**Subject:** Increased fees

I feel it is not fair for community banks like ours to be assessed higher FDIC fees because of the decisions larger banks have made. We have not participated in the bailout money and we have no plans. Charge the banks that need or took the bailout money and that have operated in an irresponsible manner. We've served our community since 1878 with fairly priced banking products and intend to do so now and in the future. Please do not penalize our customers and the community banks across the nation for what took place on Wall Street!

Thank you,

Bryan Marsh
