**Subject:** Assessments, RIN 3064-AD35

To Whom it may concern,

I am writing to voice my opinion that the smaller community banks who have not participated in the excesses and fraud of the large wallstreet banks, should not be called upon to pay for those excesses through increased Assessments via, RIN 3064-AD35. The large banks who have been on an orgy of leveraged money making schemes should be kicking in a much larger share for the FDIC fund to remain solvent. It is disgusting to see that the banks who are on the verge of taking this country down financially should be allowed to drain funds off the banks who operated in a reasonable and responsible manner.

Sincerely,  
Cheryl Storm  
Minnesota
