FIRST-QUARTER HIGHLIGHTS

• Record Bank Earnings of \$15.9 Billion Surpass Previous Mark by \$621 Million For the fifth consecutive quarter, net income of insured commercial banks set a new record. Supported by strong growth in noninterest income and one-time gains from sales of securities and other assets, industry earnings were \$621 million (4.1 percent) above the previous record, set in the fourth quarter of 1997, and were \$1.5 billion (10.1 percent) higher than a year ago. The average return on assets (ROA) reached 1.26 percent in the first quarter, up from 1.24 percent in the fourth quarter of 1997 and 1.25 percent a year ago.

• Net Interest Margins Decline to Seven-Year Low

Net interest margins declined at commercial banks for the fifth time in the last six quarters. Average asset yields declined by 17 basis points from fourth-quarter 1997 levels, while the average cost of funding interest-earning assets fell by only 5 basis points. As a result, the average net interest margin fell by 12 basis points, from 4.18 percent to 4.06 percent. This is the lowest level for the industry's net interest margin since the first quarter of 1991, when it average 4.01 percent.

Charge-offs On Credit-Card Loans Continue to Rise

The annualized net charge-off rate on banks' credit-card loans rose to an all-time high of 5.40 percent in the first quarter. The previous quarterly record was 5.37 percent, set in the third quarter of 1997. Credit-card charge-offs accounted for almost two-thirds – 62.3 percent – of all loan charge-offs taken by commercial banks in the first quarter. Despite the continued rise in credit losses, credit-card lending remains significantly more profitable than many other banking activities.

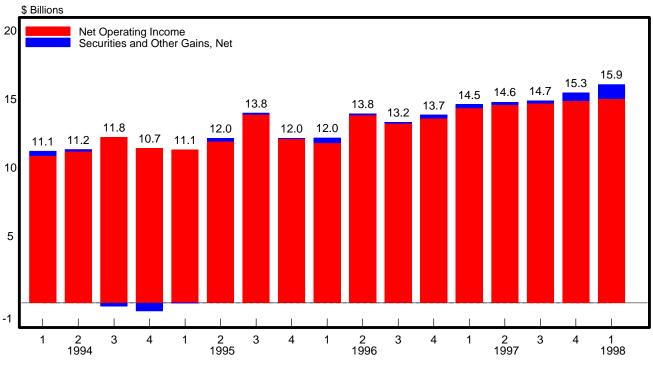

• Savings Institutions Earn \$2.6 Billion In The First Quarter

Insured savings institutions posted a 1.01-percent ROA in the first quarter, matching their second-best quarterly ROA ever. The thrift industry's all-time record is 1.03 percent, set in the second quarter of 1996. Profits were helped by reduced expenses for loan losses and increased gains from sales of securities. Assets of savings institutions increased by \$14.1 billion in the quarter, the largest quarterly increase since 1988. Equity capital set a new post-1943 high for the fourth consecutive quarter, reaching 8.79 percent of industry assets.

BIF Reserve Ratio Falls Slightly, to 1.37 Percent; SAIF Remains at 1.36 Percent Deposits insured by the Bank Insurance Fund (BIF) grew at a slightly faster pace during the first quarter than did the fund balance. As a result, the fund's reserve ratio fell by 1 basis point, from 1.38 percent of insured deposits at year-end to 1.37 percent on March 31. The reserve ratio of the Savings Association Insurance Fund (SAIF) remained at 1.36 percent. No institutions failed during the first quarter of 1998, although a BIF member failed early in the second quarter. The last failure of a SAIF member was in August, 1996. Ninety-five percent of BIF members and 91 percent of SAIF members qualify for the best ratings under the FDIC's risk-based deposit insurance premium system and currently pay no premiums.

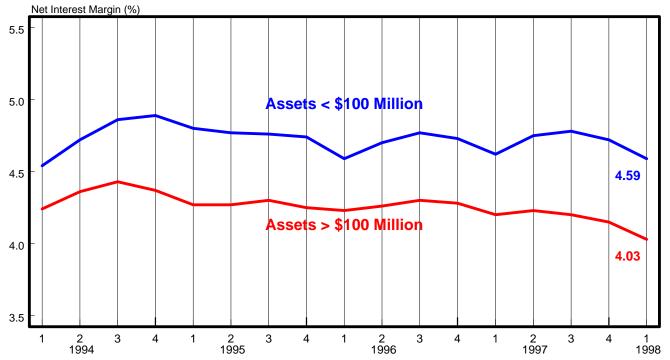

Quarterly Net Income

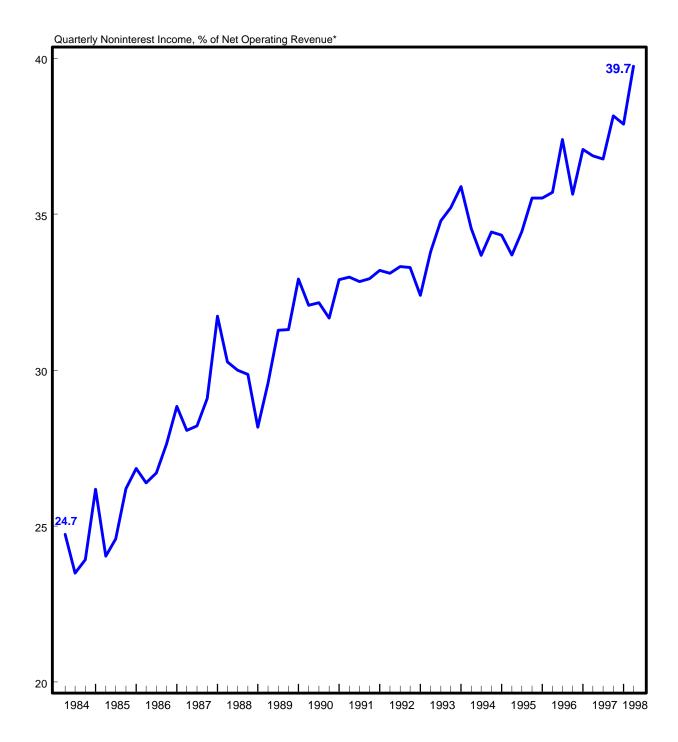

Quarterly Net Interest Margins, Annualized

1994 - 1998

Noninterest Income Provides a Growing Proportion of Bank Revenue

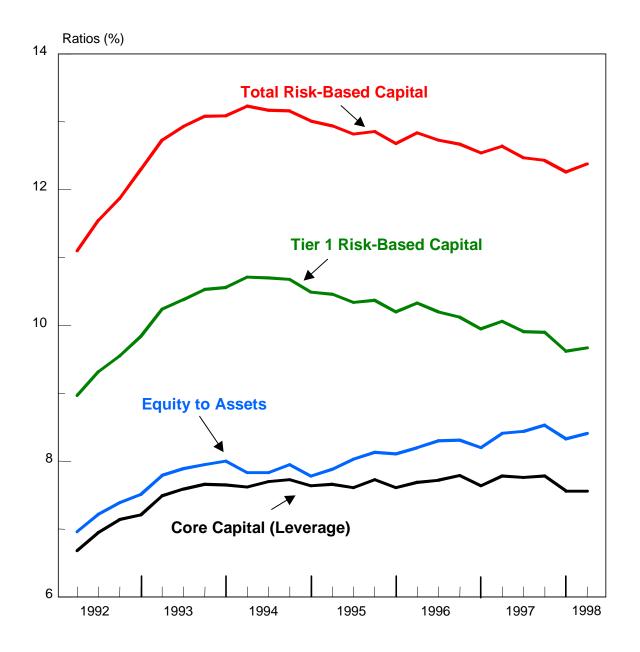

1984 - 1998

*Net operating revenue equals net interest income plus noninterest income.

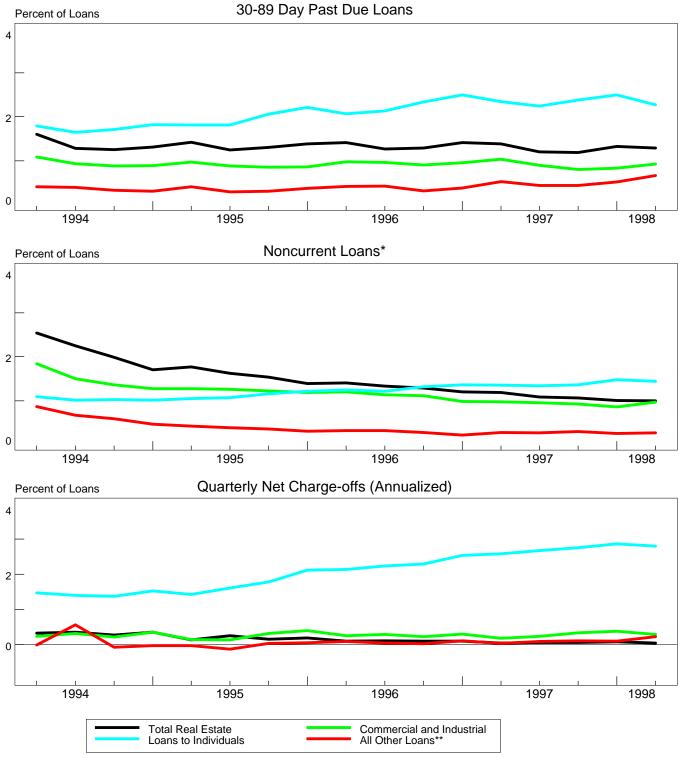

Capital Ratios

1992 - 1998

Loan Quality

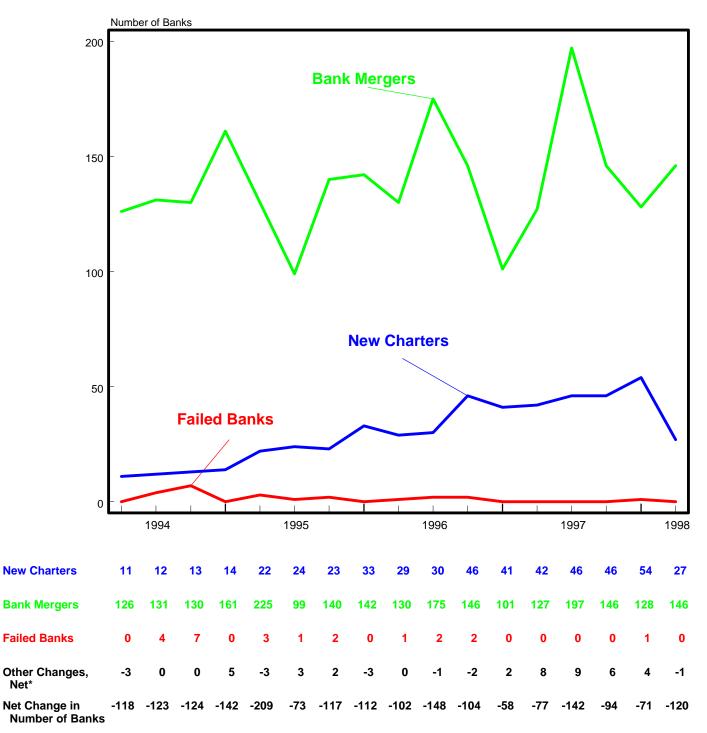

1994 - 1998

*Loans past due 90 or more days or in nonaccrual status. **Includes loans to foreign governments, depository institutions and lease receivables.

Changes in the Number of FDIC - Insured Commercial Banks

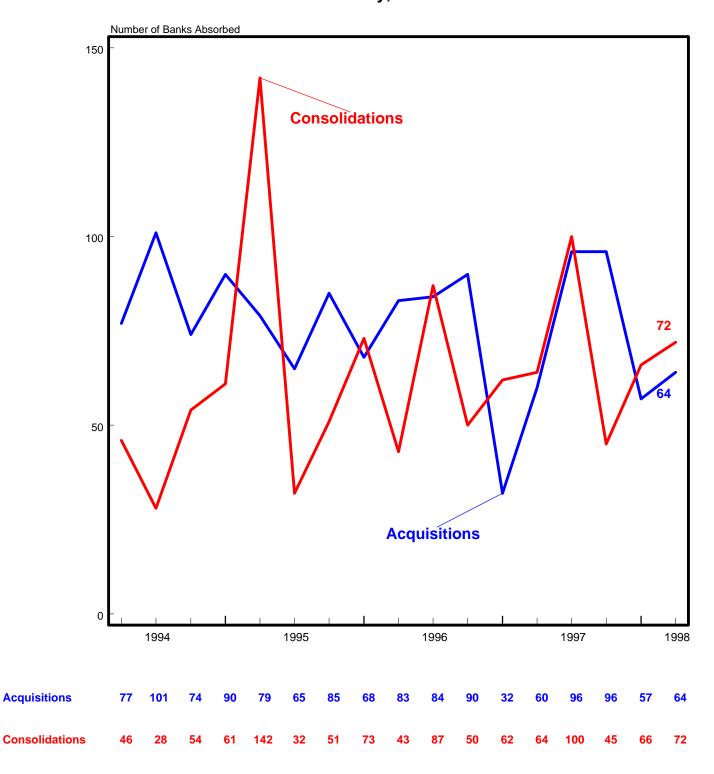

Quarterly, 1994 - 1998

*Includes charter conversions, voluntary liquidations, adjustments for open-bank assistance transactions, and other changes.

Bank Mergers: Acquisitions vs Consolidations*

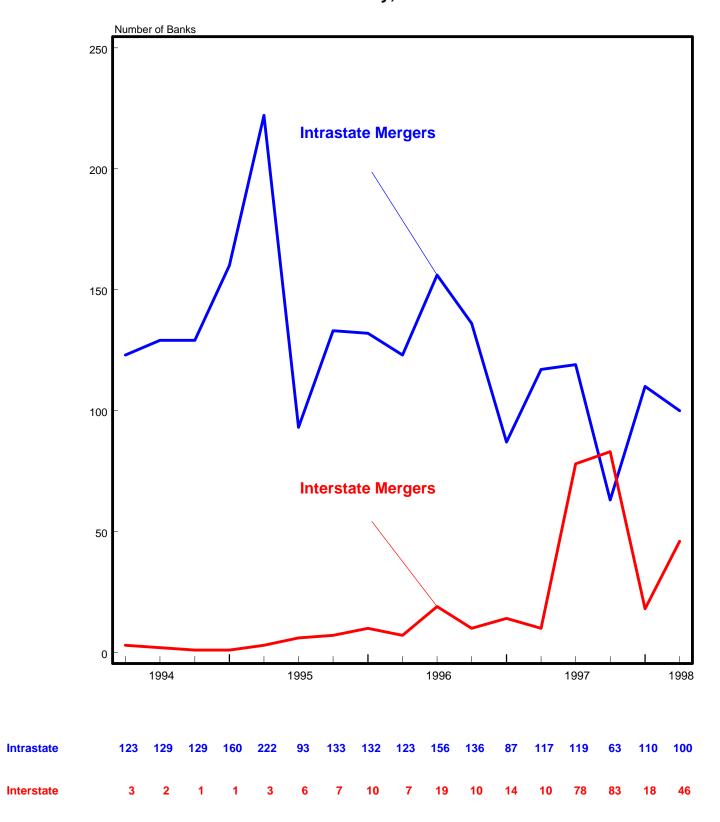

Quarterly, 1994 - 1998

*Acquisitions = Change in holding company ownership within 12 months of merger. Consolidations = No change in ownership within 12 months of merger.

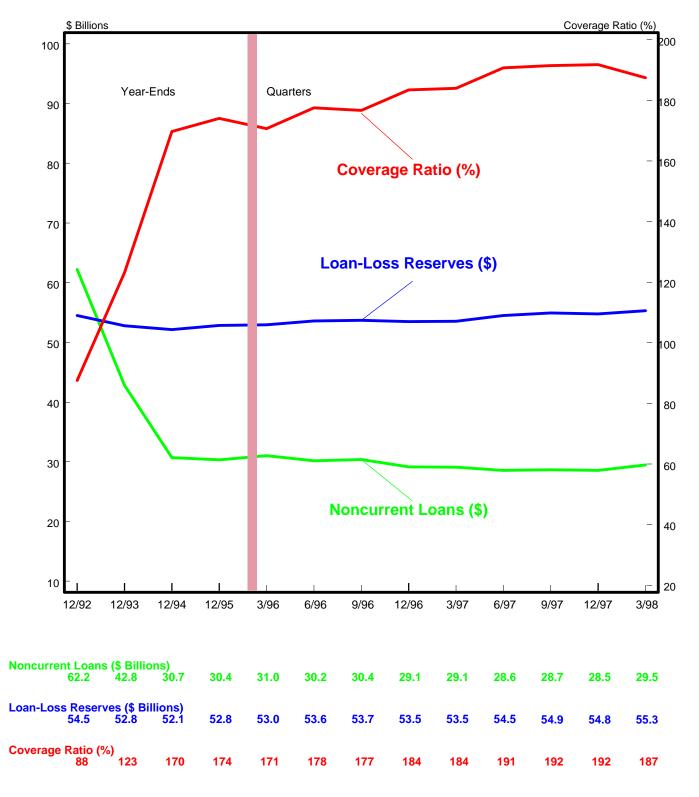

Bank Mergers: Interstate vs Intrastate

Quarterly, 1994 - 1998

Reserve Coverage Ratio*

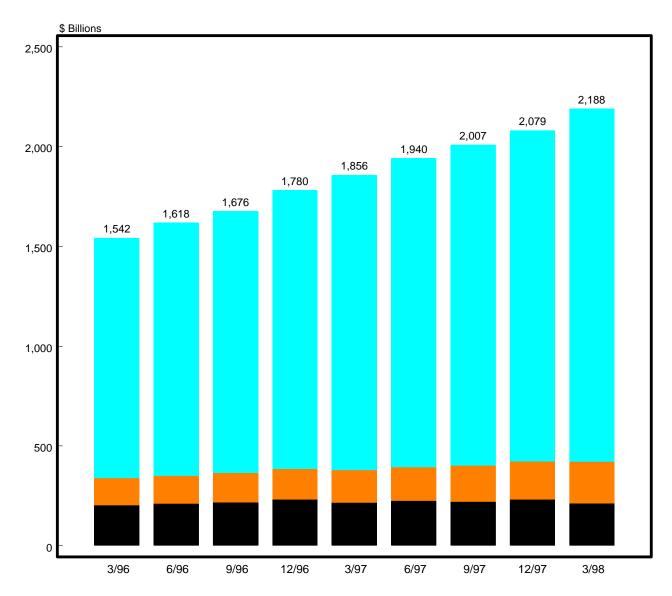

1992 - 1998

*Loan-loss reserves to noncurrent loans.

Expansion of Credit Card Lines

1996 - 1998

Loans outstanding (\$ Billions)

*Noncurrent loan rates represent the percentage of loans in each category that are past due 90 days or more or in nonaccrual status.

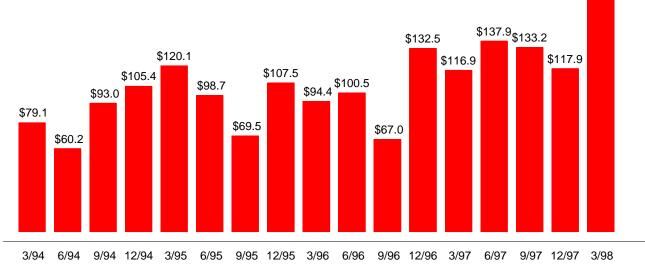

Quarterly Change in Reported Loans Outstanding (\$ Billions)

*In the first quarter of 1997, reporting changes resulted in a \$61.7 billion decline in foreign office loans. Loans in domestic offices increased by \$23.2 billion during the quarter.

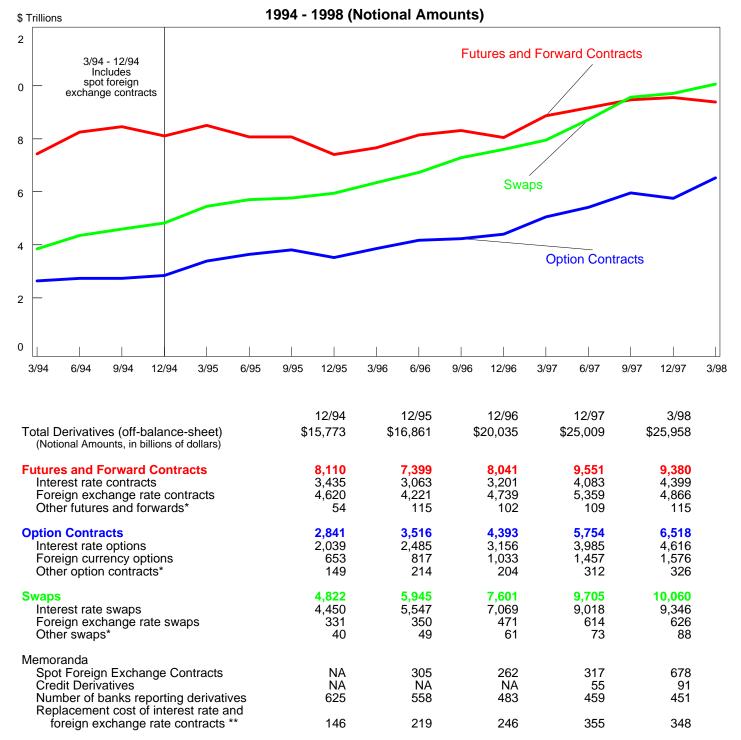

In the first quarter of 1998, real estate loans increased by \$29.0 billion, commercial and industrial loans increased by \$24.2 billion, and 1-4 family residential mortgages increased by \$18.2 billion.

\$184.8

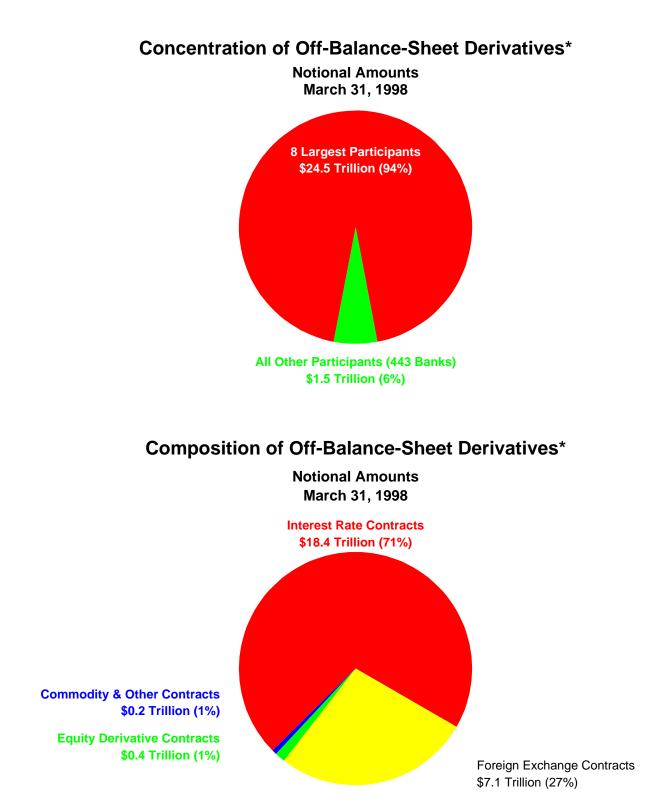

In the first quarter of 1998, unused credit card commitments increased by \$110.1 billion and unused commitments for loans to businesses increased by \$67.0 billion.

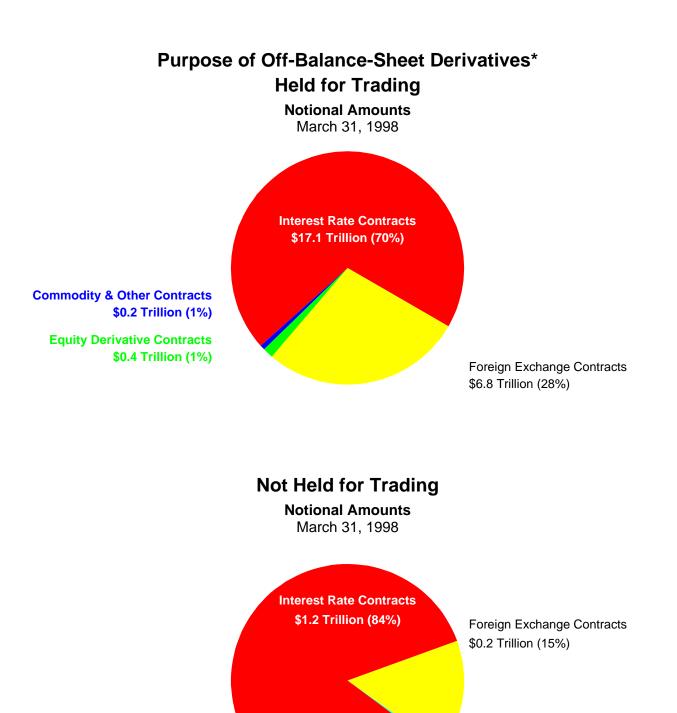

Off-Balance-Sheet Derivatives

* Not reported by banks with less than \$300 million in assets.

** Reflects replacement cost of interest rate and foreign exchange contracts covered by risk-based-capital requirements. Does not include foreign exchange rate contracts with an original maturity of 14 days or less or futures contracts.

*Amounts do not represent either the net market position or the credit exposure of banks' off-balance-sheet derivative activities. They represent the gross value of all contracts written. Spot foreign exchange contracts of \$641 billion for the eight largest participants and \$37 billion for all others are not included.

Equity Derivative Contracts, Commodity & Other Contracts \$1 Billion (0%)

* Notional amounts do not represent either the net market position or the credit exposure of banks' off-balance-sheet derivative activities. They represent the gross value of all contracts written. Spot foreign exchange contracts of \$678 billion are not included.

* Domestic office sales of proprietary, private label and third-party funds and annuities. Does not reflect redemptions.

Fee Income from Sales and Service of Mutual Funds and Annuities 1998 YTD

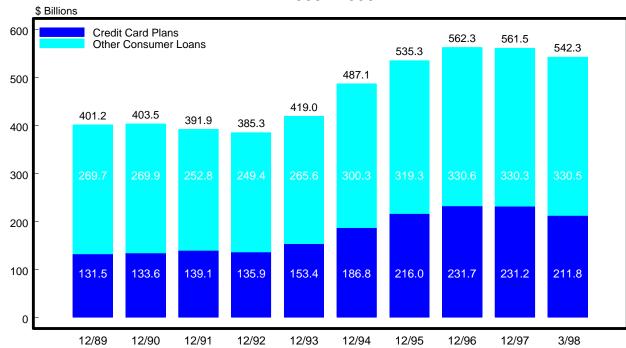

Percent of Gross Operating Income**

**Gross operating income is the total of interest income and noninterest income.

* Growth rate for most recent twelve-month period.

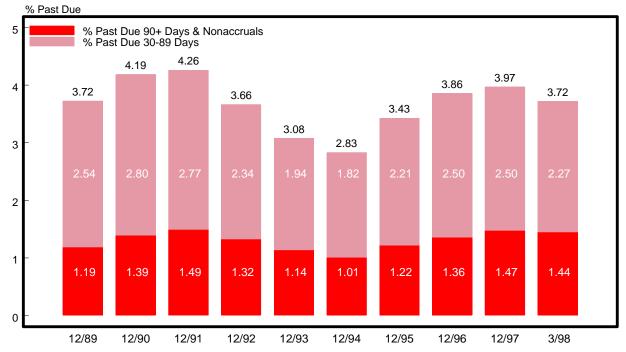

Loans to Individuals

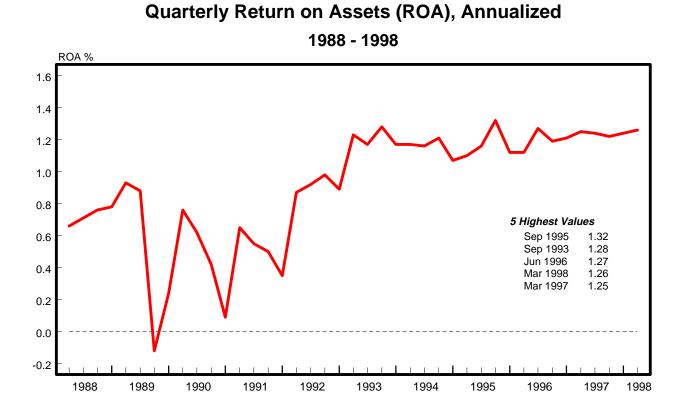

1989 - 1998

Delinquency Rates, Loans to Individuals

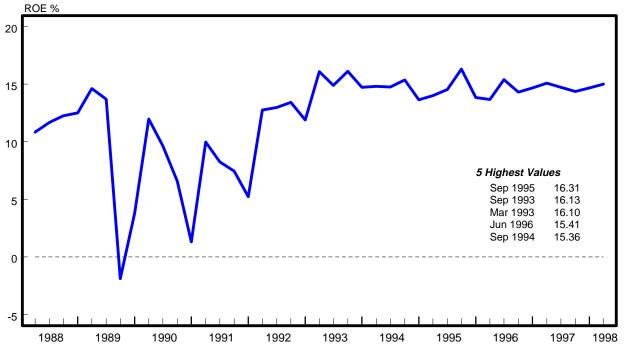

1989 - 1998

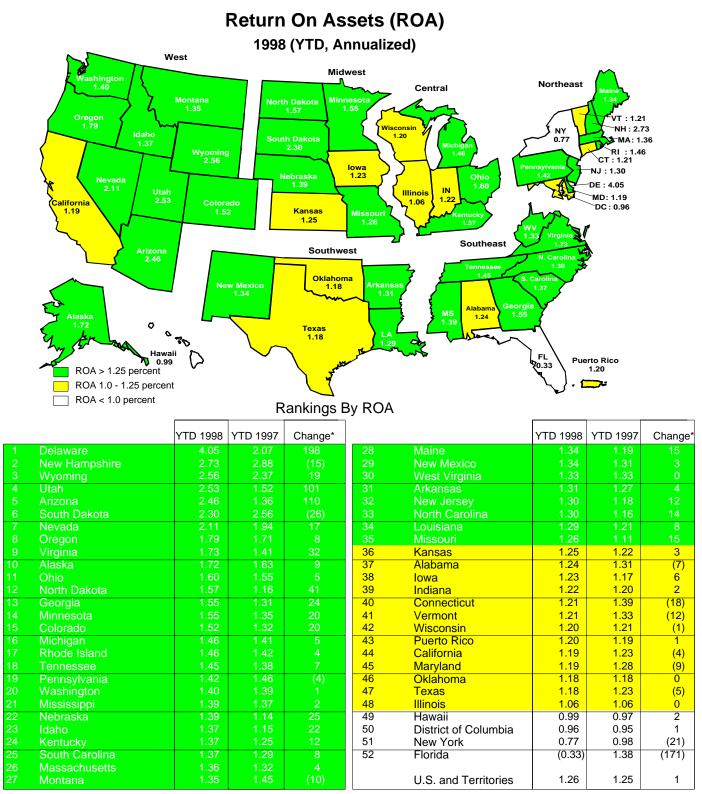

Quarterly Return on Equity (ROE), Annualized

1988 - 1998

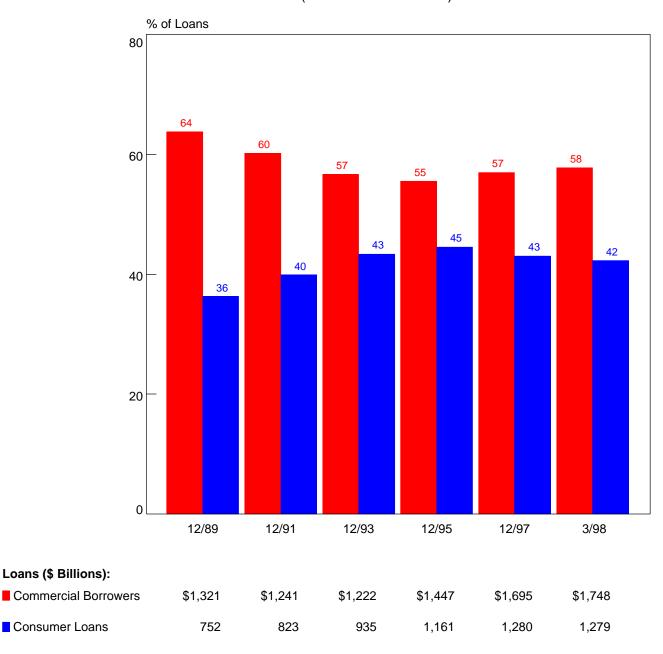

*YTD ROA minus ROA for the same period one year ago equals change in basis points. Basis point=1/100 of a percent. Results for four of the states with the highest ROAs (SD, NV, DE, & NH) were significantly influenced by the presence of large credit card operations.

Credit Risk Diversification Consumer Loans versus Loans to Commercial Borrowers

(as a % of Total Loans)

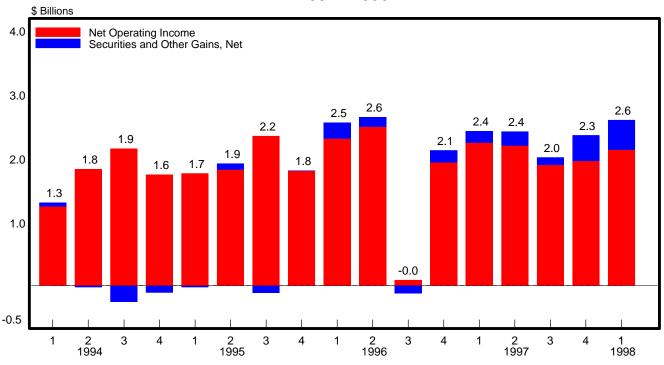

Loans to Commercial Borrowers (Credit Risk Concentrated). - These are loans that can have relatively large balances at risk to a single borrower. A single loan may represent a significant portion of an institution's capital or income. Therefore, a relatively small number of defaults could impair an institution's capital or income. These loans include commercial and industrial loans, commercial real estate, construction loans, and agricultural loans.

Consumer Loans (Credit Risk Diversified). - These are loans that typically have relatively small balances spread among a large number of borrowers. A number of defaults are likely but typically do not impair an institution's capital or income. These loans include consumer and credit card loans, 1-4 family residential mortgages and home equity loans.

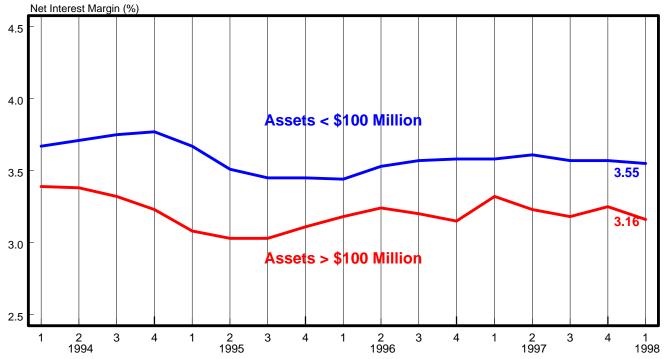

Quarterly Net Income

1994 - 1998

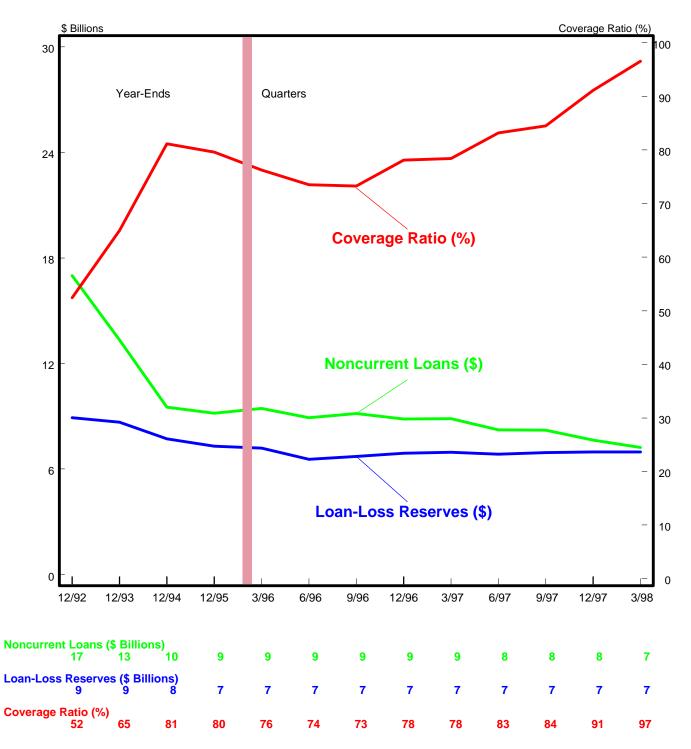

Quarterly Net Interest Margins, Annualized

Reserve Coverage Ratio*

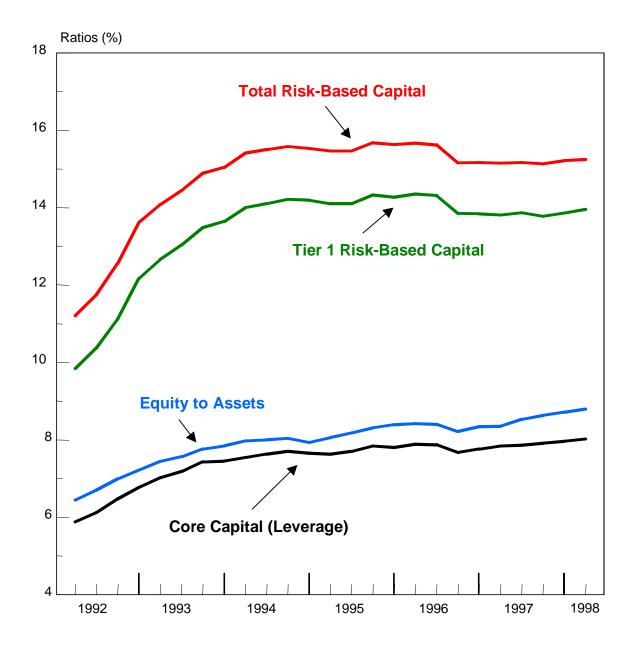

1992 - 1998

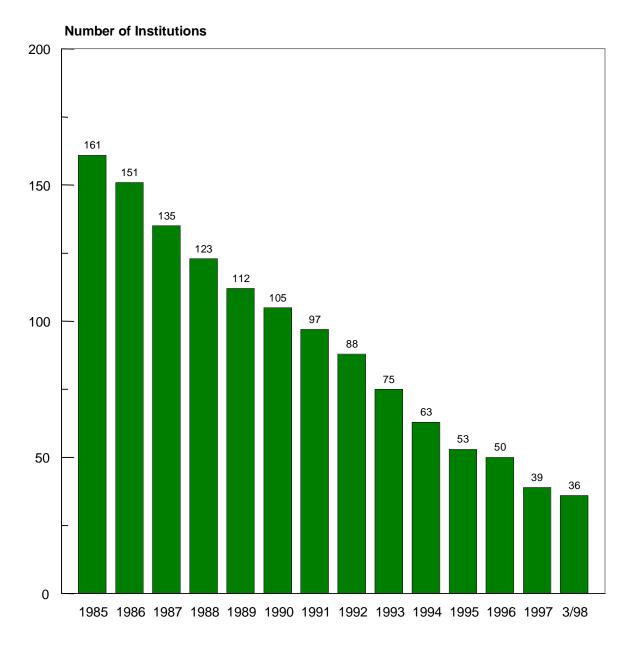

*Loan-loss reserves to noncurrent loans. Beginning with June 1996, TFR filers report noncurrent loans net of specific reserves. Accordingly, specific reserves have been subtracted from loan-loss reserves, beginning with June 1996, to make the coverage ratio more closely comparable to prior periods.

Capital Ratios

1992 - 1998

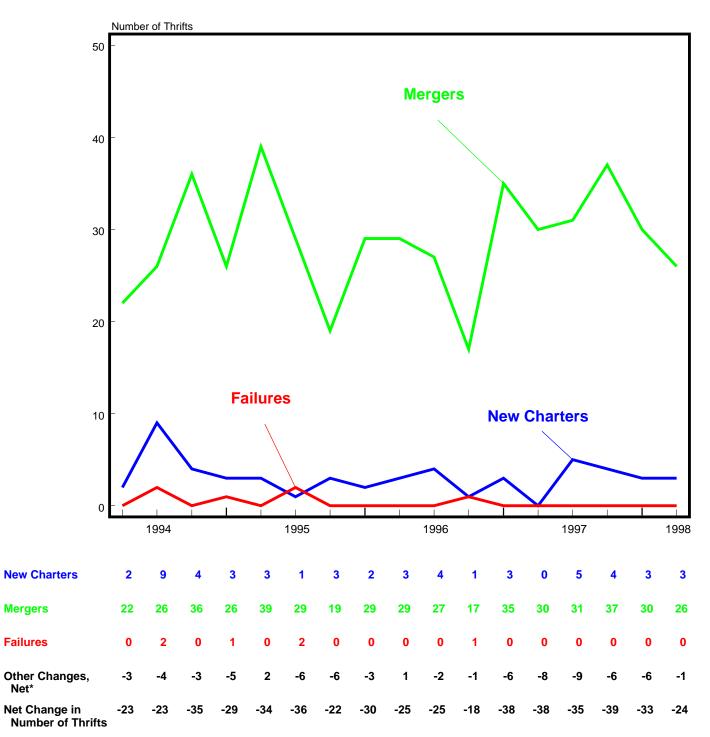

Number of Savings Institutions with 50% of Industry Assets 1985 - 1998

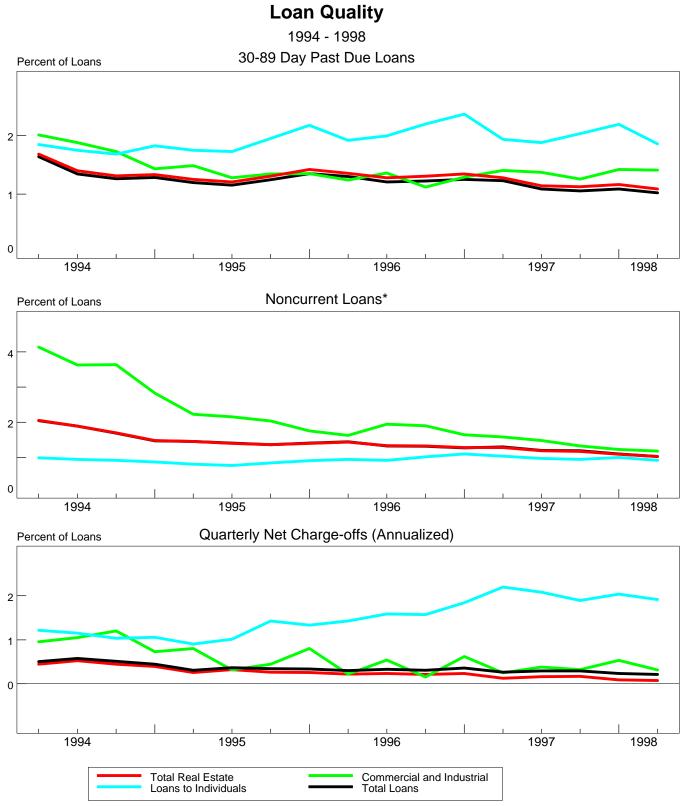

Changes in the Number of FDIC - Insured Savings Institutions

Quarterly, 1994 - 1998

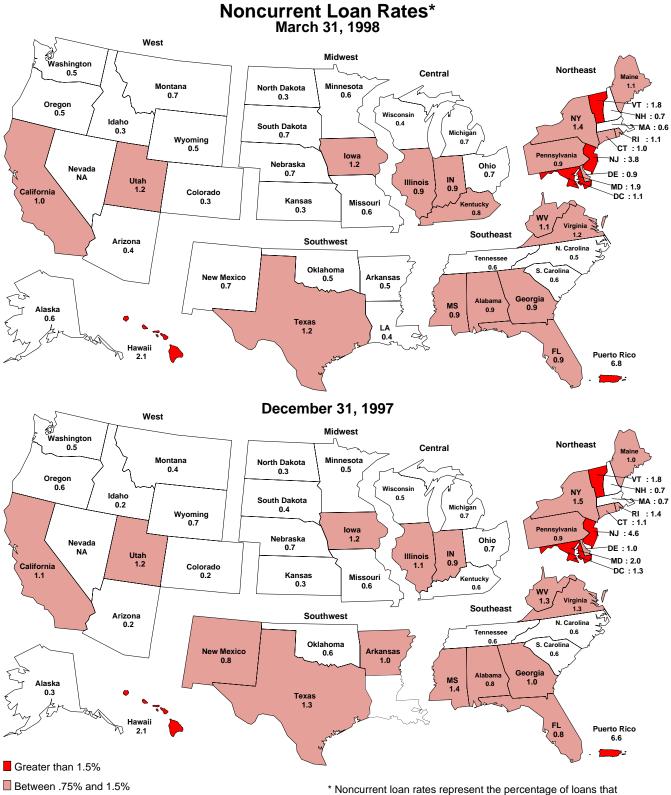

*Includes charter conversions, voluntary liquidations, adjustments for open-bank assistance transactions and other changes.

Net*

^{*}Loans past due 90 or more days or in nonaccrual status.

Less than .75%

* Noncurrent loan rates represent the percentage of loans that are past due 90 days or more or in nonaccrual status.

Noncurrent Loan Rates*

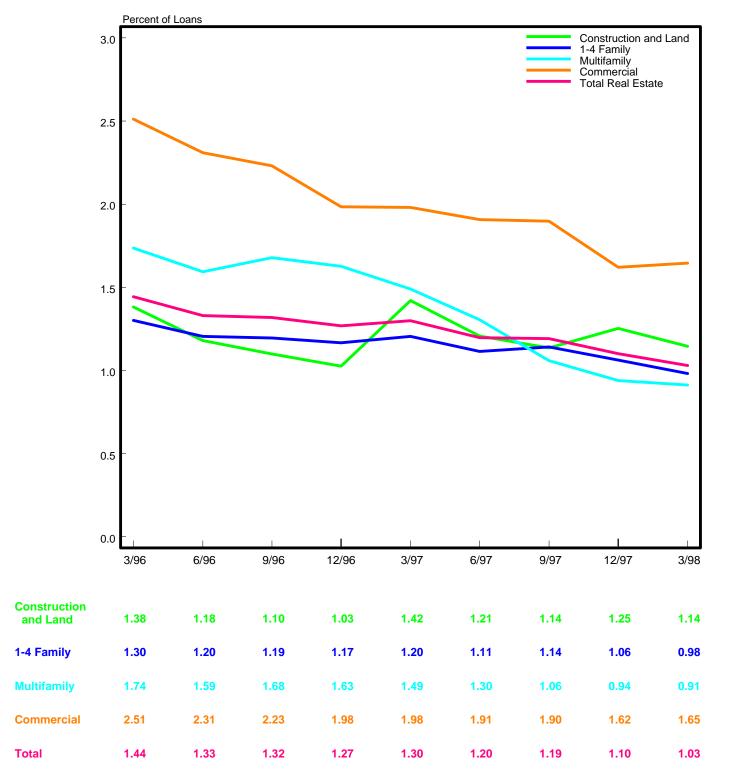

December, 1997 - March, 1998

*Noncurrent loan rates represent the percentage of loans in each category that are past due 90 days or more or in nonaccrual status.

Noncurrent Real Estate Loan Rates by Type*

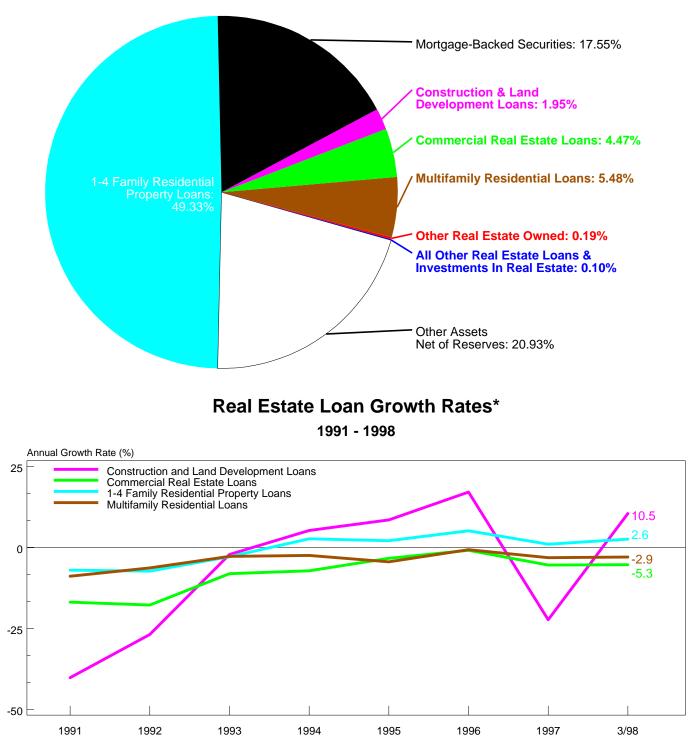

1996 - 1998

*Noncurrent loan rates represent the percentage of loans in each category that are past due 90 days or more or in nonaccrual status.

Real Estate Assets as a Percent of Total Assets

March 31, 1998

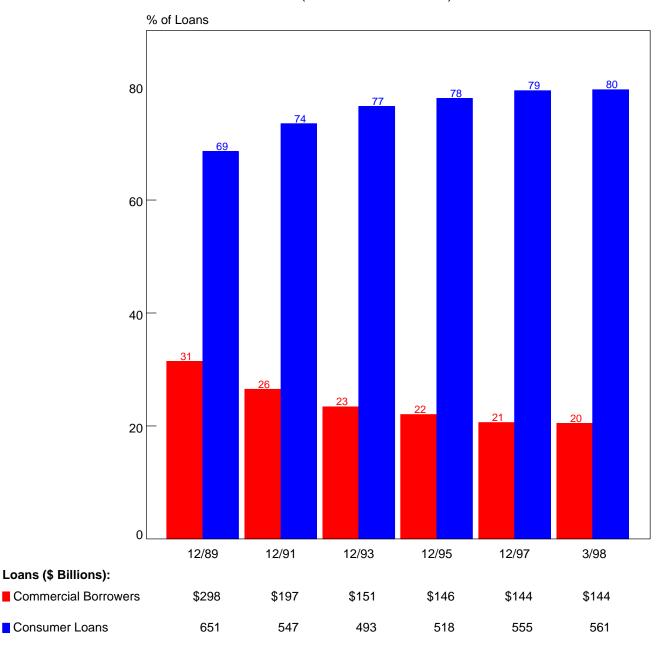

* Growth rate for most recent twelve-month period.

Beginning in March 1997, TFR filers report balances net of loans in process.

Credit Risk Diversification Consumer Loans versus Loans to Commercial Borrowers

(as a % of Total Loans)

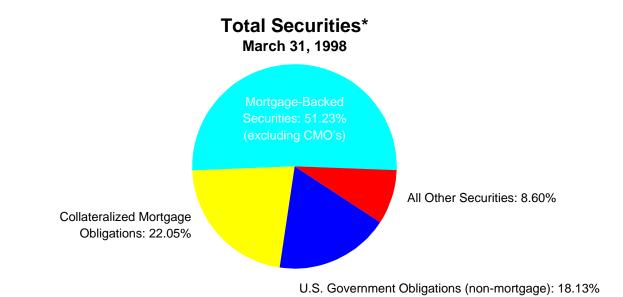

Loans to Commercial Borrowers (Credit Risk Concentrated). - These are loans that can have relatively large balances at risk to a single borrower. A single loan may represent a significant portion of an institution's capital or income. Therefore, a relatively small number of defaults could impair an institution's capital or income. These loans include commercial and industrial loans, commercial real estate, construction loans, and agricultural loans.

Consumer Loans (Credit Risk Diversified) - These are loans that typically have relatively small balances spread among a large number of borrowers. A number of defaults are likely but typically do not impair an institution's capital or income. These loans include consumer and credit card loans, 1-4 family residential mortgages and home equity loans.
