Subject: Special Assessment

After reading a letter from ICBA and being told the bank that I work for will be charge a higher fee from the FDIC for a special assessment, I'm concern for our bank and all small hometown banks in general. This fee could and may cause undo hardship on all of us, but are allowing large banks to pay it and still run their banks reckless. When will the small banks be taken care of just the the large bailouts big banks are getting . If you allow large banks to continue this and keep raising our fee the small banks will not be able to stay in business and we will lose a big part OF our hometown banks. This will mean jobs could be lost and faith in small banks in america will be lost. Please take this into account when you make decisions like this. America will not be the same again if this is to continue.
