Dear FDIC:

Your service is appreciated. It is not wise to remove the TLG program even though it not currently being utilized or is being under- utilized. Think of it as a safety net, hopefully, never used, but it adds confidence to a very weak-minded, weak-willed financial community by its very existence. The moderate success of late within the economy does not translate into being out of danger. Leave the TGLP in place until is has to be removed. It is support for a weak world.
