Subject: LLP Toxic paper

"Because the government will be in partnership with private investors, the government will share in any profits. If private parties profit from their investment, as they expect to, the Treasury will also. At the same time, the Treasury will only suffer losses if the private investors do."

You should be ashamed at your pathetic dissembling. ARE WE TAXPAYERS SHARING IN EQUAL PROPORTION TO OUR INVESTMENT?

Please don't issue statements like these again. It permanently impedes the return of confidence.
