1. Introduction

This addendum to the 2011 FDIC National Survey of Unbanked and Underbanked Households provides national- and state-level information on the use of alternative financial services (AFS). It complements the national data on AFS use presented in the 2011 report and the appendices that were released in September 2012.¹

The FDIC National Survey of Unbanked and Underbanked Households was conducted in June 2011 as a special supplement to the U.S. Census Bureau's Current Population Survey. The FDIC survey was designed to collect data on the banking status of U.S. households and to better understand unbanked and underbanked populations.

The survey was undertaken as part of the FDIC's efforts to comply with a statutory mandate that requires the FDIC to conduct ongoing surveys of bank efforts to serve the unbanked by providing important data about underserved households. Beyond estimating the number of unbanked and underbanked households and their demographic characteristics, the survey estimates the types of bank accounts that banked households own, the use of AFS, and reasons cited by households that are not fully using the mainstream banking system.

While the 2011 report included national-level findings regarding use of AFS, this addendum provides additional national data on the types, timing, and extent of AFS use among all households. The addendum also reports state-level results on the use of credit and transaction AFS products (non-bank money orders, non-bank check cashing, non-bank remittances, payday lending, pawnshops, rent-to-own stores, and refund anticipation loans).

The definition of an underbanked household was revised for the 2011 report. As a result, the estimates of the proportion of households that were underbanked in 2011 are not directly comparable with estimates previously reported for 2009. In the 2011 report, underbanked households are defined as those that used non-bank check cashing, non-bank money orders, non-bank remittances, payday lending, pawnshops, rent-to-own agreements, or refund anticipation loans (RALs) at least once in the previous 12 months. This differs from the underbanked definition used in the 2009 report in several ways. The 2009 definition of underbanked households did not include non-bank remittance use, as this information was not collected. The 2009 survey also considered households that used RALs in the previous five years to be underbanked, while the 2011 definition includes only those households that used RALs in the previous year. Finally, the 2011 report defines underbanked households as

those that used one of the AFS credit products or transaction services "in the last 12 months," while in 2009 households were considered to be underbanked if they used AFS "once or twice a year" or "at least a few times a year."

¹ 2011 FDIC National Survey of Unbanked and Underbanked Households can be found at http://www.fdic.gov/householdsurvey/2012_unbankedreport.pdf.

2. Summary of Results

2.1 National Tables

The tables in Section A present national-level estimates of AFS use by household demographic characteristics, further subdivided by banking status. The first series of tables provide an in-depth look at households that have used AFS. These tables include estimates of the number and proportion of households that have used transaction AFS and credit AFS, and estimates of the number and proportion that have used these products in the past year.

The 2011 FDIC Survey of Unbanked and Underbanked Households included analysis of the use of AFS among all U.S. households. To complement the 2011 household survey, a set of tables in Section A of the 2011 addendum provides more detailed information on the demographic characteristics of households that have used transaction or credit AFS. An additional set of tables provides a breakdown of transaction and credit product use within the past year.

National-level Summary:

- One-quarter of households have used at least one AFS product in the past year, including 65 percent of unbanked households. By definition, all underbanked households have used AFS in the past year.
- At least 12 percent of households used AFS products in the last 30 days, including about four in ten unbanked and underbanked households (45.5 percent of unbanked households and 41.2 percent of underbanked households).
- At least 42.9 percent of all U.S. households have used one or more of the following types of AFS (“ever used AFS”): non-bank money orders, non-bank check cashing, non-bank remittances, payday loans, pawnshop loans, rent-to-own agreements, and refund anticipation loans. About 54 percent of all households have never used these services. In 2009, 35.7 percent of all U.S. households had used AFS, and about 60 percent had never used these products (though data on household use of non-bank remittances were not collected in 2009).
- Compared with the national average (42.9 percent), higher proportions of black (63.8 percent) and Hispanic (54.4 percent) households have used AFS. In contrast, only 37.6 percent of white households have used AFS.

Transaction AFS (non-bank money orders, non-bank check cashing, and non-bank remittances) have been used by 39.1

percent of all U.S. households. More than one in five households (23.3 percent) have used a transaction AFS in the past year, including 62.1 percent of unbanked households and almost all underbanked households (90.4 percent).

Use of credit AFS (payday loans, pawnshop loans, rent-to-own agreements, and refund anticipation loans) is less widespread; 14.2 percent of all U.S. households have used these services. Six percent have used a credit AFS product in the past year.

More than 30 percent of unbanked households did not use AFS in the past year, including at least one in five (20.6 percent) that have never used these services. This pattern suggests a heavy reliance on cash transactions or other informal financial relationships.

2.2 State Tables

Sections B and C provide information on AFS use specific to each of the 50 states and the District of Columbia.

Tables in Section B provide state-level data on households that have ever used AFS as well as data on the timing of AFS use. For each state, Section B also presents the shares of households that have used each of the AFS products included in the 2011 household survey (i.e., non-bank money orders, non-bank check cashing, non-bank remittances, payday loans, pawnshop loans, rent-to-own agreements, and refund anticipation loans). Tables in Section C provide more detailed estimates of the timing of AFS use by banking status and household characteristics.

State-level Summary:

- Household use of AFS varies considerably across states. The state-level share of households that have ever used AFS ranges from 30.8 percent in New Hampshire to almost 60 percent in Alabama. Colorado, where 42.7 percent of households have ever used AFS, represents the median. In the 2009 survey, AFS usage (excluding non-bank remittances) ranged from a high of 49.2 percent in Alaska to a low of 25.3 percent in Massachusetts.
- Among unbanked households, the proportion that has ever used AFS ranges from about 55 percent in Connecticut to more than 93 percent in Tennessee. About three in four unbanked households in Nebraska (75.4 percent) have used AFS, representing the median across states. In 2009, AFS usage (excluding non-bank remittances) ranged from 88.7 percent of unbanked

households in Montana to 40.9 percent of unbanked households in Hawaii.

- Although the overall proportion of households in Tennessee that have ever used AFS, at 43 percent, is close to the median, Tennessee has the highest proportion of unbanked households that have ever used AFS, at 93.3 percent. About 12 percent of all households in Tennessee have used AFS in the past 30 days, compared with almost 60 percent of unbanked households in the same period. Among black households in Tennessee, 55.5 percent have ever used AFS and about 24 percent have used AFS in the last 30 days, almost double the state average.
- In Connecticut, 30.7 percent of all households and slightly more than half (54.6 percent) of unbanked households have ever used AFS, the latter being the lowest of any state. Almost 7 percent of all households and 23.9 percent of unbanked households in Connecticut have used an AFS product in the last 30 days. Among black households in Connecticut, 61.1 percent have used AFS and almost one in four has used an AFS product in the last 30 days, more than four times the state average.
- In New Mexico, 43.4 percent of unbanked households have never used AFS, the highest proportion of any state. This suggests a reliance on cash transactions or other informal financial relationships. In contrast, only 6.7 percent of unbanked households in Tennessee have never used AFS, the lowest proportion among states.
- At the state level, the share of households that have ever used transaction AFS ranges from 25.2 percent in Minnesota to almost 54 percent in Alabama, while the share of households that have used a transaction AFS in the past year ranges from about 12.6 percent in New Hampshire to almost one in three households (32.7 percent) in Texas.
- Household use of credit AFS products is less common and varies less across states when compared with transaction AFS products. The state-level share of households that have ever used credit AFS products ranges from less than 8 percent in New Hampshire to 21.7 percent in Texas, while credit AFS product use in the last year ranges from 2.5 percent in New Hampshire and New York to more than one in ten households (11.9 percent) in Nevada.

3. Methodological Note

The data for this report were collected through the 2011 FDIC National Survey of Unbanked and Underbanked Households. The Current Population Study (CPS) is a monthly survey of about 53,700 interviewed households conducted by the U.S. Census Bureau for the Bureau of Labor Statistics (BLS). The CPS sample is representative of the U.S. civilian, non-institutionalized population, aged 15 or older.

The CPS is the primary source of information on the labor force characteristics of the U.S. population, including employment, unemployment, and earnings statistics. Additional information about the CPS is provided in the Census Bureau's Technical Paper 66, Design and Methodology of the CPS, available at <http://www.census.gov/prod/2006pubs/tp-66.pdf>.

The Unbanked/Underbanked Supplement was conducted in June 2011. About 44,900 (84 percent) of the 53,700 households participating in the CPS also participated in the Unbanked/Underbanked Supplement.¹ The response rates for the 2011 Unbanked/Underbanked supplement vary by demographic group, ranging from 79 percent to 86 percent.

The 2011 Unbanked/Underbanked Supplement represents the second time this survey has been conducted. The first Unbanked/Underbanked Supplement was conducted in January 2009. The primary purpose of the supplement is to estimate the percentage of U.S. households that are “unbanked” and “underbanked” and to identify the reasons why these households do not participate fully in the mainstream banking system. The supplement survey instrument used in 2011, Appendix G of the 2011 FDIC Survey of Unbanked and Underbanked Households, included about 40 questions designed to gather this information. The 2011 survey instrument contains minor revisions to the 2009 survey instrument. The 2009 survey instrument underwent four rounds of cognitive field pre-testing and was revised to address the feedback gathered from each round². The 2011 survey instrument underwent an expert review process by the US Census Bureau. For a detailed description of the revisions, see Appendix F (Revisions to the 2011 Survey Instrument) in the 2011 FDIC Survey of Unbanked and Underbanked Households. Because of changes in the questionnaire, direct comparisons between 2009 and 2011 estimates are limited and in some instances impossible.

¹ Taking into account the nonresponse to basic CPS questions, the overall response rate for the Unbanked/Underbanked Supplement was 76 percent.

² The goal of each round was to determine respondents' comprehension of each question, test the flow of the questions, find major recall difficulties, ascertain the sensitivity or inappropriateness of any questions, and gauge the operational feasibility of the supplement. No changes to the survey were recommended following the fourth round of testing.

All households that participated in the June 2011 CPS were eligible to participate in the Unbanked/Underbanked Supplement. However, only households whose respondents specified that they had some level of participation in their household finances and also responded “Yes” or “No” to whether someone in their household had a bank account (survey supplement Question 2, or Q2) were considered survey respondents. CPS household respondents who did not answer or answered “Don’t Know” to Q2, or who did not participate in their household financial decisions (or refused to answer) were asked no further questions and were classified as nonrespondents for the supplement.

Using supplement survey results, households were classified as “unbanked” if they answered “No” to the question, “Do you or does anyone in your household currently have a checking or savings account?” Households answering “Yes” to this question were classified as “underbanked” if they indicated that they had used at least one of the following alternative financial services (AFS) at least one time in the previous 12 months: non-bank money orders, non-bank check-cashing services, non-bank remittances, payday loans, rent-to-own services, pawn shops, or refund anticipation loans.

The 2011 definition of “underbanked” has been revised from the 2009 definition to include households that used non-bank remittances in the last year. The 2011 underbanked definition was also modified to include only households that used a refund anticipation loan in the last year, as opposed to in the last five years—the basis for the 2009 report. Further, survey respondents to the 2011 survey were asked about their AFS use over definitive time periods (i.e. “in the last 30 days,” “in the last 2-12 months” or “not in the last 2-12 months”), while respondents to the 2009 survey could indicate AFS use more generally (i.e. “at least a few times a year,” “once or twice a year” or “almost never”). Consequently, 2011 underbanked estimates are not directly comparable to 2009 estimates (see Box 2 on page 19 of 2011 FDIC Household Survey Report).

Demographic characteristics such as race, age, education, and employment, associated with a respondent household for the supplement are those reported for the householder/reference person (i.e., a person who owns or rents the home, as designated by the respondent). These characteristics were used in preparing addendum estimates and tables.

The Census Bureau classifies households into different types. For instance, a family household is a household that includes two or more people related by birth, marriage, or adoption and residing together, along with any unrelated people who may be residing there. Detailed definitions regarding household types can be found in the CPS Glos-

sary available at <http://www.census.gov/cps/about/cpsdef.html>.

Households are categorized into racial-ethnic classifications as follows: If the householder is identified as black, the household is classified as “Black” regardless of whether the householder is identified as Hispanic or any other race. If the householder is not identified as black and is identified as Hispanic, the household is classified as “Hispanic Non-Black.” If the householder is identified as white and not any other race and non-Hispanic, then the household is classified as “White.” All remaining households are classified as “Other.” However, in some national summary tables, the “Other” category is further disaggregated into “Asian” if the householder is identified as Asian, “American Indian/Alaskan” if the householder is identified as American Indian/Alaskan and not Asian, and “Hawaiian/Pacific Islander” if the householder is identified as Hawaiian/Pacific Islander and not Asian or American Indian/Alaskan. In these tables, “Other” consists of the few remaining households in which the householder cannot be classified into any of the preceding groups.

Additional information regarding the unbanked/underbanked supplemental survey methodology can be found in Appendix E “FDIC Technical Notes” of the 2011 FDIC Survey of Unbanked and Underbanked Households (September 2012) available at http://www.fdic.gov/households/survey/2012_unbankedreport.pdf.

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

^aHouseholds are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^bThe AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Table A-6 Timing of Unbanked Households' Use of AFS by Demographic Characteristic

Notes:

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Table A-8 Timing of Fully Banked Households' Use of AFS by Demographic Characteristic

Notes:

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Notes:

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Notes:

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Notes:

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Notes:

Figures do not always reconcile to totals because of rounding.

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Notes:

Figures do not always reconcile to totals because of rounding.

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Table B-6 Timing of Unbanked Households' Use of AFS by State

Notes:

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Notes:

Figures do not always reconcile to totals because of rounding.

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Table B-10 Timing of Unbanked Households' Use of Non-Bank Money Orders by State

Geography	All Unbanked Households		Timing of Non-Bank Money Order Use ^a										Memo Items			
			In Last 30 Days		In Last 2-12 Months		Not in the Last 12 Months		Never Used		Unknown		Non-Bank Money Order Use in the Last Year		Ever Used Non-Bank Money Order

Notes:

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Notes:

Figures do not always reconcile to totals because of rounding.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Notes:

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Table B-15 Timing of Underbanked Households' Use of Non-Bank Check Cashing by State

Notes:

Figures do not always reconcile to totals because of rounding.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Table B-18 Timing of Unbanked Households' Use of Remittances by State

Notes:

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Table B-19 Timing of Underbanked Households' Use of Remittances by State

Geography	All Underbanked Households		Timing of Non-Bank Remittance Use ^a										Memo Items			
			In Last 30 Days		In Last 2-12 Months		Not in the Last 12 Months		Never Used		Unknown		Non-Bank Remittances Used in the Last Year		Ever Used Non-Bank Remittances

Notes:
 Figures do not always reconcile to totals because of rounding.
 - = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Notes:

Figures do not always reconcile to totals because of rounding.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Notes:

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Notes:

Figures do not always reconcile to totals because of rounding.

^a Households are categorized by their most recent known use of AFS. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Table B-30 Timing of Unbanked Households' Use of Rent-to-Own Agreements by State

Notes:

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

^a Households are categorized by their most recent known use of AFS. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Notes:

Figures do not always reconcile to totals because of rounding.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

^a Households are categorized by their most recent known use of AFS. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Table B-32 Timing of Fully Banked Households' Use of Rent-to-Own Agreements by State

Notes:

Figures do not always reconcile to totals because of rounding.

NA = Not available because the sample size was too small to make an accurate estimate.

- = For this table cell, there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

^a Households are categorized by their most recent known use of AFS. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

Table B-35 Timing of Underbanked Households' Use of Refund Anticipation Loans by State

Notes:
Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.
^a Households were not asked whether they used these AFS products in the last 30 days.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

-- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.
^a Households were not asked whether they used these AFS products in the last 30 days.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
NA = Not available because the sample size was too small to make an accurate estimate.

Table C-23 Use of AFS by Household Characteristic: Colorado

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
NA = Not available because the sample size was too small to make an accurate estimate.

Notes

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Table C-76 Timing of AFS Use by Household Characteristic: Louisiana

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Table C-80 Timing of AFS Use by Household Characteristic: Maine

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Table C-92 Timing of AFS Use by Household Characteristic: Michigan

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^a Households were not asked whether they used these AFS products in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Table C-96 Timing of AFS Use by Household Characteristic: Minnesota

Household Characteristic	All Households		Timing of AFS Use ^a										Memo Item

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^a Households were not asked whether they used these AFS products in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.
^a Households were not asked whether they used these AFS products in the last 30 days.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.
^a Households were not asked whether they used these AFS products in the last 30 days.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^a Households were not asked whether they used these AFS products in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.
^a Households were not asked whether they used these AFS products in the last 30 days.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^a Households were not asked whether they used these AFS products in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

Notes:

AFS transaction products are non-bank check cashing, non-bank money orders and non-bank remittances. AFS credit products are payday loans, pawn shop loans, rent-to-own agreements and refund anticipation loans.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes
^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.
^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.
 Figures do not always reconcile to totals because of rounding.
 - = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
 NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^a Households were not asked whether they used these AFS products in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.
^a Households were not asked whether they used these AFS products in the last 30 days.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.
NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.
^a Households were not asked whether they used these AFS products in the last 30 days.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

Notes:

Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^a Households were not asked whether they used these AFS products in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.
^a Households were not asked whether they used these AFS products in the last 30 days.
Figures do not always reconcile to totals because of rounding.
- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^a Households were not asked whether they used these AFS products in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^a Households were not asked whether they used these AFS products in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:
Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^a Households were not asked whether they used these AFS products in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

^a Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^b The AFS included in this measure are non-bank money orders, non-bank check cashing, non-bank remittances, payday loans and pawn shop loans. Households were not asked whether they use rent-to-own agreements or refund anticipation loans in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion round to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Notes:

Households are categorized by their most recent known use of AFS. Households that used AFS in the last year, but did not know whether AFS was used in the last 30 days, are categorized as having used AFS in the last 2-12 months. Households that had ever used AFS, but did not know whether AFS was used in the last year, are categorized as having used AFS, but not in the last 12 months. The unknown category includes only households that did not know whether they had ever used AFS.

^a Households were not asked whether they used these AFS products in the last 30 days.

Figures do not always reconcile to totals because of rounding.

- = For this table cell there were so few sample respondents (in some cases zero) reporting that the estimated universe proportion was rounded to 0.0 percent. It is estimated that the true value is only slightly greater than zero.

NA = Not available because the sample size was too small to make an accurate estimate.

Table C-203 Use of AFS by Household Characteristic: Wyoming

Household Characteristic	All Households		Use of AFS						Memo Items			
			Has Ever Used		Has Never Used		Unknown		Ever Used a Transaction AFS		Ever Used a Credit AFS	
	Number (1,000s)	Pct of Col	Number (1,000s)	Pct of Row	Number (1,000s)	Pct of Row	Number (1,000s)	Pct of Row	Number (1,000s)	Pct of Row	Number (1,000s)	Pct of Row
