Subject: FDIC Insurance Assessments

Dear Managers of FDIC,

Special assessments should be put back on the tables of the banks and bank officers that caused the mess. I don't feel that smaller community banks should be forced to pay for the Wall Street mistakes caused by the greed of those banks and their managers. I have worked for Hiawatha National Bank for 25 years and am well acquainted with the struggles that come with banking and the hard work that comes with working out of problems. But we did all the work without any help from the outside. Now it's time for the "bigger" bank officials to work hard, to struggle a little and pay their dues.
