Subject: "enough is enough" - overdraft fees are usury

I am 67 years old and on Social Security only.

A \$35 overdraft fee for a less than \$5.00 ATM transaction that created an overdraft in my account is ***criminal***.

The banks computer system can be programmed to protect the customer or rip them off. Today they are set to rip off people with overdraft fees.

Allow me to set a low balance limit below by which my debit transaction is refused. That is much less of a financial burden on my limited funds.

Just simply refuse my transaction when my account goes below a \$10.00 balance.
