To the Commissioner

Re: "Qualifications for Failed Bank Acquisitions." OMB Control Number: 3064-0169.

9/19/2019:

I am for easing the rules for allowing private investors to acquire failed banks. This should be done with as little paperwork and government involvement as possible. We need more private enterprise to save banks and account holders, not government bailouts. As long as the acquirer meets legal and regulatory requirements they should be allowed to purchase failed banks. This is a job for private equity; not the government.
