FDIC:

How sad it is... Volcker rule easing is dangerous to citizens. I guess DC doesn't mind watching Investment Bankers prey upon their customers by promoting assets to the masses while shorting the same assets on the other end. I guess its like Pres. Trump claiming we have such a healthy economy while begging for an immediate 1 percent fed cut. I'm sure we will see the Fed cut. I'm sure we will see Investment Bankers line their pockets. I'm sure we will see citizens once again burden the greed and fraud.

Respectfully,
