## INSURED INSTITUTION PERFORMANCE

- Full-Year 2023 Net Income Declined but Remained Well Above Pre-Pandemic Levels
- Quarterly Net Income Fell 43.9 Percent From Third Quarter 2023, Driven by Higher Noninterest and Provision Expense and Lower Noninterest Income
- The Net Interest Margin Fell Three Basis Points From the Prior Quarter
- Provision Expense Increased From the Prior Quarter
- Unrealized Losses on Securities Declined to the Lowest Level Since Second Quarter 2022
- Loan Balances Increased Modestly From Last Quarter and One Year Ago
- Domestic Deposits Increased for the First Time in Seven Quarters
- The Noncurrent Loan Rate Increased Modestly but Remained Below Pre-Pandemic Levels
- The Net Charge-Off Rate Increased and Was Above Pre-Pandemic Levels

## Full-Year Net Income Declined in 2023 but Remained Well Above Pre-Pandemic Levels

The banking industry reported full-year 2023 net income of $\$ 256.9$ billion, down $\$ 6$ billion (2.3 percent) from the prior year but still well above the pre-pandemic average of $\$ 193.5$ billion. The decrease occurred as higher noninterest expense (up $\$ 52.2$ billion, or 9.7 percent), increased provision expense (up $\$ 34.7$ billion, or 67.2 percent), and higher realized losses on securities (up $\$ 7.6$ billion, or 194.3 percent) offset growth in net operating revenue (up $\$ 79.4$ billion, or 8.6 percent). Higher net interest income drove the increase in net operating revenue. The full-year net interest margin increased to 3.30 percent, up 35 basis points from 2022. The return-on-assets (ROA) ratio decreased by 1 basis point to 1.10 percent, modestly below the industry's pre-pandemic average ROA of 1.14 percent. ${ }^{1}$

## Quarterly Net Income Fell 43.9 Percent From Third Quarter 2023, Driven by Higher Noninterest and Provision Expense and Lower Noninterest Income

Aggregate net income for the 4,587 FDIC-insured commercial banks and savings institutions declined $\$ 30$ billion ( 43.9 percent) from the prior quarter to $\$ 38.4$ billion. Higher noninterest expense (up $\$ 26.6$ billion, or 18.9 percent), lower noninterest income (down $\$ 6.5$ billion, or 8.8 percent), and higher provision expense (up $\$ 5.2$ billion, or 26.5 percent) drove the decline in net income in the fourth quarter. However, it is estimated that 70 percent of the decrease in net income was caused by specific, non-recurring, noninterest expenses at large banks. ${ }^{2}$ These expenses include the special assessment, goodwill impairment, and legal, reorganization, and other one-time costs at large banks. Higher provision expense occurred as the industry built reserves, primarily for credit card and commercial real estate loans.

The banking industry reported a quarterly ROA of 0.65 percent in the fourth quarter. The share of unprofitable institutions increased to 10.9 percent, the highest share of institutions since the 16.6 percent share reported in fourth quarter 2017.

[^0]
## The Net Interest Margin Declined From the Prior Quarter

The net interest margin (NIM) declined 3 basis points to 3.28 percent in the fourth quarter. NIM declined as the increase in deposit and non-deposit liability costs more than outpaced the increase in asset yields. Despite the quarterly decline, the industry NIM remained 3 basis points above the pre-pandemic average NIM of 3.25 percent.

## Net Operating Revenue Declined for the Third Consecutive Quarter

Net operating revenue (net interest income plus noninterest income) declined \$7.1 billion (2.9 percent) from the third quarter to $\$ 242.2$ billion. While net interest income and noninterest income both fell, the decline in noninterest income drove the overall decline. The largest contributors to the decline in noninterest income were "all other" noninterest income (down $\$ 2.6$ billion, or 7.5 percent), servicing fees (down $\$ 2.4$ billion, or 75.7 percent), and trading revenue (down $\$ 1.5$ billion, or 11.3 percent). ${ }^{3}$ Net interest income decreased $\$ 0.6$ billion ( 0.4 percent) to $\$ 174.6$ billion.

## Non-Recurring Items Drove Noninterest Expense Higher

Noninterest expense increased to $\$ 167.6$ billion during the quarter, driven by large non-recurring expenses. Due to the nature of the non-recurring items, the increase in expense was more substantial in larger banks. The efficiency ratio (noninterest expense to net operating revenue) of banks below $\$ 10$ billion in total assets increased 2.5 percentage points to 64.9 percent, while the efficiency ratio of banks above $\$ 10$ billion in total assets increased 11.6 percentage points to 66.3 percent.

## Provision Expense Increased From the Prior Quarter

Provisions for credit losses were $\$ 24.7$ billion in fourth quarter 2023, up $\$ 5.2$ billion from the previous quarter and $\$ 3.9$ billion from the year-ago quarter. With the exception of the first and second quarters of 2020, this was the largest provision expense since fourth quarter 2010. The increase can be attributed to higher credit card balances and charge-offs, greater risk in office properties, and increasing delinquency levels across loan portfolios.

The reserve coverage ratio (the ratio of the allowance for credit losses to noncurrent loans) for the banking industry declined to 203.3 percent in fourth quarter 2023, down from 209.9 percent in the prior quarter. The decline in the ratio was due to noncurrent loan balances increasing at a faster pace than the allowance for credit losses.

## Unrealized Losses on Securities Declined to the Lowest Level Since Second Quarter $2022^{4}$

The banking industry reported unrealized losses on securities of $\$ 477.6$ billion in the fourth quarter, a decline of $\$ 206.3$ billion (30.2 percent) from third quarter 2023. Lower unrealized losses on residential mortgage-backed securities accounted for about two-thirds of the total decrease. The amount of unrealized losses on securities was the lowest reported since second quarter 2022 but remained elevated compared to historical levels.

[^1]
## Banking Industry Assets Increased From the Prior Quarter

Total assets increased $\$ 259.9$ billion (1.1 percent) from third quarter 2023. Nearly three-quarters of all banks reported quarterly asset growth. Higher cash balances (up $\$ 143.2$ billion, or 5.3 percent) and securities holdings (up $\$ 131.1$ billion, or 2.5 percent) led the increase, while lower levels of trading assets (down $\$ 98.7$ billion, or 11.5 percent) partially offset the growth. The increase in securities holdings resulted from both portfolio growth and improvement in the fair value of securities.

## Loan Balances Increased Modestly From Last Quarter and From One Year Ago

Total loan and lease balances grew $\$ 107.5$ billion ( 0.9 percent) from the previous quarter. This was the highest quarterly loan growth rate reported by the industry in 2023. An increase in credit card loans (up $\$ 63.1$ billion, or 6 percent) drove quarterly loan growth. About three-quarters of banks (75.5 percent) reported quarterly loan growth.

Total loan and lease balances increased $\$ 225.1$ billion (1.8 percent) from the prior year, led by credit card loans (up $\$ 107.4$ billion, or 10.6 percent) and $1-4$ family residential loans (up $\$ 85.4$ billion, or 3.4 percent).

## Domestic Deposits Increased for the First Time in Seven Quarters

Domestic deposits increased $\$ 186.9$ billion (1.1 percent) from third quarter 2023, the first quarterly increase in the past seven quarters. Growth in time deposits led the increase in domestic deposits, while noninterest-bearing deposits declined for the seventh consecutive quarter. Estimated insured deposits (up $\$ 46.6$ billion, or 0.4 percent) increased during the quarter. Reported uninsured deposits decreased during the quarter but would have increased for the first time in seven quarters had a large bank's subsidiary transactions not affected reported data. Excluding that bank from the calculations, the industry's uninsured deposits increased $\$ 92.4$ billion, or 1.4 percent, in the quarter.

## Delinquency Rates Continued to Increase Higher but Remained Below Their Pre-Pandemic Average Rates

Noncurrent loans (loans 90 days or more past due or in nonaccrual status) increased to 0.86 percent of total loans, up 4 basis points from the prior quarter but well below the pre-pandemic average of 1.28 percent. Credit card and nonfarm nonresidential commercial real estate loans drove the quarterly increase in the noncurrent rate. The share of total loans 30-89 days past due increased to 0.61 percent, up 7 basis points from the prior quarter but also below the pre-pandemic average.

## The Net Charge-Off Rate Increased and Was Above Pre-Pandemic Levels

The industry's net charge-off rate increased 14 basis points from the prior quarter and 29 basis points from the prior year to 0.65 percent, 17 basis points above its pre-pandemic average. Credit card loans led the annual increase in net charge-off balances. The net charge-off rate on credit card loans was 4.15 percent, the highest rate for this portfolio reported by the industry since first quarter 2012. Nonfarm nonresidential commercial real estate loans also contributed to the increase in net charge-offs, particularly among non-owner occupied properties in which the net charge-off rate of 0.51 percent was the highest level since fourth quarter 2012.

## Equity Capital Increased

Equity capital increased $\$ 52.1$ billion (2.3 percent) from third quarter 2023, as an increase in accumulated other comprehensive income (up $\$ 83.5$ billion) more than offset a decrease in retained earnings (down $\$ 33.8$ billion). The leverage capital ratio declined 12 basis points from third quarter

2023 to 9.14 percent, and the tier 1 risk-based capital ratio fell 9 basis points to 13.92 percent. The number of institutions with capital ratios that did not meet Prompt Corrective Action requirements for the well-capitalized category increased by one from the prior quarter to six. ${ }^{5}$

## The Number of Problem Banks Increased

The number of banks on the FDIC's "Problem Bank List" increased by eight, rising from 44 to $52 .{ }^{6}$ These 52 banks represented 1.1 percent of total institutions by count. Total assets of problem institutions increased $\$ 12.8$ billion quarter over quarter to $\$ 66.3$ billion.

## The Total Number of FDIC-Insured Institutions Declined

The number of FDIC-insured institutions that filed Call Reports declined from 4,614 in the third quarter to 4,587 in the fourth quarter. One bank opened, one bank failed, four banks did not file a Call Report after selling a majority of their assets, and 23 institutions merged with other banks during the fourth quarter.

* See Table IV-A for explanations.
${ }^{* *}$ For institutions that have adopted ASU 2016-13, the numerator represents provisions for credit losses on a consolidated basis; for institutions that have not adopted ASU 2016-13, the numerator represents the provision for loan and lease losses.
*** Beginning March 2020, does not include institutions that have a Community Bank Leverage Ratio election in effect at the report date.

[^3]** For institutions that have adopted ASU 2016-13, the numerator represents provisions for credit losses on a consolidated basis; for institutions that have not adopted ASU 2016-13, the numerator represents the provision for loan and lease losses.
*** Beginning March 2020, does not include institutions that have a Community Bank Leverage Ratio election in effect at the report date.

TABLE IV-A. Fourth Quarter 2023, All FDIC-Insured Institutions

*Asset Concentration Group Definitions (Groups are hierarchical and mutually exclusive):
Credit-card Lenders - Institutions whose credit-card loans plus securitized receivables exceed 50 percent of total assets plus securitized receivables.
International Banks - Banks with assets greater than $\$ 10$ billion and more than 25 percent of total assets in foreign offices.
Agricultural Banks - Banks whose agricultural production loans plus real estate loans secured by farmland exceed 25 percent of the total loans and leases.
Commercial Lenders - Institutions whose commercial and industrial loans, plus real estate construction and development loans, plus loans secured by commercial real estate properties exceed 25 percent of total assets.
Mortgage Lenders - Institutions whose residential mortgage loans, plus mortgage-backed securities, exceed 50 percent of total assets.
Consumer Lenders - Institutions whose residential mortgage loans, plus credit-card loans, plus other loans to individuals, exceed 50 percent of total assets.
Other Specialized < \$1 Billion - Institutions with assets less than \$1 billion, whose loans and leases are less than 40 percent of total assets.
All Other < \$1 billion - Institutions with assets less than \$1 billion that do not meet any of the definitions above, they have significant lending activity with no identified asset concentrations.
All Other > \$1 billion - Institutions with assets greater than \$1 billion that do not meet any of the definitions above, they have significant lending activity with no identified asset concentrations.
** For institutions that have adopted ASU 2016-13, the numerator represents provisions for credit losses on a consolidated basis; for institutions that have not adopted ASU 2016-13, the numerator represents the provision for loan and lease losses.

## *Regions:

New York - Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico
Rhode Island, Vermont, U.S. Virgin Islands

Atlanta - Alabama, Florida, Georgia, North Carolina, South Carolina, Virginia, West Virginia
Chicago - Illinois, Indiana, Kentucky, Michigan, Ohio, Wisconsin
Kansas City - Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota
Dallas - Arkansas, Colorado, Louisiana, Mississippi, New Mexico, Oklahoma, Tennessee, Texas
San Francisco - Alaska, Arizona, California, Hawaii, Idaho, Montana, Nevada, Oregon, Pacific Islands, Utah, Washington, Wyoming
** For institutions that have adopted ASU 2016-13, the numerator represents provisions for credit losses on a consolidated basis; for institutions that have not adopted ASU 2016-13, the numerator represents the provision for loan and lease losses.

## COMMUNITY BANK PERFORMANCE

Community banks are identified based on criteria defined in the FDIC's 2012 Community Banking Study. When comparing community bank performance across quarters, prior-quarter dollar amounts are based on community banks designated as such in the current quarter, adjusted for mergers. In contrast, prior-quarter ratios are based on community banks designated during the previous quarter.

## - Full-Year Net Income Declined From Last Year

- Quarterly Net Income Declined From a Quarter Ago and One Year Ago
- The Net Interest Margin Was Unchanged From the Prior Quarter
- Unrealized Losses on Securities Decreased From the Prior Quarter
- Loan Growth Was Broad-Based Across Loan Categories
- Total Deposits Increased Quarter Over Quarter
- Asset Quality Metrics Remained Favorable Overall

## Full-Year Net Income Declined in 2023

Community banks reported full-year net income of $\$ 26.6$ billion, down $\$ 2$ billion ( 7.1 percent) from 2022. The decrease resulted from higher noninterest expense (up $\$ 4.4$ billion, or 7.0 percent), higher provision expense (up $\$ 849.6$ million, or $\$ 35.5$ percent), and larger realized losses on the sale of securities (up $\$ 203$ million, or 27.7 percent) more than offsetting higher net interest income (up $\$ 2.6$ billion, or 3.2 percent) and higher noninterest income (up $\$ 181$ million, or 0.9 percent). The full-year net interest margin decreased to 3.39 percent, down 6 basis points from 2022. The pretax return-on-assets (ROA) ratio decreased 17 basis point to 1.22 percent

## Quarterly Net Income Decreased From the Prior Quarter and One Year Ago

Net income for the 4,140 community banks declined $\$ 650.2$ million ( 9.9 percent) in fourth quarter 2023 from the prior quarter to $\$ 5.9$ billion. Higher noninterest expense (up $\$ 647.9$ million, or 3.9 percent), increased provisions (up $\$ 267.8$ million, or 33.7 percent), and lower noninterest income (down \$133.6 million, or 2.6 percent) more than exceeded higher net interest income (up $\$ 202.1$ million, or 1 percent) and lower losses on the sale of securities (down $\$ 70.7$ million, or 18.6 percent). More than half (59.7 percent) of all community banks reported a decline in net income from third quarter 2023.

The pretax ROA ratio at community banks declined 14 basis points from one quarter ago and 41 basis points from one year ago to 1.07 percent. The share of unprofitable community banks that were unprofitable during the quarter was 11.0 percent, up from 6.7 percent in the prior quarter. Net income decreased $\$ 1.9$ billion ( 24.7 percent) from fourth quarter 2022, driven primarily by higher noninterest expense and lower net interest income.

## The Net Interest Margin Was Unchanged From the Prior Quarter

The community bank net interest margin (NIM) was unchanged in fourth quarter 2023 from the prior quarter at 3.35 percent. The NIM was down 36 basis points from the year-ago quarter because the yield on earning assets increased 88 basis points while the cost of funds increased 124 basis points.

Net Operating Revenue Increased Slightly in the Fourth Quarter Due to Higher Net Interest Income Community bank net operating revenue (net interest income plus noninterest income) increased \$68.6 million ( 0.3 percent) quarter over quarter as higher net interest income offset lower noninterest income. Interest expense increased in the fourth quarter - mainly from domestic time deposits-by a lesser
amount than interest income, causing a $\$ 202.1$ million (1.0 percent) increase in net interest income. Noninterest income declined $\$ 133.6$ million ( 2.6 percent) from the prior quarter predominantly due to higher net losses on loan sales, net servicing fees, and "all other" noninterest income. ${ }^{1}$

Net operating revenue declined $\$ 966.9$ million ( 3.6 percent) year over year, as a $\$ 271.7$ million increase in noninterest income was more than offset by a $\$ 1.2$ billion decrease in net interest income. Although interest income rose across all loan types, net interest income declined due to higher interest expense. Higher "all other" noninterest income drove the annual increase in noninterest income.

## Noninterest Expense Increased Quarter Over Quarter and Year Over Year

Noninterest expense increased $\$ 647.9$ million ( 3.9 percent) from a quarter ago and $\$ 926.0$ million ( 5.7 percent) from a year ago to $\$ 17.3$ billion. Higher salaries and benefits expense and "all other" noninterest expense led the quarterly and yearly increases in noninterest expense. ${ }^{2}$ The efficiency ratio (noninterest expense as a share of net operating revenue) increased 2.4 percentage points from a quarter ago to 66.3 percent, indicating that community banks were less efficient at generating revenue.

## Provision Expense Increased From the Prior Quarter and One Year Ago

Quarterly provision expense of $\$ 1.1$ billion was up $\$ 267.8$ million ( 33.7 percent) from a quarter ago and $\$ 171.7$ million ( 19.3 percent) from a year ago. The reserve coverage ratio (the ratio of the allowance for credit losses to noncurrent loans) decreased 10.5 percentage points from a quarter ago and 47.6 percentage points from a year ago to 227.8 percent, driven by higher noncurrent loan balances. Nevertheless, the community bank reserve coverage ratio was 27.0 percentage points higher than the reserve coverage ratio at noncommunity banks.

## Unrealized Losses on Securities Decreased From the Prior Quarter ${ }^{3}$

Unrealized losses on securities totaled $\$ 53.4$ billion in fourth quarter 2023, down $\$ 22.9$ billion ( 30.0 percent) from the prior quarter and $\$ 12.5$ billion (19.0 percent) from the prior year. Unrealized losses on held-to-maturity securities ( $\$ 9.1$ billion) and available-for-sale securities ( $\$ 44.2$ billion) both decreased quarter over quarter and year over year. Nearly all community banks ( 96.0 percent) reported unrealized losses on securities.

## Total Assets Were Up From a Year Ago and Quarter Ago

Total assets at community banks increased $\$ 45.6$ billion (1.7 percent) quarter over quarter and $\$ 118.0$ billion (4.6 percent) year over year. Quarterly growth in total loans and leases was \$32.5 billion (1.8 percent) in fourth quarter 2023, similar to the $\$ 31.8$ billion ( 1.7 percent) increase in third quarter 2023. Total loans and leases grew $\$ 134.3$ billion ( 7.8 percent) from a year ago. Securities balances increased $\$ 7.3$ billion ( 1.4 percent) quarter over quarter and fell $\$ 37.7$ billion ( 6.5 percent) year over year. Cash and balances due from depository institutions increased $\$ 18.3$ billion ( 12.2 percent) year over year and $\$ 8.9$ billion ( 5.6 percent) quarter over quarter.

[^6]
## Loan Growth Was Broad Based

Loan and lease balances increased from one quarter ago across all major portfolios. Increases in 1-4 family residential real estate loans ( $\$ 8.6$ billion, or 1.9 percent) and nonfarm nonresidential commercial real estate (CRE) loans ( $\$ 9.1$ billion, or 1.6 percent) led the quarter-over-quarter loan growth. The majority of community banks ( 76.2 percent) reported quarterly growth in total loan balances.

Loan and lease balances also increased 7.9 percent from the prior year. Increases in 1-4 family residential real estate loans ( $\$ 41.7$ billion, or 10.1 percent) and nonfarm nonresidential CRE loans ( $\$ 38.2$ billion, or 7.2 percent) led the year-over-year loan growth.

## Deposits Increased From the Previous Quarter

Community banks reported an increase in total deposits of 1.2 percent ( $\$ 25.7$ billion) during fourth quarter 2023, similar to an increase of 1.0 percent reported in third quarter 2023. More than half of all community banks ( 59.9 percent) reported an increase in deposit balances from the prior quarter. Community banks reported growth in both insured ( $\$ 11.6$ billion, or 0.7 percent) and uninsured deposit account balances ( $\$ 14.9$ billion, or 2.2 percent). In the fourth quarter, growth in interest-bearing deposit balances ( $\$ 35.5$ billion, or 2.1 percent) was somewhat offset by a decline in noninterest-bearing deposits ( $\$ 9.8$ billion, or 1.8 percent). Total deposits increased 2.3 percent ( $\$ 51.2$ billion) from one year ago.

The Noncurrent Loan Rate and Net Charge-Off Rate Increased From the Prior Quarter
The share of loans and leases 90 days or more past due or in nonaccrual status increased 2 basis points from third quarter 2023 to 0.54 percent. Less than half of community banks ( 37.9 percent) reported quarter-over-quarter increases in noncurrent loan balances. Noncurrent loan balances for all major loan portfolios except farm loans increased from one quarter ago.

The community bank net charge-off rate increased 7 basis points from one quarter ago and 6 basis points from one year ago to 0.18 percent. This ratio is 3 basis points higher than the pre-pandemic average. Approximately 26.0 percent of the annual increase in net charge-off volume occurred in consumer loans, a relatively small loan portfolio at community banks ( 4.0 percent of total loan balances). The net chargeoff rate for consumer loans increased 47 basis points from one year ago to 1.70 percent.

## Capital Ratios Remained Stable

The tier one risk-based capital ratio for community banks that did not file the community bank leverage ratio (CBLR) was 13.78 percent, up 2 basis points from the prior quarter, as reductions in risk-weighted assets outpaced tier 1 capital declines. The average CBLR for the 1,618 community banks that elected to use the CBLR framework was 12.18 percent, up 5 basis points from third quarter 2023. The leverage capital ratio for community banks was unchanged at 10.70 percent from a quarter ago.

## One Community Bank Opened and One Failed in Fourth Quarter 2023

The number of community banks declined to 4,140 in the fourth quarter, down 26 from the previous quarter. One community bank opened and one failed. Several banks transitioned from community to noncommunity banks or vice versa, and 20 merged out of existence during the quarter.

## INSURANCE FUND INDICATORS

- Deposit Insurance Fund Increases by \$2.4 Billion
- DIF Reserve Ratio Rises 2 Basis Points, Ends Fourth Quarter at 1.15 Percent
- One Institution Fails During the Fourth Quarter

During the fourth quarter, the Deposit Insurance Fund (DIF) balance increased by $\$ 2.4$ billion to $\$ 121.8$ billion. The rise in the DIF was primarily driven by assessment income of $\$ 3.1$ billion. Net investment income (including the effect of unrealized and realized gains and losses) added $\$ 0.8$ billion. These gains were partially offset by provisions for insurance losses of $\$ 0.9$ billion, and operating expenses of \$0.6 billion. One insured institution failed during the fourth quarter at an estimated cost to the Fund of $\$ 14.8$ million.

The deposit insurance assessment base-average consolidated total assets minus average tangible equity - increased by 0.8 percent in the fourth quarter but fell by 0.6 percent compared to a year ago. ${ }^{1,2}$

Total estimated insured deposits increased by 0.5 percent in the fourth quarter and 3.6 percent year over year. The DIF's reserve ratio (the fund balance as a percent of insured deposits) was 1.15 percent on December 31, 2023, up 2 basis points from the previous quarter and 10 basis points lower than the previous year.

The FDIC adopted a DIF Restoration Plan on September 15, 2020, to return the reserve ratio to 1.35 percent, the statutory minimum, by September 2028 as required by law. Based on FDIC projections, the reserve ratio remains on track to reach 1.35 percent by the statutory deadline. The FDIC will continue to monitor factors affecting the reserve ratio, including but not limited to, insured deposit growth and potential losses due to bank failures and related reserves, as required under the current Restoration Plan.

## Notes to Users

This publication contains financial data and other information for depository institutions insured by the Federal Deposit Insurance Corporation (FDIC). These notes are an integral part of this publication and provide information regarding the comparability of source data and reporting differences over time.

## Tables I-A through VIII-A.

The information presented in Tables I-A through VIII-A of the FDIC Quarterly Banking Profile is aggregated for all FDIC-insured Call Report filers, both commercial banks and savings institutions. Some tables are arrayed by groups of FDIC-insured institutions based on predominant types of asset concentration, while other tables aggregate institutions by asset size and geographic region. Quarterly and full-year data are provided for selected indicators, including aggregate condition and income data, performance ratios, condition ratios, and structural changes, as well as past due, noncurrent, and charge-off information for loans outstanding and other assets.

## Tables I-B through VI-B.

The information presented in Tables I-B through VI-B is aggregated for all FDIC-insured commercial banks and savings institutions meeting the criteria for community banks that were developed for the FDIC's Community Banking Study, published in December, 2012: https://www.fdic.gov/resources/community-banking/cbi-study.html.
The determination of which insured institutions are considered community banks is based on five steps.
The first step in defining a community bank is to aggregate all charter-level data reported under each holding company into a single banking organization. This aggregation applies both to balance-sheet measures and the number and location of banking offices. Under the FDIC definition, if the banking organization is designated as a community bank, every charter reporting under that organization is also considered a community bank when working with data at the charter level.

The second step is to exclude any banking organization where more than 50 percent of total assets are held in certain specialty banking charters, including: credit card specialists, consumer nonbank banks, industrial loan companies, trust companies, bankers' banks, and banks holding 10 percent or more of total assets in foreign offices.
Once the specialty organizations are removed, the third step involves including organizations that engage in basic banking activities as measured by the total loans-toassets ratio (greater than 33 percent) and the ratio of core deposits to assets (greater than 50 percent). Core deposits
are defined as non-brokered deposits in domestic offices. Analysis of the underlying data shows that these thresholds establish meaningful levels of basic lending and deposit gathering and still allow for a degree of diversity in how individual banks construct their balance sheets.

The fourth step includes organizations that operate within a limited geographic scope. This limitation of scope is used as a proxy measure for a bank's relationship approach to banking. Banks that operate within a limited market area have more ease in managing relationships at a personal level. Under this step, four criteria are applied to each banking organization. They include both a minimum and maximum number of total banking offices, a maximum level of deposits for any one office, and location-based criteria. The limits on the number of and deposits per office are adjusted upward quarterly. For banking offices, banks must have more than one office, and the maximum number of offices is 40 in 1985 and reached 104 in 2023. The maximum level of deposits for any one office is $\$ 1.25$ billion in deposits in 1985 and reached $\$ 10.28$ billion in deposits in 2023. The remaining geographic limitations are also based on maximums for the number of states (fixed at 3) and large metropolitan areas (fixed at 2) in which the organization maintains offices. Branch office data are based on the most recent data from the annual June 30 Summary of Deposits Survey that are available at the time of publication.

Finally, the definition establishes an asset-size limit, also adjusted upward quarterly and below which the limits on banking activities and geographic scope are waived. The asset-size limit is $\$ 250$ million in 1985 and reached $\$ 2.06$ billion in 2023. This final step acknowledges the fact that most of those small banks that are not excluded as specialty banks meet the requirements for banking activities and geographic limits in any event.

## Summary of FDIC Research Definition of Community Banking Organizations

Community banks are designated at the level of the banking.
(All charters under designated holding companies are considered community banking charters.)
Exclude: Any organization with:

- No loans or no core deposits
- Assets held in foreign branches $\geq 10 \%$ of total assets
- More than $50 \%$ of assets in certain specialty banks, including:
- credit card specialists
- consumer nonbank banks ${ }^{1}$
- industrial loan companies
- trust companies
- bankers' banks

Include: All remaining banking organizations with:

- Total assets < indexed size threshold ${ }^{2}$
- Total assets $\geq$ indexed size threshold, where:
- Loan to assets > 33\%
- Core deposits to assets $>50 \%$
- More than 1 office but no more than the indexed maximum number of offices. ${ }^{3}$
- Number of large MSAs with offices $\leq 2$
- Number of states with offices $\leq 3$
- No single office with deposits > indexed maximum branch deposit size. ${ }^{4}$
${ }^{1}$ Consumer nonbank banks are financial institutions with limited charters that can make commercial loans or take deposits, but not both.
${ }^{2}$ Asset size threshold indexed to equal \$250 million in 1985 and $\$ 2.06$ billion in 2023.
${ }^{3}$ Maximum number of offices indexed to equal 40 in 1985 and 104 in 2023.
${ }^{4}$ Maximum branch deposit size indexed to equal $\$ 1.25$ billion in 1985 and $\$ 10.28$ billion in 2023.

Tables I-C through IV-C.
A separate set of tables (Tables I-C through IV-C) provides comparative quarterly data related to the Deposit Insurance Fund (DIF), problem institutions, failed institutions, estimated FDIC-insured deposits, as well as assessment rate information. Depository institutions that are not insured by the FDIC through the DIF are not included in the FDIC Quarterly Banking Profile. U.S. branches of institutions headquartered in foreign countries and non-deposit trust companies are not included unless otherwise indicated. Efforts are made to obtain financial reports for all active institutions. However, in some cases, final financial reports are not available for institutions that have closed or converted their charters.

## DATA SOURCES

The financial information appearing in this publication is obtained primarily from the Federal Financial Institutions Examination Council (FFIEC) Consolidated Reports of Condition and Income (Call Reports) and the OTS Thrift Financial Reports (TFR) submitted by all FDICinsured depository institutions. (TFR filers began filing Call Reports effective with the quarter ending March 31, 2012.) This information is stored on and retrieved from the FDIC's Research Information System (RIS) database.

## COMPUTATION METHODOLOGY

Parent institutions are required to file consolidated reports, while their subsidiary financial institutions are still required to file separate reports. Data from subsidiary institution reports are included in the Quarterly Banking Profile tables, which can lead to double-counting. No adjustments are made for any double-counting of subsidiary data. Additionally, certain adjustments are made to the OTS Thrift Financial Reports to provide closer conformance with the reporting and accounting requirements of the FFIEC Call Reports. (TFR filers began
filing Call Reports effective with the quarter ending March 31, 2012.)
All condition and performance ratios represent weighted averages, which is the sum of the individual numerator values divided by the sum of individual denominator values. All asset and liability figures used in calculating performance ratios represent average amounts for the period (beginning-of-period amount plus end-of-period amount plus any interim periods, divided by the total number of periods). For "pooling-of-interest" mergers, the assets of the acquired institution(s) are included in average assets, since the year-to-date income includes the results of all merged institutions. No adjustments are made for "purchase accounting" mergers. Growth rates represent the percentage change over a 12-month period in totals for institutions in the base period to totals for institutions in the current period. For the community bank subgroup, growth rates will reflect changes over time in the number and identities of institutions designated as community banks, as well as changes in the assets and liabilities, and income and expenses of group members. Unless indicated otherwise, growth rates are not adjusted for mergers or other changes in the composition of the community bank subgroup. When community bank growth rates are adjusted for mergers, prior period balances used in the calculations represent totals for the current group of community bank reporters, plus prior period amounts for any institutions that were subsequently merged into current community banks.
All data are collected and presented based on the location of each reporting institution's main office. Reported data may include assets and liabilities located outside of the reporting institution's home state. In addition, institutions may relocate across state lines or change their charters, resulting in an inter-regional or interindustry migration; institutions can move their home offices between regions, savings institutions can convert to commercial banks, or commercial banks may convert to savings institutions.

## ACCOUNTING CHANGES

Financial accounting pronouncements by the Financial Accounting Standards Board (FASB) can result in changes in an individual bank's accounting policies and in the Call Reports they submit. Such accounting changes can affect the aggregate amounts presented in the QBP for the current period and the period-to-period comparability of such financial data.
The current quarter's Financial Institution Letter (FIL) and related Call Report supplemental instructions can provide additional explanation to the QBP reader beyond any material accounting changes discussed in the QBP analysis.

## DEFINITIONS (in alphabetical order)

All other assets - total cash, balances due from depository institutions, premises, fixed assets, direct investments in real estate, investment in unconsolidated subsidiaries, customers' liability on acceptances outstanding, assets held in trading accounts, federal funds sold, securities purchased with agreements to resell, fair market value of derivatives, prepaid deposit insurance assessments, and other assets.
All other liabilities - bank's liability on acceptances, limited-life preferred stock, allowance for estimated off-balance-sheet credit losses, fair market value of derivatives, and other liabilities.
Assessment base - Effective April 1, 2011, the deposit insurance assessment base changed to "average consolidated total assets minus average tangible equity" with an additional adjustment to the assessment base for banker's banks and custodial banks. Previously, the assessment base consisted of deposit liabilities after exclusions.

Assessment rate schedule - Initial base assessment rates for small institutions (except new institutions) are based on a combination of financial ratios and CAMELS component ratings. Initial rates for large institutionsgenerally those with at least $\$ 10$ billion in assets-are also based on CAMELS component ratings and certain financial measures combined into two scorecards-one for most large institutions and another for the remaining very large institutions that are structurally and operationally complex or that pose unique challenges and risks in case of failure (highly complex institutions). The FDIC may take additional information into account to make a limited adjustment to a large institution's scorecard results, which are used to determine a large institution's initial base assessment rate.
Initial rates for small institutions are subject to minimums and maximums based on an institution's CAMELS composite rating.
The current assessment rate schedule became effective January 1, 2023. Under the current schedule, initial base assessment rates range from 5 to 32 basis points. An institution's total base assessment rate may differ from its initial rate due to three possible adjustments: (1) Unsecured Debt Adjustment: An institution's rate may
decrease by up to 5 basis points for unsecured debt. The unsecured debt adjustment cannot exceed the lesser of 5 basis points or 50 percent of an institution's initial base assessment rate (IBAR). Thus, for example, an institution with an IBAR of 5 basis points would have a maximum unsecured debt adjustment of 2.5 basis points and could not have a total base assessment rate lower than 2.5 basis points. (2) Depository Institution Debt Adjustment: For institutions that hold long-term unsecured debt issued by another insured depository institution, a 50 basis point charge is applied to the amount of such debt held in excess of 3 percent of an institution's Tier 1 capital. (3) Brokered Deposit Adjustment: Rates for large institutions that are not well capitalized or do not have a composite CAMELS rating of 1 or 2 may increase (not to exceed 10 basis points) if their brokered deposits exceed 10 percent of domestic deposits.
The assessment rate schedule effective January 1, 2023, is shown in the following table:

Total Base Assessment Rates*

|  | Established Small Banks |  |  | Large \& Highly Complex Institutions |
| :---: | :---: | :---: | :---: | :---: |
|  | CAMELS Composite |  |  |  |
|  | 1 or 2 | 3 | 4 or 5 |  |
| Initial Base <br> Assessment Rate | 5 to 18 | $\begin{array}{\|c\|} \hline 8 \text { to } \\ 32 \end{array}$ | 18 to 32 | 5 to 32 |
| Unsecured Debt Adjustment | -5 to 0 | $\begin{array}{\|c} -5 \text { to } \\ 0 \end{array}$ | -5 to 0 | -5 to 0 |
| Brokered Deposit Adjustment | N/A | N/A | N/A | 0 to 10 |
| Total Base Assessment Rate | 2.5 to 18 | $\begin{array}{\|c\|} \hline 4 \text { to } \\ 32 \end{array}$ | 13 to 32 | 2.5 to 42 |

* All amounts for all categories are in basis points annually. Total base rates that are not the minimum or maximum rate will vary between these rates. Total base assessment rates do not include the depository institution debt adjustment.
Each institution is assigned a risk-based rate for a quarterly assessment period near the end of the quarter following the assessment period. Payment is generally due on the 30th day of the last month of the quarter following the assessment period. Supervisory rating changes are effective for assessment purposes as of the examination transmittal date.

Assets securitized and sold - total outstanding principal balance of assets securitized and sold with servicing retained or other seller-provided credit enhancements.
Capital Purchase Program (CPP) - As announced in October 2008 under the TARP, the Treasury Department purchase of noncumulative perpetual preferred stock and
related warrants that is treated as Tier 1 capital for regulatory capital purposes is included in "Total equity capital." Such warrants to purchase common stock or noncumulative preferred stock issued by publicly-traded banks are reflected as well in "Surplus." Warrants to purchase common stock or noncumulative preferred stock of not-publicly-traded bank stock are classified in a bank's balance sheet as "Other liabilities."
Common equity Tier 1 capital ratio - ratio of common equity Tier 1 capital to risk-weighted assets. Common equity Tier 1 capital includes common stock instruments and related surplus, retained earnings, accumulated other comprehensive income (AOCI), and limited amounts of common equity Tier 1 minority interest, minus applicable regulatory adjustments and deductions. Items that are fully deducted from common equity Tier 1 capital include goodwill, other intangible assets (excluding mortgage servicing assets) and certain deferred tax assets; items that are subject to limits in common equity Tier 1 capital include mortgage servicing assets, eligible deferred tax assets, and certain significant investments. Beginning March 2020, this ratio does not include institutions that have a Community Bank Leverage Ratio election in effect at the report date.
Construction and development loans - includes loans for all property types under construction, as well as loans for land acquisition and development.
Core capital - common equity capital plus noncumulative perpetual preferred stock plus minority interest in consolidated subsidiaries, less goodwill and other ineligible intangible assets. The amount of eligible intangibles (including servicing rights) included in core capital is limited in accordance with supervisory capital regulations.
Cost of funding earning assets - total interest expense paid on deposits and other borrowed money as a percentage of average earning assets.
Credit enhancements - techniques whereby a company attempts to reduce the credit risk of its obligations. Credit enhancement may be provided by a third party (external credit enhancement) or by the originator (internal credit enhancement), and more than one type of enhancement may be associated with a given issuance.
Deposit Insurance Fund (DIF) - the Bank (BIF) and Savings Association (SAIF) Insurance Funds were merged in 2006 by the Federal Deposit Insurance Reform Act to form the DIF.
Deposits liabilities after exclusions - amount equal to gross total deposit liabilities meeting the statutory definition of a deposit in Section 3(l) of the Federal Deposit Insurance Act, before deducting allowable
exclusions. Deposit liabilities after exclusions may differ from amounts reported for total deposits or total domestic deposits due to adjustments made to align with the determination of deposit insurance coverage in the event of a bank failure, including reporting based on an unconsolidated single FDIC certificate number basis.
Derivatives notional amount - the notional, or contractual, amounts of derivatives represent the level of involvement in the types of derivatives transactions and are not a quantification of market risk or credit risk. Notional amounts represent the amounts used to calculate contractual cash flows to be exchanged.
Derivatives credit equivalent amount - the fair value of the derivative plus an additional amount for potential future credit exposure based on the notional amount, the remaining maturity and type of the contract.

## Derivatives transaction types:

Futures and forward contracts - contracts in which the buyer agrees to purchase and the seller agrees to sell, at a specified future date, a specific quantity of an underlying variable or index at a specified price or yield. These contracts exist for a variety of variables or indices, (traditional agricultural or physical commodities, as well as currencies and interest rates). Futures contracts are standardized and are traded on organized exchanges which set limits on counterparty credit exposure. Forward contracts do not have standardized terms and are traded over the counter.
Option contracts - contracts in which the buyer acquires the right to buy from or sell to another party some specified amount of an underlying variable or index at a stated price (strike price) during a period or on a specified future date, in return for compensation (such as a fee or premium). The seller is obligated to purchase or sell the variable or index at the discretion of the buyer of the contract.
Swaps - obligations between two parties to exchange a series of cash flows at periodic intervals (settlement dates), for a specified period. The cash flows of a swap are either fixed, or determined for each settlement date by multiplying the quantity (notional principal) of the underlying variable or index by specified reference rates or prices. Except for currency swaps, the notional principal is used to calculate each payment but is not exchanged.
Derivatives underlying risk exposure - the potential exposure characterized by the level of banks' concentration in particular underlying instruments, in general. Exposure can result from market risk, credit risk, and operational risk, as well as, interest rate risk.
Domestic deposits to total assets - total domestic office deposits as a percent of total assets on a consolidated basis.

Earning assets - all loans and other investments that earn interest or dividend income.
Efficiency ratio - Noninterest expense less amortization of intangible assets as a percent of net interest income plus noninterest income. This ratio measures the proportion of net operating revenues that are absorbed by overhead expenses, so that a lower value indicates greater efficiency.
Estimated insured deposits - In general, insured deposits are total deposit liabilities after exclusions minus estimated uninsured deposits. Beginning September 30, 2009, insured deposits reflect an increase in the FDIC's standard maximum deposit insurance amount from \$100,000 to $\$ 250,000$. From December 31, 2010, through December 31, 2012, insured deposits also include all funds held in noninterest-bearing transaction accounts, without limit.
Estimated uninsured deposits - In general, institutions with $\$ 1$ billion or more in total assets report estimated uninsured deposits in domestic offices of the bank and in insured branches in Puerto Rico and U.S. territories and possessions, including related interest accrued and unpaid. For institutions that do not report estimated uninsured deposits, the FDIC calculates this amount as the amount of deposit and retirement accounts with balances greater than the standard maximum deposit insurance amount (SMDIA), currently $\$ 250,000$, minus the portion that is insured. The amount that is insured is estimated by multiplying the number of accounts with balances greater than the SMDIA, as reported on the Call Report, by the SMDIA. For example, under the current SMDIA, if an institution reports a number and amount of deposit and retirement accounts with balances greater than $\$ 250,000$ of 1,000 and $\$ 500$ million, respectively, estimated uninsured deposits as calculated by the FDIC would equal $\$ 250$ million (\$500,000,000-1,000 * \$250,000).
Failed/assisted institutions - An institution fails when regulators take control of the institution, placing the assets and liabilities into a bridge bank, conservatorship, receivership, or another healthy institution. This action may require the FDIC to provide funds to cover losses. An institution is defined as "assisted" when the institution remains open and receives assistance in order to continue operating.
Fair Value - the valuation of various assets and liabilities on the balance sheet-including trading assets and liabilities, available-for-sale securities, loans held for sale, assets and liabilities accounted for under the fair value option, and foreclosed assets-involves the use of fair values. During periods of market stress, the fair values of some financial instruments and nonfinancial assets may decline.

FHLB advances - all borrowings by FDIC-insured institutions from the Federal Home Loan Bank System (FHLB), as reported by Call Report filers, and by TFR filers prior to March 31, 2012.
Goodwill and other intangibles - Intangible assets include servicing rights, purchased credit card relationships, and other identifiable intangible assets. Goodwill is the excess of the purchase price over the fair market value of the net assets acquired, less subsequent impairment adjustments. Other intangible assets are recorded at fair value, less subsequent quarterly amortization and impairment adjustments.
Liquidity ratio - liquid assets to total assets. Liquid assets include cash, federal funds sold, and securities including unrealized gains/losses on held-to-maturity securities less pledged securities.
Loans secured by real estate - includes home equity loans, junior liens secured by $1-4$ family residential properties, and all other loans secured by real estate.
Loans to individuals - includes outstanding credit card balances and other secured and unsecured consumer loans.
Long-term assets ( $5+$ years) - loans and debt securities with remaining maturities or repricing intervals of over five years.
Maximum credit exposure - the maximum contractual credit exposure remaining under recourse arrangements and other seller-provided credit enhancements provided by the reporting bank to securitizations.
Mortgage-backed securities - certificates of participation in pools of residential mortgages and collateralized mortgage obligations issued or guaranteed by government-sponsored or private enterprises. Also, see "Securities," below.
Net charge-offs - total loans and leases charged off (removed from balance sheet because of uncollectability), less amounts recovered on loans and leases previously charged off.
Net interest margin - the difference between interest and dividends earned on interest-bearing assets and interest paid to depositors and other creditors, expressed as a percentage of average earning assets. No adjustments are made for interest income that is tax exempt.
Net loans to total assets - loans and lease financing receivables, net of unearned income, allowance and reserves, as a percent of total assets on a consolidated basis.
Net operating income - income excluding discretionary transactions such as gains (or losses) on the sale of investment securities and extraordinary items.

Income taxes subtracted from operating income have been adjusted to exclude the portion applicable to securities gains (or losses).
Noncurrent assets - the sum of loans, leases, debt securities, and other assets that are 90 days or more past due, or in nonaccrual status.
Noncurrent loans \& leases - the sum of loans and leases 90 days or more past due, and loans and leases in nonaccrual status.
Number of institutions reporting - the number of institutions that actually filed a financial report.
New reporters - insured institutions filing quarterly financial reports for the first time.
Other borrowed funds - federal funds purchased, securities sold with agreements to repurchase, demand notes issued to the U.S. Treasury, FHLB advances, other borrowed money, mortgage indebtedness, obligations under capitalized leases and trading liabilities, less revaluation losses on assets held in trading accounts.
Other real estate owned - primarily foreclosed property. Direct and indirect investments in real estate ventures are excluded. The amount is reflected net of valuation allowances. For institutions that filed a Thrift Financial Report (TFR), the valuation allowance subtracted also includes allowances for other repossessed assets. Also, for TFR filers the components of other real estate owned are reported gross of valuation allowances. (TFR filers began filing Call Reports effective with the quarter ending March 31, 2012.)
Percent of institutions with earnings gains - the percent of institutions that increased their net income (or decreased their losses) compared to the same period a year earlier.
"Problem" institutions - Federal regulators assign a composite rating to each financial institution, based upon an evaluation of financial and operational criteria. The rating is based on a scale of 1 to 5 in ascending order of supervisory concern. "Problem" institutions are those institutions with financial, operational, or managerial weaknesses that threaten their continued financial viability. Depending upon the degree of risk and supervisory concern, they are rated either a " 4 " or " 5 ." The number and assets of "problem" institutions are based on FDIC composite ratings. Prior to March 31, 2008, for institutions whose primary federal regulator was the OTS, the OTS composite rating was used.
Recourse - an arrangement in which a bank retains, in form or in substance, any credit risk directly or indirectly associated with an asset it has sold (in accordance with generally accepted accounting principles) that exceeds a pro rata share of the bank's claim on the asset. If a bank has no claim on an asset it has sold, then the retention of
any credit risk is recourse.
Reserves for losses - the allowance for loan and lease losses on a consolidated basis.
Restructured loans and leases - loan and lease financing receivables with terms restructured from the original contract. Excludes restructured loans and leases that are not in compliance with the modified terms.
Retained earnings - net income less cash dividends on common and preferred stock for the reporting period.
Return on assets - bank net income (including gains or losses on securities and extraordinary items) as a percentage of average total (consolidated) assets. The basic yardstick of bank profitability.
Return on equity - bank net income (including gains or losses on securities and extraordinary items) as a percentage of average total equity capital.
Risk-weighted assets - assets adjusted for risk-based capital definitions which include on-balance-sheet as well as off-balance-sheet items multiplied by riskweights that range from zero to 200 percent. A conversion factor is used to assign a balance sheet equivalent amount for selected off-balance-sheet accounts.
Securities - excludes securities held in trading accounts. Banks' securities portfolios consist of securities designated as "held-to-maturity" (reported at amortized cost (book value)), securities designated as "available-for-sale" (reported at fair (market) value), and equity securities with readily determinable fair values not held for trading.
Securities gains (losses) - realized gains (losses) on held-to-maturity and available-for-sale securities, before adjustments for income taxes. Thrift Financial Report (TFR) filers also include gains (losses) on the sales of assets held for sale. (TFR filers began filing Call Reports effective with the quarter ending March 31, 2012.)

## Seller's interest in institution's own

securitizations - the reporting bank's ownership interest in loans and other assets that have been securitized, except an interest that is a form of recourse or other seller-provided credit enhancement. Seller's interests differ from the securities issued to investors by the securitization structure. The principal amount of a seller's interest is generally equal to the total principal amount of the pool of assets included in the securitization structure less the principal amount of those assets attributable to investors, i.e., in the form of securities issued to investors.
Small Business Lending Fund - The Small Business Lending Fund (SBLF) was enacted into law in September 2010 as part of the Small Business Jobs Act of 2010 to encourage lending to small businesses by providing capital to qualified community institutions with assets of
less than $\$ 10$ billion. The SBLF Program is administered by the U.S. Treasury Department (https://home.treasury.gov/policy-issues/small-business-programs/small-business-lending-fund). Under the SBLF Program, the Treasury Department purchased noncumulative perpetual preferred stock from qualifying depository institutions and holding companies (other than Subchapter S and mutual institutions). When this stock has been issued by a depository institution, it is reported as "Perpetual preferred stock and related surplus." For regulatory capital purposes, this noncumulative perpetual preferred stock qualifies as a component of Tier 1 capital. Qualifying Subchapter S corporations and mutual institutions issue unsecured subordinated debentures to the Treasury Department through the SBLF. Depository institutions that issued these debentures report them as "Subordinated notes and debentures." For regulatory capital purposes, the debentures are eligible for inclusion in an institution's Tier 2 capital in accordance with their primary federal regulator's capital standards. To participate in the SBLF Program, an institution with outstanding securities issued to the Treasury Department under the Capital Purchase Program (CPP) was required to refinance or repay in full the CPP securities at the time of the SBLF funding. Any outstanding warrants that an institution issued to the Treasury Department under the CPP remain outstanding after the refinancing of the CPP stock through the SBLF Program unless the institution chooses to repurchase them.

## Subchapter S Corporation - A Subchapter S

 corporation is treated as a pass-through entity, similar to a partnership, for federal income tax purposes. It is generally not subject to any federal income taxes at the corporate level. This can have the effect of reducing institutions' reported taxes and increasing their after-tax earnings.Trust assets - market value, or other reasonably available value of fiduciary and related assets, to include marketable securities, and other financial and physical assets. Common physical assets held in fiduciary accounts include real estate, equipment, collectibles, and household goods. Such fiduciary assets are not included in the assets of the financial institution.

Unearned income and contra accounts - unearned income for Call Report filers only.

Unused loan commitments - includes credit card lines, home equity lines, commitments to make loans for construction, loans secured by commercial real estate, and unused commitments to originate or purchase loans. (Excluded are commitments after June 2003 for originated mortgage loans held for sale, which are accounted for as derivatives on the balance sheet.)

Yield on earning assets - total interest, dividend, and fee income earned on loans and investments as a percentage of average earning assets.

[^0]:    ${ }^{1}$ The pre-pandemic average of quarterly items refers to the period first quarter 2015 through fourth quarter 2019 and for full-year items refers to the period full-year 2015 through full-year 2019. Both periods are used consistently throughout this report.
    ${ }^{2}$ After taking into account the estimated tax benefits of the expenses.

[^1]:    ${ }^{3}$ All other noninterest income includes material write-in items as well as income related to wire transfers and ATM fees, bank card and credit card interchange fees, safe deposit box rent, printing and sale of checks, earnings on/increase in value of cash surrender value of life insurance, and other noninterest sources. ${ }^{4}$ Unrealized losses on securities reflect the difference between the market value as of quarter-end and the book value of non-equity securities. This calculation does not account for any unrealized gains or losses in accumulated other comprehensive income because these cannot be derived from Call Reports.

[^2]:    ${ }^{5}$ Prompt Corrective Action categories are assigned based on reported capital ratios only and do not include the effects of regulatory downgrades.
    " Banks on the FDIC's "Problem Bank List" have a CAMELS composite rating of " 4 " or " 5 " due to financial, operational, or managerial weaknesses, or a combination of such issues. It is common for banks to move on or off this list each quarter.
