Risk-Based Capital Guidelines; Capital Adequacy Guidelines; Capital Maintenance: Regulatory Capital; Impact of Modifications to Generally Accepted Accounting Principles; Consolidation of Asset-Backed Commercial Paper Programs; and Other Related Issues

AGENCIES: Office of the Comptroller of the Currency, Department of the Treasury; Board of Governors of the Federal Reserve System; Federal Deposit Insurance Corporation; and Office of Thrift Supervision, Department of the Treasury.

ACTION: Final rule.

SUMMARY: The Office of the Comptroller of the Currency (OCC), Board of Governors of the Federal Reserve System (Board), Federal Deposit Insurance Corporation (FDIC), and the Office of Thrift Supervision (OTS) (collectively, the agencies) are amending their general risk-based and advanced risk-based capital adequacy frameworks by adopting a final rule that (1) eliminates the exclusion of certain consolidated asset-backed commercial paper programs from risk-weighted assets; (2) provides for an optional two-

quarter implementation delay followed by an optional two-quarter partial implementation of the effect on risk-weighted assets that will result from changes to U.S. generally accepted accounting principles from the Financial Accounting Standard Board's Statement of Financial Accounting Standards No. 166, Accounting for Transfers of Financial Assets, an Amendment of FASB Statement No. 140 (FAS 166), and Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R) (FAS 167); (3) provides for an optional two-quarter delay, followed by an optional two-quarter phase-in, of the application of the agencies' regulatory limit on the inclusion of the allowance for loan and lease losses (ALLL) in tier 2 capital for the portion of the ALLL associated with the assets a banking organization consolidates as a result of FAS 167; and (4) provides a reservation of authority to permit the agencies to require a banking organization to treat entities that are not consolidated under accounting standards as if they were consolidated for risk-based capital purposes, commensurate with the risk relationship of the banking organization to the structure. The delay and subsequent phase-in periods of the implementation will apply only to the agencies' risk-based capital requirements, not the leverage ratio requirement.

DATES: This rule is effective [INSERT DATE 60 DAYS AFTER DATE OF PUBLICATION IN FEDERAL REGISTER]. Banking organizations may elect to comply with this final rule as of the beginning of their first annual reporting period that begins after November 15, 2009.

SUPPLEMENTARY INFORMATION:

I. Background

A. Changes to U.S. Accounting Standards and the Effect on Regulatory Capital

On June 12, 2009, the Financial Accounting Standard Board (FASB) issued FAS 166 and FAS 167. Among other things, FAS 166 and FAS 167 modified the accounting treatment under U.S. generally accepted accounting principles (GAAP) of certain structured finance transactions involving a special purpose entity.¹ FAS 166 and FAS 167 are effective as of the beginning of a banking organization's² first annual reporting period that begins after November 15, 2009 (implementation date), including interim periods therein, and for interim and annual periods thereafter.³

The agencies' risk-based measures for banking organizations (the general risk-based capital rules⁴ and the advanced approaches rules,⁵ collectively the risk-based capital rules) establish capital requirements intended to reflect the risks associated with on-balance sheet exposures as well as off-balance sheet exposures, such as guarantees, commitments, and derivative transactions. The agencies use GAAP as the initial basis for determining whether an exposure is treated as on- or off-balance sheet for risk-based capital purposes. Additionally, the agencies' leverage measure (leverage rule)⁶ uses consolidated on-balance sheet assets as the basis for setting minimum capital requirements that are intended to limit the degree to which a banking organization can leverage its equity capital base.

¹ The accounting treatment of these transactions and structures was previously governed by the FASB's Statement of Financial Accounting Standards No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities (2000) (FAS 140) and FASB Interpretation No. 46(R), Consolidation of Variable Interest Entities (2003) (FIN 46(R)). References herein to FASB Statements of Financial Accounting Standards and Interpretations are to the FASB's "pre-Codification standards" documents and do not reflect modifications that have been made by the FASB as the related text is incorporated in the FASB Accounting Standards Codification that FASB announced on July 1, 2009.

² Unless otherwise indicated, the term "banking organization" includes banks, savings associations, and bank holding companies (BHCs). The terms "bank holding company" and "BHC" refer only to bank holding companies regulated by the Board.

³ See relevant provisions in FAS 166, paragraphs 5-7, and FAS 167, paragraphs 7-10.

⁴ 12 CFR part 3, appendix A (OCC); 12 CFR parts 208 and 225, appendix A (Board); 12 CFR part 325, appendix A (FDIC); and 12 CFR part 567, subpart B (OTS). The risk-based capital rules generally do not apply to BHCs with \$500 million or less in consolidated assets.

⁵ 12 CFR part 3, appendix C (OCC); 12 CFR part 208, appendix F; and 12 CFR part 225, appendix G (Board); 12 CFR part 325, appendix D (FDIC); 12 CFR 567, Appendix C (OTS).

⁶ 12 CFR part 3 (OCC); 12 CFR part 208, appendix B and 12 CFR part 225 appendix D (Board); 12 CFR 325.3 (FDIC); 12 CFR 567.8 (OTS).

FAS 166 and FAS 167, among other things, establish new standards for reporting companies' transfers of assets to special purpose entities, known as variable interest entities (VIEs) under GAAP, and for consolidating VIEs. Under FAS 167, banking organizations may be required to consolidate assets, liabilities, and equity in certain VIEs that were not consolidated under the standards that FAS 166 and FAS 167 replaced. Most banking organizations will be required to implement the new consolidation standards as of January 1, 2010.⁷ The agencies' risk-based capital and leverage rules (collectively, the capital rules) generally would require a banking organization to include assets held by newly consolidated VIEs in its leverage and risk-based capital ratios determined under those rules. At the same time, a consolidating banking organization may need to establish an ALLL⁸ to cover estimated credit losses on the assets consolidated under FAS 167. As a consequence, absent a change in the capital rules and all other factors remaining constant, both the leverage and risk-based capital ratios of banking organizations that must consolidate due to FAS 167 VIEs that they did not previously consolidate are likely to fall by varying amounts.

B. Notice of Proposed Rulemaking

On September 15, 2009, the agencies published a notice of proposed rulemaking (NPR) that solicited information and views from the public on the effect the accounting changes mandated by FAS 166 and FAS 167 would have on regulatory capital, the appropriateness of adjusting the risk-based capital treatment of some classes of assets that would be consolidated by banking organizations as a result of their implementation of FAS 167, and the utility of a phase-in of the regulatory capital effects of the accounting changes, among other issues.⁹

In addition, the NPR proposed modifying the agencies' risk-based capital rules by eliminating provisions that permit a banking organization to exclude assets of consolidated asset-backed commercial paper (ABCP) programs from risk-weighted assets (ABCP exclusion) and instead assess a risk-based capital requirement against any

⁷ While most banking organizations affected by FAS 166 and FAS 167 will implement the new standards on January 1, 2010, some banking organizations use annual reporting periods other than the calendar year and will implement the new standards at the beginning of their first annual reporting period that starts after November 15, 2009.

⁸ Under GAAP, an ALLL should be recognized when events have occurred indicating that it is probable that an asset has been impaired or that a liability has been incurred as of the balance sheet date and the amount of the loss can be reasonably estimated. Furthermore, under the risk-based capital rules, the ALLL is a component of tier 2 capital and, therefore, included in the numerator of the total risk-based capital ratio. However, the amount of the ALLL that may be included in tier 2 capital is limited to 1.25 percent of gross risk-weighted assets under the risk-based capital rules. 12 CFR part 3, appendix A § 2(b)(1) (OCC); 12 CFR part 208, appendix A § II.A.2.a and 12 CFR part 225, appendix A § II.A.2.a (Board); 12 CFR part 325, appendix A § I.A.2.i. (FDIC); 12 CFR 567.5 (OTS).

⁹ 74 FR 47138 (September 15, 2009).

contractual exposures of the banking organization to such ABCP programs.¹⁰ The NPR also proposed eliminating an associated provision in the general risk-based capital rules (incorporated by reference in the advanced approaches) that excludes from tier 1 capital the minority interest in a consolidated ABCP program not included in a banking organization's risk-weighted assets.¹¹ In addition, the NPR proposed a new reservation of authority for the agencies' risk-based capital rules to permit a banking organization's primary federal supervisor to treat entities that are not consolidated under GAAP as if they were consolidated for risk-based capital purposes, commensurate with the risk relationship of the banking organization to the entity.

Collectively, the agencies received approximately 41 comment letters from banking organizations, banking industry associations, mortgage companies, investment and asset management firms, and individuals. Commenters generally agreed with the agencies' preliminary identification of VIEs that are likely to be consolidated by banking organizations as a result of FAS 167. Most notably, these included VIEs associated with (1) ABCP programs; (2) revolving securitizations structured as master trusts, including credit card and home equity line of credit (HELOC) securitizations; (3) certain mortgage loan securitizations not guaranteed by the U.S. government or a U.S. government-sponsored agency; and (4) certain term loan securitizations in which a banking organization retains a residual interest and servicing rights, including some student loan and automobile loan securitizations.¹²

A number of commenters asserted that the implementation of FAS 166 and FAS 167 without changes to the agencies' risk-based capital and leverage rules would increase regulatory capital requirements for banking organizations, as would the

¹⁰ 12 CFR part 3, appendix A, § 3(a)(5) and 12 CFR part 3, appendix C § 42(l) (OCC); 12 CFR part 208, appendix A, § III.B.6.b and appendix F § 42(l); and 12 CFR part 225, appendix A, § III.B.6.b and appendix G § 42(l) (Board); 12 CFR part 325, appendix A, § II.B.6.b and 12 CFR part 325, appendix D, § 42(l) (FDIC); 12 CFR 567.6(a)(2)(vi)(E) and 12 CFR part 567, appendix C, § 42(l) (OTS).

¹¹ 12 CFR part 3, appendix A, § 2(a)(3)(ii) (OCC); 12 CFR parts 208 and 225, appendix A, § II A.1.c (Board); 12 CFR part 325, appendix A, § I.A.1.(d) (FDIC); 12 CFR 567.5(a)(iii)(OTS). See 12 CFR part 3, appendix C § 11(a) (OCC); 12 CFR part 208, appendix F, § 11(a) and 12 CFR part 225, appendix G, § 11(a) (Board); 12 CFR part 325, appendix D, § 11(a) (FDIC); 12 CFR part 567, appendix C, § 11(a) (OTS).

¹² Many commenters also expressed concern regarding the possibility that VIEs used for asset management, money market, and private equity investments where the fund manager earns more than a non-significant performance fee could be subject to consolidation under FAS 167, and urged the agencies to implement alternative regulatory capital treatments for such funds. On December 4, 2009, FASB proposed that the application of FAS 167 to such entities be deferred for an undetermined period of time. As a result, both risk-based and leverage capital requirements related to these assets would remain unchanged for the duration of the deferral. The agencies are taking no action with respect to these assets at this time.

proposed elimination of the ABCP exclusion. They argued this would have a negative and procyclical impact on financial markets and the economy, particularly as banking organizations recover from the recent financial crises and recession, by increasing the cost of and ultimately curtailing lending. Most commenters also argued that there would be negative competitive equity effects from increased regulatory capital requirements that would disadvantage U.S. banking organizations relative to foreign and domestic competitors not subject to similarly high capital requirements. A few commenters asserted that competitive equity concerns were most severe with respect to foreign banking competitors. Some commenters also expressed concern that higher capital requirements would provide incentives for banking organizations to conduct more activity in less stringently regulated foreign jurisdictions.

Many commenters also argued that such implementation would inappropriately align regulatory capital requirements with GAAP's control-based approach to consolidation, in contrast to the credit-risk focus of the agencies' risk-based capital rules. Commenters overwhelmingly supported a delay and/or phase-in of the regulatory capital requirements associated with the implementation of FAS 167 for a period of up to three years. A number of commenters asserted that the proposed elimination of the exclusion of consolidated ABCP program assets from risk-weighted assets would lead to an inappropriate capital requirement for ABCP programs with certain structural features.

II. Final Rule

A. Transition Mechanism for Risk-Based Capital Requirements Associated with the Implementation of FAS 166 and FAS 167

In the final rule, the agencies are instituting a transition mechanism consisting of: (1) an optional two-quarter delay, through the end of the second quarter after the implementation date of FAS 166 and FAS 167 for a banking organization, of recognition of the effect on risk-weighted assets and ALLL includable in tier 2 capital that results from a banking organization's implementation of FAS 167 and (2) an optional phase-in, for a banking organization that has opted for the delay, of those effects over the next two quarters.¹³ A banking organization that chooses to implement this transition mechanism must apply it to all relevant VIEs. The effect of the transition mechanism on a banking organization's risk-based capital ratios would be reflected in the regulatory capital information the organization reports in its regulatory reports¹⁴ for the four calendar quarter-end regulatory report dates following the banking organization's implementation date.

¹³ For example, if a banking organization has a calendar year reporting period, the optional two-quarter delay period ends June 30, 2010, and the optional phase-in period ends December 31, 2010.

¹⁴ For banks, Schedule RC-R of the Consolidated Reports of Condition and Income (Call Report); for savings associations, Schedule CCR of the Thrift Financial Report (TFR); and for bank holding companies, Schedule HC-R of the Consolidated Financial Statements for Bank Holding Companies (FR Y-9C).

In the NPR, the agencies requested comment on any significant costs or burdens, or other relevant considerations that the agencies should consider with respect to phasing-in the impact on capital requirements relating to banking organizations' implementation of FAS 167. The agencies also requested specific and detailed rationales, evidence, and data in support of commenters' positions and requested comment on one potential four-quarter phase-in method.

Almost every commenter asserted that a four-quarter phase-in of any additional capital requirements resulting from banking organizations' implementation of FAS 167 would be insufficient. The majority of commenters requested at least a three-year phase-in period. The commenters offered three primary rationales for a longer phase-in period: (1) any shorter phase-in would unfairly penalize banking organizations given their already established businesses, practices, and programs conceived in good faith to comply with the current capital standards; (2) banking organizations need a longer period to phase out structures designed for current regulatory capital treatment and/or adopt the more risk-sensitive capital treatment of the advanced approaches rules; and (3) corporate financing and capital planning covers more than a four-quarter horizon. In addition, some commenters asserted that the cost of raising new capital in the current economic environment is high. Several commenters requested, in addition to the increased phase-in time, a six-month delay on the effect of implementation of FAS 167 on capital requirements, during which the agencies would further study the effects of FAS 166 and FAS 167 implementation, including the appropriate regulatory capital treatment for VIEs consolidated as a result of FAS 167 implementation. A few commenters indicated that there should be no phase-in or that any phase-in should be as short as possible, on the grounds that any phase-in would delay needed changes.

The agencies have long maintained that a banking organization should hold capital commensurate with the level and nature of the risks to which it is exposed. As described below, the agencies believe that the effects of FAS 166 and FAS 167 on banking organizations' risk-based capital ratios will result in regulatory capital requirements that better reflect, in many cases, banking organizations' exposure to credit risk. As a result, the agencies do not believe it is appropriate for banking organizations to delay recognizing VIEs consolidated under FAS 167 and the risks associated with them in their risk-based capital ratios for several years, as some commenters proposed. However, as discussed below, in order to avoid abrupt adjustments that could undermine or complicate government actions to support the provision of credit to U.S. households and businesses in the current economic environment, the agencies are providing banking organizations with an optional two-quarter implementation delay followed by an optional two-quarter partial implementation of the effect of FAS 167 on risk-weighted assets and ALLL includable in tier 2 capital.

Many commenters asserted that banking organizations' implementation of FAS 166 and FAS 167 without a change to the regulatory capital rules would decrease the volume and increase the cost of lending to consumers and businesses. Commenters did not, however, provide adequate empirical analyses and projections of this impact. The agencies note that both the supply of and demand for credit has decreased over recent quarters due to many factors, including household, business, and financial sector

deleveraging. As described in the NPR, affected banking organizations' risk-based and leverage capital ratios likely will decrease with their implementation of FAS 166 and FAS 167. However, based on public disclosures by some banking organizations and supervisory information, including the Supervisory Capital Assessment Program (SCAP),¹⁵ risk-based and leverage capital ratios at the largest banking organizations (the banking organizations most affected by FAS 166 and FAS 167) will remain substantially in excess of regulatory minimums. The agencies thus believe that, based on available information, these banking organizations will not encounter an immediate or near-term need to decrease lending or raise substantial amounts of new capital for risk-based capital purposes related to the incremental effects of this final rule. In addition, smaller banking organizations, including community banking organizations, generally did not raise concerns about an adverse impact on smaller banking organizations from the implementation of FAS 166 and FAS 167.

Although the agencies believe that a banking organization's implementation of FAS 166 and FAS 167 will result in regulatory capital requirements that more appropriately reflect risks to which the banking organization is exposed, the agencies also recognize that government initiatives may affect the securitization market in the near term. Several government programs supporting the securitization market, including the Commercial Paper Funding Facility and the non-commercial mortgage-backed securities portion of the Term Asset-Backed Securities Loan Facility, are scheduled to terminate in the first quarter of 2010. Moreover, the Congress and financial regulators, including the agencies, are considering a number of legislative and regulatory changes that would affect securitization activities. Because the agencies cannot fully assess the combined impact of these potential changes on the securitization market, and because securitization remains an important source of funding for banking organizations, the agencies are providing in the final rule an optional transition mechanism that permits a banking organization to phase in the impact of FAS 167 on its risk-weighted assets and ALLL includable in tier 2 capital.

The transition mechanism consists of an optional two-quarter delay in implementation followed by an optional two-quarter partial implementation of the effect of FAS 167 on risk-weighted assets and ALLL includable in tier 2 capital.¹⁶ The timing

¹⁵ The SCAP was a supervisory exercise conducted in the first half of 2009 to determine if the 19 largest banking organizations (the banking organizations most affected by FAS 166 and FAS 167 due to the volume of their securitization activities) held regulatory capital sufficient to absorb losses under a specified adverse scenario. The exercise included consideration of estimates of the impact of FAS 166 and FAS 167 on banking organizations' balance sheets and resulting risk-based capital requirements. Further information about SCAP results is available at <
<http://www.federalreserve.gov/bankinfo/scap.htm>>.

¹⁶ One commenter expressed concern about a statutory provision in the Home Owner's Lending Act (HOLA), uniquely applicable to savings associations, which limits the amount of consumer loans to 35 percent of the amount of a savings association's total

of the transition reflects the termination dates of the government programs supporting the securitization market and the potential for uncertainty regarding securitization reform initiatives to extend through 2010. The delay and partial implementation periods also provide time for financial market participants and the agencies to observe the effects of these changes on bank lending, financial markets and the overall economy. The transition mechanism is optional because it requires a banking organization to maintain two sets of records for the duration of the delay and partial implementation periods — to account for affected VIEs for financial reporting under GAAP and separately to track the implementation-date contractual exposures to these VIEs and the ALLLs attributable to their assets for regulatory capital reporting — a dual recordkeeping requirement that banking organizations have expressed concerns about in the past.

A banking organization generally would adopt the transition mechanism as of the date it implements FAS 166 and FAS 167, which is the starting date of its first annual reporting period beginning after November 15, 2009.

1. Transition for risk-weighted assets.

For the banking organization's first two quarters after the date it implements FAS 166 and FAS 167 (exclusion period), including for the two calendar quarter-end regulatory report dates within the exclusion period, the banking organization may choose to exclude from risk-weighted assets those assets held by VIEs that the banking organization must consolidate as a result of implementing FAS 167, provided that (1) the VIE existed prior to the banking organization's implementation date and (2) the banking organization did not consolidate the VIE on its balance sheet for calendar quarter-end regulatory report dates prior to the implementation date. A banking organization that applies this exclusion to any VIE must apply the exclusion to all VIEs that qualify for the exclusion.

During the exclusion period, the banking organization may also exclude from risk-weighted assets those assets held by VIEs that are consolidated ABCP programs (ABCP program VIEs), provided that the banking organization is the sponsor of the ABCP program and the banking organization consolidated the ABCP program VIE onto its balance sheet under GAAP and excluded the VIE's assets from its risk-weighted assets prior to the implementation date. A banking organization that applies this exclusion to any ABCP program VIE must apply the exclusion to all ABCP program VIEs that qualify for the exclusion.

A banking organization electing to exclude assets of any VIE pursuant to the transition mechanism described above may not, however, exclude from risk-weighted assets the assets of a VIE to which the banking organization has provided recourse through credit enhancement beyond any contractual obligation to support assets it has sold (implicit support).

assets. OTS notes that any provision under HOLA would be treated consistent with the transition mechanism.

During the exclusion period, the banking organization would include in risk-weighted assets an amount equal to the risk-weighted assets it would have been required to calculate for its contractual exposures to these VIEs on the implementation date, including direct-credit substitutes, recourse obligations, residual interests, liquidity facilities, and loans, under the risk-based capital rules prior to its implementation of FAS 166 and FAS 167. The agencies expect a banking organization would calculate risk-weighted assets using a methodology similar to the methodology used to calculate the risk weights of exposures to ABCP programs pursuant to the ABCP exclusion.

The amount of risk-weighted assets associated with assets held by VIEs subject to exclusion as described above as of the implementation date of FAS 166 and FAS 167 is the exclusion amount. For the third and fourth quarters after the implementation date (phase-in period), including for the two calendar quarter-end regulatory report dates within those quarters, a banking organization that has adopted the optional transition mechanism for the first two quarters may exclude from risk-weighted assets 50 percent of the exclusion amount. However, the banking organization may not include in risk-weighted assets an amount less than the aggregate risk-weighted assets it held based on its contractual exposures to these VIEs as of the implementation date, had the VIEs not been consolidated. This floor on risk-weighted assets ensures that, notwithstanding these transition provisions, a banking organization always calculates risk-weighted assets in a manner that at a minimum reflects its contractual risk exposure to its consolidated VIEs as of the implementation date.

2. Transition for Allowance for Loan and Lease Losses.

During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a banking organization that adopts the transition mechanism for risk-weighted assets described in section II.A.1. above by excluding assets of consolidated VIEs from risk-weighted assets may also include without limit in tier 2 capital the full amount of the ALLL calculated as of the implementation date that is attributable to the assets it excluded pursuant to the transition mechanism for risk-weighted assets (inclusion amount). That is, the ALLL included in tier 2 capital pursuant to this transition mechanism during the exclusion period would not be subject to (1) the 1.25 percent of risk-weighted assets limit (1.25 percent limit) on the ALLL in tier 2 capital contained in the agencies' general risk-based capital rules;¹⁷ or (2) the limits in section 13 of the agencies' advanced approaches rules on including ALLL in tier 2 capital.¹⁸

During the phase-in period, including for the two calendar quarter-end regulatory report dates within the phase-in period, a banking organization that has adopted the

¹⁷ See footnote 8.

¹⁸ 12 CFR part 3, appendix C § 13(a)(2) and (b) (OCC); 12 CFR part 208, appendix F § 13(a)(2) and (b); and 12 CFR part 225, appendix G § 13(a)(2) and (b) (Board); 12 CFR part 325, appendix D, § 13(a)(2) and (b) (FDIC); 12 CFR part 567, appendix C, § 13(a)(2) and (b) (OTS).

transition mechanism for risk-weighted assets during the phase-in period may include in tier 2 capital without limit 50 percent of the inclusion amount. The banking organization's ALLL in excess of 50 percent of the inclusion amount may be included in tier 2 capital subject to the 1.25 percent limit. As with the transition for risk-weighted assets, a banking organization may not adopt the transition mechanism for the ALLL for VIEs that it must consolidate after implementing FAS 167 to which it has provided implicit support. Therefore, a banking organization must count toward the 1.25 percent limit all ALLL it includes in tier 2 capital that is associated with assets of a VIE to which it has provided implicit support.

B. Regulatory Capital Requirements Associated with the Implementation of FAS 166 and FAS 167

1. Risk-based capital rules.

The agencies have concluded that it is appropriate to provide an optional delay of and then phase in the effect of banking organizations' implementation of FAS 166 and FAS 167 on risk-weighted assets and the ALLL included in tier 2 capital as described above. However, after careful consideration and analyses of commenters' arguments and supporting information, as well as banking organizations' financial disclosures, and supervisory data and analyses, the agencies have concluded that there is insufficient justification to warrant a permanent modification of the risk-based capital rules in response to banking organizations' implementation of FAS 166 and FAS 167.

a. Risk-weighted assets.

As the agencies noted in the NPR, the qualitative analysis required under FAS 167, as well as enhanced requirements for recognizing transfers of financial assets under FAS 166, converge in many respects with the agencies' assessment of a banking organization's ongoing credit risk exposure to the VIEs that are required to be consolidated under FAS 167. Experience from the recent financial crisis demonstrates that credit risk exposure of sponsoring banking organizations to such structures (and to the assets of these structures) has in fact been greater than the agencies previously estimated, and more associated with non-contractual risks, including reputational risk, than the agencies had previously anticipated. In the NPR, the agencies noted situations in which banking organizations provided implicit support to some securitization structures, revolving structures in particular, to reduce the likelihood that senior securities of the structures would experience credit ratings downgrades.¹⁹ These examples were intended to demonstrate that risk-based capital requirements based solely on a banking

¹⁹ Typical structures of this type include securitizations that are backed by credit card or HELOC receivables, single- and multi-seller ABCP conduits, and structured investment vehicles.

organization's contractual exposure may underestimate the true exposure of a sponsoring banking organization to the credit risk of securitization structures and other VIEs.²⁰

In the NPR, the agencies sought specific views from commenters, with supporting data and other documentation, regarding the types of VIEs and other special purpose entities that are more or less likely to elicit implicit support. The agencies also sought comment on any types of consolidated VIEs that might merit a different risk-based capital treatment than that which will result from the implementation of FAS 166 and FAS 167 without any change to regulatory capital requirements, together with a detailed explanation and supporting empirical analysis of why the features and characteristics of these structure types merit an alternative treatment, how the risks to the consolidating banking organization of the structures should be measured, and what an appropriate alternative capital treatment would be.

Many commenters identified reputational and operational risks as most likely to induce a banking organization to provide implicit support to a VIE. Some commenters noted that certain banking organizations did not follow their peers in providing implicit support during the recent crisis despite reputational risks. However, commenters generally argued that the risk-based capital rules should be modified to mitigate the effect of FAS 166 and FAS 167 on risk-based capital requirements, taking into account risks borne by third-party investors in VIEs; a substantial number of commenters asserted that risk-based capital requirements should be limited to a banking organization's contractual exposure to VIEs consolidated under FAS 167. Other commenters suggested that the agencies consider using a sliding-scale to risk weight assets subject to consolidation under FAS 167 based on the likelihood of the VIE holding the assets receiving implicit support, as demonstrated by historical experience. Some commenters suggested an implicit support trigger approach that would require higher capital requirements based on a decrease in a VIE's excess spread (that is, the amount of income the VIE receives from assets in excess of that it pays to holders of its obligations), deterioration in VIE asset quality, downward changes in the credit ratings of the VIE's obligations, or other adverse credit events.

Many commenters recommended an approach to risk weighting assets held by consolidated VIEs that would consider each structure independently, calculate a banking organization's "net exposure" to the structure by subtracting third-party investor interests in the structure from the structure's total assets, and then consider the appropriate risk weight to be applied to the resulting net exposure based on the risk characteristics of the structure. Some commenters similarly suggested the agencies adjust risk weights for

²⁰ Some commenters expressed concern that the accounting changes coupled with the agencies' proposal would result in duplicative capital requirements and excessive regulatory capital being held on a system-wide basis. The agencies recognize that there will be some overlap in regulatory capital held by sponsoring and investing banking organizations in relation to the same assets. However, the agencies believe this overlap results in a fair reflection of the risks to which sponsoring and investing banking organizations are exposed on an individual basis.

securitized assets case-by-case on the basis of credit risk mitigation instruments supporting the assets, or include in regulatory capital some subordinated debt instruments issued by consolidated VIEs. Others argued that the agencies should separate regulatory capital reporting from GAAP when establishing regulatory capital requirements for banking organizations' exposures to VIEs and look to the way banking organizations manage VIE exposures internally to determine treatment as "on"- or- "off" balance sheet for regulatory capital purposes. Some commenters suggested that the size and risk profile of a banking organization should determine capital requirements for consolidated assets. Other commenters suggested the agencies develop risk weights for consolidated VIEs based on the agencies' guidance on synthetic securitizations. With regard to specific types of structures, many commenters asserted that certain multi-seller ABCP conduits (as discussed further below) and non-revolving, amortizing asset securitizations with certain features, such as term residential mortgage-backed securities structures, should receive more favorable capital treatment based on their low historical loss levels to sponsoring banking organizations or low likelihood of implicit support. Some commenters also requested the agencies provide capital relief for consolidated residential and commercial mortgage-backed securities structures in order to aid the real estate market.

Although commenters provided some empirical data in support of their arguments for favorable treatment of ABCP conduits (as discussed below), they provided much less data in support of other proposed alternative risk-based capital treatments. Commenters provided some examples of structural features (such as tax consequences) that may effectively minimize the possibility that a sponsoring banking organization will provide implicit support to certain structures. They did not, however, provide an explicit set of criteria, supported by broad-based empirical evidence, that the agencies could use to identify structures with minimal likelihood of implicit support, particularly during times of financial market stress, nor did they identify alternative risk-based capital treatments that would appropriately identify and measure risk and allay the agencies' concerns regarding regulatory capital arbitrage (that is, the structuring of transactions to obtain lower regulatory capital requirements without a commensurate reduction in risk). Commenters also did not empirically demonstrate the degree of competitive harm relative to foreign banks and other competitors that banking organizations would likely suffer as a result of the regulatory capital effects of their implementation of FAS 166 and FAS 167.

The agencies therefore are not implementing modifications to the risk-based capital rules to provide an alternative risk-based capital treatment for assets that will be newly consolidated on a banking organization's balance sheet following implementation of FAS 166 and FAS 167. The agencies believe that the optional interim relief provided by this final rule, through the delay and phase-in of the effects of FAS 167 upon risk-based capital requirements as described above, will give a banking organization that elects the option adequate time to adjust its risk profiles to address competitive concerns and to plan to develop structural features needed for future transactions with due consideration to its regulatory capital profiles.

b. Qualifying total capital.

In the NPR, the agencies sought comment on whether securitized loans subject to consolidation on banking organizations' balance sheets under FAS 167 would be subject to the same ALLL provisioning process, including applicable loss rates, as similar loans that are not securitized. The agencies asked for comment on how banking organizations would reflect the benefits of risk sharing in cases where investors in VIEs holding such loans absorb realized credit losses, and for a quantification of such benefits and any other effects of loss sharing, wherever possible. The agencies also asked whether they should consider policy alternatives with regard to the ALLL provisioning process, including the limit on ALLL that may be included in tier 2 capital.

Commenters indicated that the ALLL provisioning process and amounts for loans held in VIEs consolidated under FAS 167 would be the same as for loans not held in VIEs. Commenters asserted that the addition to ALLL that would result from this consolidation would be significantly greater than the actual losses contractually borne by the consolidating banking organization and would distort the relationship of the ALLL to the contractual risk of the consolidating banking organization to the assets held in the affected VIEs. Commenters further noted that, because additions to ALLL are deducted from retained earnings, the additions have the effect of reducing tier 1 capital.

Many commenters also noted that a higher ALLL would result in higher deferred tax assets (DTAs)²¹ and significantly affect banking organizations' regulatory capital ratios due to the capital rules' limits on including DTAs and the ALLL in regulatory capital.²² Many commenters requested that the agencies relax or eliminate the restrictions on including DTAs in tier 1 capital and the ALLL in tier 2 capital to mitigate the effects of consolidation due to the implementation of FAS 167 on regulatory capital. Specifically, some commenters recommended that the current limit (1.25 percent of risk-weighted assets) on the inclusion of the ALLL in tier 2 capital be increased, or that the entire ALLL related to the assets supporting VIEs' contractual obligations to third parties be included in tier 2 capital. Other commenters recommended that all ALLL related to losses contractually borne by third parties be eligible for inclusion in tier 1 capital. Commenters also noted that DTA balances will increase along with the ALLL, and recommended that either the current limit on DTAs in regulatory capital be removed or

²¹ Under GAAP, a DTA arises as a result of the recognition of an expense, in this case a loss provision, for financial reporting purposes in advance of its recognition as a deduction for income tax reporting purposes.

²² The agencies' risk-based capital rules limit the amount of DTAs dependent upon future taxable income that may be included in tier 1 capital to the lesser of two measures: (a) the amount of such DTAs that a banking organization could reasonably expect to realize within one year; or (b) ten percent of tier 1 capital that exists before the deduction of any disallowed servicing assets, any disallowed purchased credit card relationships, any disallowed credit-enhancing interest-only strips, and any disallowed deferred tax assets. See 12 CFR part 3, Appendix A, § 2(c)(1)(iii) (OCC); 12 CFR parts 208 and 225, Appendix A § II.B.4 (Board); 12 CFR § 325.5(g) (FDIC); and 12 CFR § 567.12(h) (OTS).

that all DTAs arising from ALLL related to the contractual loss absorption responsibilities of third parties to consolidated VIEs be included in tier 1 capital.

Under FAS 167, banking organizations have several financial reporting methods for recognizing the initial and ongoing consolidation of VIEs. One method is the fair value option, under which the assets of the VIE are recorded at fair value upon consolidation and no associated ALLL is recognized. Another method is to record newly consolidated assets at carrying value, which requires the establishment of an ALLL at a level appropriate to cover estimated credit losses.²³ Commenters suggested that by not relaxing the limit on the amount of ALLL that may be included in tier 2 capital, the agencies may encourage banking organizations to elect the fair value option for initial consolidation and/or ongoing accounting of affected consolidated VIEs.

The agencies have considered the concerns raised by commenters with respect to ALLL provisioning and DTAs created as a result of a banking organization's implementation of FAS 167. The agencies recognize the effects on tier 1 and tier 2 capital of the increased ALLL provisioning that will result from the consolidation of VIEs, and note the concern of some commenters that, in some cases, the provisioning may be disproportionate to the contractual risks borne by a banking organization with respect to the consolidated assets. However, as described above, a regulatory focus on contractual exposures may understate a banking organization's exposure to loss with regard to a VIE's assets that the banking organization must consolidate under FAS 167. Moreover, the agencies have determined that the current limits on ALLL are appropriate given the policy benefits of maintaining consistency among international capital standards absent compelling policy justifications for deviating from such standards. The limit of 1.25 percent of risk-weighted assets on the amount of the ALLL that a banking organization may include in tier 2 capital is a standard included in the first capital accord of the Basel Committee on Banking Supervision (Basel Accord).²⁴ The agencies also note that the current limit on DTAs that a banking organization may include in tier 1 capital is currently being considered as part of an international review of the components of regulatory capital, including deductions from capital. Moreover, commenters generally did not quantify the effect of FAS 167 on banking organizations' ALLLs and DTAs, and the agencies believe that it may be difficult to identify on an ongoing basis the ALLLs and DTAs associated only with assets newly subject to consolidation under FAS 167.

For the above reasons, the agencies have decided not to modify current limits on the inclusion of the ALLL in tier 2 capital and of DTAs in tier 1 capital. However, as described in section II.A.2., this final rule provides substantial transitional relief from the

²³ If a banking organization makes use of a practicability exception to record the assets at fair value as of the date FAS 166 and FAS 167 are first implemented, no associated ALLL is recognized on that date, but an associated ALLL will be recognized in future periods.

²⁴ Basel Committee on Banking Supervision, International Convergence of Capital Measurement and Capital Standards (1988), paragraph 21.

agencies' limits on including ALLL in tier 2 capital to a banking organization implementing FAS 167 that elects to adopt the transition mechanism for risk-weighted assets described in section II.A.1 above. The agencies believe that this relief, along with the transitional relief for risk-weighted assets included in the final rule, will aid banking organizations with capital planning as they implement FAS 166 and FAS 167 and adjust their business practices accordingly.

2. Leverage requirement.

Under the leverage rule, tier 1 capital is assessed against a measure of a banking organization's total on-balance sheet assets, net of ALLL and certain other exposures (leverage ratio).²⁵ Therefore, previously unconsolidated assets that now must be recognized on a banking organization's balance sheet as a result of its implementation of FAS 167 will increase the denominator of the banking organization's leverage ratio. The agencies have maintained the leverage rule as a balance-sheet assessment to supplement the risk-based capital rules and limit the degree to which a banking organization can leverage its equity capital base.²⁶ By design, the leverage rule does not recognize the risk profile of on-balance sheet exposures, including any risk transference associated with those exposures.

Some commenters suggested, based on the same risk transference arguments referred to above with respect to the risk-based capital rules, that the agencies exclude the assets of VIEs consolidated by banking organizations under FAS 167 from the leverage ratio. Other commenters urged that the agencies apply any phase-in of capital requirements associated with the implementation of FAS 167 to the leverage rule as well as the risk-based capital rules.

Having considered commenters' views, the anticipated impact of the implementation of FAS 166 and FAS 167 on banking organizations' leverage ratios, and the history and purpose of the leverage rule, the agencies have concluded that a delay or phase-in of the effect of consolidation under FAS 167 on the leverage rule is not appropriate or justified. The agencies believe the maintenance of the leverage rule as a balance-sheet assessment separate from the assessment of relative risk is a particularly important feature of prudential regulation and did not find evidence that the impact of FAS 166 and FAS 167 on banking organizations' leverage ratios justifies any alteration of the leverage rule.

C. Asset-Backed Commercial Paper Programs

In the NPR, the agencies proposed to eliminate the ABCP exclusion, which permits a banking organization to exclude from risk-weighted assets the assets of an

²⁵ See 12 CFR 3.2(a) (OCC); 12 CFR part 208, appendix B §II.b and 12 CFR part 225, appendix D, § II.b (Board); 12 CFR 325.2(m) (FDIC); 12 CFR 567.5(b)(4) (OTS).

²⁶ 12 CFR 3.6 (b) and (c) (OCC); 12 CFR part 208, appendix B, § I.a. and 12 CFR part 225, appendix D, § I.a (Board); 12 CFR 325.3 (FDIC); 12 CFR 567.5 (OTS).

ABCP program that the banking organization is required to consolidate under GAAP and for which the banking organization acts as sponsor. Under the current risk-based capital rules, a banking organization that elects the ABCP exclusion must instead assess risk-based capital requirements only on its contractual exposures to the program. As proposed in the NPR, as with all other consolidated VIEs, a banking organization would be required to include the assets of a consolidated ABCP program in risk-weighted assets. The agencies also proposed to eliminate the associated provision in the general risk-based capital rules (incorporated by reference in the advanced approaches) that excludes from tier 1 capital the minority interest in a consolidated ABCP program not included in a banking organization's risk-weighted assets.

Commenters generally opposed the proposal to eliminate the ABCP exclusion, particularly with respect to customer-focused, multi-seller ABCP programs (customer conduits). These commenters argued that such ABCP programs have a history of low loss rates (including during the recent financial crisis) and are important sources of funding for many businesses. These commenters also suggested that if the agencies eliminate the ABCP exclusion, the increased capital requirement associated with ABCP programs would increase the cost of funding and decrease credit availability for businesses that have used customer conduits to fund their operations, and therefore would adversely affect the economy and financial markets. Commenters also argued that the proposed elimination of the ABCP exclusion would raise significant competitive equity concerns for domestic banking organizations relative to foreign banks and domestic entities not subject to banking regulation. Some commenters additionally argued that the elimination of the ABCP exclusion would decrease incentives for banking organizations to transfer risk and might encourage banking organizations to invest in riskier, higher yield assets than those typically associated with consumer conduits. One commenter suggested that elimination of the ABCP exclusion was appropriate where liquidity facilities act as credit enhancement or where affiliates of the conduit sponsor are the largest holder of the ABCP obligations.

Additionally, in response to the agencies' proposal, a number of commenters suggested that the agencies allow early adoption of the advanced approaches rules' Internal Assessment Approach (IAA) methodology²⁷ for risk weighting these assets, or delay eliminating the ABCP exclusion until banking organizations could operate fully under the advanced approaches rules. Other commenters urged the agencies not to implement the proposal to eliminate the ABCP exclusion at all, particularly for customer conduits.

²⁷ See 12 CFR part 3, appendix C, (OCC) § 44; 12 CFR part 208, appendix F, § 44; and 12 CFR part 225, appendix G, § 44 (Board); 12 CFR part 325, appendix D, § 44 (FDIC); 12 CFR 567, Appendix C, § 44 (OTS). Qualifying banking organizations using the IAA may calculate risk-weighted asset amounts for securitization exposures (as defined in the advanced approaches rule) to qualifying ABCP programs by using an internal credit assessment process mapped to equivalent external ratings.

The agencies have weighed the concerns raised by commenters, as described above, related to the proposal to eliminate the ABCP exclusion from the risk-based capital rules, against the agencies' own concerns regarding the possibility of sponsors providing implicit support to ABCP programs and regulatory capital arbitrage, among others. The agencies acknowledge that customer conduits appear to present a lower risk of loss to the sponsoring banking organization relative to other ABCP programs. However, recent events have raised serious questions about the original rationale for allowing the exclusion of consolidated ABCP programs from risk-weighted assets. As the agencies noted in the NPR, the 2004 implementation of the ABCP exclusion was based on the agencies' belief that sponsoring banking organizations' risk exposure to these entities was limited to their contractual exposure. However, as a result of some banking organizations having provided implicit support to a number of ABCP programs they sponsored during the recent financial turmoil, the agencies have observed that the premise of a contractual limit on risk was incorrect for some ABCP programs. In addition, and notwithstanding commenters' assertions to the contrary, the agencies believe that the type of customer conduit advocated by commenters to be considered for preferential exclusion from risk-weighted assets cannot be distinguished from other ABCP programs to a degree of certainty that would effectively mitigate the risk of regulatory capital arbitrage. Furthermore, commenters did not describe the features and characteristics of customer conduits that would effectively mitigate the risk of a banking organization providing implicit support to sponsored structures under the broadest range of circumstances. The agencies are sensitive to competitive concerns and recognize that some ABCP programs include generally high credit-quality assets. However, given the absence of a workable alternative proposal that satisfactorily addresses the agencies' concerns about regulatory capital arbitrage and implicit support, the agencies have decided to eliminate as proposed the ABCP exclusion, subject to the delay and phase-in described above.

With respect to the recommendation that the agencies allow early adoption of the IAA, the agencies note that the IAA is applicable exclusively to a banking organization's exposures to off-balance sheet ABCP programs and not to a program's underlying assets when reported on balance sheet. Moreover, the IAA, like the ABCP exclusion, focuses on a banking organization's contractual exposures to an ABCP conduit. The IAA does not capture implicit support and thus an extension of the IAA to consolidated ABCP programs would not sufficiently reflect the risk to a sponsoring banking organization of such programs.

D. Reservation of Authority

The NPR proposed a new reservation of authority for the risk-based capital rules specifying that a banking organization's primary federal supervisor would have the authority to require the banking organization to treat an off-balance sheet VIE (or similar entity) as if it were consolidated onto the banking organization's balance sheet. The banking organization would have to hold capital against the entity's exposures for risk-based capital purposes if the primary federal supervisor determined that the banking organization's exposure or other relationship to the entity was not commensurate with the actual risk relationship of the banking organization to the entity.

The agencies received little comment with respect to the proposed reservation of authority. The few comments received regarding the proposed reservation of authority suggested that it be used in conjunction with recognition of contractual risk transfer. One commenter opposed the reservation of authority as proposed and requested that the agencies specify standards for the exercise of the authority. The agencies asked in the NPR if there are any features and characteristics of transactions not subject to consolidation on banking organizations' balance sheets under GAAP as modified by FAS 166 and FAS 167 that should be recognized as on-balance sheet exposures for regulatory capital purposes to more appropriately reflect risk. Commenters generally stated that they were not aware of any such transactions. Many commenters also asserted that such transactions were unlikely.

As stated in the NPR, the agencies believe the reservation of authority is essential to address instances when a banking organization structures a financial transaction with a VIE to avoid consolidation under FAS 167, and the resulting capital treatment is not commensurate with all risks of the banking organization to the VIE, including non-contractual risks. The agencies have therefore decided to incorporate the reservation of authority in their risk-based capital rules as proposed in the NPR.

E. Other Related Matters

1. Department of the Treasury's Home Affordable Mortgage Program.

In the NPR, the agencies solicited comment on whether banking organizations that service securitized residential mortgages, participate in the United States Department of the Treasury's Home Affordable Mortgage Program (HAMP), and receive certain incentive payments in connection with the program, would be required under FAS 167 to consolidate VIEs holding such mortgages solely due to loan modifications under HAMP. The agencies also asked if such consolidation were required, whether such assets should be included in regulatory capital requirements and what alternative capital treatment may be appropriate.

Commenters generally did not think that incentive payments under HAMP would independently trigger consolidation under FAS 167. Most also argued that if such consolidation were to occur as a result of actions related to or required by HAMP participation, regulatory capital treatment should be modified with respect to the relevant consolidated mortgage loan assets.

The agencies agree with commenters' assessment that it is unlikely that incentive payments under HAMP independently would cause servicers participating in HAMP to consolidate VIEs holding mortgage loans modified under HAMP. The agencies therefore do not see a basis for any modification of their capital requirements in relation to incentive payments made pursuant to HAMP.

2. Denial of Extension of Comment Period.

A few commenters requested that the agencies extend the NPR comment period. As noted above, the agencies received approximately 41 comments following the

publication of the NPR, which indicates that commenters had adequate time to express their views. Furthermore, the possible regulatory capital implications of FAS 166 and FAS 167 were publicly known for months prior to the NPR and several commenters expressed viewpoints on these matters to the agencies well before the publication of the NPR. The agencies therefore have concluded that the 30-day comment period provided adequate time for commenters to provide views to the agencies and deny requests to extend the NPR comment period.

VI. Regulatory Analysis

Riegle Community Development and Regulatory Improvement Act

Section 302 of Riegle Community Development and Regulatory Improvement Act²⁸ (RCDRIA) generally requires that regulations prescribed by federal banking agencies which impose additional reporting, disclosures or other new requirements on insured depository institutions take effect on the first day of a calendar quarter unless an agency finds good cause that the regulations should become effective sooner and publishes its finding with the rule. The effective date of this rule is [INSERT DATE 60 DAYS AFTER PUBLICATION IN THE FEDERAL REGISTER].²⁹ The agencies believe that it is important to make this final rule effective before banking organizations generally must calculate their regulatory risk-based capital ratios at the end of the first quarter of 2010. This will allow banking organizations to implement the rule prior to calculating their first quarter 2010 risk-based capital ratios and mitigate possible negative impacts on securitization and financial markets as described in section II.A above. The RCDRIA also provides that an entity that is subject to such a regulation may elect to comply with the regulation before its effective date.³⁰ Accordingly, banking organizations may elect to comply with this final rule before the effective date (as of the beginning of their first annual reporting period that begins after November 15, 2009).

Regulatory Flexibility Act

In accordance with Section 3(a) of the Regulatory Flexibility Act (RFA),³¹ the agencies are publishing a final regulatory flexibility analysis for amendments to their capital rules. Under regulations issued by the Small Business Administration,³² a small entity includes a commercial bank, BHC, or savings association with assets of \$175 million or less (a small banking organization). As of September 30, 2009, there were approximately 2,484 small BHCs, 379 small savings associations, 722 small

²⁸ 12 U.S.C. 4802.

²⁹ This final rule is a “major rule” under the Congressional Review Act and therefore may not take effect until at least 60 days after publication in the Federal Register. See 5 U.S.C. 801.

³⁰ 12 U.S.C. 4802(b)(2).

³¹ 5 U.S.C. 601 et seq.

³² See 13 CFR 121.201.

national banks, 419 small state member banks, and 2,818 small state nonmember banks. As a general matter, the Board's general risk-based capital rules apply only to a BHC that has consolidated assets of \$500 million or more. Therefore, the proposed changes to the Board's general risk-based capital rules for BHCs will not affect small BHCs.

The agencies have determined that the final rule will not have a significant impact on a substantial number of small banking organizations. Small banking organizations do not sponsor ABCP programs and very few will be required to consolidate VIEs as a result of implementing FAS 167. The agencies expect that few small banking organizations will elect to implement the transition mechanism set forth in the final rule and they will not be affected by the removal of the ABCP exclusion. Therefore, the agencies certify that the final rule will not have a significant economic impact on a substantial number of small banking organizations.

Paperwork Reduction Act

In accordance with the requirements of the Paperwork Reduction Act of 1995,³³ the agencies have reviewed the final rule. The Board reviewed the final rule under the authority delegated to the Board by the Office of Management and Budget. The Board, the FDIC, and the OCC note that instructions related to ABCP conduits in Schedule RC-R of the Consolidated Reports of Condition and Income³⁴ and Schedule HC-R of the Consolidated Financial Statements for Bank Holding Companies³⁵ will require revision.³⁶ The Board, the FDIC, and the OCC also note that the instructions for other items in Schedules RC-R and HC-R will require revisions related to the delay and phase-in options included in the final rule. If these revisions are determined to be significant, the revisions would be incorporated into a proposal that the agencies would publish with a request for comment in accordance with the requirements of the PRA.

Executive Order 12866

Executive Order 12866 requires federal agencies to prepare a regulatory impact analysis for agency actions that are found to be "significant regulatory actions." Significant regulatory actions include, among other things, rulemakings that "have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or

³³ 44 U.S.C. 3506.

³⁴ OMB Nos. 7100-0036, 1557-0081, and 3064-0052; FFIEC 031 and 041.

³⁵ OMB No. 7100-0128; FR Y-9C.

³⁶ OTS notes that the Thrift Financial Report (TFR) does not need any revisions, given that it does not currently ask for specific information like the call report. OTS does not anticipate the need to revise the TFR, but if the need arises OTS would request comment in accordance with the requirements of the PRA.

communities.” Regulatory actions that satisfy one or more of these criteria are referred to as “economically significant regulatory actions.”

The OCC and OTS have determined that this rulemaking is an economically significant regulatory action for purposes of Executive Order 12866. However, because the rule addresses changes to accounting standards that will become effective for national banks and savings associations as of the beginning of their first annual reporting period that begins after November 15, 2009, the issuance of this rule is subject to the procedures set forth in Section 6(a)(3)(D) of Executive Order 12866.

OCC/OTS Unfunded Mandates Reform Act of 1995 Determination

The Unfunded Mandates Reform Act of 1995³⁷ (UMRA) requires that an agency prepare a budgetary impact statement before promulgating a rule that includes a federal mandate that may result in the expenditure by state, local, and tribal governments, in the aggregate, or by the private sector of \$100 million or more (adjusted annually for inflation) in any one year. If a budgetary impact statement is required, section 205 of the UMRA also requires an agency to identify and consider a reasonable number of regulatory alternatives before promulgating a rule. The OCC and the OTS each have determined that its proposed rule will not result in expenditures by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more in any one year. Accordingly, neither the OCC nor the OTS has prepared a budgetary impact statement or specifically addressed the regulatory alternatives considered.

Use of Plain Language

Section 722 of the Gramm-Leach-Bliley Act³⁸ requires the federal banking agencies to use plain language in all proposed and final rules published after January 1, 2000. The agencies invited comment on how to make the proposed rule easier to understand. The agencies received no comment on plain language.

Nevertheless, the agencies have endeavored to present this final rule, and all their capital rules, in a manner that is as brief, comprehensible, and straightforward as possible, in light of the nature and complexity of the subject matter.

Department of the Treasury

Office of the Comptroller of the Currency

12 CFR Chapter I

Authority and Issuance

For the reasons stated in the common preamble, the Office of the Comptroller of the Currency is amending Part 3 of chapter I of Title 12, Code of Federal Regulations as follows:

PART 3—MINIMUM CAPITAL RATIOS; ISSUANCE OF DIRECTIVES

1. The authority citation for part 3 continues to read as follows:

Authority: 12 U.S.C. 93a, 161, 1818, 1828(n), 1828 note, 1831n note, 1835, 3907, and 3909.

2. Section 3.4 is amended by adding paragraph (c) to read as follows:

§ 3.4 Reservation of authority.

* * * * *

(c) The OCC may find that the capital treatment for an exposure not subject to consolidation on the bank's balance sheet does not appropriately reflect the risks imposed on the bank. Accordingly, the OCC may require the bank to treat the exposure as if it were consolidated onto the bank's balance sheet for the purpose of determining compliance with the bank's minimum risk-based capital requirements set forth in

Appendix A or Appendix C to this Part. The OCC will look to the substance of and risk associated with the transaction as well as other relevant factors the OCC deems appropriate in determining whether to require such treatment and in determining the bank's compliance with minimum risk-based capital requirements.

3. In appendix A to Part 3:
 - a. In section 2, remove and reserve paragraph (a)(3)(ii);
 - b. In section 3, remove and reserve paragraph (a)(5) and revise paragraph (a)(6) to read as follows; and
 - c. Revise section 5 to read as follows:

The revisions read as set forth below.

Appendix A to Part 3 – Risk-Based Capital Guidelines

* * * * *

Section 3. * * *

* * * * *

(a) * * *

(6) Other variable interest entities subject to consolidation. If a bank is required to consolidate the assets of a variable interest entity under generally accepted accounting principles, the bank must assess a risk-based capital charge based on the appropriate risk weight of the consolidated assets in accordance with sections 3(a) and 4 of this appendix A. Any direct credit substitutes and recourse obligations (including residual interests), and loans that a bank may provide to such a variable interest entity are not subject to a capital charge under section 4 of this appendix A.

* * * * *

Section 5. Optional transition provisions related to the implementation of consolidation requirements under FAS 167.

(a) This section 5 provides optional transition provisions for a national bank that is required for financial and regulatory reporting purposes, as a result of its implementation of Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R) (FAS 167), to consolidate certain variable interest entities (VIEs) as defined under United States generally accepted accounting principles (GAAP). These transition provisions apply through the end of the fourth quarter following the date of a bank's implementation of FAS 167 (implementation date).

(b) Exclusion period. (1) Exclusion of risk-weighted assets for the first and second quarters. For the first two quarters after the implementation date (exclusion period), including for the two calendar quarter-end regulatory report dates within those quarters, a bank may exclude from risk-weighted assets:

(i) Subject to the limitations in paragraph (d) of this section 5, assets held by a VIE, provided that the following conditions are met:

(A) The VIE existed prior to the implementation date;

(B) The bank did not consolidate the VIE on its balance sheet for calendar quarter-end regulatory report dates prior to the implementation date;

(C) The bank must consolidate the VIE on its balance sheet beginning as of the implementation date as a result of its implementation of FAS 167; and

(D) The bank excludes all assets held by VIEs described in paragraphs (b)(1)(i)(A) through (C) of this section 5; and

(ii) Subject to the limitations of paragraph (d) of this section 5, assets held by a VIE that is a consolidated asset-backed commercial paper (ABCP) program, provided that the following conditions are met:

(A) The bank is the sponsor of the ABCP program;

(B) Prior to the implementation date, the bank consolidated the VIE onto its balance sheet under GAAP and excluded the VIE's assets from the bank's risk-weighted assets; and

(C) The bank chooses to exclude all assets held by ABCP program VIEs described in paragraphs (b)(1)(ii)(A) and (B) of this section 5.

(2) Risk-weighted assets during exclusion period. During the exclusion period, including the two calendar quarter-end regulatory report dates within the exclusion period, a bank adopting the optional provisions of this paragraph (b) of this section 5 must calculate risk-weighted assets for its contractual exposures to the VIEs referenced in paragraph (b)(1) of this section 5 on the implementation date and include this calculated amount in its risk-weighted assets. Such contractual exposures may include direct-credit substitutes, recourse obligations, residual interests, liquidity facilities, and loans.

(3) Inclusion of ALLL in Tier 2 capital for the first and second quarters. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a bank that excludes VIE assets from risk-weighted assets pursuant to paragraph (b)(1) of this section may include in Tier 2 capital the full amount of the allowance for loan and lease losses (ALLL) calculated as of the implementation date that is attributable to the assets it excludes pursuant to paragraph (b)(1) of this section 5 (inclusion amount). The amount of ALLL includable in Tier 2 capital in accordance with this paragraph shall not be subject to the limitations set forth in section 2(b)(1) of this Appendix A.

(c) Phase-in period. (1) Exclusion amount. For purposes of this paragraph (c), exclusion amount is defined as the amount of risk-weighted assets excluded in paragraph (b)(1) of this section as of the implementation date.

(2) Risk-weighted assets during the third and fourth quarters. A bank that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph

(b)(1) of this section may, for the third and fourth quarters after the implementation date (phase-in period), including for the two calendar quarter-end regulatory report dates within those quarters, exclude from risk-weighted assets 50 percent of the exclusion amount, provided that the bank may not include in risk-weighted assets pursuant to this paragraph an amount less than the aggregate risk-weighted assets calculated pursuant to paragraph (b)(2) of this section.

(3) Inclusion of ALLL in Tier 2 capital during the third and fourth quarters. A bank that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (c)(2) of this section may, for the phase-in period, include in Tier 2 capital 50 percent of the inclusion amount it included in Tier 2 capital during the exclusion period, notwithstanding the limit on including ALLL in Tier 2 capital in section 2(b)(1) of this Appendix A.

(d) Implicit recourse limitation. Notwithstanding any other provision in this section 5, assets held by a VIE to which the bank has provided recourse through credit enhancement beyond any contractual obligation to support assets it has sold may not be excluded from risk-weighted assets.

* * * *

4. In Appendix C to part 3, revise the Table of Contents by adding a new Part IX and Section 81 as follows:

Appendix C to Part 3 – Capital Adequacy Guidelines for Banks: Internal-Ratings-Based and Advanced Measurement Approaches

Part I General Provisions

* * * * *

Part IX Transition Provisions

SECTION 81—Optional transition provisions related to the implementation of consolidation requirements under FAS 167

5. In appendix C to Part 3:
 - a. In section 1, redesignate paragraph (c)(3) as paragraph (c)(4), and add a new paragraph (c)(3) to read as follows; and
 - b. Remove section 42(l) and redesignate section 42(m) as section 42(l).

The addition reads as set forth below.

Appendix C to Part 3—Capital Adequacy Guidelines for Banks: Internal-Ratings-Based and Advanced Measurement Approaches

* * * * *

Section 1. * * *

(c)* * *

(3) Regulatory capital treatment of unconsolidated entities. If the OCC determines that the capital treatment for a bank's exposure or other relationship to an entity not consolidated on the bank's balance sheet is not commensurate with the actual risk relationship of the bank to the entity, for risk-based capital purposes, it may require the bank to treat the entity as if it were consolidated onto the bank's balance sheet and require the bank to hold capital against the entity's exposures. The OCC will look to the substance of and risk associated with the transaction as well as other relevant factors the OCC deems appropriate in determining whether to require such treatment and in determining the bank's compliance with minimum risk-based capital requirements. In making a determination under this paragraph, the OCC will apply notice and response procedures in the same manner and to the same extent as the notice and response procedures in 12 CFR 3.12.

* * * * *

6. Revise Appendix C to part 3 by inserting a new part IX and section 81 to read as follows:

Appendix C to Part 3 – Capital Adequacy Guidelines for Banks: Internal-Ratings-Based and Advanced Measurement Approaches

* * * * *

Part IX. Transition Provisions

SECTION 81—Optional transition provisions related to the implementation of consolidation requirements under FAS 167

(a) Scope, applicability, and purpose. This section 81 provides optional transition provisions for a bank that is required for financial and regulatory reporting purposes, as a result of its implementation of Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R) (FAS 167), to consolidate certain variable interest entities (VIEs) as defined under GAAP. These transition provisions apply through the end of the fourth quarter following the date of a bank's implementation of FAS 167 (implementation date).

(b) Exclusion period. (1) Exclusion of risk-weighted assets for the first and second quarters. For the first two quarters after the implementation date (exclusion period), including for the two calendar quarter-end regulatory report dates within those quarters, a bank may exclude from risk-weighted assets:

(i) Subject to the limitations in paragraph (d) of this section 81, assets held by a VIE, provided that the following conditions are met:

(A) The VIE existed prior to the implementation date;

(B) The bank did not consolidate the VIE on its balance sheet for calendar quarter-end regulatory report dates prior to the implementation date;

(C) The bank must consolidate the VIE on its balance sheet beginning as of the implementation date as a result of its implementation of FAS 167; and

(D) The bank chooses to exclude all assets held by VIEs described in paragraphs (b)(1)(i)(A) through (C) of this section 81; and

(ii) Subject to the limitations in paragraph (d) of this section 81, assets held by a VIE that is a consolidated asset-backed commercial paper (ABCP) program, provided that the following conditions are met:

(A) The bank is the sponsor of the ABCP program;

(B) Prior to the implementation date, the bank consolidated the VIE onto its balance sheet under GAAP and excluded the VIE's assets from the bank's risk-weighted assets; and

(C) The bank excludes all assets held by ABCP program VIEs described in paragraphs (b)(1)(ii)(A) and (B) of this section 81.

(2) Risk-weighted assets during exclusion period. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a bank adopting the optional provisions in paragraph (b) of this section must calculate risk-weighted assets for its contractual exposures to the VIEs referenced in paragraph (b)(1) of this section 81 on the implementation date and include this calculated amount in risk-weighted assets. Such contractual exposures may include direct-credit substitutes, recourse obligations, residual interests, liquidity facilities, and loans.

(3) Inclusion of ALLL in Tier 2 capital for the first and second quarters. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a bank that excludes VIE assets from risk-weighted assets pursuant to paragraph (b)(1) of this section 81 may include in Tier 2 capital the full amount of the ALLL calculated as of the implementation date that is attributable to the assets it excludes pursuant to paragraph (b)(1) of this section 81 (inclusion amount). The amount of ALLL includable in Tier 2 capital in accordance with this paragraph shall not be subject to the limitations set forth in section 13(a)(2) and (b) of this Appendix C.

(c) Phase-in period. (1) Exclusion amount. For purposes of this paragraph (c), exclusion amount is defined as the amount of risk-weighted assets excluded in paragraph (b)(1) of this section as of the implementation date.

(2) Risk-weighted assets for the third and fourth quarters. A bank that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (b)(1) of this section may, for the third and fourth quarters after the implementation date (phase-in period), including for the two calendar quarter-end regulatory report dates within those quarters, exclude from risk-weighted assets 50 percent of the exclusion amount, provided that the bank may not include in risk-weighted assets pursuant to this paragraph an amount less than the aggregate risk-weighted assets calculated pursuant to paragraph (b)(2) of this section 81.

(3) Inclusion of ALLL in Tier 2 capital for the third and fourth quarters. A bank that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (c)(2) of this section may, for the phase-in period, include in Tier 2 capital 50 percent of the inclusion amount it included in Tier 2 capital during the exclusion

period, notwithstanding the limit on including ALLL in Tier 2 capital in section 13(a)(2) and (b) of this Appendix.

(d) Implicit recourse limitation. Notwithstanding any other provision in this section 81, assets held by a VIE to which the bank has provided recourse through credit enhancement beyond any contractual obligation to support assets it has sold may not be excluded from risk-weighted assets.

Board of Governors of the Federal Reserve System

12 CFR Chapter II

Authority and Issuance

For the reasons stated in the common preamble, the Board of Governors of Federal Reserve System amends parts 208 and 225 of Chapter II of title 12 of the Code of Federal Regulations as follows:

PART 208 – MEMBERSHIP OF STATE BANKING INSTITUTIONS IN THE FEDERAL RESERVE SYSTEM (REGULATION H)

7. The authority for part 208 continues to read as follows:

Authority : 12 U.S.C. 24, 36, 92a, 93a, 248(a), 248(c), 321-338a, 371d, 461, 481-486, 601, 611, 1814, 1816, 1818, 1820(d)(9), 1833(j), 1828(o)1831, 1831o, 1831p-1, 1831r-1, 1831w, 1831x 1835a, 1882, 2901-2907, 3105, 3310, 3331-3351, and 3905-3909; 15 U.S.C. 78b, 78I(b), 78I(i), 780-4(c)(5), 78q, 78q-1, and 78w, 1681s, 1681w, 6801, and 6805; 31 U.S.C. 5318; 42 U.S.C. 4012a, 4104a, 4104b, 4106 and 4128.

8. In appendix A to part 208:

- A. Amend section I by adding a new paragraph immediately prior to the last undesignated paragraph;
- B. Amend paragraph (c) of section II.A.1 by removing the last sentence;
- C. Remove paragraph (b) of section III.B.6 and redesignate paragraph (c) of section III.B.6 as paragraph (b);
- D. Amend section IV by adding the following new paragraph C after section IV.B:

The additions and revisions read as follows:

Appendix A to Part 208 – Capital Adequacy Guidelines for State Member Banks: Risk-Based Measure

I.* * *

The Federal Reserve may determine that the regulatory capital treatment for a bank's exposure or other relationship to an entity not consolidated on the bank's balance sheet is not commensurate with the actual risk relationship of the bank to the entity. In making this determination, the Federal Reserve may require the bank to treat the entity as if it were consolidated onto the balance sheet of the bank for risk-based capital purposes and calculate the appropriate risk-based capital ratios accordingly, all as specified by the Federal Reserve.

* * * * *

II. Definition of Qualifying Capital for the Risk-Based Capital Ratio

* * *

A. * * *

1. * * *

* * * * *

c. Minority interest in equity accounts of consolidated subsidiaries. This element is included in tier 1 capital because, as a general rule, it represents equity that is freely available to absorb losses in operating subsidiaries whose assets are included in a bank's risk-weighted asset base. While not subject to an explicit sublimit within tier 1, banks are expected to avoid using minority interest in the equity accounts of consolidated subsidiaries as an avenue for introducing into their capital structures elements that might not otherwise qualify as tier 1 capital or that would, in effect, result in an excessive reliance on preferred stock within tier 1. Minority interests in small business investment companies, investment funds that hold nonfinancial equity investments (as defined in section II.B.5.b. of this appendix A), and subsidiaries engaged in nonfinancial activities, are not included in the bank's tier 1 or total capital base if the bank's interest in the company or fund is held under one of the legal authorities listed in section II.B.5.b. [Removed]. * * * * *

III. Procedures for Computing Weighted Risk Assets and Off-Balance Sheet Items

* * *

B. Collateral, Guarantees, and Other Considerations

* * *

6. * * *

b. If a bank has multiple overlapping exposures (such as a program-wide credit enhancement and multiple pool-specific liquidity facilities) to an ABCP program that is not consolidated for risk-based capital purposes, the bank is not required to hold duplicative risk-based capital under this appendix against the overlapping position.

Instead, the bank should apply to the overlapping position the applicable risk-based capital treatment that results in the highest capital charge.

IV. Minimum Supervisory Ratios and Standards

* * *

C. Optional Transition provisions related to the implementation of consolidation requirements under FAS 167

This section IV.C. provides optional transition provisions for a bank that is required for financial and regulatory reporting purposes, as a result of its implementation of Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R) (FAS 167), to consolidate certain variable interest entities (VIEs) as defined under United States generally accepted accounting principles (GAAP). These transition provisions apply through the end of the fourth quarter following the date of a bank's implementation of FAS 167 (implementation date).

1. Exclusion period.

a. Exclusion of risk-weighted assets for the first and second quarters. For the first two quarters after the implementation date (exclusion period), including for the two calendar quarter-end regulatory report dates within those quarters, a bank may exclude from risk-weighted assets:

i. Subject to the limitations in section IV.C.3, assets held by a VIE, provided that the following conditions are met:

- (1) The VIE existed prior to the implementation date,
- (2) The bank did not consolidate the VIE on its balance sheet for calendar quarter-end regulatory report dates prior to the implementation date,
- (3) The bank must consolidate the VIE on its balance sheet beginning as of the implementation date as a result of its implementation of FAS 167, and
- (4) The bank excludes all assets held by VIEs described in paragraphs C.1.a.i.(1) through (3) of this section IV.C.1.a.i; and

ii. Subject to the limitations in section IV.C.3, assets held by a VIE that is a consolidated ABCP program, provided that the following conditions are met:

- (1) The bank is the sponsor of the ABCP program,
- (2) Prior to the implementation date, the bank consolidated the VIE onto its balance sheet under GAAP and excluded the VIE's assets from the bank's risk-weighted assets, and
- (3) The bank chooses to exclude all assets held by ABCP program VIEs described in paragraphs (1) and (2) of this section IV.C.1.a.ii.

b. Risk-weighted assets during exclusion period. During the exclusion period, including for the two-calendar quarter-end regulatory report dates within the exclusion period, a bank adopting the optional provisions in section IV.C.1.a must calculate risk-weighted assets for its contractual exposures to the VIEs referenced in section IV.C.1.a on the implementation date and include this calculated amount in its risk-weighted assets. Such

contractual exposures may include direct-credit substitutes, recourse obligations, residual interests, liquidity facilities, and loans.

c. Inclusion of allowance for loan and lease losses in tier 2 capital for the first and second quarters. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a bank that excludes VIE assets from risk-weighted assets pursuant to section IV.C.1.a may include in tier 2 capital the full amount of the allowance for loan and lease losses (ALLL) calculated as of the implementation date that is attributable to the assets it excludes pursuant to section IV.C.1.a (inclusion amount). The amount of ALLL includable in tier 2 capital in accordance with this paragraph shall not be subject to the limitations set forth in section II.A.2.a. of this Appendix.

2. Phase-in period.

a. Exclusion amount. For purposes of this section IV.C., exclusion amount is defined as the amount of risk-weighted assets excluded in section IV.C.1.a. as of the implementation date.

b. Risk-weighted assets for the third and fourth quarters. A bank that excludes assets of consolidated VIEs from risk-weighted assets pursuant to section IV.C.1.a. may, for the third and fourth quarters after the implementation date (phase-in period), including for the two calendar quarter-end regulatory report dates within those quarters, exclude from risk-weighted assets 50 percent of the exclusion amount, provided that the bank may not include in risk-weighted assets pursuant to this paragraph an amount less than the aggregate risk-weighted assets calculated pursuant to section IV.C.1.b.

c. Inclusion of ALLL in tier 2 capital for the third and fourth quarters. A bank that excludes assets of consolidated VIEs from risk-weighted assets pursuant to section IV.C.2.b. may, for the phase-in period, include in tier 2 capital 50 percent of the inclusion amount it included in tier 2 capital during the exclusion period, notwithstanding the limit on including ALLL in tier 2 capital in section II.A.2.a. of this Appendix.

3. Implicit recourse limitation. Notwithstanding any other provision in this section IV.C., assets held by a VIE to which the bank has provided recourse through credit enhancement beyond any contractual obligation to support assets it has sold may not be excluded from risk-weighted assets.

9. In appendix F to part 208:
- A. Add a new paragraph (3) to section 1(c) and redesignate paragraph (3) as paragraph (4) ;
 - B. Remove section 42(l) and redesignate section 42(m) as section 42(l);
 - C. Insert a new part IX and section 81 at the end of appendix F.

The addition reads as follows:

Appendix F to Part 208 – Capital Adequacy Guidelines for Banks: Internal-Ratings-Based and Advanced Measurement Approaches

* * * * *

1. * * *

(c) * * *

* * * * *

(3) Regulatory capital treatment of unconsolidated entities. The Federal Reserve may determine that the regulatory capital treatment for a bank's exposure or other relationship to an entity not consolidated on the bank's balance sheet is not commensurate with the actual risk relationship of the bank to the entity. In making this determination, the Federal Reserve may require the bank to treat the entity as if it were consolidated onto the balance sheet of the bank for risk-based capital purposes and calculate the appropriate risk-based capital ratios accordingly, all as specified by the Federal Reserve.

(4) Other supervisory authority. Nothing in this appendix limits the authority of the Federal Reserve under any other provision of law or regulation to take supervisory or enforcement action, including action to address unsafe or unsound practices or conditions, deficient capital levels, or violations of law.

* * * * *

Part IX — TRANSITION PROVISIONS

SECTION 81 — Optional transition provisions related to the implementation of, consolidation requirements under FAS 167.

(a) Scope, applicability, and purpose. This section 81 provides optional transition provisions for a state member bank that is required for financial and regulatory reporting purposes, as a result of its implementation of Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R) (FAS 167), to consolidate certain variable interest entities (VIEs) as defined under GAAP. These transition provisions apply through the end of the fourth quarter following the date of a bank's implementation of FAS 167 (implementation date).

(b) Exclusion period.

(1) Exclusion of risk-weighted assets for the first and second quarters. For the first two quarters after the implementation date (exclusion period), including for the two calendar quarter-end regulatory report dates within those quarters, a bank may exclude from risk-weighted assets:

(i) Subject to the limitations in paragraph (d) of this section 81, assets held by a VIE, provided that the following conditions are met:

(A) The VIE existed prior to the implementation date,

(B) The bank did not consolidate the VIE on its balance sheet for calendar quarter-end regulatory report dates prior to the implementation date,

(C) The bank must consolidate the VIE on its balance sheet beginning as of the implementation date as a result of its implementation of FAS 167, and

(D) The bank excludes all assets held by VIEs described in paragraphs (b)(1)(i)(A) through (C) of this section 81; and

(ii) Subject to the limitations in paragraph (d) of this section 81, assets held by a VIE that is a consolidated asset-backed commercial paper (ABCP) program, provided that the following conditions are met:

(A) The bank is the sponsor of the ABCP program,

(B) Prior to the implementation date, the bank consolidated the VIE onto its balance sheet under GAAP and excluded the VIE's assets from the bank's risk-weighted assets, and

(C) The bank chooses to exclude all assets held by ABCP program VIEs described in paragraphs (b)(1)(ii)(A) and (B) of this section 81.

(2) Risk-weighted assets during exclusion period. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a bank adopting the optional provisions in paragraph (b) of this section must calculate risk-weighted assets for its contractual exposures to the VIEs referenced in paragraph (b)(1) of this section 81 on the implementation date and include this calculated amount in risk-weighted assets. Such contractual exposures may include direct-credit substitutes, recourse obligations, residual interests, liquidity facilities, and loans.

(3) Inclusion of ALLL in Tier 2 capital for the first and second quarters. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a bank that excludes VIE assets from risk-weighted assets pursuant to paragraph (b)(1) of this section 81 may include in Tier 2 capital the full amount of the ALLL calculated as of the implementation date that is attributable to the assets it excludes pursuant to paragraph (b)(1) of this section 81 (inclusion amount). The amount of ALLL includable in Tier 2 capital in accordance with this paragraph shall not be subject to the limitations set forth in section 13(a)(2) and (b) of this Appendix.

(c) Phase-in period.

(1) Exclusion amount. For purposes of this paragraph (c), exclusion amount is defined as the amount of risk-weighted assets excluded in paragraph (b)(1) of this section as of the implementation date.

(2) Risk-weighted assets for the third and fourth quarters. A bank that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (b)(1) of this section may, for the third and fourth quarters after the implementation date (phase-in period), including for the two calendar quarter-end regulatory report dates within those quarters, exclude from risk-weighted assets 50 percent of the exclusion amount, provided that the bank may not include in risk-weighted assets pursuant to this paragraph an amount less than the aggregate risk-weighted assets calculated pursuant to paragraph (b)(2) of this section 81.

(3) Inclusion of ALLL in Tier 2 capital for the third and fourth quarters. A bank that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (c)(2) of this section may, for the phase-in period, include in Tier 2 capital 50 percent of the inclusion amount it included in Tier 2 capital during the exclusion period, notwithstanding the limit on including ALLL in Tier 2 capital in section 13(a)(2) and (b) of this Appendix.

(d) Implicit recourse limitation. Notwithstanding any other provision in this section 81, assets held by a VIE to which the bank has provided recourse through credit enhancement beyond any contractual obligation to support assets it has sold may not be excluded from risk-weighted assets.

PART 225 – BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL (REGULATION Y)

10. The authority for part 225 continues to read as follows:
Authority : 12 U.S.C. 1817(j)(13), 1818, 1828(o), 1831i, 1831p-1, 1843(c)(8), 1844(b), 1972(1), 3106, 3108, 3310, 3331-3351, 3907, and 3909; 15 U.S.C. 1681s, 1681w, 6801 and 6805.
11. In appendix A to part 225,
A. Amend section I by adding the following paragraph immediately prior to the last undesignated paragraph;
B. Amend paragraph (iii) of section II.A.1.c by removing the last sentence;
C. Remove paragraph (b) of section III.B.6 and redesignate paragraph (c) of section III.B.6 as paragraph (b);
D. Amend section IV by adding the following new paragraphs after section IV.B.

The additions and revisions will read as follows:

Appendix A to Part 225 – Capital Adequacy Guidelines for Bank Holding Companies: Risk-Based Measure

I.* * *

The Federal Reserve may determine that the regulatory capital treatment for a banking organization's exposure or other relationship to an entity not consolidated on the banking organization's balance sheet is not commensurate with the actual risk relationship of the banking organization to the entity. In making this determination, the Federal Reserve may require the banking organization to treat the entity as if it were consolidated onto the balance sheet of the banking organization for risk-based capital purposes and calculate the appropriate risk-based capital ratios accordingly, all as specified by the Federal Reserve.

II. Definition of Qualifying Capital for the Risk Based Capital Ratio

A. The Definition and Components of Qualifying Capital

1. * * *

* * * * *

c. * * *

* * * * *

iii. Minority interest in equity accounts of consolidated subsidiaries. Minority interest in the common and preferred stockholders' equity accounts of a consolidated subsidiary (minority interest) represents stockholders' equity associated with common or preferred equity instruments issued by a banking organization's consolidated subsidiary that are held by investors other than the banking organization. Minority interest is included in tier 1 capital because, as a general rule, it represents equity that is freely available to absorb losses in the issuing subsidiary. Nonetheless, minority interest typically is not available to absorb losses in the banking organization as a whole, a feature that is a particular concern when the minority interest is issued by a subsidiary that is neither a U.S. depository institution nor a foreign bank. For this reason, this appendix distinguishes among three types of qualifying minority interest. Class A minority interest is minority interest related to qualifying common and noncumulative perpetual preferred equity instruments issued directly (that is, not through a subsidiary) by a consolidated U.S. depository institution⁹ or foreign bank¹⁰ subsidiary of a banking organization. Class A minority interest is not subject to a formal limitation within tier 1 capital. Class B minority interest is minority interest related to qualifying cumulative perpetual preferred equity instruments issued directly by a consolidated U.S. depository institution or foreign bank subsidiary of a banking organization. Class B minority interest is a restricted core capital element subject to the limitations set forth in section II.A.1.b.i. of this appendix, but is not subject to a tier 2 sub-limit. Class C minority interest is minority interest related to qualifying common or perpetual preferred stock issued by a banking organization's consolidated subsidiary that is neither a U.S. depository institution nor a foreign bank. Class C minority interest is eligible for inclusion in tier 1 capital as a restricted core

⁹ U.S. depository institutions are defined to include branches (foreign and domestic) of federally insured banks and depository institutions chartered and headquartered in the 50 states of the United States, the District of Columbia, Puerto Rico, and U.S. territories and possessions. The definition encompasses banks, mutual or stock savings banks, savings or building and loan associations, cooperative banks, credit unions, and international banking facilities of domestic banks.

¹⁰ For this purpose, a foreign bank is defined as an institution that engages in the business of banking; is recognized as a bank by the bank supervisory or monetary authorities of the country of its organization or principal banking operations; receives deposits to a substantial extent in the regular course of business; and has the power to accept demand deposits.

capital element and is subject to the limitations set forth in sections II.A.1.b.i. and II.A.2.d.iv. of this appendix. Minority interest in small business investment companies, investment funds that hold nonfinancial equity investments (as defined in section II.B.5.b. of this appendix), and subsidiaries engaged in nonfinancial activities are not included in the banking organization's tier 1 or total capital if the banking organization's interest in the company or fund is held under one of the legal authorities listed in section II.B.5.b. of this appendix.

* * * * *

* * *

C. Optional Transition provisions related to the implementation of consolidation requirements under FAS 167

This section IV.C. provides optional transition provisions for a banking organization that is required for financial and regulatory reporting purposes, as a result of its implementation of Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R) (FAS 167), to consolidate certain variable interest entities (VIEs) as defined under United States generally accepted accounting principles (GAAP). These transition provisions apply through the end of the fourth quarter following the date of a banking organization's implementation of FAS 167 (implementation date).

1. Exclusion period.

a. Exclusion of risk-weighted assets for the first and second quarters. For the first two quarters after the implementation date (exclusion period), including for the two calendar

quarter-end regulatory report dates within those quarters, a banking organization may exclude from risk-weighted assets:

i. Subject to the limitations in section IV.C.3, assets held by a VIE, provided that the following conditions are met:

- (1) The VIE existed prior to the implementation date,
- (2) The banking organization did not consolidate the VIE on its balance sheet for calendar quarter-end regulatory report dates prior to the implementation date,
- (3) The banking organization must consolidate the VIE on its balance sheet beginning as of the implementation date as a result of its implementation of FAS 167, and
- (4) The banking organization excludes all assets held by VIEs described in paragraphs C.1.a.i.(1) through (3) of this section IV.C.1.a.i; and

ii. Subject to the limitations in section IV.C.3, assets held by a VIE that is a consolidated ABCP program, provided that the following conditions are met:

- (1) The banking organization is the sponsor of the ABCP program,
- (2) Prior to the implementation date, the banking organization consolidated the VIE onto its balance sheet under GAAP and excluded the VIE's assets from the banking organization's risk-weighted assets, and
- (3) The banking organization chooses to exclude all assets held by ABCP program VIEs described in paragraphs (1) and (2) of this section IV.C.1.a.ii.

b. Risk-weighted assets during exclusion period. During the exclusion period, including the two calendar quarter-end regulatory report dates during the exclusion period, a banking organization adopting the optional provisions in section IV.C.1.a must calculate risk-weighted assets for its contractual exposures to the VIEs referenced in section IV.C.1.a on the implementation date and include this calculated amount in its risk-weighted assets. Such contractual exposures may include direct-credit substitutes, recourse obligations, residual interests, liquidity facilities, and loans.

c. Inclusion of allowance for loan and lease losses in tier 2 capital for the first and second quarters. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a banking organization that excludes VIE assets from risk-weighted assets pursuant to section IV.C.1.a may include in tier 2 capital the full amount of the allowance for loan and lease losses (ALLL) calculated as of the implementation date that is attributable to the assets it excludes pursuant to section IV.C.1.a (inclusion amount). The amount of ALLL includable in tier 2 capital in accordance with this paragraph shall not be subject to the limitations set forth in section II.A.2.a of this Appendix.

2. Phase-in period.

a. Exclusion amount. For purposes of this section IV.C., exclusion amount is defined as the amount of risk-weighted assets excluded in section IV.C.1.a as of the implementation date.

b. Risk-weighted assets for the third and fourth quarters. A banking organization that excludes assets of consolidated VIEs from risk-weighted assets pursuant to section

IV.C.1.a. may, for the third and fourth quarters after the implementation date (phase-in period), including for the two calendar quarter-end regulatory report dates within those quarters, exclude from risk-weighted assets 50 percent of the exclusion amount, provided that the banking organization may not include in risk-weighted assets pursuant to this paragraph an amount less than the aggregate risk-weighted assets calculated pursuant to section IV.C.1.b.

c. Inclusion of ALLL in tier 2 capital for the third and fourth quarters. A banking organization that excludes assets of consolidated VIEs from risk-weighted assets pursuant to section IV.C.2.b. may, for the phase-in period, include in tier 2 capital 50 percent of the inclusion amount it included in tier 2 capital during the exclusion period, notwithstanding the limit on including ALLL in tier 2 capital in section II.A.2.a. of this Appendix.

3. Implicit recourse limitation. Notwithstanding any other provision in this section IV.C., assets held by a VIE to which the banking organization has provided recourse through credit enhancement beyond any contractual obligation to support assets it has sold may not be excluded from risk-weighted assets.

12. In appendix G to part 225,
 - A. Add a new paragraph (3) to section 1(c) and redesignate paragraph (3) as paragraph (4);
 - B. Remove section 42(l) and redesignating section 42(m) as section 42(l);
 - C. Add a new part IX and section 81 at the end of appendix G.

The added text will read as follows:

Appendix G to Part 225 – Capital Adequacy Guidelines for Bank Holding Companies:
Internal-Ratings-Based and Advanced Measurement Approaches

* * * * *

1. * * *

(c) * * *

* * * * *

(3) Regulatory capital treatment of unconsolidated entities. The Federal Reserve may determine that the regulatory capital treatment for a bank holding company's exposure or other relationship to an entity not consolidated on the bank holding company's balance sheet is not commensurate with the actual risk relationship of the bank holding company to the entity. In making this determination, the Federal Reserve may require the bank holding company to treat the entity as if it were consolidated onto the balance sheet of the bank holding company for risk-based capital purposes and calculate the appropriate risk-based capital ratios accordingly, all as specified by the Federal Reserve.

(4) Other supervisory authority. Nothing in this appendix limits the authority of the Federal Reserve under any other provision of law or regulation to take supervisory or

enforcement action, including action to address unsafe or unsound practices or conditions, deficient capital levels, or violations of law.

Part IX — TRANSITION PROVISIONS

SECTION 81 — Optional transition provisions related to the implementation of, consolidation requirements under FAS 167.

(a) Scope, applicability, and purpose. This section 81 provides optional transition provisions for a bank holding company that is required for financial and regulatory reporting purposes, as a result of its implementation of Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R) (FAS 167), to consolidate certain variable interest entities (VIEs) as defined under GAAP. These transition provisions apply through the end of the fourth quarter following the date of a bank holding company's implementation of FAS 167 (implementation date).

(b) Exclusion period.

(1) Exclusion of risk-weighted assets for the first and second quarters. For the first two quarters after the implementation date (exclusion period), including for the two calendar quarter-end regulatory report dates within those quarters, a bank holding company may exclude from risk-weighted assets:

(i) Subject to the limitations in paragraph (d) of this section 81, assets held by a VIE, provided that the following conditions are met:

(A) The VIE existed prior to the implementation date,

(B) The bank holding company did not consolidate the VIE on its balance sheet for calendar quarter-end regulatory report dates prior to the implementation date,

(C) The bank holding company must consolidate the VIE on its balance sheet beginning as of the implementation date as a result of its implementation of FAS 167, and

(D) The bank holding company excludes all assets held by VIEs described in paragraphs (b)(1)(i)(A) through (C) of this section 81; and

(ii) Subject to the limitations in paragraph (d) of this section 81, assets held by a VIE that is a consolidated ABCP program, provided that the following conditions are met:

(A) The bank holding company is the sponsor of the ABCP program,

(B) Prior to the implementation date, the bank holding company consolidated the VIE onto its balance sheet under GAAP and excluded the VIE's assets from the bank holding company's risk-weighted assets, and

(C) The bank holding company chooses to exclude all assets held by ABCP program VIEs described in paragraphs (b)(1)(ii)(A) and (B) of this section 81.

(2) Risk-weighted assets during exclusion period. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a bank holding company adopting the optional provisions in paragraph (b) of this

section must calculate risk-weighted assets for its contractual exposures to the VIEs referenced in paragraph (b)(1) of this section 81 on the implementation date and include this calculated amount in risk-weighted assets. Such contractual exposures may include direct-credit substitutes, recourse obligations, residual interests, liquidity facilities, and loans.

(3) Inclusion of ALLL in Tier 2 capital for the first and second quarters. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a bank holding company that excludes VIE assets from risk-weighted assets pursuant to paragraph (b)(1) of this section 81 may include in Tier 2 capital the full amount of the ALLL calculated as of the implementation date that is attributable to the assets it excludes pursuant to paragraph (b)(1) of this section 81 (inclusion amount). The amount of ALLL includable in Tier 2 capital in accordance with this paragraph shall not be subject to the limitations set forth in section 13(a)(2) and (b) of this Appendix.

(c) Phase-in period.

(1) Exclusion amount. For purposes of this paragraph (c), exclusion amount is defined as the amount of risk-weighted assets excluded in paragraph (b)(1) of this section as of the implementation date.

(2) Risk-weighted assets for the third and fourth quarters. A bank holding company that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (b)(1) of this section may, for the third and fourth quarters after the implementation date (phase-in period), including for the two calendar quarter-end regulatory report dates within those quarters, exclude from risk-weighted assets 50 percent of the exclusion amount, provided that the bank holding company may not include in risk-weighted assets pursuant to this paragraph an amount less than the aggregate risk-weighted assets calculated pursuant to paragraph (b)(2) of this section 81.

(3) Inclusion of ALLL in Tier 2 capital for the third and fourth quarters. A bank holding company that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (c)(2) of this section may, for the phase-in period, include in Tier 2 capital 50 percent of the inclusion amount it included in Tier 2 capital during the exclusion period, notwithstanding the limit on including ALLL in Tier 2 capital in section 13(a)(2) and (b) of this Appendix.

(d) Implicit recourse limitation. Notwithstanding any other provision in this section 81, assets held by a VIE to which the bank holding company has provided recourse through credit enhancement beyond any contractual obligation to support assets it has sold may not be excluded from risk-weighted assets.

Federal Deposit Insurance Corporation

12 CFR Chapter III

Authority for Issuance

For the reasons stated in the common preamble, the Federal Deposit Insurance Corporation amends Part 325 of Chapter III of Title 12, Code of the Federal Regulations as follows:

PART 325 – CAPITAL MAINTENANCE

13. The authority citation for part 325 continues to read as follows:

Authority: 12 U.S.C. 1815(a), 1815(b), 1816, 1818(a), 1818(b), 1818(c), 1818(t), 1819(Tenth), 1828(c), 1828(d), 1828(i), 1828(n), 1828(o), 1831o, 1835, 3907, 3909, 4808; Pub. L. 102-233, 105 Stat. 1761, 1789, 1790, (12 U.S.C. 1831n note); Pub. L. 102-242, 105 Stat. 2236, as amended by Pub. L. 103-325, 108 Stat. 2160, 2233 (12 U.S.C. 1828 note); Pub. L. 102-242, 105 Stat. 2236, 2386, as amended by Pub. L. 102-550, 106 Stat. 3672, 4089 (12 U.S.C. 1828 note).

14. In Appendix A to part 325, revise section I.A.1.(d) to read as follows:

Appendix A to Part 325 – Statement of Policy on Risk Based Capital

* * * * *

I. * * *

A. * * *

1. * * * * *

(d) Minority interests in small business investment companies, investment funds that hold nonfinancial equity investments (as defined in section II.B.(6)(ii) of this appendix A), and subsidiaries that are engaged in non-financial activities are not included in the bank's Tier 1 or total capital base if the bank's interest in the company or fund is held under one of the legal authorities listed in section II.B.(6)(ii) of this appendix A.

15. In Appendix A to part 325, revise section II.A. by adding new paragraphs 4. and 5. as follows:

Appendix A to Part 325 – Statement of Policy on Risk Based Capital

* * * * *

II. * * *

A. * * * * *

4. The Director of the Division of Supervision and Consumer Protection (DSC) may, on a case-by-case basis, determine that the regulatory capital treatment for an exposure or other relationship to an entity that is not subject to consolidation on the balance sheet is not commensurate with the risk of the exposure and the relationship of the bank to the entity. In making this determination, the Director of DSC may require the bank to treat the entity as if it were consolidated on the balance sheet of the bank for risk-based capital purposes and calculate the appropriate risk-based capital ratios accordingly.

5. Optional transition provisions related to the implementation of consolidation requirements under FAS 167

Section II.A.5 of this appendix provides optional transition provisions for a state nonmember bank that is required for financial and regulatory reporting purposes, as a result of its implementation of Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R) (FAS 167), to consolidate certain variable interest entities (VIEs) as defined under United States generally accepted accounting principles (GAAP). These transition provisions apply through the end of the fourth quarter following the date of a bank's implementation of FAS 167 (implementation date).

i. Exclusion period.

(a) Exclusion of risk-weighted assets for the first and second quarters. For the first two quarters after the implementation date (exclusion period), including for the two calendar quarter-end regulatory report dates within those quarters, a bank may exclude from risk-weighted assets:

(1) Subject to the limitations in paragraph iii. of this section II.A.5, assets held by a VIE, provided that the following conditions are met:

(i) The VIE existed prior to the implementation date,

(ii) The bank did not consolidate the VIE on its balance sheet for calendar quarter-end regulatory report dates prior to the implementation date,

(iii) The bank must consolidate the VIE on its balance sheet beginning as of the implementation date as a result of its implementation of FAS 167, and

(iv) The bank excludes all assets held by VIEs described in paragraphs i.(a)(1)(i) through (iii) of this section II.A.5; and

(2) Subject to the limitations in paragraph iii. of this section II.A.5, assets held by a VIE that is a consolidated asset-backed commercial paper (ABCP) program, provided that the following conditions are met:

(i) The bank is the sponsor of the ABCP program,

(ii) Prior to the implementation date, the bank consolidated the VIE onto its balance sheet under GAAP and excluded the VIE's assets from the bank's risk-weighted assets, and

(iii) The bank chooses to exclude all assets held by ABCP program VIEs described in paragraphs i.(a)(2)(i) and (ii) of this section II.A.5.

(b) Risk-weighted assets during exclusion period. During the exclusion period, including the two calendar quarter-end regulatory report dates within the exclusion period, a bank adopting the optional provisions of this paragraph i. of this section II.A.5 must calculate risk-weighted assets for its contractual exposures to the VIEs referenced in paragraph i.(a) of this section II.A.5 on the implementation date and include this calculated amount in its risk-weighted assets. Such contractual exposures may include direct-credit substitutes, recourse obligations, residual interests, liquidity facilities, and loans.

(c) Inclusion of ALLL in Tier 2 capital for the first and second quarters. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a bank that excludes VIE assets from risk-weighted assets pursuant to paragraph i.(a) of this section II.A.5 may include in Tier 2 capital the full amount of the allowance for loan and lease losses (ALLL) calculated as of the implementation date that is attributable to the assets it excludes pursuant to paragraph i.(a) of this section II.A.5 (inclusion amount). The amount of ALLL includable in Tier 2 capital in accordance with this paragraph shall not be subject to the limitations set forth in paragraph i. of section I.A.2.

ii. Phase-in period.

(a) Exclusion amount. For purposes of this paragraph ii. of this section II.A.5, exclusion amount is defined as the amount of risk-weighted assets excluded in paragraph i.(a) of this section II.A.5 as of the implementation date.

(b) Risk-weighted assets for the third and fourth quarters. A bank that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph i.(a) of this section II.A.5 may, for the third and fourth quarters after the implementation date (phase-in period), including for the two calendar quarter-end regulatory report dates within those quarters, exclude from risk-weighted assets 50 percent of the exclusion amount, provided that the bank may not include in risk-weighted assets pursuant to this paragraph an amount less than the aggregate risk-weighted assets calculated pursuant to paragraph i.(b) of this section II.A.5.

(c) Inclusion of ALLL in Tier 2 capital for the third and fourth quarters. A bank that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph ii.(b) of this section II.A.5 may, for the phase-in period, include in Tier 2 capital 50 percent of the inclusion amount it included in Tier 2 capital during the exclusion period, notwithstanding the limit on including ALLL in Tier 2 capital in paragraph i. of section I.A.2.

iii. Implicit recourse limitation. Notwithstanding any other provision in this section II.A.5, assets held by a VIE to which the bank has provided recourse through credit enhancement beyond any contractual obligation to support assets it has sold may not be excluded from risk-weighted assets.

16. Revise Appendix A to part 325 by removing section II.B.6.b. and redesignating section II.B.6.c. as section II.B.6.b. as follows:

Appendix A to Part 325 – Statement of Policy on Risk Based Capital

* * * * *

II. * * *

B. * * * * *

6. * * * * *

b. If a bank has multiple overlapping exposures (such as a program-wide credit enhancement and multiple pool-specific liquidity facilities) to an ABCP program that is not consolidated for risk-based capital purposes, the bank is not required to hold capital under duplicative risk-based capital requirements under this appendix against the overlapping position. * * *

17. In Appendix D to part 325, revise the Table of Contents by adding a new Part IX and Section 81 as follows:

Appendix D to Part 325 – Capital Adequacy Guidelines for Banks: Internal-Ratings-Based and Advanced Measurement Approaches

Part I General Provisions

* * * * *

Part IX Transition Provisions

SECTION 81—Optional transition provisions related to the implementation of consolidation requirements under FAS 167

18. In Appendix D to part 325, revise section 1(c) by redesignating paragraph (3) as paragraph (4) and inserting new paragraph (3) as follows:

Appendix D to Part 325 – Capital Adequacy Guidelines for Banks: Internal-Ratings-Based and Advanced Measurement Approaches

Part I. * * *

Section 1. * * * * *

(c) * * * * *

(3) The FDIC may, on a case-by-case basis, determine that the regulatory capital treatment for an exposure or other relationship to an entity that is not subject to

consolidation on the balance sheet is not commensurate with the risk of the exposure and the relationship of the bank to the entity. In making this determination, the FDIC may require the bank to treat the entity as if it were consolidated on the balance sheet of the bank for risk-based capital purposes and calculate the appropriate risk-based capital ratios accordingly.

(4) Other supervisory authority. * * *

19. Revise Appendix D to part 325 by removing section 42(l) and redesignating section 42(m) as section 42(l) as follows:

Appendix D to Part 325 – Capital Adequacy Guidelines for Banks: Internal-Ratings-Based and Advanced Measurement Approaches

* * * * *

Part V. * * * * *

Section 42. * * * * *

(l) Nth-to-default credit derivatives * * *

20. Revise Appendix D to part 325 by inserting a new part IX and section 81 to read as follows:

Appendix D to Part 325 – Capital Adequacy Guidelines for Banks: Internal-Ratings-Based and Advanced Measurement Approaches

* * * * *

Part IX. Transition Provisions

SECTION 81—Optional transition provisions related to the implementation of consolidation requirements under FAS 167

(a) Scope, applicability, and purpose. This section 81 provides optional transition provisions for a state nonmember bank that is required for financial and regulatory reporting purposes, as a result of its implementation of Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R) (FAS 167), to consolidate certain variable interest entities (VIEs) as defined under GAAP. These transition provisions apply through the end of the fourth quarter following the date of a bank's implementation of FAS 167 (implementation date).

(b) Exclusion period.

(1) Exclusion of risk-weighted assets for the first and second quarters. For the first two quarters after the implementation date (exclusion period), including for the two

calendar quarter-end regulatory report dates within those quarters, a bank may exclude from risk-weighted assets:

(i) Subject to the limitations in paragraph (d) of this section 81, assets held by a VIE, provided that the following conditions are met:

(A) The VIE existed prior to the implementation date,

(B) The bank did not consolidate the VIE on its balance sheet for calendar quarter-end regulatory report dates prior to the implementation date,

(C) The bank must consolidate the VIE on its balance sheet beginning as of the implementation date as a result of its implementation of FAS 167, and

(D) The bank excludes all assets held by VIEs described in paragraphs (b)(1)(i)(A) through (C) of this section 81; and

(ii) Subject to the limitations in paragraph (d) of this section 81, assets held by a VIE that is a consolidated ABCP program, provided that the following conditions are met:

(A) The bank is the sponsor of the ABCP program,

(B) Prior to the implementation date, the bank consolidated the VIE onto its balance sheet under GAAP and excluded the VIE's assets from the bank's risk-weighted assets, and

(C) The bank chooses to exclude all assets held by ABCP program VIEs described in paragraphs (b)(1)(ii)(A) and (B) of this section 81.

(2) Risk-weighted assets during exclusion period. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a bank adopting the optional provisions in paragraph (b) of this section must calculate risk-weighted assets for its contractual exposures to the VIEs referenced in paragraph (b)(1) of this section 81 on the implementation date and include this calculated amount in risk-weighted assets. Such contractual exposures may include direct-credit substitutes, recourse obligations, residual interests, liquidity facilities, and loans.

(3) Inclusion of ALLL in Tier 2 capital for the first and second quarters. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a bank that excludes VIE assets from risk-weighted assets pursuant to paragraph (b)(1) of this section 81 may include in Tier 2 capital the full amount of the ALLL calculated as of the implementation date that is attributable to the assets it excludes pursuant to paragraph (b)(1) of this section 81 (inclusion amount). The amount of ALLL includable in Tier 2 capital in accordance with this paragraph shall not be subject to the limitations set forth in section 13(a)(2) and (b) of this Appendix.

(c) Phase-in period.

(1) Exclusion amount. For purposes of this paragraph (c), exclusion amount is defined as the amount of risk-weighted assets excluded in paragraph (b)(1) of this section as of the implementation date.

(2) Risk-weighted assets for the third and fourth quarters. A bank that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (b)(1) of this section may, for the third and fourth quarters after the implementation date (phase-in period), including for the two calendar quarter-end regulatory report dates within those quarters, exclude from risk-weighted assets 50 percent of the exclusion amount, provided that the bank may not include in risk-weighted assets pursuant to this paragraph an amount less than the aggregate risk-weighted assets calculated pursuant to paragraph (b)(2) of this section 81.

(3) Inclusion of ALLL in Tier 2 capital for the third and fourth quarters. A bank that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (c)(2) of this section may, for the phase-in period, include in Tier 2 capital 50 percent of the inclusion amount it included in Tier 2 capital during the exclusion period, notwithstanding the limit on including ALLL in Tier 2 capital in section 13(a)(2) and (b) of this Appendix.

(d) Implicit recourse limitation. Notwithstanding any other provision in this section 81, assets held by a VIE to which the bank has provided recourse through credit enhancement beyond any contractual obligation to support assets it has sold may not be excluded from risk-weighted assets.

Department of the Treasury

Office of Thrift Supervision

12 CFR Chapter V

For reasons set forth in the common preamble, the Office of Thrift Supervision amends part 567 of Chapter V of title 12 of the Code of Federal Regulations as follows:

PART 567 – CAPITAL

21. The authority for citation for part 567 continues to read as follows:

Authority: 12 U.S.C. 1462, 1462a, 1463, 1464, 1467a, 1828 (note)

22. Section 567.0 is amended by adding paragraph (c) to read as follows:

(c). Optional transition provisions related to the implementation of consolidation requirements under FAS 167

(1) Scope, applicability, and purpose. The section provides optional transition provisions for a savings association that is required for financial and regulatory reporting purposes, as a result of its implementation of Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R) (referred to in this section as FAS 167), to consolidate certain variable interest entities (VIEs) as defined under United States generally accepted accounting principles (GAAP). These transition

provisions apply through the end of the fourth quarter following the date of a savings association's implementation of FAS 167 (implementation date).

(2) Exclusion period

(i) Exclusion of risk-weighted assets for first and second quarters. For the first two quarters, after the implementation date (exclusion period), including for the two calendar quarter-end regulatory report dates within those quarters, a savings association may exclude from risk-weighted assets:

(A) Subject to the limitations in paragraph (4) of this section, assets held by a VIE, provided that the following conditions are met:

(1) The VIE existed prior to the implementation date;

(2) The savings association did not consolidate the VIE on its balance sheet for calendar quarter-end regulatory report dates prior to the implementation date;

(3) The savings association must consolidate the VIE on its balance sheet beginning as of the implementation date as a result of its implementation of FAS 167; and

(4) The savings association excludes all assets held by VIEs described in paragraphs (2)(i)(A)(1) through (3).

(B) Subject to the limitations in paragraph 4 of this section, assets held by a VIE that is a consolidated asset-backed commercial paper (ABCP) program, provided that the following conditions are met:

(1) The savings association is the sponsor of the ABCP program,

(2) Prior to the implementation date, the savings association consolidated the VIE onto its balance sheet under GAAP and excluded the VIE's assets from the savings association's risk-weighted assets; and

(3) The savings association chooses to exclude all assets held by ABCP program VIEs described in paragraphs (2)(i)(B)(i) and (ii).

(ii) Risk-weighted assets during exclusion period. During the exclusion period, including the two calendar quarter-end regulatory report dates within the exclusion period, a savings association adopting the optional provisions of paragraph (c)(2) must calculate risk-weighted assets for its contractual exposures to the VIEs referenced in paragraph (2)(i) on the implementation date and include this calculated amount in its risk-weighted assets. Such contractual exposures may include direct-credit substitutes, recourse obligations, residual interests, liquidity facilities, and loans.

(iii) Inclusion of Allowance for Loan and Lease Losses (ALLL) in tier 2 capital for the first and second quarters.

During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a savings association that excludes VIE assets from risk-weighted assets pursuant to paragraph (2)(i) may include in tier 2 capital the full amount of the allowance for loan and lease losses (ALLL) calculated as of the implementation date that is attributable to the assets it excludes pursuant to paragraph (2)(i) of this section (inclusion amount). The amount of ALLL includable in tier 2 capital in accordance with this paragraph shall not be subject to the limitations set forth at section 567.5(b)(4).

(3) Phase-in period

(i) Exclusion amount. For purposes of this paragraph, exclusion amount is defined as the amount of risk-weighted assets excluded in paragraph (2)(i) of this section as of the implementation date.

(ii) Risk-weighted assets for the third and fourth quarters. A savings association that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (2)(i) of this section may, for the third and fourth quarters, after the implementation date (phase-in period), including for the two calendar quarter-end regulatory report dates within those quarters exclude from risk-weighted assets 50 percent of the exclusion amount, provided that the savings association may not include in risk-weighted assets pursuant to this paragraph an amount less than the aggregate risk-weighted assets calculated pursuant to paragraph (b)(ii).

(iii) Inclusion of ALLL in Tier 2 capital for the third and fourth quarters. A savings association that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (3)(ii) of this section may, for the phase-in period, include in tier 2 capital 50 percent of the inclusion amount it included in tier 2 capital during the exclusion period, notwithstanding the limit on including ALLL in tier 2 capital in section 567.5(b)(4).

(4) Implicit recourse limitation. Notwithstanding any other provision in section 567.0(c), assets held by a VIE to which a savings association has provided recourse through credit enhancement beyond any contractual obligation to support assets it has sold may not be excluded from risk-weighted assets.

23. Section 567.5 (a)(1)(iii) is amended to read as follows:

§ 567.5 Components of capital.

* * * * *

(a) * * *

(1) * * *

(iii) Minority interests in the equity accounts of the subsidiaries that are fully consolidated.

* * * * *

24. Section 567.6 is amended by deleting paragraphs (a)(2)(vi)(E)(3)(i) and (ii).

25. Section 567.6 is amended by redesignating paragraph (a)(2)(vi)(E)(3)(iii) as (a)(2)(vi)(E)(3).

* * * * *

(a) * * *

(3) If a savings association has multiple overlapping exposures (such as a program-wide credit enhancement and a liquidity facility) to an ABCP program that is not consolidated for risk-based capital purposes, the savings association is not required to hold duplicative risk-based capital under this part against the overlapping position. Instead, the savings association should apply to the overlapping position the applicable risk-based capital treatment that results in the highest capital charge.

26. Section 567.11 is amended by adding paragraphs (c)(3) and redesignating paragraph (c)(3) as paragraph (c)(4). Section 567.11 is amended by adding paragraph (d) to read as follows:

§ 567.11 Reservation of authority.

* * * * *

(c) * * *

(3) OTS may find that the capital treatment for an exposure to a transaction not subject to consolidation on the savings association's balance sheet does not appropriately reflect the risks imposed on the savings association. Accordingly, OTS may require the savings association to treat the transaction as if it were consolidated on the savings association's balance sheet. OTS will look to the substance of and risk associated with the transaction as well as other relevant factors in determining whether to require such treatment and in calculating risk based capital as OTS deems appropriate.

(4) If this part does not specifically assign a risk weight, credit equivalent amount, or credit conversion factor, OTS may assign any risk weight, credit equivalent amount or credit conversion factor that it deems appropriate. In making this determination, OTS will consider the risks associated with the asset or off-balance sheet item as well as other relevant factors.

(d) In making a determination under this paragraph (c) of this section, the OTS will notify the savings association of the determination and solicit a response from the savings association. After review of the response by the savings association, the OTS shall issue a final supervisory decision regarding the determination made under paragraph (c) of this section.

27. In Appendix C to part 567, revise the Table of Contents by adding a new Part IX and Section 81 as follows:

Appendix C to Part 567 - Risk-Based Capital Requirements – Internal Ratings-Based and Advanced Measurement Approaches

Part I General Provisions

* * * * *

Part IX Transition Provisions

SECTION 81—Optional transition provisions related to the implementation of consolidation requirements under FAS 167

28. In Appendix C to part 567, add a new paragraph (c)(3) to Part 1, Section 1 and redesignate paragraph (c)(3) as paragraph (c)(4) as follows:

Appendix C to Part 567 - Risk-Based Capital Requirements – Internal Ratings-Based and Advanced Measurement Approaches

* * * * *

(c) * * *

(3) Regulatory capital treatment of unconsolidated entities. OTS may find that the capital treatment for an exposure to a transaction not subject to consolidation on the savings association’s balance sheet does not appropriately reflect the risks imposed on the savings association. Accordingly, OTS may require the savings association to treat the transaction as if it were consolidated on the savings association’s balance sheet. OTS will look to the substance of and risk associated with the transaction as well as other relevant factors in determining whether to require such treatment and in calculating risk-based capital as OTS deems appropriate.

(4) Other supervisory authority. Nothing in this appendix limits the authority of the OTS under any other provision of law or regulation to take supervisory or enforcement action, including action to address unsafe or unsound practices or conditions, deficient capital levels, or violations of law.

29. Revise appendix C to part 567 by removing section 42(l) and redesignating section 42(m) as section 42(l) as follows:

Appendix C to Part 567 – Risk-Based Capital Requirements: Internal-Ratings-Based and Advanced Measurement Approaches

* * * * *

Part V. * * * * *

Section 42. * * * * *

(l) Nth-to-default credit derivatives * * *

1. Revise Appendix C to part 567 by inserting a new part IX and section 81 to read as follows:

Appendix C to Part 567 – Risk-Based Capital Requirements: Internal-Ratings-Based and Advanced Measurement Approaches

* * * * *

Part IX. Transition Provisions

SECTION 81—Optional transition provisions related to the implementation of consolidation requirements under FAS 167

(a) Scope, applicability, and purpose. This section 81 provides optional transition provisions for a savings association that is required for financial and regulatory reporting purposes, as a result of its implementation of Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R) (FAS 167), to consolidate certain variable interest entities (VIEs) as defined under GAAP. These transition provisions apply through the end of the fourth quarter following the date of a savings association's implementation of FAS 167 (implementation date).

(b) Exclusion period.

(1) Exclusion of risk-weighted assets for the first and second quarters. For the first two quarters after the implementation date (exclusion period), including for the two calendar quarter-end regulatory report dates within those quarters, a savings association may exclude from risk-weighted assets:

(i) Subject to the limitations in paragraph (d) of section 81, assets held by a VIE, provided that the following conditions are met:

(A) The VIE existed prior to the implementation date,

(B) The savings association did not consolidate the VIE on its balance sheet for calendar quarter-end regulatory report dates prior to the implementation date,

(C) The savings association must consolidate the VIE on its balance sheet beginning as of the implementation date as a result of its implementation of FAS 167, and

(D) The savings association excludes all assets held by VIEs described in paragraphs (b)(1)(i)(A) through (C) of this section 81; and

(ii) Subject to the limitations in paragraph (d) of this section 81, assets held by a VIE that is a consolidated ABCP program, provided that the following conditions are met:

(A) The savings association is the sponsor of the ABCP program,

(B) Prior to the implementation date, the savings association consolidated the VIE onto its balance sheet under GAAP and excluded the VIE's assets from the savings association's risk-weighted assets, and

(C) The savings association chooses to exclude all assets held by ABCP program VIEs described in paragraphs (b)(1)(ii)(A) and (B) of this section 81.

(2) Risk-weighted assets during exclusion period. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a savings association adopting the optional provisions in paragraph (b) of this section must calculate risk-weighted assets for its contractual exposures to the VIEs referenced in paragraph (b)(1) of this section 81 on the implementation date and include this calculated amount in risk-weighted assets. Such contractual exposures may include direct-credit substitutes, recourse obligations, residual interests, liquidity facilities, and loans.

(3) Inclusion of ALLL in tier 2 capital for the first and second quarters. During the exclusion period, including for the two calendar quarter-end regulatory report dates within the exclusion period, a savings association that excludes VIE assets from risk-weighted assets pursuant to paragraph (b)(1) of this section 81 may include in tier 2 capital the full amount of the ALLL calculated as of the implementation date that is attributable to the assets it excludes pursuant to paragraph (b)(1) of this section 81 (inclusion amount). The amount of ALLL includable in tier 2 capital in accordance with this paragraph shall not be subject to the limitations set forth in section 13(A)(2) and 13(b) of this Appendix. .

(c) Phase-in period.

(1) Exclusion amount. For purposes of this paragraph (c), exclusion amount is defined as the amount of risk-weighted assets excluded in paragraph (b)(1) of this section as of the implementation date.

(2) Risk-weighted assets for the third and fourth quarters. A savings association that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (b)(1) of this section may, for the third and fourth quarters after the implementation date (phase-in period), including for the two calendar quarter-end regulatory report dates within those quarters, exclude from risk-weighted assets 50 percent of the exclusion amount, provided that the savings association may not include in risk-weighted assets pursuant to this paragraph an amount less than the aggregate risk-weighted assets calculated pursuant to paragraph (b)(2) of this section 81.

(3) Inclusion of ALLL in tier 2 capital for the third and fourth quarters. A savings association that excludes assets of consolidated VIEs from risk-weighted assets pursuant to paragraph (c)(2) of this section may, for the phase-in period, include in tier 2 capital 50 percent of the inclusion amount it included in tier 2 capital, during the exclusion period, notwithstanding the limit on including ALLL in tier 2 capital in section 13(a)(2) and 13(b) of this Appendix.

(d) Implicit recourse limitation. Notwithstanding any other provision in this section 81, assets held by a VIE to which the savings association has provided recourse through credit enhancement beyond any contractual obligation to support assets it has

sold may not be excluded from risk-weighted assets.
