Subject: Fees

Importance: High

I am 52 years old and have been mostly careful but sometimes not right on top of my checking account balances. Even though I'm pretty careful I bet I have paid thousands of dollars in overdraft fees, that is after begging the bank people to refund some of the amounts. I think banks should BILL people for reasonable fees, ie \$10 or so and not simply take it out of their accounts. Taking a persons money is robbery or embezzling. Many times the fees were accessed because the fee itself put me into the red.
