## Small Bank Requests for Review of Assessment Rate January 1, 2018 – June 30, 2025

| Date of<br>Request | <b>Basis of Request</b>  | DIR Decision  | Appealed to<br>the AAC  | AAC Decision  |
|--------------------|--|---|---|---|
| January 9, 2018    | The Bank filed a request for review stating the<br>Bank's "unique product offerings" were not<br>properly captured in the Small Bank Assessment<br>methodology or the Call Report. Further, the Bank<br>took issue with several measures in the small bank<br>pricing methodology that contributed to the<br>increase in its assessment rate. These measures<br>included the loan mix index, brokered deposit ratio,<br>one-year asset growth rate, and net income before<br>taxes ratio. The Bank requested an individualized<br>assessment rate for the third quarter 2017 and<br>subsequent quarters. | On February 27, 2018, the Division of<br>Insurance and Research (DIR) found the<br>regulation was properly followed and<br>denied the Bank's request. DIR is<br>bound by the current assessment<br>regulations and creating exceptions to<br>the methodology for individual small<br>banks would lead to inconsistent and<br>inequitable treatment. In addition, the<br>Bank filed its quarterly Call Report data<br>correctly and that data was properly used<br>to determine the assessment rate.   | On March 23, 2018, the<br>Bank filed an appeal<br>with the AAC. | The AAC denied the appeal on<br>April 30, 2018.<br><u>AAC-2018-01 – 04/30/2018 -<br/>PDF</u>    |
| April 17, 2018     | The Bank filed a request for review asking that a transaction undertook by the Bank in the fourth quarter 2017, and affecting that quarter's assessment rate, be treated differently for assessment rate determination. The Bank acquired a branch which resulted in a large increase to the Bank's one-year asset growth rate and subsequent increase to the assessment rate. The Bank requested the branch acquisition be excluded from the calculation of the one-year asset growth rate and therefore lowering the assessment rate for the fourth quarter 2017 and following three quarters.         | On May 30, 2018, the Division of<br>Insurance and Research found the<br>Bank's assessment rate was calculated in<br>accordance with current assessment<br>regulation and applied correctly to the<br>Bank using properly filed Call Report<br>data and denied the Bank's request. The<br>regulation requires the FDIC to adjust<br>the one-year asset growth rate for whole<br>bank mergers and acquisitions but not<br>for branch purchases or other assets<br>from another bank. In addition, banks<br>do not report, nor does the FDIC collect,<br>information on branch purchases which<br>could be used adjust the one-year asset<br>growth rate for branch purchases. | On June 28, 2018, the<br>Bank filed an appeal<br>with the AAC.  | The AAC denied the appeal on<br>November 20, 2018.<br><u>AAC-2018-02 – 11/20/2018 -<br/>PDF</u> |

| August 5, 2020        | The Bank filed a request for review stating the<br>Bank's assessment rate was inconsistent with a<br>recent recapitalization and a CAMELS rating<br>upgrade. After the Bank's recapitalization, the<br>Bank maintained well-capitalized ratios starting<br>five months before the start of the assessment<br>period.  | On September 30, 2020 the Division of<br>Insurance and Research (DIR) found the<br>regulation was properly followed and<br>denied the Bank's request. The<br>increased capital was used in the<br>assessment rate calculation and DIR is<br>bound by the current assessment<br>regulations regarding the use of<br>CAMELS ratings which become<br>effective as of the date the ratings are<br>officially transmitted to the institution. | No                     | N/A          |
| September 29,<br>2020 | The Bank filed a request for review asking that a<br>recent goodwill impairment charge be added back<br>to the Bank's net income when used to calculate<br>the Bank's assessment rate. The Bank's holding<br>company was purchased by another holding<br>company which resulted in the booking of<br>goodwill. Subsequently, the Bank was required to<br>record a goodwill impairment which significantly<br>impacted the Bank's net income. The Bank<br>requested the removal of the goodwill impairment<br>since it had no impact on the Bank's liquidity or<br>capital ratios. | On October 16, 2020 the Division of<br>Insurance and Research (DIR) found the<br>regulation was properly followed and<br>denied the Bank's request. The goodwill<br>impairment charge was properly<br>included in the net income calculation<br>per FDIC regulations and Call Report<br>instructions.  | No                     | N/A          |

| November 8,<br>2022 | The Bank filed a request for review asking that a transaction undertook by the Bank in the fourth quarter 2021, and affecting that quarter's assessment rate, be treated differently for assessment rate determination. The Bank acquired a branch which resulted in a large increase to the Bank's one-year asset growth rate and subsequent increase to the assessment rate. The Bank requested the branch acquisition be excluded from the calculation of the one-year asset growth rate and therefore lowering the assessment rate for three quarters of 2022 | On February 14, 2023, the Division of<br>Insurance and Research found the<br>Bank's assessment rate was calculated in<br>accordance with current assessment<br>regulation and applied correctly to the<br>Bank using properly filed Call Report<br>data and denied the Bank's request. The<br>regulation requires the FDIC to adjust<br>the one-year asset growth rate for whole<br>bank mergers and acquisitions but not<br>for branch purchases or other assets<br>from another bank. In addition, banks<br>do not report, nor does the FDIC collect,<br>information on branch purchases which<br>could be used adjust the one-year asset<br>growth rate for branch purchases. | On March 16, 2023, the<br>Bank filed an appeal<br>with the AAC. | The AAC denied the appeal on<br>November 16, 2023.<br><u>AAC-2023-01 – 11/16/2023 -</u><br><u>PDF</u> |
