Subject: special assessment

Please reconsider your decision to assess a special 20 bp premium on all financial institutions. We are a community bank in a rural county in west central Ohio, this special assessment will cost our bank approx. \$500,000 in one shot. That is \$500,000 gone and not available for us to loan out to our customers, thus restricting credit nor will these funds be available to support our local community.

While realizing the FDIC must rebuild the DIF, the special assessment should be levied on those institutions who are causing risk to the fund, not those who are and always have acted conservatively and responsibly.

Thank you for your consideration.
