QUARTERLY BANKING PROFILE: THIRD QUARTER 2025

Net income for the 4,379 FDIC-insured commercial banks and savings institutions totaled \$79.3 billion, up \$9.4 billion (13.5 percent) from the prior quarter. The quarterly increase in net income was driven by lower provision expenses and higher net interest income, which were offset by higher income taxes and higher noninterest expense. The quarterly decrease in provision expense was largely attributable to the acquisition of one large bank in the prior quarter. Absent this large provision expense, net income would still have increased due to higher net interest and noninterest income. The banking industry reported an aggregate return on assets (ROA) ratio of 1.27 percent in third quarter 2025, up from 1.13 percent in second quarter 2025 and 1.09 percent in third quarter 2024. See page 1.

COMMUNITY BANK PERFORMANCE

Community banks—which represent 90 percent of insured institutions—reported quarterly net income of \$8.4 billion in third quarter 2025, an increase of \$756.9 million (9.9 percent) from the previous quarter. Higher net interest and noninterest income more than offset higher noninterest expense. The pretax return on assets ratio at community banks increased 13 basis points from the prior quarter and increased 25 basis points from one year earlier to 1.46 percent. Nearly two-thirds (63.9 percent) of all community banks reported a quarter-over-quarter increase in net income. See page 19.

INSURANCE FUND INDICATORS

The Deposit Insurance Fund (DIF) balance increased by \$4.8 billion to \$150.1 billion. The rise in the DIF was primarily driven by assessment income of \$3.3 billion. Interest earned on securities, negative provisions, and unrealized gains on securities also contributed a combined \$2.1 billion to the fund during the quarter. These gains were partially offset by operating expenses of \$0.6 billion. There were no institutions that failed during the third quarter. The DIF's reserve ratio was 1.40 percent on September 30, 2025, up 4 basis points from the previous quarter and 15 basis points higher than the previous year. See page 29.

PAGE INTENTIONALLY LEFT BLANK

INSURED INSTITUTION PERFORMANCE

Net Income Increased from the Prior Quarter, Led by Lower Provision Expense and Higher Net Interest Income

Net Interest Margin Increased from the Prior Quarter

Loan Growth Continued from the Prior Quarter

Domestic Deposits Increased for the Fifth Consecutive Quarter

Asset Quality Metrics Remained Generally Favorable, Though Weakness in Certain Portfolios Persisted

The Deposit Insurance Fund Reserve Ratio Increased 4 Basis Points to 1.40 Percent

NET INCOME INCREASED FROM THE PRIOR QUARTER, LED BY LOWER PROVISION EXPENSE AND HIGHER NET INTEREST INCOME

For the 4,379 FDIC-insured commercial banks and savings institutions, quarterly net income totaled \$79.3 billion in the third quarter, up \$9.4 billion (13.5 percent) from the prior quarter. The banking industry reported an aggregate return on assets of 1.27 percent in third quarter 2025, up from 1.13 percent in second quarter 2025 and 1.09 percent in the year-ago quarter. The quarterly increase in net income was driven by lower provision expense (down \$9.2 billion, or 30.7 percent) and higher net interest income (up \$7.6 billion, or 4.2 percent), which were offset by higher income taxes (up \$5.0 billion, or 30.1 percent) and higher noninterest expense (up \$2.9 billion, or 1.9 percent). The quarterly decrease in provision expense was largely attributable to the acquisition of one large bank in the prior quarter. Absent this large provision expense, net income still would have increased, as the industry experienced a \$7.6 billion increase in net interest income and a \$1.1 billion increase in noninterest income.

Chart 1

Quarterly Net Income

All FDIC-Insured Institutions

Chart 2

Quarterly Net Interest Margin

All FDIC-Insured Institutions

NET INTEREST MARGIN INCREASED FROM THE PRIOR QUARTER

The yield on earning assets rose 11 basis points during the quarter, while the cost of funds increased 2 basis points, resulting in a 9 basis point increase in the industry's net interest margin (NIM). At 3.34 percent, industry NIM is above the pre-pandemic average of 3.25 percent.¹

NET OPERATING REVENUE INCREASED IN THE THIRD QUARTER

Net operating revenue (net interest income plus noninterest income) increased \$8.7 billion (3.3 percent) quarter over quarter to \$275.1 billion on higher net interest income and higher noninterest income. Quarter over quarter, increases in total interest income (up \$10.8 billion, or 3.5 percent), driven by increases in credit card loan income, outpaced increases in interest expense. Noninterest income rose \$1.1 billion (1.3 percent) from the previous quarter, predominantly due to higher trading revenue.

Net operating revenue increased \$21.6 billion (8.5 percent) year over year as net interest income increased \$13.2 billion and noninterest income increased \$8.5 billion. Higher trading revenue drove the annual increase in noninterest income.

Chart 3

All FDIC-Insured Institutions

Chart 4

Quarterly Change in Loan Balances

All FDIC-Insured Institutions

¹The "pre-pandemic average" in this statement is calculated as the average from first quarter 2015 through fourth quarter 2019.

NONINTEREST EXPENSE INCREASED FROM THE PRIOR QUARTER AND THE YEAR-AGO QUARTER

Noninterest expense increased \$2.9 billion (1.9 percent) from the prior quarter and \$7.5 billion (5.2 percent) from a year earlier to \$152.3 billion. The quarterly increase was led by all other noninterest expense, which rose \$1.6 billion (2.6 percent).² The annual increase was attributable to higher salaries and employee benefits (up \$3.6 billion, or 5.1 percent). The efficiency ratio (noninterest expense as a share of net operating revenue) declined from 55.6 percent in second quarter 2025 to 54.7 percent in third quarter 2025.

PROVISION EXPENSE DECREASED FROM THE PREVIOUS QUARTER AND ONE YEAR EARLIER

Quarterly provision expense totaled \$20.8 billion in the third quarter, down \$9.2 billion (30.7 percent) from the previous quarter and \$2.8 billion (11.7 percent) from one year earlier. The decrease was largely attributable to the acquisition of one large bank in the prior quarter, as accounting standards require the acquiring institution to recognize a provision expense related to certain acquired assets. Absent this large acquisition, provisions would have slightly declined from the prior quarter and year-ago quarter. The reserve coverage ratio (the ratio of the allowance for credit losses to noncurrent loans) was 178.4 percent in the third quarter, a decrease from 179.4 in the previous quarter, as the allowance for credit losses increased at a slower pace than noncurrent loan balances.

Chart 6
Past-Due and Nonaccrual Rate and Quarterly Net Charge-Off Rate
All FDIC-Insured Institutions

² “All other noninterest expense” includes expenses related to data processing, advertising and marketing, legal fees, and consulting and advisory fees.

ASSET QUALITY METRICS REMAINED GENERALLY FAVORABLE, THOUGH WEAKNESS IN CERTAIN PORTFOLIOS PERSISTED

Past-due and nonaccrual (PDNA) loans, or loans that are 30 or more days past due or in nonaccrual status, remained the same as the prior quarter at 1.49 percent of total loans. The industry's PDNA ratio is still well below the pre-pandemic average of 1.94 percent. The PDNA rates for non-owner-occupied commercial real estate (CRE), multifamily CRE, auto loans, and credit card portfolios remain well above their pre-pandemic averages.

The industry's net charge-off rate increased 1 basis point to 0.61 percent from the prior quarter but is 5 basis points lower than the year-ago quarter. The third quarter rate is 13 basis points above the pre-pandemic average, but significantly below the peaks during the Great Financial Crisis. Most portfolios have net charge-off rates above their pre-pandemic averages.

UNREALIZED LOSSES ON SECURITIES DECREASED BOTH QUARTERLY AND ANNUALLY

Unrealized losses on securities decreased \$58.2 billion (14.7 percent) from the prior quarter and \$26.9 billion (7.4 percent) from the year-ago quarter to \$337.1 billion.³ Unrealized losses on available-for-sale securities were \$115.4 billion, down \$28.3 billion (19.7 percent) from the prior quarter and down \$23.3 billion (16.8 percent) from the year-ago quarter. Unrealized losses on held-to-maturity securities were \$221.8 billion, down \$29.9 billion (11.9 percent) from the prior quarter and down \$3.6 billion (1.6 percent) from the year-ago quarter.

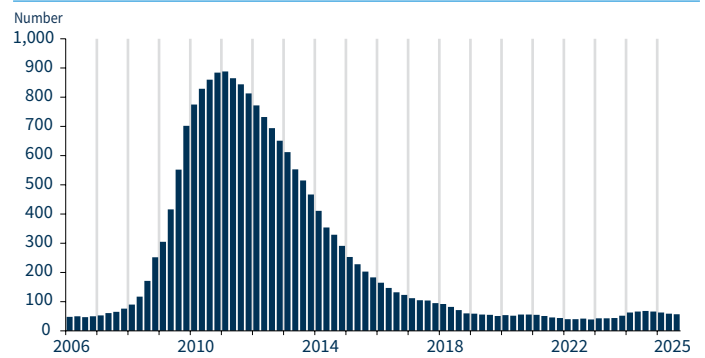

Chart 7
Unrealized Gains (Losses) on Investment Securities

Source: FDIC.
Note: Insured Call Report filers only. Unrealized losses on securities solely reflect the difference between the market value and book value of non-equity securities as of quarter end. This chart does not reflect unrealized gains or losses in other parts of the balance sheet.

Chart 8
Number of Banks on the "Problem Bank List"

All FDIC-Insured Institutions

Source: FDIC.

³Unrealized losses on securities reflect the difference between the market value as of quarter-end and the book value of non-equity securities. This calculation does not account for any unrealized gains or losses in accumulated other comprehensive income because these cannot be derived from Consolidated Reports of Condition and Income (Call Reports).

BANKING INDUSTRY ASSETS INCREASED IN THIRD QUARTER 2025

The banking industry reported total assets of \$25.1 trillion in the third quarter, an increase of \$124.6 billion (0.5 percent) from the prior quarter and \$901 billion (3.7 percent) from the year-ago quarter. The quarterly increase was led by higher total loans and leases (up \$159.0 billion, or 1.2 percent), higher assets in trading accounts (up \$63.8 billion, or 5.5 percent), and higher securities (up \$59.0 billion, or 1.0 percent). The increase in total assets was partially offset by a decline in cash and balance due from depository institutions (down \$140.2 billion, or 5.3 percent). On an annual basis, growth in total loans and leases (up \$589.8 billion, or 4.7 percent), assets in trading accounts (up \$215.9 billion, or 21.6 percent), and securities (up \$177.4 billion, or 3.2 percent) drove the increase.

LOAN GROWTH CONTINUED FROM THE PRIOR QUARTER

Total loan and lease balances increased \$159.0 billion (1.2 percent) from the prior quarter to \$13.2 trillion. The largest portfolio increases were reported in loans to non-depository financial institutions and loans to purchase or carry securities, including margin loans. While growth in these portfolios was in part due to continued reclassifications following changes to how certain loan products should be reported, organic growth and growth in consumer and nonfarm nonresidential CRE portfolios also contributed to the increase. The industry's annual rate of loan growth in the third quarter was 4.7 percent, below the pre-pandemic average of 4.9 percent.

DOMESTIC DEPOSITS INCREASED FOR THE FIFTH CONSECUTIVE QUARTER

Domestic deposits increased \$92.2 billion (0.5 percent) from second quarter 2025, rising for a fifth consecutive quarter. Interest-bearing deposits increased while noninterest-bearing deposits remained relatively unchanged from the prior quarter. Estimated uninsured domestic deposits drove the increase in domestic deposits, increasing \$88.6 billion (1.1 percent) during the quarter.

EQUITY CAPITAL ROSE FROM THE PRIOR QUARTER

Equity capital increased \$43.4 billion (1.7 percent) from the prior quarter to \$2.6 trillion. The quarterly increase was led by a decline in unrealized losses on available-for-sale securities of \$28.3 billion. The leverage capital ratio decreased 3 basis points from second quarter 2025 to 9.33 percent.

THE NUMBER OF PROBLEM BANKS DECREASED IN THE THIRD QUARTER

The number of banks on the FDIC's "Problem Bank List" decreased by a net of two in the third quarter to 57 banks.⁴ The number of problem banks represented 1.3 percent of total banks in the third quarter, which is in the normal range of 1 to 2 percent for non-crisis periods.

THE DEPOSIT INSURANCE FUND RESERVE RATIO INCREASED 4 BASIS POINTS TO 1.40 PERCENT

In the third quarter, the Deposit Insurance Fund balance increased \$4.8 billion to \$150.1 billion. The reserve ratio increased 4 basis points during the quarter to 1.40 percent.

THE TOTAL NUMBER OF INSURED INSTITUTIONS DECLINED

The total number of FDIC-insured institutions declined by 42 during the third quarter to 4,379. Four banks were sold to non-FDIC-insured institutions and 38 institutions merged with other banks.

Author:

Nathan Greenwell
Senior Financial Analyst
Division of Insurance and Research

⁴Banks on the FDIC's "Problem Bank List" have a CAMELS composite rating of "4" or "5." It is common for banks to be added to or removed from this list each quarter.

*Asset Concentration Group Definitions (Groups are hierarchical and mutually exclusive):

Credit-card Lenders - Institutions whose credit-card loans plus securitized receivables exceed 50 percent of total assets plus securitized receivables.

International Banks - Banks with assets greater than \$10 billion and more than 25 percent of total assets in foreign offices.

Agricultural Banks - Banks whose agricultural production loans plus real estate loans secured by farmland exceed 25 percent of the total loans and leases.

Commercial Lenders - Institutions whose commercial and industrial loans, plus real estate construction and development loans, plus loans secured by commercial real estate properties exceed 25 percent of total assets.

Mortgage Lenders - Institutions whose residential mortgage loans, plus mortgage-backed securities, exceed 50 percent of total assets.

Consumer Lenders - Institutions whose residential mortgage loans, plus credit-card loans, plus other loans to individuals, exceed 50 percent of total assets.

Other Specialized < \$1 Billion - Institutions with assets less than \$1 billion, whose loans and leases are less than 40 percent of total assets.

All Other < \$1 billion - Institutions with assets less than \$1 billion that do not meet any of the definitions above, they have significant lending activity with no identified asset concentrations.

All Other > \$1 billion - Institutions with assets greater than \$1 billion that do not meet any of the definitions above, they have significant lending activity with no identified asset concentrations.

** For institutions that have adopted ASU 2016-13, the numerator represents provisions for credit losses on a consolidated basis; for institutions that have not adopted ASU 2016-13, the numerator represents the provision for loan and lease losses. Beginning in 2024, almost all institutions have adopted ASU 2016-13.

*** Beginning March 2020, does not include institutions that have a Community Bank Leverage Ratio election in effect at the report date.

San Francisco - Alaska, Arizona, California, Hawaii, Idaho, Montana, Nevada, Oregon, Pacific Islands, Utah, Washington, Wyoming

** For institutions that have adopted ASU 2016-13, the numerator represents provisions for credit losses on a consolidated basis; for institutions that have not adopted ASU 2016-13, the numerator represents the provision for loan and lease losses. Beginning in 2024, almost all institutions have adopted ASU 2016-13.

*** Beginning March 2020, does not include institutions that have a Community Bank Leverage Ratio election in effect at the report date.

* Does not include banks filing the FFIEC 051 report form, which was introduced in first quarter 2017.

** Beginning in June 2018, for banks that file the FFIEC 041 report form, all other loans include home equity loans, credit card receivables, auto loans, other consumer loans, and commercial and industrial loans.

*** Beginning in June 2018, only includes banks that file the FFIEC 031 report form.

**** The amount of financial assets serviced for others, other than closed-end 1-4 family residential mortgages, is reported when these assets are greater than \$10 million.

***** Total credit exposure includes the sum of the three line items titled "Total credit exposure" reported above.

PAGE INTENTIONALLY LEFT BLANK

COMMUNITY BANK PERFORMANCE

Community banks are defined by criteria identified in the 2012 FDIC Community Banking Study. When comparing community bank performance across quarters, prior quarter dollar amounts are based on community banks designated as such in the current quarter, adjusted for mergers. Prior quarter ratios are based on community banks designated during the prior quarter.

Net Income Increased from the Prior Quarter, Led by Higher Net Interest Income

Net Interest Margin Increased from the Prior Quarter and the Year-Ago Quarter

Loan Growth Continued in Most Portfolios

Domestic Deposits Increased from the Prior Quarter and the Year-Ago Quarter

Asset Quality Metrics Improved Slightly and Remained Generally Favorable

QUARTERLY NET INCOME AND PRETAX RETURN ON ASSETS INCREASED FROM THE PRIOR QUARTER

Third quarter net income for the 3,953 community banks increased \$756.9 million (9.9 percent) from the prior quarter to \$8.4 billion. The pretax return on assets ratio at community banks increased 13 basis points from the prior quarter and 25 basis points from the year-ago quarter to 1.46 percent. Nearly two-thirds (63.9 percent) of all community banks reported a quarter-over-quarter increase in net income. Higher net interest income (up \$958.5 million, or 4.1 percent) and higher noninterest income (up \$371.1 million, or 7.1 percent) more than offset higher noninterest expense (up \$303 million, or 1.7 percent). The share of community banks that were unprofitable during the quarter was 5.1 percent, down from 5.6 percent in the prior quarter.

NET INTEREST MARGIN INCREASED FROM THE PRIOR QUARTER AND THE YEAR-AGO QUARTER

The community bank net interest margin increased 10 basis points from the prior quarter and 37 basis points from the year-ago quarter to 3.73 percent. Quarter over quarter, average earning asset yields rose 11 basis points to 5.80 percent, while average funding costs increased 1 basis point to 2.07 percent. From the year-ago quarter, average earning asset yields rose 12 basis points and average funding costs declined 25 basis points.

Chart 2

Net Interest Margin

Source: FDIC.

NET OPERATING REVENUE INCREASED IN THE THIRD QUARTER

Community bank net operating revenue (net interest income plus noninterest income) increased \$1.3 billion (4.7 percent) to \$29.7 billion during the quarter due to increases in both net interest income and noninterest income. Quarter over quarter, increases in interest income (up \$1.14 billion, or 3.1 percent), driven by higher real estate loan income, outpaced increased interest expense (up \$180.5 million, or 1.4 percent). Noninterest income rose \$371.1 million (7.1 percent) from the prior quarter, predominantly due to higher “all other noninterest income.”¹

Net operating revenue increased \$3.8 billion (14.8 percent) from the year-ago quarter as net interest income rose \$3.2 billion and noninterest income increased \$621.0 million. Higher “all other noninterest income” drove the annual increase in noninterest income.

NONINTEREST EXPENSE INCREASED FROM THE PRIOR QUARTER

Noninterest expense increased \$303 million (1.7 percent) from the prior quarter and \$1.3 billion (7.9 percent) from the year-ago quarter to \$18.1 billion. Salaries and employee benefits expense led the quarterly increase in noninterest expense. The efficiency ratio (noninterest expense as a share of net operating revenue) declined to 60.28 percent from 62.87 percent in second quarter 2025.

Chart 3

Change in Loan Balances and Unused Commitments

FDIC-Insured Community Banks

Chart 4

Past-Due and Nonaccrual Rate and Quarterly Net Charge-Off Rate

FDIC-Insured Community Banks

¹“All other noninterest income” includes income related to wire transfers and ATM fees, bank card fees, credit card interchange fees, safe deposit box rent, printing and sale of checks, and earnings on/increase in the cash surrender value of life insurance.

PROVISION EXPENSE DECREASED FROM THE PRIOR QUARTER

Quarterly provision expense of \$1.4 billion was down \$7.0 million (0.5 percent) from the prior quarter but up \$343.8 million (33.1 percent) from the year-ago quarter. The reserve coverage ratio (the ratio of the allowance for credit losses to noncurrent loans) decreased 6.4 percentage points from the prior quarter and 28.2 percentage points from the year-ago quarter to 157.1 percent, as the allowance for credit losses increased at a slower pace than noncurrent loan balances.

ASSET QUALITY METRICS IMPROVED SLIGHTLY AND REMAINED GENERALLY FAVORABLE

The share of loans and leases 30 days or more past due or in nonaccrual (PDNA) status decreased 1 basis point from second quarter 2025 to 1.26 percent. The third quarter PDNA ratio was 24 basis points below the pre-pandemic average of 1.50 percent.²

The community bank net charge-off ratio increased 4 basis points from the prior quarter and 7 basis points from the year-ago quarter to 0.23 percent. This ratio was above the pre-pandemic average of 0.15 percent. The largest portion of the annual increase in net charge-off volume occurred in commercial real estate (CRE) loans, which increased \$264.4 million, primarily in nonfarm nonresidential CRE loans (up \$169.4 million). The net charge-off ratio for CRE loans increased 11 basis points from the year-ago quarter to 0.16 percent.

UNREALIZED LOSSES ON SECURITIES DECREASED FROM THE PRIOR QUARTER

Unrealized losses on securities totaled \$33.6 billion in third quarter 2025, down \$7.8 billion (18.8 percent) from the prior quarter and down \$4.2 billion (11.1 percent) from the year-ago quarter.³ Unrealized losses on available-for-sale securities (\$27.8 billion) and held-to-maturity securities (\$5.8 billion) both decreased quarter over quarter.

TOTAL ASSETS INCREASED FROM THE PRIOR QUARTER AND YEAR-AGO QUARTER

Total assets at community banks increased \$42.5 billion (1.6 percent) from the prior quarter and \$109.2 billion (4.1 percent) from the year-ago quarter to \$2.8 trillion. The quarterly increase was led by higher total loans and leases (up \$24.4 billion, or 1.3 percent), higher cash and balances due from depository institutions (up \$12.7 billion, or 6.8 percent), and increased securities (up \$4.8 billion, or 1.0 percent). On an annual basis, growth in total loans and leases (up \$96.0 billion, or 5.2 percent) and cash and balances due from depository institutions (up \$13.7 billion, or 7.4 percent) drove the increase.

²The “pre-pandemic average” is the average from first quarter 2015 through fourth quarter 2019.

³Unrealized losses on securities reflect the difference between the market value as of quarter-end and the book value of non-equity securities. This calculation does not account for any unrealized gains or losses in accumulated other comprehensive income because these cannot be derived from Consolidated Reports of Condition and Income (Call Reports).

LOAN GROWTH CONTINUED IN MOST PORTFOLIOS

Loan and lease balances increased \$24.4 billion (1.3 percent) from the prior quarter to \$1.9 trillion. Nearly 70 percent of community banks (69.5 percent) reported quarterly growth in total loan balances. Growth was broad-based across all major portfolios, except auto loans and credit card loans. Increases in nonfarm nonresidential CRE loans (up \$9.2 billion, or 1.6 percent) led the quarter-over-quarter growth.

Loan and lease balances increased 5.2 percent from the year-ago quarter. Increases in nonfarm nonresidential CRE loans (up \$36.0 billion, or 6.4 percent) and 1–4 family residential real estate loans (up \$16.1 billion, or 3.6 percent) led the growth from the year-ago quarter.

DOMESTIC DEPOSITS INCREASED FROM THE PRIOR QUARTER AND THE YEAR-AGO QUARTER

Community banks reported an increase in domestic deposits of 1.6 percent (\$36.1 billion) to \$2.3 trillion in third quarter 2025. Sixty percent of community banks reported an increase in total domestic deposit balances from the prior quarter. Community banks reported an increase in estimated uninsured domestic deposits (up \$22.4 billion, or 3.2 percent) and an increase in estimated insured domestic deposits (up \$13.7 billion, or 0.8 percent). Quarter over quarter, community banks reported an increase in interest-bearing deposits (up \$27.5 billion, or 1.5 percent) and an increase in noninterest-bearing deposits (up \$8.6 billion, or 1.7 percent). Domestic deposits rose \$113.8 billion (5.1 percent) from the year-ago quarter.

CAPITAL RATIOS INCREASED DURING THE QUARTER

The tier 1 risk-based capital ratio for community banks that did not opt into the community bank leverage ratio (CBLR) framework was 14.27 percent, up 14 basis points from the prior quarter. The average CBLR for the 1,668 community banks that elected to use the CBLR framework was 12.44 percent, up 3 basis points from the prior quarter. The leverage capital ratio for all community banks was 11.08 percent, up 6 basis points from the prior quarter.

NO COMMUNITY BANKS FAILED IN THIRD QUARTER 2025

The number of community banks declined to 3,953 in the third quarter, down 26 from the prior quarter. Two banks transitioned from community to noncommunity banks, and six transitioned from noncommunity to community banks. No community banks failed; four community banks were sold to non-FDIC-insured institutions; and 26 community banks merged or consolidated during the quarter.

* See Table IV-A for explanation.

** For institutions that have adopted ASU 2016-13, this item represents the allowance for credit losses on loans and leases held for investment and allocated transfer risk.

Beginning in 2024, almost all institutions have adopted ASU 2016-13.

*** For institutions that have adopted ASU 2016-13, securities are reported net of allowances for credit losses. Beginning in 2024, almost all institutions have adopted ASU 2016-13.

**** For institutions that have adopted ASU 2016-13, this item represents provisions for credit losses on a consolidated basis; for institutions that have not adopted ASU 2016-13, this item represents the provision for loan and lease losses. Beginning in 2024, almost all institutions have adopted ASU 2016-13.

Note: Noncurrent loan rates represent the percentage of loans in each category that are past due 90 days or more or that are in nonaccrual status.

INSURANCE FUND INDICATORS

Deposit Insurance Fund Increases by \$4.8 Billion

DIF Reserve Ratio Rises 4 Basis Points, Ends Third Quarter at 1.40 Percent

No Institutions Failed During the Third Quarter

During the third quarter, the Deposit Insurance Fund (DIF) balance increased by \$4.8 billion to \$150.1 billion. The rise in the DIF was primarily driven by assessment income of \$3.3 billion. Interest earned on securities, negative provisions, and unrealized gains on securities also contributed a combined \$2.1 billion to the fund during the quarter. These gains were partially offset by operating expenses of \$0.6 billion. There were no institutions that failed during the third quarter.

The deposit insurance assessment base—average consolidated total assets minus average tangible equity—increased by 1.2 percent in the third quarter and is above balances reported a year ago by 3.5 percent.

The quarterly change to total estimated insured deposits was 0.1 percent for the third quarter, and remains above balances reported a year ago by 0.7 percent. The DIF's reserve ratio (the fund balance as a percent of insured deposits) was 1.40 percent on September 30, 2025, up 4 basis points from the previous quarter and 15 basis points higher than the previous year.

* Includes insured branches of foreign banks (IBAs) and any revisions to prior quarter data.

** Quarterly financial statement results are unaudited.

*** Includes unrealized postretirement benefit gain (loss).

**** Does not equal total deposits and domestic office deposits in the tables above due to adjustments to align with the determination of deposit insurance coverage in the event of a bank failure.

***** Average consolidated total assets minus tangible equity, with adjustments for banker's banks and custodial banks.

NOTES TO USERS

This publication contains financial data and other information for depository institutions insured by the Federal Deposit Insurance Corporation (FDIC). These notes are an integral part of this publication and provide information regarding the comparability of source data and reporting differences over time.

TABLES I-A THROUGH VIII-A.

The information presented in Tables I-A through VIII-A of the *FDIC Quarterly Banking Profile* is aggregated for all FDIC-insured Call Report filers, both commercial banks and savings institutions. Some tables are arrayed by groups of FDIC-insured institutions based on predominant types of asset concentration, while other tables aggregate institutions by asset size and geographic region. Quarterly and full-year data are provided for selected indicators, including aggregate condition and income data, performance ratios, condition ratios, and structural changes, as well as past-due, noncurrent, and charge-off information for loans outstanding and other assets.

TABLES I-B THROUGH VI-B.

The information presented in Tables I-B through VI-B is aggregated for all FDIC-insured commercial banks and savings institutions meeting the criteria for community banks that were developed for the FDIC's *Community Banking Study*, published in December, 2012: <https://www.fdic.gov/resources/community-banking/cbi-study.html>.

The determination of which insured institutions are considered community banks is based on five steps.

The first step in defining a community bank is to aggregate all charter-level data reported under each holding company into a single banking organization. This aggregation applies both to balance-sheet measures and the number and location of banking offices. Under the FDIC definition, if the banking organization is designated as a community bank, every charter reporting under that organization is also considered a community bank when working with data at the charter level.

The second step is to exclude any banking organization where more than 50 percent of total assets are held in certain specialty banking charters, including credit card specialists, consumer nonbank banks, industrial loan companies, trust companies, bankers' banks, and banks holding 10 percent or more of total assets in foreign offices.

Once the specialty organizations are removed, the third step involves including organizations that engage in basic banking activities as measured by the total loans-to-assets ratio (greater than 33 percent) and the ratio of core deposits to assets (greater than 50 percent). Core deposits are defined as non-brokered deposits in domestic offices. Analysis of the underlying data shows that these thresholds establish meaningful levels of basic lending and deposit gathering and still allow for a degree of diversity in how individual banks construct their balance sheets.

The fourth step includes organizations that operate within a limited geographic scope. This limitation of scope is used as a proxy measure for a bank's relationship approach to banking. Banks that operate within a limited market area have more ease in managing relationships at a personal level. Under this step, four criteria are applied to each banking organization. They include both a minimum and maximum number of total banking offices, a maximum level of deposits for any one office, and location-based criteria. The limits on the

number of and deposits per office are adjusted upward quarterly. For banking offices, banks must have more than one office, and the maximum number of offices is 40 in 1985 and reached 109 in 2025. The maximum level of deposits for any one office is \$1.25 billion in deposits in 1985 and reached \$11.49 billion in deposits in 2025. The remaining geographic limitations are also based on maximums for the number of states (fixed at three) and large metropolitan areas (fixed at two) in which the organization maintains offices. Branch office data are based on the most recent data from the annual June 30 *Summary of Deposits Survey* that are available at the time of publication.

Finally, the definition establishes an asset-size limit, also adjusted upward quarterly and below which the limits on banking activities and geographic scope are waived. The asset-size limit is \$250 million in 1985 and reached \$2.30 billion in 2025. This final step acknowledges the fact that most of those small banks that are not excluded as specialty banks meet the requirements for banking activities and geographic limits in any event.

SUMMARY OF FDIC RESEARCH
DEFINITION OF COMMUNITY
BANKING ORGANIZATIONS

Community banks are designated at the level of the banking organization. (All charters under designated holding companies are considered community banking charters.)

Exclude: Any organization with:

- No loans or no core deposits
- Assets held in foreign branches \geq 10 percent of total assets
- More than 50 percent of assets in certain specialty banks, including:
 - credit card specialists
 - consumer nonbank banks¹
 - industrial loan companies
 - trust companies
 - bankers' banks

Include: All remaining banking organizations with:

- Total assets < indexed size threshold²
- Total assets \geq indexed size threshold, where:
 - Loan to assets > 33 percent
 - Core deposits to assets > 50 percent
 - More than 1 office but no more than the indexed maximum number of offices.³
 - Number of large MSAs with offices \leq 2
 - Number of states with offices \leq 3
 - No single office with deposits > indexed maximum branch deposit size.⁴

TABLES I-C THROUGH IV-C.

A separate set of tables (Tables I-C through IV-C) provides comparative quarterly data related to the Deposit Insurance Fund (DIF), problem institutions, failed institutions, estimated FDIC-insured deposits, as well as assessment rate information. Depository institutions that are not insured by the FDIC through the DIF are not included in the *FDIC Quarterly Banking*

¹Consumer nonbank banks are financial institutions with limited charters that can make commercial loans or take deposits, but not both.

²Asset size threshold indexed to equal \$250 million in 1985 and \$2.30 billion in 2025.

³Maximum number of offices indexed to equal 40 in 1985 and 109 in 2025.

⁴Maximum branch deposit size indexed to equal \$1.25 billion in 1985 and \$11.49 billion in 2025.

Profile. U.S. branches of institutions headquartered in foreign countries and non-deposit trust companies are not included unless otherwise indicated. Efforts are made to obtain financial reports for all active institutions. However, in some cases, final financial reports are not available for institutions that have closed or converted their charters.

DATA SOURCES

The financial information appearing in this publication is obtained primarily from the Federal Financial Institutions Examination Council (FFIEC) *Consolidated Reports of Condition and Income (Call Reports)* and the OTS *Thrift Financial Reports (TFR)* submitted by all FDIC-insured depository institutions. (TFR filers began filing Call Reports effective with the quarter ending March 31, 2012.) This information is stored on and retrieved from the FDIC's Research Information System (RIS) database.

COMPUTATION METHODOLOGY

Parent institutions are required to file consolidated reports, while their subsidiary financial institutions are still required to file separate reports. Data from subsidiary institution reports are included in the *Quarterly Banking Profile* tables, which can lead to double-counting. No adjustments are made for any double-counting of subsidiary data. Additionally, certain adjustments are made to the OTS *Thrift Financial Reports* to provide closer conformance with the reporting and accounting requirements of the FFIEC *Call Reports*. (TFR filers began filing Call Reports effective with the quarter ending March 31, 2012.)

All condition and performance ratios represent weighted averages, which is the sum of the individual numerator values divided by the sum of individual denominator values. All asset and liability figures used in calculating performance ratios represent average amounts for the period (beginning-of-period amount plus end-of-period amount plus any interim periods, divided by the total number of periods). For "pooling-of-interest" mergers, the assets of the acquired institution(s) are included in average assets, since the year-to-date income includes the results of all merged institutions. No adjustments are made for "purchase accounting" mergers. Growth rates represent the percentage change over a 12-month period in totals for institutions in the base period to totals for institutions in the current period. For the community bank subgroup, growth rates will reflect changes over time in the number and identities of institutions designated as community banks, as well as changes in the assets and liabilities, and income and expenses of group members. Unless indicated otherwise, growth rates are not adjusted for mergers or other changes in the composition of the community bank subgroup. When community bank growth rates are adjusted for mergers, prior period balances used in the calculations represent totals for the current group of community bank reporters, plus prior period amounts for any institutions that were subsequently merged into current community banks.

All data are collected and presented based on the location of each reporting institution's main office. Reported data may include assets and liabilities located outside of the reporting institution's home state. In addition, institutions may relocate across state lines or change their charters, resulting in an inter-regional or inter-industry migration; institutions can move their home offices between regions, savings institutions can convert to commercial banks, or commercial banks may convert to savings institutions.

ACCOUNTING CHANGES

Financial accounting pronouncements by the Financial Accounting Standards Board (FASB) can result in changes in an individual bank's accounting policies and in the Call Reports they submit. Such accounting changes can affect the aggregate amounts presented in the QBP for the current period and the period-to-period comparability of such financial data.

The current quarter's Financial Institution Letter (FIL) and related Call Report supplemental instructions can provide additional explanation to the QBP reader beyond any material accounting changes discussed in the QBP analysis.

DEFINITIONS (IN ALPHABETICAL ORDER)

All other assets – total cash, balances due from depository institutions, premises, fixed assets, direct investments in real estate, investment in unconsolidated subsidiaries, customers' liability on acceptances outstanding, assets held in trading accounts, federal funds sold, securities purchased with agreements to resell, fair market value of derivatives, prepaid deposit insurance assessments, and other assets.

All other liabilities – bank's liability on acceptances, limited-life preferred stock, allowance for estimated off-balance-sheet credit losses, fair market value of derivatives, and other liabilities.

Assessment base – Effective April 1, 2011, the deposit insurance assessment base changed to "average consolidated total assets minus average tangible equity" with an additional adjustment to the assessment base for banker's banks and custodial banks. Previously, the assessment base consisted of deposit liabilities after exclusions.

Assessment rate schedule – Initial base assessment rates for small institutions (except new institutions) are based on a combination of financial ratios and CAMELS component ratings. Initial rates for large institutions—generally those with at least \$10 billion in assets—are also based on CAMELS component ratings and certain financial measures combined into two scorecards—one for most large institutions and another for the remaining very large institutions that are structurally and operationally complex or that pose unique challenges and risks in case of failure (highly complex institutions). The FDIC may take additional information into account to make a limited adjustment to a large institution's scorecard results, which are used to determine a large institution's initial base assessment rate.

Initial rates for small institutions are subject to minimums and maximums based on an institution's CAMELS composite rating.

The current assessment rate schedule became effective January 1, 2023. Under the current schedule, initial base assessment rates range from 5 to 32 basis points. An institution's total base assessment rate may differ from its initial rate due to three possible adjustments: (1) Unsecured Debt Adjustment: An institution's rate may decrease by up to 5 basis points for unsecured debt. The unsecured debt adjustment cannot exceed the lesser of 5 basis points or 50

percent of an institution's initial base assessment rate (IBAR). For example, an institution with an IBAR of 5 basis points would have a maximum unsecured debt adjustment of 2.5 basis points and could not have a total base assessment rate lower than 2.5 basis points. (2) Depository Institution Debt Adjustment: For institutions that hold long-term unsecured debt issued by another insured depository institution, a 50 basis point charge is applied to the amount of such debt held in excess of 3 percent of an institution's tier 1 capital. (3) Brokered Deposit Adjustment: Rates for large institutions that are not well capitalized or do not have a composite CAMELS rating of 1 or 2 may increase (not to exceed 10 basis points) if their brokered deposits exceed 10 percent of domestic deposits.

The assessment rate schedule effective January 1, 2023, is shown in the following table:

Total Base Assessment Rates*				
	Established Small Banks			Large and Highly Complex Institutions
	CAMELS Composite			
	1 or 2	3	4 or 5	
Initial Base Assessment Rate	5 to 18	8 to 32	18 to 32	5 to 32
Unsecured Debt Adjustment	-5 to 0	-5 to 0	-5 to 0	-5 to 0
Brokered Deposit Adjustment	N/A	N/A	N/A	0 to 10
Total Base Assessment Rate	2.5 to 18	4 to 32	13 to 32	2.5 to 42

* All amounts for all categories are in basis points annually. Total base rates that are not the minimum or maximum rate will vary between these rates. Total base assessment rates do not include the depository institution debt adjustment.

Each institution is assigned a risk-based rate for a quarterly assessment period near the end of the quarter following the assessment period. Payment is generally due on the 30th day of the last month of the quarter following the assessment period. Supervisory rating changes are effective for assessment purposes as of the examination transmittal date.

Assets securitized and sold – total outstanding principal balance of assets securitized and sold with servicing retained or other seller-provided credit enhancements.

Capital Purchase Program (CPP) – As announced in October 2008 under the TARP, the Treasury Department purchase of noncumulative perpetual preferred stock and related warrants that is treated as tier 1 capital for regulatory capital purposes is included in “total equity capital.” Such warrants to purchase common stock or noncumulative preferred stock issued by publicly-traded banks are reflected as well in “surplus.” Warrants to purchase common stock or noncumulative preferred stock of not-publicly-traded bank stock are classified in a bank's balance sheet as “Other liabilities.”

Common equity tier 1 capital ratio – ratio of common equity tier 1 capital to risk-weighted assets. Common equity tier 1 capital includes common stock instruments and related surplus, retained earnings, accumulated other comprehensive income (AOCI), and limited amounts of common equity tier 1 minority interest, minus applicable regulatory adjustments and deductions. Items that are fully deducted from common equity tier 1 capital include goodwill, other intangible assets (excluding mortgage servicing assets) and certain deferred tax assets; items that are subject to limits in common equity tier 1 capital include mortgage servicing assets, eligible deferred tax assets, and certain significant investments. Beginning March 2020, this ratio does not

include institutions that have a Community Bank Leverage Ratio election in effect at the report date.

Construction and development loans – includes loans for all property types under construction, as well as loans for land acquisition and development.

Core capital – common equity capital plus noncumulative perpetual preferred stock plus minority interest in consolidated subsidiaries, less goodwill and other ineligible intangible assets. The amount of eligible intangibles (including servicing rights) included in core capital is limited in accordance with supervisory capital regulations.

Cost of funding earning assets – total interest expense paid on deposits and other borrowed money as a percentage of average earning assets.

Credit enhancements – techniques whereby a company attempts to reduce the credit risk of its obligations. Credit enhancement may be provided by a third party (external credit enhancement) or by the originator (internal credit enhancement), and more than one type of enhancement may be associated with a given issuance.

Deposit Insurance Fund (DIF) – the Bank Insurance Fund (BIF) and the Savings Association (SAIF) Insurance Fund were merged in 2006 by the Federal Deposit Insurance Reform Act to form the DIF.

Deposits liabilities after exclusions – amount equal to gross total deposit liabilities meeting the statutory definition of a deposit in Section 3(l) of the Federal Deposit Insurance Act, before deducting allowable exclusions. Deposit liabilities after exclusions may differ from amounts reported for total deposits or total domestic deposits due to adjustments made to align with the determination of deposit insurance coverage in the event of a bank failure, including reporting based on an unconsolidated single FDIC certificate number basis.

Derivatives notional amount – the notional, or contractual, amounts of derivatives represent the level of involvement in the types of derivatives transactions and are not a quantification of market risk or credit risk. Notional amounts represent the amounts used to calculate contractual cash flows to be exchanged.

Derivatives credit equivalent amount – the fair value of the derivative plus an additional amount for potential future credit exposure based on the notional amount, the remaining maturity and type of the contract.

Derivatives transaction types:

Futures and forward contracts – contracts in which the buyer agrees to purchase, and the seller agrees to sell, at a specified future date, a specific quantity of an underlying variable or index at a specified price or yield. These contracts exist for a variety of variables or indices, (traditional agricultural or physical commodities, as well as currencies and interest rates). Futures contracts are standardized and are traded on organized exchanges which set limits on counterparty credit exposure. Forward contracts do not have standardized terms and are traded over the counter.

Option contracts – contracts in which the buyer acquires the right to buy from or sell to another party some specified amount of an underlying variable or index at a stated price (strike price) during a period or on a specified future date, in return for compensation (such as a fee or premium).

The seller is obligated to purchase or sell the variable or index at the discretion of the buyer of the contract.

Swaps – obligations between two parties to exchange a series of cash flows at periodic intervals (settlement dates), for a specified period. The cash flows of a swap are either fixed or determined for each settlement date by multiplying the quantity (notional principal) of the underlying variable or index by specified reference rates or prices. Except for currency swaps, the notional principal is used to calculate each payment but is not exchanged.

Derivatives underlying risk exposure – the potential exposure characterized by the level of banks' concentration in particular underlying instruments, in general. Exposure can result from market risk, credit risk, operational risk, and interest rate risk.

Domestic deposits to total assets – total domestic office deposits as a percent of total assets on a consolidated basis.

Earning assets – all loans and other investments that earn interest or dividend income.

Efficiency ratio – noninterest expense less amortization of intangible assets as a percent of net interest income plus noninterest income. This ratio measures the proportion of net operating revenues that are absorbed by overhead expenses, so that a lower value indicates greater efficiency.

Estimated insured deposits – In general, insured deposits are total deposit liabilities after exclusions minus estimated uninsured deposits. Beginning September 30, 2009, insured deposits reflect an increase in the FDIC's standard maximum deposit insurance amount from \$100,000 to \$250,000. From December 31, 2010, through December 31, 2012, insured deposits also include all funds held in noninterest-bearing transaction accounts, without limit.

Estimated uninsured deposits – In general, institutions with \$1 billion or more in total assets report estimated uninsured deposits in domestic offices of the bank and in insured branches in U.S. territories and possessions, including related interest accrued and unpaid. For institutions that do not report estimated uninsured deposits, the FDIC calculates this amount as the amount of deposit and retirement accounts with balances greater than the standard maximum deposit insurance amount (SMDIA), currently \$250,000, minus the portion that is insured. The amount that is insured is estimated by multiplying the number of accounts with balances greater than the SMDIA, as reported on the Call Report, by the SMDIA. For example, under the current SMDIA, if an institution reports a number and amount of deposit and retirement accounts with balances greater than \$250,000 of 1,000 and \$500 million, respectively, estimated uninsured deposits as calculated by the FDIC would equal \$250 million ($\$500,000,000 - 1,000 * \$250,000$).

Failed/assisted institutions – An institution fails when regulators take control of the institution, placing the assets and liabilities into a bridge bank, conservatorship, receivership, or another healthy institution. This action may require the FDIC to provide funds to cover losses. An institution is defined as "assisted" when the institution remains open and receives assistance in order to continue operating.

Fair value – the valuation of various assets and liabilities on the balance sheet—including trading assets and liabilities, available-for-sale securities, loans held for sale, assets and liabilities accounted for under the fair value option, and foreclosed assets—involves the use of fair values. During periods of

market stress, the fair values of some financial instruments and nonfinancial assets may decline.

FHLB advances – all borrowings by FDIC-insured institutions from the Federal Home Loan Bank System (FHLB), as reported by Call Report filers, and by TFR filers prior to March 31, 2012.

Goodwill and other intangibles – Intangible assets include servicing rights, purchased credit card relationships, and other identifiable intangible assets. Goodwill is the excess of the purchase price over the fair market value of the net assets acquired, less subsequent impairment adjustments. Other intangible assets are recorded at fair value, less subsequent quarterly amortization and impairment adjustments.

Liquidity ratio – liquid assets to total assets. Liquid assets include cash, federal funds sold, securities purchased under agreements to resell, and securities (including unrealized gains/losses on securities) less pledged securities.

Loans secured by real estate – includes home equity loans, junior liens secured by 1–4 family residential properties, and all other loans secured by real estate.

Loans to individuals – includes outstanding credit card balances and other secured and unsecured consumer loans.

Long-term assets (5+ years) – loans and debt securities with remaining maturities or repricing intervals of over five years.

Maximum credit exposure – the maximum contractual credit exposure remaining under recourse arrangements and other seller-provided credit enhancements provided by the reporting bank to securitizations.

Mortgage-backed securities – certificates of participation in pools of residential mortgages and collateralized mortgage obligations issued or guaranteed by government-sponsored or private enterprises. Also, see “Securities,” below.

Net charge-offs – total loans and leases charged off (removed from balance sheet because of uncollectability), less amounts recovered on loans and leases previously charged off.

Net interest margin – the difference between interest and dividends earned on interest-bearing assets and interest paid to depositors and other creditors, expressed as a percentage of average earning assets. No adjustments are made for interest income that is tax exempt.

Net loans to total assets – loans and lease financing receivables, net of unearned income, allowance and reserves, as a percent of total assets on a consolidated basis.

Net operating income – income excluding discretionary transactions such as gains (or losses) on the sale of investment securities and extraordinary items. Income taxes subtracted from operating income have been adjusted to exclude the portion applicable to securities gains (or losses).

Noncurrent assets – the sum of loans, leases, debt securities, and other assets that are 90 days or more past due, or in nonaccrual status.

Noncurrent loans and leases – the sum of loans and leases 90 days or more past due, and loans and leases in nonaccrual status.

Number of institutions reporting – the number of institutions that actually filed a financial report.

New reporters – insured institutions filing quarterly financial reports for the first time.

Other borrowed funds – federal funds purchased, securities sold with agreements to repurchase, demand notes issued to the U.S. Treasury, FHLB advances, other borrowed money, mortgage indebtedness, obligations under capitalized leases and trading liabilities, less revaluation losses on assets held in trading accounts.

Other real estate owned – primarily foreclosed property. Direct and indirect investments in real estate ventures are excluded. The amount is reflected net of valuation allowances. For institutions that filed a *Thrift Financial Report* (TFR), the valuation allowance subtracted also includes allowances for other repossessed assets. Also, for TFR filers the components of other real estate owned are reported gross of valuation allowances. (TFR filers began filing Call Reports effective with the quarter ending March 31, 2012.)

Percent of institutions with earnings gains – the percent of institutions that increased their net income (or decreased their losses) compared to the same period a year earlier.

“Problem” institutions – Federal regulators assign a composite rating to each financial institution, based upon an evaluation of financial and operational criteria. The rating is based on a scale of 1 to 5 in ascending order of supervisory concern. “Problem” institutions are rated either a “4” or “5,” depending upon the degree of risk and supervisory concern. The number of “problem” institutions is based on FDIC composite ratings. Prior to March 31, 2008, for institutions whose primary federal regulator was the OTS, the OTS composite rating was used.

Recourse – an arrangement in which a bank retains, in form or in substance, any credit risk directly or indirectly associated with an asset it has sold (in accordance with generally accepted accounting principles) that exceeds a pro rata share of the bank’s claim on the asset. If a bank has no claim on an asset it has sold, then the retention of any credit risk is recourse.

Reserves for losses – the allowance for loan and lease losses on a consolidated basis.

Restructured loans and leases – loan and lease financing receivables with terms restructured from the original contract. Excludes restructured loans and leases that are not in compliance with the modified terms.

Retained earnings – net income less cash dividends on common and preferred stock for the reporting period.

Return on assets – bank net income (including gains or losses on securities and extraordinary items) as a percentage of average total (consolidated) assets. The basic yardstick of bank profitability.

Return on equity – bank net income (including gains or losses on securities and extraordinary items) as a percentage of average total equity capital.

Risk-weighted assets – assets adjusted for risk-based capital definitions which include on-balance-sheet as well as off-balance-sheet items multiplied by risk-weights that range from zero to 200 percent. A conversion factor is used to assign a balance sheet equivalent amount for selected off-balance-sheet accounts.

Securities – excludes securities held in trading accounts. Banks' securities portfolios consist of securities designated as "held-to-maturity" (reported at amortized cost (book value)), securities designated as "available-for-sale" (reported at fair (market) value), and equity securities with readily determinable fair values not held for trading.

Securities gains (losses) – realized gains (losses) on held-to-maturity and available-for-sale securities, before adjustments for income taxes. *Thrift Financial Report* (TFR) filers also include gains (losses) on the sales of assets held for sale. (TFR filers began filing Call Reports effective with the quarter ending March 31, 2012.)

Seller's interest in institution's own securitizations – the reporting bank's ownership interest in loans and other assets that have been securitized, except an interest that is a form of recourse or other seller-provided credit enhancement. Seller's interests differ from the securities issued to investors by the securitization structure. The principal amount of a seller's interest is generally equal to the total principal amount of the pool of assets included in the securitization structure less the principal amount of those assets attributable to investors, i.e., in the form of securities issued to investors.

Small Business Lending Fund – The Small Business Lending Fund (SBLF) was enacted into law in September 2010 as part of the Small Business Jobs Act of 2010 to encourage lending to small businesses by providing capital to qualified community institutions with assets of less than \$10 billion. The SBLF Program is administered by the U.S. Treasury Department (<https://home.treasury.gov/policy-issues/small-business-programs/small-business-lending-fund>).

Under the SBLF Program, the Treasury Department purchased noncumulative perpetual preferred stock from qualifying depository institutions and holding companies (other than Subchapter S and mutual institutions). When this stock has been issued by a depository institution, it is reported as "Perpetual preferred stock and related surplus." For regulatory capital purposes, this noncumulative perpetual preferred stock qualifies as a component of tier 1 capital. Qualifying Subchapter S corporations and mutual institutions issue unsecured subordinated debentures to the Treasury Department through the SBLF. Depository institutions that issued these debentures report them as "Subordinated notes and debentures." For regulatory capital purposes, the debentures are eligible for inclusion in an institution's tier 2 capital in accordance with their primary federal regulator's capital standards. To participate in the SBLF Program, an institution with outstanding securities issued to the Treasury Department under the Capital Purchase Program (CPP) was required to refinance or repay in full the CPP securities at the time of the SBLF funding. Any outstanding warrants that an institution issued to the Treasury Department under the CPP remain outstanding after the refinancing of the CPP stock through the SBLF Program unless the institution chooses to repurchase them.

Subchapter S corporation – A Subchapter S corporation is treated as a pass-through entity, similar to a partnership, for federal income tax purposes. It is generally not subject to any federal income taxes at the corporate level. This can have the effect of reducing institutions' reported taxes and increasing their after-tax earnings.

Trust assets – market value, or other reasonably available value of fiduciary and related assets, to include marketable securities and other financial and physical assets. Common physical assets held in fiduciary accounts include real estate, equipment, collectibles, and household goods. Such fiduciary assets are not included in the assets of the financial institution.

Unearned income and contra accounts – unearned income for *Call Report* filers only.

Unused loan commitments – includes credit card lines, home equity lines, commitments to make loans for construction, loans secured by commercial real estate, and unused commitments to originate or purchase loans. (Excluded are commitments after June 2003 for originated mortgage loans held for sale, which are accounted for as derivatives on the balance sheet.)

Yield on earning assets – total interest, dividend, and fee income earned on loans and investments as a percentage of average earning assets.
