**Subject:** Interim Rule, Special Assessment

Chairman Bair, It is fortunate that we have thirty days to respond concerning the Special Assessment and regular assessment increases. We are too mad to even respond intelligently right now. We are \$65mm community bank still paying the FICO bonds, and "yes" I was here then as well. I warned the FDIC before the S&L disaster, just as we did this time.

This current disaster was directly caused by Washington regulators and politicians unable or un-willing to control the greed and excesses of Wall Street and the too-big-to-fail. It is absolutely unconscionable to now bail out the big, and put this price tag on innocent others.

This is very flawed and I think you know it. When something is so clearly just plain wrong, then wrong is just that . . . it is Wrong. I truly sympathize with the situation you are in, but to tell us you did not know what else to do is quite honestly an insult.

More comments will come later. Right now I must tell you, I am filled with anger and mistrust.

John Kingsbury, President Bank of Dixon County
