Subject: "Assessments, RIN3064-AD35"

To Whom It May Concern:

The FDIC Assessment levied on community bank's is unfair and going to cause a hardship when we are not one of the bank's that were in a position to have caused the problem in the first place. Well run community bank's should not have to pay the penalty for the lose run, unmanaged bank's. Where were the examiners? Why did they not catch these problems earlier?
