

promulgated under CWA section 312 for vessels of the Armed forces if there is significant new information that could reasonably result in a change to the discharge determination or standard. This ICR addresses the information requirements associated with the establishment of an UNDS NDZ for a particular discharge from a vessel of the Armed Forces in addition to the information requirements associated with a request to the EPA and DoD to review a discharge determination or standard. UNDS NDZs for a particular discharge from a vessel of the Armed Forces cannot be requested or established until after the EPA and DoD promulgate vessel discharge performance standards for marine pollution control devices for that particular discharge and DoD promulgates the corresponding regulations governing the design, construction, installation and use of marine pollution control devices for that particular discharge. The information collection activities discussed in this ICR do not require the submission of any confidential information.

Form Numbers: None.

Respondents/affected entities: States.

Respondent's obligation to respond: The responses to this collection of information are required for a state to obtain a sewage NDZ (CWA section 312(f)) and required to obtain an UNDS NDZ or a review of an UNDS discharge determination or standard (CWA section 312(n)).

Estimated number of respondents: 13 (total).

Frequency of response: One time.

Total estimated burden: 914 hours (per year). Burden is defined at 5 CFR 120.03(b).

Total estimated cost: \$12,501 (per year), includes \$848 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 169 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This estimated decrease is attributable to a downward adjustment in the estimated number of anticipated total actions during the upcoming 3-year period.

SUPPLEMENTARY INFORMATION:

Proposal To Renew the Following Currently Approved Collection of Information

1. *Title:* Interagency Complaint Form.
OMB Number: 3064-0190.
Form Number: FDIC 3064-0190.
Affected Public: Individuals, financial institutions and other private sector entities.
Burden Estimate:

SUMMARY OF ANNUAL BURDEN

Information collection description	Type of burden	Obligation to respond	Estimated number of respondents	Estimated frequency of responses	Estimated time per response (minutes)	Estimated annual burden (hours)
Interagency Appraisal Complaint Form	Reporting	Voluntary	40	On Occasion	30	20
Total Estimated Annual Burden	20

General Description of Collection

As required by the Dodd-Frank Act, the Appraisal Subcommittee of the Federal Financial Institutions Examination Council (the "ASC") established a hotline to refer complaints to appropriate state and Federal regulators. For those instances where the ASC determines the FDIC, OCC, FRB, or NCUA is the appropriate regulator, the agencies developed the Interagency Appraisal Complaint Form as a means to efficiently collect necessary information. The Interagency Appraisal Complaint Form is designed to collect information necessary for one or more agencies to take further action on a complaint from an appraiser, other individual, financial institution, or

other entities. The FDIC will use the information to take further action on the complaint to the extent it relates to an issue within its jurisdiction.

There is no change in the method or substance of the collection. The overall reduction in burden hours (from 100 hours to 20 hours) is the result of a change in the agency's estimate of the number of annual responses based on a review of the actual number of complaints received over the last three years. In particular, the estimated number of respondents has decreased from 200 to 40 while the estimated time per response and the frequency of response have remained the same.

Request for Comment

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.
