Proposed Project: National Blood
 Collection and Utilization Survey—
 Reinstatement without Change— OMB
 No. 0990-0313—The Office of the
 Advisory Committee on Blood Safety
 and Availability.

Abstract: The NBCUS is a biennial
 survey of the blood collection and
 utilization community to produce
 reliable and accurate estimates of
 national and regional collections,
 utilization and safety of all blood
 products.

The objective of the NBCUS is to
 produce reliable and accurate estimates
 of national and regional collections,
 utilization, and safety of all blood
 products—red blood cells, fresh frozen
 plasma, and platelets, as well as related
 cellular therapy products. This survey
 will significantly improve the federal
 government's capacity to understand the
 dynamics of blood supply, safety and
 availability, and to provide a
 quantitative basis for assessing strategic
 and regulatory agendas. An important
 purpose of the 2011 survey is to help
 the federal government continue to
 monitor trends in blood availability
 since a variety of factors have come to
 play that have reduced the number of
 people eligible to give blood and, as
 stated in the evolving National Strategic
 Plan for Blood, this information is
 critical to ensure an adequate supply of
 safe blood in the United States.
