Re: Basel III Capital Proposals

Ladies and Gentlemen:

Thank you for the opportunity to provide comment on the Basel III proposals<sup>1</sup> that were recently issued for public comment by the Federal Reserve Board, the Office of the Comptroller of the Currency, and the Federal Deposit Insurance Corporation.

Community banks should be allowed to continue using the current Basel I framework for computing their capital requirements. Community banks operate on a relationship-based business model that is specifically designed to serve customers in their respective communities on a long-term basis. This model contributes to the success of community banks all over the United States through practical, common sense approaches to managing risk. The largest banks operate purely on transaction volume and pay little attention to the customer relationship. This difference in banking models demonstrates the need to place tougher capital standards exclusively on the largest banks to better manage the ability to absorb losses.

In summary, this cookie cutter, one-size-fits-all approach was not designed for Community banks, like Bank of Charles Town. It only adds to the already overwhelming regulatory burden that small Community banks are forced to deal with. Allowing banks like ours to continue to use the Basel I framework is imperative. Thank you for your consideration.

Matthew C. Stickel  
Assistant Vice President  
Bank of Charles Town  
Charles Town, WV

---

<sup>1</sup> The proposals are titled: *Regulatory Capital Rules: Regulatory Capital, Implementation of Basel III, Minimum Regulatory Capital Ratios, Capital Adequacy, and Transition Provisions*; *Regulatory Capital Rules: Standardized Approach for Risk-weighted Assets*; *Market Discipline and Disclosure Requirements*; and *Regulatory Capital Rules: Advanced Approaches Risk-based Capital Rules; Market Risk Capital Rule*.
