My major comment would be that any and all signs regarding FDIC insurance include and incorporate the FDIC website, https://edie.fdic.gov/fdic_info.html and EDIE calculator, <https://edie.fdic.gov/index.html> to eliminate the need to maintain paper brochures. This way you guarantee consumers have access to the most current and accurate information and eliminate the expense the FDIC has to provide costly brochures that need to be replaced if and when there is a change.
