Title: Satellite Delivery of Network Signals to Unserved Households for Purposes of the Satellite Home Viewer Act.

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 848 respondents; 250,000 responses.

Estimated Time per Response: 0.50 hours.

Frequency of Response: Recordkeeping requirement; On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is the Satellite Home Viewer Act, 17 U.S.C. 119.

Total Annual Burden: 125,000 hours.

Total Annual Cost: None.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: On November 23, 2010, the Commission's Office of Engineering and Technology, released a Report and Order, Measurement Standards for Digital Television Signals

Pursuant to the Satellite Home Viewer Extension and Reauthorization Act of 2004, ET Docket No. 06-94; FCC 10-195. The Report and Order adopted rules establishing measurement procedures for determining the strength of a digital broadcast television (DTV) signal at any specific location. These procedures will be used for determining whether households are eligible to receive distant DTV network signals retransmitted by satellite carriers, pursuant to the provisions of the Satellite Television Extension and Localism Act of 2010 (STELA). This Report and Order implements DTV signal measurement procedures proposed in the Commission's Notice of Proposed Rulemaking (SHVERA NPRM) and Further Notice of Proposed Rulemaking (STELA FNRPM) in this proceeding with minor modifications.

Therefore, the information collection requirements that require approval by the Office of Management and Budget (OMB) are as follows:

47 CFR 73.686(e) describes the procedures for measuring the field strength of digital television signals. These procedures will be used to determine whether a household is eligible to receive a distant digital network signal from a satellite television provider, largely rely on existing, proven methods the Commission has already established for measuring analog television signal strength at any individual location, as set forth in Section 73.686(d) of the existing rules, but include modifications as necessary to accommodate the inherent differences between analog and digital TV signals. The new digital signal measurement procedures include provisions for the location of the measurement antenna, antenna height, signal measurement method, antenna orientation and polarization, and data recording.

Therefore, satellite and broadcast industries making field strength measurements shall maintain written records and include the following information: (a) A list of calibrated equipment used in the field strength survey, which for each instrument specifies the manufacturer, type, serial number and rated accuracy, and the date of the most recent calibration by the manufacturer or by a laboratory. Include complete details of any instrument not of standard manufacture; (b) a detailed description of the calibration of the measuring equipment, including field strength meters, measuring antenna, and connecting cable; (c) for each spot at the measuring site, all factors which may affect the recorded field, such as topography,

height and types of vegetation, buildings, obstacles, weather, and other local features; (d) a description of where the cluster measurements were made; (e) time and date of the measurements and signature of the person making the measurements; (f) for each channel being measured, a list of the measured value of field strength (in units of dB) after adjustment for line loss and antenna factor) of the five readings made during the cluster measurement process, with the median value highlighted.

SUPPLEMENTARY INFORMATION:

Proposal To Renew the Following Currently-Approved Collection of Information:

Title: Flood Insurance.

OMB Number: 3064–0120.

Frequency of Response: On occasion.

Affected Public: Any depository institution that makes one or more loans to be secured by a building located on property in a special flood hazard area.

Estimated Number of Respondents/Recordkeepers: 5,272.

Estimated Number of Transactions: 180,000.

Estimated Reporting Hours: .05 hours × 180,000 = 9,000.

Estimated Recordkeeping Hours: 1 hour × 5,272 hours = 5,272.

Estimated Total Annual Reporting and Recordkeeping Burden Hours: 5,272 + 9,000 = 14,272 hours.

General Description of Collection:

Each supervised lending institution is currently required to provide a notice of special flood hazards to each borrower with a loan secured by a building or mobile home located or to be located in an area identified by the Director of the Federal Emergency Management Agency as being subject to special flood hazards. The Riegle Community Development Act requires that each institution must also provide a copy of the notice to the servicer of the loan (if different from the originating lender).

Request for Comment

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.

Dated at Washington, DC, this 27th day of April 2011.

Title: 46 CFR Part 540—Application for Certificate of Financial Responsibility/Form FMC–131.

OMB Approval Number: 3072–0012 (Expires August 31, 2011).

Abstract: Sections 2 and 3 of Public Law 89–777 (46 U.S.C. 44101–44106) require owners or charterers of passenger vessels with 50 or more passenger berths or stateroom accommodations and embarking passengers at United States ports and territories to establish their financial responsibility to meet liability incurred for death or injury to passengers and other persons, and to indemnify passengers in the event of nonperformance of transportation. The Commission's Rules at 46 CFR part 540 implement Public Law 89–777 and specify financial responsibility coverage requirements for such owners and charterers.

Current Actions: There are no changes to this information collection, and it is being submitted for extension purposes only.

Type of Review: Extension.

Needs and Uses: The information will be used by the Commission's staff to ensure that passenger vessel owners and charterers have evidenced financial responsibility to indemnify passengers and others in the event of nonperformance or casualty.

Frequency: This information is collected when applicants apply for a certificate or when existing certificants change any information in their application forms.

Type of Respondents: The types of respondents are owners, charterers and operators of passenger vessels with 50 or more passenger berths that embark passengers from U.S. ports or territories.

Number of Annual Respondents: The Commission estimates an annual respondent universe of 45.

Estimated Time per Response: The time per response ranges from 0.5 to 8 person-hours for reporting and recordkeeping requirements contained
