Subject: Stop the Bailouts

Subsidizing private investors with taxpayer money to purchase toxic assets is a bailout by any other name.

Using the FDIC to perpetrate this crime is just an end-run around Congress which would, in response to taxpayer outrage, refuse to provide funding for this abortion.

Our government is protecting and supporting the financial industry who created this vapor-wealth Ponzi scheme, benefited personally from it to the tune of billions in fees and bonuses, and is doing this on the backs of the US middle class. THIS HAS TO STOP!!!

Summer is dirty and hopelessly compromised. Geithner is captured by the industry. Bernanke is on a power trip. Get rid of the three of them and put Volcker in charge.

Stop the wholesale transfer of our national treasure to the thieves, brigands and whores who destroyed the global financial system.
