This seems to me one of the worst examples of 'monopoly' on the Corporate level that I have ever heard of. I certainly hope you and your constituents all get a chance to review this proposal and find some reasonable judgement that will protect the American public against this type of unreasonable encroachment. Its high time we wake up to this type of Corporate take-over mentality that does not serve the long term public and national interests, and threatens an already weakened and bloated economy.

Thanks for your considered wisdom on this subject.

Sincerely,
Scott Washburn
