GENERAL INSTRUCTIONS

Schedules RC and RC-A through RC-T constitute the Report of Condition and its supporting schedules. Schedules RI, RI-A, RI-B, RI-D, and RI-E constitute the Report of Income and its supporting schedules. The Reports of Condition and Income are commonly referred to as the Call Report.

WHO MUST REPORT ON WHAT FORMS

Every national bank, state member bank, and insured state nonmember bank is required to file consolidated Reports of Condition and Income normally as of the close of business on the last calendar day of each calendar quarter, i.e., the report date. The specific reporting requirements depend upon the size of the bank and whether it has any "foreign" offices. Banks must file the appropriate forms as described below:

- (1) **BANKS WITH FOREIGN OFFICES:** Banks of any size that have any "foreign" offices (as defined below) must file quarterly the *Consolidated Reports of Condition and Income for a Bank with Domestic and Foreign Offices* (FFIEC 031). For purposes of these reports, all of the following constitute "foreign" offices:
- (a) an International Banking Facility (IBF);
 - (b) a branch or consolidated subsidiary in a foreign country; and
 - (c) a majority-owned Edge or Agreement subsidiary.

In addition, for banks chartered and headquartered in the 50 states of the United States and the District of Columbia, a branch or consolidated subsidiary in Puerto Rico or a U.S. territory or possession is a "foreign" office. However, for purposes of these reports, a branch at a U.S. military facility located in a foreign country is a "domestic" office.

- (2) **BANKS WITHOUT FOREIGN OFFICES:** Banks of any size that have only domestic offices must file quarterly the *Consolidated Reports of Condition and Income for a Bank with Domestic Offices Only* (FFIEC 041). For banks chartered and headquartered in Puerto Rico or a U.S. territory or possession, a branch or consolidated subsidiary in one of the 50 states of the United States, the District of Columbia, Puerto Rico, or a U.S. territory or possession is a "domestic" office.

Close of Business

The term "close of business" refers to the time established by the reporting bank as the cut-off time for receipt of work for posting transactions to its general ledger accounts for that day. The time designated as the close of business should be reasonable and applied consistently. The posting of a transaction to the general ledger means that both debit and credit entries are recorded as of the same date. In addition, entries made to general ledger accounts in the period subsequent to the close of business on the report date that are applicable to the period covered by the Reports of Condition and Income (e.g., adjustments of accruals, posting of items held in suspense on the report date to their proper accounts, and other quarter-end adjusting entries) should be reported in the Reports of Condition and Income as if they had actually been posted to the general ledger at or before the cut-off time on the report date.

With respect to deposits received by the reporting bank after the cut-off time for posting them to individual customer accounts for a report date (i.e., so-called "next day deposits" or "late deposits"), but which are nevertheless posted in any manner to the reporting bank's general ledger accounts for that report date (including, but not limited to, through the use of one or more general ledger contra accounts), such deposits must be reported in (1) Schedule RC, Balance Sheet, item 13, "Deposits," and in

Schedule RC-E, Deposit Liabilities, or (2) in Schedule RC-O, Other Data for Deposit Insurance and FICO Assessments, item 2, "Unposted credits." The use of memorandum accounts outside the reporting bank's general ledger system for control over "next day" or "late deposits" received on the report date will not cause such deposits to be reportable in Schedules RC and RC-E or Schedule RC-O.

Frequency of Reporting

The reports are required to be submitted quarterly by all banks. However, some schedules are required on a less frequent basis, as follows:

- (1) For all banks, Schedule RC-C, part II, Loans to Small Businesses and Small Farms, is to be filed *only* as of the June 30 report date.
- (2) Banks with total fiduciary assets greater than \$250 million (as of the preceding December 31) or with gross fiduciary and related services income greater than 10 percent of revenue (net interest income plus noninterest income) for the preceding calendar year must complete the applicable items of Schedule RC-T quarterly. All other banks with fiduciary powers must complete the applicable items of Schedule RC-T annually as of the December 31 report date.

In addition, the following items are to be completed annually rather than quarterly:

- (1) Schedule RC, Memorandum item 1, on the level of external auditing work performed for the bank is to be reported as of the March 31 report date;
- (2) Schedule RC-O, Memorandum item 1.a.(2), "Number of deposit accounts of \$100,000 or less" (in domestic offices), is to be reported as of the June 30 report date; and
- (3) Schedule RC-E, Memorandum item 1.e, "Preferred deposits," is to be reported as of the December 31 report date.

Differences in Detail of Reports

The amount of detail required to be reported varies between the two versions of the report forms, with the report forms for banks with foreign offices (FFIEC 031) having more detail than the report forms for banks with domestic offices only (FFIEC 041). Furthermore, as discussed below under Shifts in Reporting Status, the amount of detail varies within the FFIEC 041 report form, primarily based on the size of the bank. In general, the FFIEC 041 report form requires the least amount of detail from banks with less than \$100 million in total assets.

Differences in the level of detail within both the FFIEC 031 and 041 report forms are as follows:

- (1) banks reporting average trading assets of \$2 million or more for any quarter of the preceding calendar year must complete Schedule RC-D, Trading Assets and Liabilities, and provide a breakdown of their trading revenue by risk exposure in Schedule RI, Memorandum item 8, "Trading revenue;"
- (2) banks with financial subsidiaries must complete certain additional items in Schedule RC-R, Regulatory Capital;
- (3) banks servicing more than \$10 million in financial assets other than 1-4 family residential mortgages must report the volume of such servicing in Schedule RC-S, Memorandum item 2.c; and

No item on the Reports of Condition and Income is to be left blank unless otherwise indicated in the instructions. Except in those instances, an entry must be made for each item, i.e., an amount, a zero, the word "none," an "X," or an "N/A."

State banks should refer to their appropriate state bank supervisory authority for information concerning state requirements for submitting copies of the Reports of Condition and Income filed with federal bank supervisory authorities.

Submission Date

The term "submission date" is defined as the date by which a bank's completed Reports of Condition and Income must be received in electronic form by EDS, the banking agencies' electronic collection agent. Except as indicated below, EDS must receive the data file for a bank's Reports of Condition and Income no more than 30 calendar days after the report date (subject to the timely filing provisions for computer diskettes set forth in the following paragraph). For example, the March 31 report must be received by April 30 and the June 30 report by July 30. Earlier submission would aid the banking agencies in editing and reviewing the reports and is encouraged. No extensions of time for submitting reports are granted.

Any bank using the paper-based filing alternative must ensure that it delivers its hard-copy reports to the party with whom it has contracted for the conversion of its reports to automated form in sufficient time for that party to electronically transmit the reports to EDS by the submission deadline.

The filing of a bank's completed Reports of Condition and Income on a computer diskette will be considered timely, regardless of when the reports are received by EDS, if the computer diskette is mailed first class and postmarked no later than the third calendar day preceding the submission deadline. In the absence of a postmark, a bank whose computer diskette containing its completed Reports of Condition and Income is received late may be called upon to provide proof of timely mailing. A "Certificate of Mailing" (U.S. Postal Service Form 3817) may be used to provide such proof. If an overnight delivery service is used, the placement of the computer diskette into the delivery system on the day before the submission deadline will constitute timely submission.

Any bank that has more than one foreign office, other than a "shell" branch or an IBF, may take an additional limited period of time to submit its Reports of Condition and Income. Effective June 30, 2004, EDS must receive the data file for such a bank's Reports of Condition and Income in electronic form no more than 40 calendar days after the report date. The filing deadline for such a bank will be reduced to 35 calendar days effective June 30, 2006. Eligible banks are urged to use the additional time only if absolutely necessary and to make every effort to report as soon as possible, preferably within the 30-day submission period.

Amended Reports

A bank's primary federal bank supervisory authority may require the filing of amended Reports of Condition and Income if reports as previously submitted contain significant errors, as determined by the supervisory authority, in how the reporting bank classified or categorized items in the reports, i.e., on what line of the report an item has been reported.

When dealing with the recognition and measurement of events and transactions in the Reports of Condition and Income, amended reports may be required if a bank's primary federal bank supervisory authority determines that the reports as previously submitted contain errors that are material for the reporting bank. Materiality is a qualitative characteristic of accounting information which is defined in FASB Concepts Statement No. 2 as "the magnitude of an omission or misstatement of accounting

information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement."

SCOPE OF THE "CONSOLIDATED BANK" REQUIRED TO BE REPORTED IN THE SUBMITTED REPORTS

In their Reports of Condition and Income submitted to the federal bank supervisory agencies, banks and their subsidiaries shall present their financial condition and results of operations on a consolidated basis in accordance with generally accepted accounting principles. All majority-owned subsidiaries shall be consolidated unless the subsidiary is not "significant" or is covered by one of the exceptions listed in the "Exclusions from the Coverage of the Consolidated Report" section below. (See the Glossary entry for "subsidiaries" for the definition of "significant subsidiary.") Accordingly, the Consolidated Reports of Condition and Income shall consolidate the operations of:

- (1) the bank's head office;
- (2) all branches of the bank, domestic and foreign;
- (3) any International Banking Facility (IBF) established by the bank;
- (4) all majority-owned Edge and Agreement subsidiaries, including their IBFs, their foreign and domestic branches, and their significant subsidiaries;
- (5) all majority-owned foreign banks held directly by the reporting bank pursuant to Section 25 of the Federal Reserve Act;
- (6) all other majority-owned subsidiaries that are "significant," including domestic subsidiaries that are commercial banks, savings banks, or savings and loan associations that must file separate Reports of Condition and Income (or separate reports of a comparable nature) with any state or federal financial institutions supervisory authority; and
- (7) all nonsignificant majority-owned subsidiaries that the bank has elected to consolidate on a consistent basis in both the Report of Condition and the Report of Income.

Each bank shall account for any investments in unconsolidated subsidiaries, associated companies, and those corporate joint ventures over which the bank exercises significant influence according to the equity method of accounting. The equity method of accounting is described in Schedule RC-M, item 4. (Refer to the Glossary entry for "subsidiaries" for the definitions of the terms subsidiary, associated company, and corporate joint venture.)

Exclusions from the Coverage of the Consolidated Report

Subsidiaries where control does not rest with the parent -- If control of a majority-owned subsidiary does not rest with the parent bank because of legal or other reasons (e.g., the subsidiary is in bankruptcy), the subsidiary is not to be consolidated for purposes of the report. Thus, the bank's investment in such a subsidiary is not eliminated in consolidation but will be reflected in the reports in the balance sheet item for "Investments in unconsolidated subsidiaries and associated companies" (Schedule RC, item 8) and other transactions of the bank with such a subsidiary will be reflected in the appropriate items of the reports in the same manner as transactions with unrelated

Memoranda**Item No. Caption and Instructions**

- 7** **If the reporting bank has restated its balance sheet as a result of applying push down accounting this calendar year, report the date of the bank's acquisition.** If the reporting bank was acquired during the calendar year-to-date reporting period and applied push down accounting to its balance sheet in accordance with the "push down accounting" section of the Glossary entry for "business combinations," report the date (year, month, and day) as of which the acquisition took place. For example, a bank that was acquired as of the close of business June 1, 2005, and applied push down accounting to its balance sheet would report 20050601 in this Memorandum item in the Reports of Condition and Income for June 30, September 30, and December 31, 2005.

Push down accounting is the establishment of a new accounting basis for a bank in its separate financial statements (including its Reports of Condition and Income) as a result of the bank becoming substantially wholly owned by an investor (which may be a holding company) or a group of investors working collaboratively via a purchase transaction or a series of purchase transactions. When push down accounting is used to account for the acquisition of a bank that becomes substantially wholly owned, yet retains its separate corporate existence, the bank's assets and liabilities (Schedule RC) are restated based on the amount or amounts paid to purchase the bank's voting stock. The purchase cost should be allocated to the bank's assets and liabilities based on their fair values as of the date(s) of the purchase transaction(s). In the year the bank applies push down accounting, its income statements (Schedule RI) for periods after the date it became substantially wholly owned should only include amounts from that date through the end of the calendar year-to-date reporting period.

If the reporting bank has not been acquired during this calendar year or if the reporting bank has been acquired during this calendar year but push down accounting was not applied, the bank should report zeros (i.e., 00000000) in the year, month, and day columns of this Memorandum item.

8 **Trading revenue (from cash instruments and derivative instruments).**

Memorandum items 8.a through 8.d are to be completed by banks that reported average trading assets (in Schedule RC-K, item 7) of \$2 million or more for any quarter of the preceding calendar year.

Report, in the appropriate item below, a breakdown of trading revenue that has been included in the body of the income statement in Schedule RI, item 5.c. For each of the four types of underlying risk exposure, report the combined revenue (net gains and losses) from trading cash instruments and derivative instruments. For purposes of Memorandum item 8, the reporting bank should determine the underlying risk exposure category in which to report the trading revenue from cash instruments and derivative instruments in the same manner that the bank makes this determination for other financial reporting purposes. The sum of Memorandum items 8.a through 8.d must equal Schedule RI, item 5.c.

Memoranda**Item No. Caption and Instructions**

8.a Interest rate exposures. Report in this item net gains (losses) from trading cash instruments and derivative contracts that the reporting bank manages as interest rate exposures. Interest rate exposures may arise from cash debt instruments (e.g., U.S. Treasury securities) and interest rate contracts. Interest rate contracts are those contracts related to an interest-bearing financial instrument or whose cash flows are determined by referencing interest rates or another interest rate contract (e.g., an option on a futures contract to purchase a Treasury bill). Interest rate contracts include interest rate futures, single currency interest rate swaps, basis swaps, forward rate agreements, and interest rate options, including caps, floors, collars, and corridors.

Exclude trading revenue on contracts involving the exchange of foreign currencies (e.g., cross-currency swaps and currency options) that the reporting bank manages as foreign exchange exposures. Report such trading revenue in Memorandum item 8.b.

8.b Foreign exchange exposures. Report in this item net gains (losses) from trading cash instruments and derivative contracts that the reporting bank manages as foreign exchange exposures. Foreign exchange exposures may arise from cash instruments (e.g., debt securities) denominated in non-U.S. currencies and foreign exchange rate contracts. Foreign exchange rate contracts are those contracts to purchase foreign (non-U.S.) currencies and U.S. dollar exchange in the forward market, i.e., on an organized exchange or in an over-the-counter market. A purchase of U.S. dollar exchange is equivalent to a sale of foreign currency. Foreign exchange rate contracts include cross-currency interest rate swaps where there is an exchange of principal, forward and spot foreign exchange contracts, and currency futures and currency options.

8.c Equity security and index exposures. Report in this item net gains (losses) from trading cash instruments and derivative contracts that the reporting bank manages as equity security or index exposures. Equity security or index exposures may arise from equity securities and equity security or index (i.e., equity derivative) contracts. Equity derivative contracts are contracts that have a return, or a portion of their return, linked to the price of a particular equity or to an index of equity prices, such as the Standard and Poor's 500.

8.d Commodity and other exposures. Report in this item net gains (losses) from trading cash instruments and derivative contracts that the reporting bank manages as commodity or other exposures. Commodity or other exposures may arise from commodities and commodity and other derivative contracts not reported as interest rate, foreign exchange, or equity derivative contracts. Commodity and other contracts are contracts that have a return, or a portion of their return, linked to the price or to an index of precious metals, petroleum, lumber, agricultural products, etc. Commodity and other contracts also include any other contracts that are not reportable as interest rate, foreign exchange, or equity derivative contracts.

Memoranda**Item No. Caption and Instructions**

- 1 Pledged securities.** Report the amortized cost of all held-to-maturity securities and the fair value of all available-for-sale securities included in Schedule RC-B above that are pledged to secure deposits, repurchase transactions, or other borrowings (regardless of the balance of the deposits or other liabilities against which the securities are pledged); as performance bonds under futures or forward contracts; or for any other purpose. Include as pledged securities any held-to-maturity and available-for-sale securities that have been "loaned" in securities borrowing/lending transactions that do not qualify as sales under FASB Statement No. 140.

Also include securities owned by consolidated insurance subsidiaries and held in custodial trusts (that are reported as held-to-maturity securities or available-for-sale securities in Schedule RC-B) that are pledged to insurance companies external to the consolidated bank.

- 2 Maturity and repricing data for debt securities.** Report in the appropriate subitem maturity and repricing data for the bank's holdings of debt securities (reported in Schedule RC-B, items 1 through 6 above). Report the amortized cost of held-to-maturity debt securities and the fair value of available-for-sale debt securities in the appropriate maturity and repricing subitems. Exclude from Memorandum item 2 the bank's holdings of equity securities with readily determinable fair values (reported in Schedule RC-B, item 7, above) (e.g., investments in mutual funds, common stock, preferred stock). Also exclude those debt securities that are reported as "nonaccrual" in Schedule RC-N, item 9, column C.

The sum of Memorandum items 2.a.(1) through 2.c.(2) plus the amount of any nonaccrual debt securities included in Schedule RC-N, item 9, column C, must equal Schedule RC-B, sum of items 1 through 6, columns A and D.

On the FFIEC 031, banks that have more than one office in foreign countries (including offices of consolidated foreign subsidiaries but excluding "shell" branches, offices in Puerto Rico or U.S. territories and possessions, and IBFs) have the option of excluding the smallest of such non-U.S. offices from Memorandum item 2. Such banks may omit the smallest of their offices in foreign countries (other than "shell" branches) when arrayed by total assets provided that the assets of the excluded offices do not exceed 50 percent of the total assets of the bank's offices (excluding "shells") in foreign countries and do not exceed 10 percent of the total consolidated assets of the reporting bank as of the report date. (Note: In determining the total assets of offices in foreign countries eligible for exclusion from these memorandum items, banks should exclude not only "shell" branches but also offices in Puerto Rico and U.S. territories and possessions, domestic offices of Edge and Agreement subsidiaries, and IBFs even though these are sometimes referred to as "foreign" offices. Also, the asset totals for all offices in foreign countries should be the component of the total consolidated assets, i.e., should exclude all intrabank transactions.)

For purposes of this memorandum item, the following definitions apply:

A fixed interest rate is a rate that is specified at the origination of the transaction, is fixed and invariable during the term of the debt security, and is known to both the borrower and the lender. Also treated as a fixed interest rate is a predetermined interest rate which is a rate that changes during the term of the debt security on a predetermined basis, with the exact rate of interest over the life of the debt security known with certainty to both the borrower and the lender when the debt security is acquired.

Memoranda**Item No. Caption and Instructions**

2
(cont.) A floating rate is a rate that varies, or can vary, in relation to an index, to some other interest rate such as the rate on certain U.S. Government securities or the "prime rate," or to some other variable criterion the exact value of which cannot be known in advance. Therefore, the exact rate the debt security carries at any subsequent time cannot be known at the time of origination.

When the rate on a debt security with a floating rate has reached a contractual floor or ceiling level, the debt security is to be treated as "fixed rate" rather than as "floating rate" until the rate is again free to float.

Remaining maturity is the amount of time remaining from the report date until the final contractual maturity of a debt security without regard to the security's repayment schedule, if any.

Next repricing date is the date the interest rate on a floating rate debt security can next change in accordance with the terms of the contract (without regard to the security's repayment schedule, if any, or expected prepayments) or the contractual maturity date of the security, whichever is earlier.

Banks whose records or information systems provide data on the final contractual maturities, next repricing dates, and expected average lives of their debt securities for time periods that closely approximate the maturity and repricing periods specified in Memorandum items 2.a through 2.d (e.g., 89 or 90 days rather than three months, 359 or 360 days rather than 12 months) may use these data to complete Memorandum items 2.a through 2.d.

For debt securities with scheduled contractual payments, banks whose records or information systems provide repricing data that take into account these scheduled contractual payments, with or without the effect of anticipated prepayments, may adjust these data in an appropriate manner to derive reasonable estimates for the final contractual maturities of fixed rate debt securities (and floating rate debt securities for purposes of Memorandum item 2.c) and the next repricing dates of floating rate debt securities.

Callable fixed rate debt securities should be reported in Memorandum items 2.a, 2.b, and 2.d without regard to their next call date unless the security has actually been called. When fixed rate debt securities have been called, they should be reported on the basis of the time remaining until the call date. Callable floating rate debt securities should be reported in Memorandum items 2.a and 2.b on the basis of their next repricing date without regard to their next call date if the security has not been called. Those that have been called should be reported based on the earlier of their next repricing date or their actual call date.

Fixed rate mortgage pass-through securities (such as those guaranteed by the Government National Mortgage Association (GNMA) or issued by the Federal Home Loan Mortgage Corporation (FHLMC), the Federal National Mortgage Association (FNMA), and certain banks, savings associations, and securities dealers) and fixed rate Small Business Administration (SBA) "Guaranteed Loan Pool Certificates" should be reported on the basis of the time remaining until their final contractual maturity without regard to either expected prepayments or scheduled contractual payments. Floating rate mortgage pass-through securities and SBA "Guaranteed Loan Pool Certificates" should be reported in Memorandum items 2.a and 2.b on the basis of their next repricing date.

Memoranda**Item No. Caption and Instructions**

- 2.d** **Debt securities with a remaining maturity of one year or less.** Report all debt securities with a remaining maturity of one year or less. Include both fixed rate and floating rate debt securities. Exclude debt securities that are in nonaccrual status.

For held-to-maturity debt securities, report amortized cost. For available-for-sale debt securities, report fair value.

The fixed rate debt securities (excluding "Other mortgage-backed securities") that should be included in this item will also have been reported by remaining maturity in Schedule RC-B, Memorandum items 2.a.(1), 2.a.(2), 2.b.(1), and 2.b.(2), above. The floating rate debt securities (excluding "Other mortgage-backed securities") that should be included in this item will have been reported by next repricing date in Memorandum items 2.a.(1), 2.a.(2), 2.b.(1), and 2.b.(2), above. However, these four Memorandum items may include floating rate debt securities with a remaining maturity of more than one year, but on which the interest rate can next change in one year or less; those debt securities should not be included in this Memorandum item 2.d. The "Other mortgage-backed securities" included in this item will have been reported by expected weighted average life in Memorandum items 2.c.(1) and 2.c.(2) above.

- 3** **Amortized cost of held-to-maturity securities sold or transferred to available-for-sale or trading securities during the calendar year-to-date.** If the reporting bank has sold any held-to-maturity debt securities or has transferred any held-to-maturity debt securities to the available-for-sale or to trading securities during the calendar year-to-date, report the total amortized cost of these held-to-maturity debt securities as of their date of sale or transfer.

Exclude the amortized cost of any held-to-maturity debt security that has been sold near enough to (e.g., within three months of) its maturity date (or call date if exercise of the call is probable) that interest rate risk is substantially eliminated as a pricing factor. Also exclude the amortized cost of any held-to-maturity debt security that has been sold after the collection of a substantial portion (i.e., at least 85 percent) of the principal outstanding at acquisition due to prepayments on the debt security or, if the debt security is a fixed rate security, due to scheduled payments payable in equal installments (both principal and interest) over its term.

- 4** **Structured notes.** Report in this item all structured notes included in the held-to-maturity and available-for-sale accounts and reported in Schedule RC-B, items 2, 3, 5, and 6. In general, structured notes are debt securities whose cash flow characteristics (coupon rate, redemption amount, or stated maturity) depend upon one or more indices and/or that have embedded forwards or options or are otherwise commonly known as "structured notes." Include as structured notes any asset-backed securities (other than mortgage-backed securities) which possess the aforementioned characteristics.

Structured notes include, but are not limited to, the following common structures:

- (1) Floating rate debt securities whose payment of interest is based upon:
 - (a) a single index of a Constant Maturity Treasury (CMT) rate or a Cost of Funds Index (COFI), or
 - (b) changes in the Consumer Price Index (CPI). However, **exclude** from structured notes all U.S. Treasury Inflation-Protected Securities (TIPS).

MemorandaItem No. Caption and Instructions

- 4
(cont.)
- (2) **Step-up Bonds.** Step-up securities initially pay the investor an above-market yield for a short noncall period and then, if not called, "step up" to a higher coupon rate (which will be below current market rates). The investor initially receives a higher yield because of having implicitly sold one or more call options. A step-up bond may continue to contain call options even after the bond has stepped up to the higher coupon rate. A **multistep** bond has a series of fixed and successively higher coupons over its life. At each call date, if the bond is not called, the coupon rate increases.
- (3) **Index Amortizing Notes (IANs).** IANs repay principal according to a predetermined amortization schedule that is linked to the level of a specific index (usually the London Interbank Offered Rate - LIBOR - or a specified prepayment rate). As market interest rates increase (or prepayment rates decrease), the maturity of an IAN extends, similar to that of a collateralized mortgage obligation.
- (4) **Dual Index Notes.** These bonds have coupon rates that are determined by the difference between two market indices, typically the CMT rate and LIBOR. These bonds often have a fixed coupon rate for a brief period, followed by a longer period of variable rates, e.g., 8 percent fixed for two years, then the 10-year CMT rate plus 300 basis points minus three-month LIBOR.
- (5) **De-leveraged Bonds.** These bonds pay investors according to a formula that is based upon a fraction of the increase or decrease in a specified index, such as the CMT rate or the prime rate. For example, the coupon might be the 10-year CMT rate multiplied by 0.5, plus 150 basis points. The de-leveraging multiplier (0.5) causes the coupon to lag overall movements in market yields. A **leveraged** bond would involve a multiplier greater than 1.
- (6) **Range Bonds.** Range bonds (or accrual bonds) pay the investor an above-market coupon rate as long as the reference rate is between levels established at issue. For each day that the reference rate is outside this range, the bonds earn no interest. For example, if LIBOR is the reference rate, a bond might pay LIBOR plus 75 basis points for each day that LIBOR is between 3.5 and 5.0 percent. When LIBOR is less than 3.5 percent or more than 5 percent, the bond would accrue no interest.
- (7) **Inverse Floaters.** These bonds have coupons that increase as rates decline and decrease as rates rise. The coupon is based upon a formula, such as 12 percent minus three-month LIBOR.

Exclude from structured notes floating rate debt securities denominated in U.S. dollars whose payment of interest is based upon a single index of a Treasury bill rate, the prime rate, or LIBOR and which do not contain adjusting caps, adjusting floors, leverage, or variable principal redemption. Furthermore, debt securities that do not possess the aforementioned characteristics of a structured note need not be reported as structured notes solely because they are callable as of a specified date at a specified price. In addition, debt securities that in the past possessed the characteristics of a structured note, but which have "fallen through" their structures (e.g., all of the issuer's call options have expired and there are no more adjustments to the interest rate on the security), need not be reported as structured notes.

SCHEDULE RC-D - TRADING ASSETS AND LIABILITIES

General Instructions

Schedule RC-D is to be completed by banks that reported a quarterly average for trading assets of \$2 million or more in Schedule RC-K, item 7, for any quarter of the preceding calendar year. However, because banks with domestic offices only and with less than \$100 million in total assets do not report a quarterly average for trading assets in Schedule RC-K, item 7, on the FFIEC 041, Schedule RC-D is not applicable to such banks.

Banks that (a) regularly underwrite or deal in securities; interest rate, foreign exchange rate, commodity, equity, and credit derivative contracts; other financial instruments; and other assets for resale (or repurchase); (b) acquire or take positions in such items principally for the purpose of selling in the near term or otherwise with the intent to resell (or repurchase) in order to profit from short-term price movements; or (c) acquire or take positions in such items as an accommodation to customers or for other trading purposes shall report in this schedule the value of such items or positions on the report date. Assets, liabilities, and other financial instruments held for trading shall be consistently valued at fair value.

Exclude from this schedule all available-for-sale securities and all loans and leases that are held for sale. Available-for-sale securities are generally reported in Schedule RC, item 2.b, and in Schedule RC-B, columns C and D. However, a bank may have certain assets that fall within the definition of "securities" in FASB Statement No. 115 (e.g., nonrated industrial development obligations) that the bank has designated as "available-for-sale" which are reported for purposes of the Report of Condition in a balance sheet category other than "Securities" (e.g., "Loans and lease financing receivables"). Loans and leases held for sale should be reported in Schedule RC, item 4.a, "Loans and leases held for sale," and in Schedule RC-C.

Item Instructions

Item No. Caption and Instructions

ASSETS

- 1 **U.S. Treasury securities (in domestic offices)**. Report the total fair value of securities issued by the U.S. Treasury (as defined for Schedule RC-B, item 1, "U.S. Treasury securities") held for trading (in domestic offices).
- 2 **U.S. Government agency obligations (in domestic offices)**. Report the total fair value of all obligations of U.S. Government agencies (as defined for Schedule RC-B, item 2, "U.S. Government agency obligations") held for trading (in domestic offices). Exclude mortgage-backed securities.
- 3 **Securities issued by states and political subdivisions in the U.S. (in domestic offices)**. Report the total fair value of all securities issued by states and political subdivisions in the United States (as defined for Schedule RC-B, item 3, "Securities issued by states and political subdivisions in the U.S.") held for trading (in domestic offices).
- 4 **Mortgage-backed securities (in domestic offices)**. Report in the appropriate subitem the total fair value of all mortgage-backed securities held for trading (in domestic offices).

Item No. Caption and Instructions

- 4.a** **Pass-through securities issued or guaranteed by FNMA, FHLMC, or GNMA.** Report the total fair value of all pass-through securities issued or guaranteed by FNMA, FHLMC, or GNMA (as defined for Schedule RC-B, item 4.a.(1), Pass-through securities "Guaranteed by GNMA," and item 4.a.(2), Pass-through securities "Issued by FNMA and FHLMC") held for trading (in domestic offices).
- 4.b** **Other mortgage-backed securities issued or guaranteed by FNMA, FHLMC, or GNMA.** Report the total fair value of all other mortgage-backed securities issued by FNMA, FHLMC, or GNMA (as defined for Schedule RC-B, item 4.b.(1), Other mortgage-backed securities "Issued or guaranteed by FNMA, FHLMC, or GNMA") held for trading (in domestic offices).
- 4.c** **All other mortgage-backed securities.** Report the total fair value of all other mortgage-backed securities (as defined for Schedule RC-B, item 4.a.(3), "Other pass-through securities," item 4.b.(2), Other mortgage-backed securities "Collateralized by MBS issued or guaranteed by FNMA, FHLMC, or GNMA," and item 4.b.(3), "All other mortgage-backed securities") held for trading (in domestic offices).
- 5** **Other debt securities (in domestic offices).** Report the total fair value of all other debt securities (as defined for Schedule RC-B, item 5, "Asset-backed securities," and item 6, "Other debt securities") held for trading (in domestic offices).
- 6-8** Not applicable.
- 9** **Other trading assets (in domestic offices).** Report the total fair value of all trading assets (in domestic offices) that cannot properly be reported in items 1 through 5. Exclude revaluation gains on interest rate, foreign exchange rate, commodity, equity, and credit derivative contracts (in domestic offices) (report in item 11 below).

NOTE: Item 10 is applicable only to banks filing the FFIEC 031 report form.

- 10** **Trading assets in foreign offices.** On the FFIEC 031 only, report the total fair value of all assets held for trading in foreign offices. Exclude revaluation gains on interest rate, foreign exchange rate, commodity, equity, and credit derivative contracts in foreign offices (report in item 11.b below).
- 11** **Derivatives with a positive fair value.** Report (on the FFIEC 031, in the appropriate subitem) the amount of revaluation gains (i.e., assets) from the "marking to market" of interest rate, foreign exchange rate, commodity, equity, and credit derivative contracts held for trading purposes. Revaluation gains and losses (i.e., assets and liabilities) from the "marking to market" of the reporting bank's derivative contracts executed with the same counterparty that meet the criteria for a valid right of setoff contained in FASB Interpretation No. 39 (e.g., those contracts subject to a qualifying master netting arrangement) may be reported on a net basis using this item and item 14 below, as appropriate. (For further information, see the Glossary entry for "offsetting.")

Item No. Caption and Instructions

NOTE: Items 11.a and 11.b are applicable only to banks filing the FFIEC 031 report form.

- 11.a** **In domestic offices.** On the FFIEC 031 only, report the amount of revaluation gains (i.e., assets) from the "marking to market" of interest rate, foreign exchange rate, commodity, equity, and credit derivative contracts held for trading purposes in domestic offices. To the extent that the bank performs its "marking to market" of these contracts on a consolidated basis and nets the resulting revaluation gains and losses (i.e., assets and liabilities) for other financial reporting purposes as described in the instruction to item 11 above, but cannot readily determine separate asset amounts for its domestic offices and for its foreign offices, the asset amounts reported in this item may include revaluation gains and losses on derivative contracts with the same counterparty in both domestic and foreign offices.
- 11.b** **In foreign offices.** On the FFIEC 031 only, report the amount of revaluation gains (i.e., assets) from the "marking to market" of interest rate, foreign exchange rate, commodity, equity, and credit derivative contracts held for trading purposes in foreign offices.
- 12** **Total trading assets.** Report the sum of items 1 through 11. This amount must equal Schedule RC, item 5, "Trading assets."

LIABILITIES

- 13** **Liability for short positions.** Report the total fair value of the reporting bank's liabilities resulting from sales of assets that the reporting bank does not own (see the Glossary entry for "short position").
- 14** **Derivatives with a negative fair value.** Report the amount of revaluation losses (i.e., liabilities) from the "marking to market" of interest rate, foreign exchange rate, commodity, equity, and credit derivative contracts held for trading purposes. Revaluation gains and losses (i.e., assets and liabilities) from the "marking to market" of the reporting bank's interest rate, foreign exchange rate, commodity, equity, and credit derivative contracts executed with the same counterparty that meet the criteria for a valid right of setoff contained in FASB Interpretation No. 39 (e.g., those contracts subject to a qualifying master netting arrangement) may be reported on a net basis using this item and item 11 above, as appropriate. (For further information, see the Glossary entry for "offsetting.")
- 15** **Total trading liabilities.** Report the sum of items 13 and 14. This amount must equal Schedule RC, item 15, "Trading liabilities."

SCHEDULE RC-L – DERIVATIVES AND OFF-BALANCE SHEET ITEMS

General Instructions

Schedule RC-L should be completed on a fully consolidated basis. In addition to information about derivatives, Schedule RC-L includes the following selected commitments, contingencies, and other off-balance sheet items that are not reportable as part of the balance sheet of the Report of Condition (Schedule RC). Among the items not to be reported in Schedule RC-L are contingencies arising in connection with litigation. For those asset-backed commercial paper program conduits that the reporting bank consolidates onto its balance sheet (Schedule RC) in accordance with FASB Interpretation No. 46 (Revised), any credit enhancements and liquidity facilities the bank provides to the programs should not be reported in Schedule RC-L. In contrast, for conduits that the reporting bank does not consolidate, the bank should report the credit enhancements and liquidity facilities it provides to the programs in the appropriate items of Schedule RC-L.

Item Instructions

Item No. Caption and Instructions

- 1** **Unused commitments.** Report in the appropriate subitem the unused portions of commitments to make or purchase extensions of credit in the form of loans or participations in loans, lease financing receivables, or similar transactions. Exclude commitments that meet the definition of a derivative and must be accounted for in accordance with FASB Statement No. 133, which should be reported in Schedule RC-L, item 12.

Report the unused portions of all credit card lines in item 1.b. Report in items 1.a and 1.c through 1.e the unused portions of commitments for which the bank has charged a commitment fee or other consideration, or otherwise has a legally binding commitment. Such commitments are to be reported in the appropriate subitem regardless of whether they contain "material adverse change" clauses or other provisions that are intended to relieve the issuer of its funding obligations under certain conditions and regardless of whether they are unconditionally cancelable at any time. In the case of commitments for syndicated loans, report only the bank's proportional share of the commitment. Unused commitments are to be reported gross, i.e., include in this item the amounts of commitments acquired from and conveyed to others.

If the bank offers an overdraft protection program and it advises account holders of the available amount of overdraft protection, for example, when accounts are opened or on depositors' account statements or ATM receipts, report the available amount of overdraft protection on depositors' accounts in item 1.e.

Include loan proceeds that the bank is obligated to advance, such as loan draws, construction progress payments, seasonal or living advances to farmers under prearranged lines of credit, rotating or revolving credit arrangements, including retail credit cards, or similar transactions. Forward agreements and commitments to issue a commitment at some point in the future are to be reported in this item.

In addition, include revolving underwriting facilities (RUFs), note issuance facilities (NIFs), and other similar arrangements. These are facilities under which a borrower can issue on a revolving basis short-term paper in its own name, but for which the underwriting banks have a legally binding commitment either to purchase any notes the borrower is unable to sell by the rollover date or to advance funds to the borrower.

Item No. Caption and Instructions

1.a Revolving, open-end lines secured by 1-4 family residential properties. Report the unused portions of commitments to extend credit under revolving, open-end lines of credit secured by 1-4 family residential properties. These lines, commonly known as home equity lines, are typically secured by a junior lien and are usually accessible by check or credit card.

1.b Credit card lines. Report the unused portions of all commitments to extend credit both to individuals for household, family, and other personal expenditures and to commercial or industrial enterprises through credit cards. Exclude home equity lines accessible through credit cards. Banks may report unused credit card lines as of the end of their customers' last monthly billing cycle prior to the report date or as of the report date.

1.c Commercial real estate, construction and land development. Report in the appropriate subitem the unused portions of commitments to extend credit for commercial real estate, construction, and land development activities.

1.c.(1) Commitments to fund loans secured by real estate. Report the unused portions of commitments to extend credit for the specific purpose of financing commercial and multifamily residential properties (e.g., business and industrial properties, hotels, motels, churches, hospitals, and apartment buildings), provided that such commitments, when funded, would be reportable as either loans secured by multifamily residential properties in Schedule RC-C, part I, item 1.d, or loans secured by nonfarm nonresidential properties in Schedule RC-C, part I, item 1.e.

Also include the unused portions of commitments to extend credit for the specific purpose of financing land development (i.e., the process of improving land - laying sewers, water pipes, etc.) preparatory to erecting new structures or the on-site construction of industrial, commercial, residential, or farm buildings, provided that such commitments, when funded, would be reportable as loans secured by real estate in Schedule RC-C, part I, item 1.a, "Construction, land development, and other land loans." For this item, "construction" includes not only construction of new structures, but also additions or alterations to existing structures and the demolition of existing structures to make way for new structures. Also include in this item loan proceeds the bank is obligated to advance as construction progress payments.

Do not include general lines of credit that a borrower, at its option, may draw down to finance construction and land development (report in Schedule RC-L, item 1.c.(2) or item 1.e, below, as appropriate).

1.c.(2) Commitments to fund loans not secured by real estate. Report the unused portions of all commitments to extend credit for the specific purpose of financing commercial and residential real estate activities, e.g., acquiring, developing, and renovating commercial and residential real estate, provided that such commitments, when funded, would be reportable as "Commercial and industrial loans" in Schedule RC-C, part I, item 4, or as "Other loans" in Schedule RC-C, part I, item 9. Include in this item loan proceeds the bank is obligated to advance as construction progresses.

Such commitments generally may include:

- (1) commitments to extend credit for the express purpose of financing real estate ventures as evidenced by loan documentation or other circumstances connected with the loan; or
- (2) commitments made to organizations or individuals 80 percent of whose revenue or assets are derived from or consist of real estate ventures or holdings.

Item No. Caption and Instructions

- 1.c.(2)** Exclude from this item all commitments that, when funded, would be reportable as "Loans secured by real estate" in Schedule RC-C, part I, item 1. Also exclude commitments made to commercial and industrial firms where the sole purpose for the financing is to construct a factory or office building to house the company's operations or employees.
- 1.d** **Securities underwriting.** Report the unsold portion of the reporting bank's own takedown in securities underwriting transactions. Include NIFs and RUFs in this item.
- 1.e** **Other unused commitments.** Report the unused portion of all other commitments not reportable above. Include commitments to extend credit through overdraft facilities or commercial lines of credit, retail check credit and related plans, and those overdraft protection programs in which the bank advises account holders of the available amount of protection.

Also include commitments to extend credit secured by 1-4 family residential properties, except (a) revolving, open-end lines of credit secured by 1-4 family residential properties (e.g., home equity lines) which should be reported in Schedule RC-L, item 1.a, above, (b) commitments for 1-4 family residential construction and land development loans (that are secured by such properties) which should be reported in Schedule RC-L, item 1.c.(1), above, and (c) commitments that meet the definition of a derivative and must be accounted for in accordance with FASB Statement No. 133, which should be reported in Schedule RC-L, item 12.

- 2 and 3** **General Instructions for Standby Letters of Credit** -- Originating banks must report in items 2 and 3 the full amount outstanding and unused of financial and performance standby letters of credit, respectively. Include those standby letters of credit that are collateralized by cash on deposit, that have been acquired from others, and in which participations have been conveyed to others where (a) the originating and issuing bank is obligated to pay the full amount of any draft drawn under the terms of the standby letter of credit and (b) the participating banks have an obligation to partially or wholly reimburse the originating bank, either directly in cash or through a participation in a loan to the account party.

For syndicated standby letters of credit where each bank has a direct obligation to the beneficiary, each bank must report only its share in the syndication. Similarly, if several banks participate in the issuance of a standby letter of credit under a bona fide binding agreement which provides that (a) regardless of any event, each participant shall be liable only up to a certain percentage or to a certain amount and (b) the beneficiary is advised and has agreed that each participating bank is only liable for a certain portion of the entire amount, each bank shall report only its proportional share of the total standby letter of credit.

For a financial or performance standby letter of credit that is in turn backed by a financial standby letter of credit issued by another bank, each bank must report the entire amount of the standby letter of credit it has issued in either item 2 or item 3 below, as appropriate. The amount of the reporting bank's financial or performance standby letter of credit that is backed by the other bank's financial standby letter of credit must also be reported in either item 2.a or 3.a, as appropriate, since the backing of standby letters of credit has substantially the same effect as the conveying of participations in standby letters of credit.

On the FFIEC 031, also include all financial and performance guarantees issued by foreign offices of the reporting bank pursuant to Federal Reserve Regulation K or Section 347.103(a)(1) of the FDIC Rules and Regulations.

Item No. Caption and Instructions

- 2 Financial standby letters of credit (and foreign office guarantees -- for the FFIEC 031).** Report the amount outstanding and unused as of the report date of all financial standby letters of credit (and all legally binding commitments to issue financial standby letters of credit) issued by any office of the bank. A financial standby letter of credit irrevocably obligates the bank to pay a third-party beneficiary when a customer (account party) fails to repay an outstanding loan or debt instrument. (See the Glossary entry for "letter of credit" for further information.)

Exclude from financial standby letters of credit:

- (1) Financial standby letters of credit where the beneficiary is a consolidated subsidiary of the reporting bank.
- (2) Performance standby letters of credit.
- (3) Signature or endorsement guarantees of the type associated with the clearing of negotiable instruments or securities in the normal course of business.

- 2.a Amount of financial standby letters of credit conveyed to others.** Report that portion of the bank's total contingent liability for financial standby letters of credit reported in Schedule RC-L, item 2, above, that the bank has conveyed to others. Also include that portion of the reporting bank's financial standby letters of credit that are backed by other banks' financial standby letters of credit, as well as the portion that participating banks have reparticipated to others. Participations and backings may be for any part or all of a given obligation.

- 3 Performance standby letters of credit (and foreign office guarantees -- for the FFIEC 031).** Report the amount outstanding and unused as of the report date of all performance standby letters of credit (and all legally binding commitments to issue performance standby letters of credit) issued by any office of the bank. A performance standby letter of credit irrevocably obligates the bank to pay a third-party beneficiary when a customer (account party) fails to perform some contractual non-financial obligation. (See the Glossary entry for "letter of credit" for further information.)

Exclude from performance standby letters of credit:

- (1) Performance standby letters of credit where the beneficiary is a consolidated subsidiary of the reporting bank.
- (2) Financial standby letters of credit.
- (3) Signature or endorsement guarantees of the type associated with the clearing of negotiable instruments or securities in the normal course of business.

- 3.a Amount of performance standby letters of credit conveyed to others.** Report that portion of the bank's total contingent liability for performance standby letters of credit reported in Schedule RC-L, item 3, above, that the bank has conveyed to others. Also include that portion of the reporting bank's performance standby letters of credit that are backed by other banks' financial standby letters of credit, as well as the portion that participating banks have reparticipated to others. Participations and backings may be for any part or all of a given obligation.

Item No. Caption and Instructions

- 41** value of those mortgage-backed and asset-backed securities reported in Schedule RC-D, (cont.) item 4, "Mortgage-backed securities," item 5, "Other debt securities," and, on the FFIEC 031 report form, item 10, "Trading assets in foreign offices," that are rated in the highest or second highest investment grade, e.g., AAA or AA, in the case of long-term ratings, or in the highest rating category, e.g., A-1 or P-1, in the case of short-term ratings. If the bank does not complete Schedule RC-D, include the portion of the amount reported in Schedule RC, item 5, that represents the fair value of these types of trading assets.
- *In column E--50% risk weight*, if the bank completes Schedule RC-D, include the portion of the amount reported in RC-D, item 3, that represents the fair value of revenue obligations issued by states and political subdivisions in the U.S. Also include the fair value of those mortgage-backed and asset-backed securities reported in Schedule RC-D, item 4, "Mortgage-backed securities," item 5, "Other debt securities," and, on the FFIEC 031 report form, item 10, "Trading assets in foreign offices," that are rated in the third highest investment grade category, e.g., A, in the case of long-term ratings, or in the second highest rating category, e.g. A-2 or P-2, in the case of short-term ratings (excluding interest-only strips that are not credit-enhancing and principal-only strips, which must be assigned a 100 percent risk weight). If the bank does not complete Schedule RC-D, include the portion of the amount reported in Schedule RC, item 5, that represents the fair value of these types of securities.
 - *In column F--100% risk weight*, include the fair value of trading assets reported in Schedule RC, item 5, that is not included in columns B through E. However, for those mortgage-backed and asset-backed securities reported in Schedule RC, item 5, that are rated one category below investment grade, e.g., BB, include in column F the fair value of these securities multiplied by 2.
- 42** **All other assets.** Report in column A the sum of the amounts reported in Schedule RC, item 6, "Premises and fixed assets," item 7, "Other real estate owned," item 8, "Investments in unconsolidated subsidiaries and associated companies," item 9, "Customers' liability to this bank on acceptances outstanding," item 10.a, "Goodwill," item 10.b, "Other intangible assets," and item 11, "Other assets."

The carrying value of any bank-owned general account insurance product included in Schedule RC, item 11, should be risk weighted 100 percent. If the bank owns a separate account insurance product that qualifies for the "look-through" approach, the qualifying portion of the carrying value of this product included in Schedule RC, item 11, may be eligible for a risk weight less than 100 percent, but in no case less than 20 percent. Any general account and stable value protection (SVP) portions of the carrying value of a separate account insurance product should be risk weighted at the risk weights applicable to claims on the insurer (100 percent) and the SVP provider (100 percent or, if appropriate, 20 percent), respectively. A separate account insurance product that does not qualify for the "look-through" approach should receive a 100 percent risk weight. For further information, see the Interagency Statement on the Purchase and Risk Management of Life Insurance, issued December 7, 2004.

- *In column B*, include the amount of any disallowed goodwill and other disallowed intangible assets reported in Schedule RC-R, item 7; disallowed servicing assets and purchased credit card relationships reported in Schedule RC-R, item 9.a; disallowed deferred tax assets reported in Schedule RC-R, item 9.b; all credit-enhancing

Item No. Caption and Instructions

42
(cont.)

interest-only strips reported in Schedule RC, item 11; all residual interests (as defined in the instructions for Schedule RC-R, item 50) not eligible for the ratings-based approach; the fair value of derivative contracts that are reported as assets in Schedule RC, item 11; and the carrying value of other assets reported in Schedule RC, item 11, that act as credit enhancements for those recourse transactions that must be reported in Schedule RC-R, items 49 and 51. Also include the amount of the bank's investments in unconsolidated banking and finance subsidiaries that are reported in Schedule RC, item 8, and are deducted for risk-based capital purposes in Schedule RC-R, item 20.

If the bank has residual interests in asset securitizations that are eligible for the ratings-based approach, report the difference between these residuals' fair value carrying amount and their amortized cost in column B as a positive number if fair value exceeds cost and as a negative number (i.e., in parentheses) if cost exceeds fair value. Also, include *in column B* as a negative number the amortized cost of any residual interests in asset securitizations (other than credit-enhancing interest-only strips) included in Schedule RC, item 11, that are rated one category below investment grade, e.g., BB.

- *In column C--0% risk weight*, include the carrying value of Federal Reserve Bank stock included in Schedule RC-F, item 4; accrued interest receivable on assets included in the zero percent risk weight category (column C of Schedule RC-R, items 34 through 41); and the carrying value of gold bullion not held for trading that is held in the bank's own vault or in another bank's vault on an allocated basis.
- *In column D--20% risk weight*, include the carrying value of Federal Home Loan Bank stock included in Schedule RC-F, item 4; accrued interest receivable on assets included in the 20 percent risk weight category (column D of Schedule RC-R, items 34 through 41); and the portion of customers' acceptance liability reported in Schedule RC, item 9, that has been participated to other depository institutions. (These participations in acceptances conveyed to other depository institutions should be included in the amount reported in Schedule RC-L, item 5.) Also include the amortized cost of residual interests in asset securitizations (other than credit-enhancing interest-only strips) included in Schedule RC, item 11, that are rated in the highest or second highest investment grade, e.g., AAA or AA, in the case of long-term ratings, or in the highest rating category, e.g., A-1 or P-1, in the case of short-term ratings.
- *In column E--50% risk weight*, include accrued interest receivable on assets included in the 50 percent risk weight category (column E of Schedule RC-R, items 34 through 41). Also include the amortized cost of residual interests in asset securitizations (other than credit-enhancing interest-only strips) included in Schedule RC, item 11, that are rated in the third highest investment grade, e.g., A, in the case of long-term ratings, or in the second highest rating category, e.g., A-2 or P-2, in the case of short-term ratings.
- *In column F--100% risk weight*, include the amount of all other assets reported in column A that is not included in columns B through E. However, for residual interests in asset securitizations (other than credit-enhancing interest-only strips) included in Schedule RC, item 11, include the amortized cost of those that are rated in the lowest investment grade category, e.g., BBB, and the amortized cost multiplied by 2 of those that are rated one category below investment grade, e.g., BB.

43 **Total assets.** For columns A through F, report the sum of items 34 through 42. The sum of columns B through F must equal column A.

Item No. Caption and Instructions

51 For those recourse arrangements that must be included in this item that are not eligible for the ratings-based approach, report *in column A* the outstanding principal balance of the loans or other financial assets that were sold with recourse, minus the amount of any recourse liability account associated with these transactions that is included in Schedule RC-G, item 4, "Other" liabilities. For those recourse arrangements that must be included in this item that act as credit enhancements for asset-backed or mortgage-backed securities and to which the ratings-based approach applies, report *in column A*:

- (1) the maximum contractual remaining amount of the bank's recourse exposures that are subject to a risk weight of 100% or less, minus the amount of any recourse liability account associated with these exposures that is included in Schedule RC-G, item 4, and
- (2) two times the maximum contractual remaining amount of the bank's recourse exposures that are subject to a 200% risk weight, minus the amount of any recourse liability account associated with these exposures that is included in Schedule RC-G, item 4.
- *In column B*, report 100 percent of the amount reported in column A.
 - *In column C—0% risk weight*, include the credit equivalent amount of financial assets sold with recourse (not eligible for the ratings-based approach) that, if they were carried as assets on the balance sheet, would meet the criteria for the zero percent risk weight category as described in the instructions for Risk-Weighted Assets and for Schedule RC-R, items 34 through 42, above.
 - *In column D—20% risk weight*, include the credit equivalent amount of financial assets sold with recourse (not eligible for the ratings-based approach) that, if they were carried as assets on the balance sheet, would meet the criteria for the 20 percent risk weight category as described in the instructions for Risk-Weighted Assets and for Schedule RC-R, items 34 through 42, above. Also include in column D the credit equivalent amount of those recourse arrangements to which the ratings-based approach applies that are rated in the highest or second highest investment grade category, e.g., AAA or AA, in the case of long-term ratings, or in the highest rating category, e.g., A-1 or P-1, in the case of short-term ratings.
 - *In column E—50% risk weight*, include the credit equivalent amount of financial assets sold with recourse (not eligible for the ratings-based approach) that, if they were carried as assets on the balance sheet, would meet the criteria for the 50 percent risk weight category as described in the instructions for Risk-Weighted Assets and for Schedule RC-R, items 34 through 42, above. Also include in column E the credit equivalent amount of those recourse arrangements to which the ratings-based approach applies that are rated in the third highest investment grade category, e.g., A, in the case of long-term ratings, or in the second highest rating category, e.g., A-2 or P-2, in the case of short-term ratings.
 - *In column F—100% risk weight*, include the portion of the credit equivalent amount reported in column B that is not included in columns C through E.

52 **All other off-balance sheet liabilities.** Report in column A the notional amount of all other off-balance sheet liabilities reported in Schedule RC-L, item 9, that are covered by the risk based capital guidelines. Also include in column A the notional amount of written option contracts that act as financial guarantees, which have been reported as derivatives in Schedule RC-L, item 12, but are treated as direct credit substitutes rather than derivatives for risk-based capital purposes. Also include in column A the amount of those credit derivatives reported in Schedule RC-L, item 7, that – under the supervisory guidance issued by the

Item No. Caption and Instructions

52
(cont.) by the bank's primary federal supervisory authority – are covered by the risk-based capital standards, but have not been included in any of the preceding items in the Derivatives and Off-Balance Sheet Items section of Schedule RC-R. However, do not report in column A the notional amount of standby letters of credit issued by a Federal Home Loan Bank on behalf of the reporting bank that are reported in Schedule RC-L, item 9, because these letters of credit are not covered by the risk-based capital guidelines.

- *In column B*, report 100 percent of the notional amount reported in column A.
- *In column C--0% risk weight*, include the credit equivalent amount of liabilities to counterparties who meet, or that have guarantees or collateral that meets, the criteria for the zero percent risk weight category as described in the instructions for Risk-Weighted Assets and for Schedule RC-R, items 34 through 42, above.
- *In column D--20% risk weight*, include the credit equivalent amount of liabilities to counterparties who meet, or that have guarantees or collateral that meets, the criteria for the 20 percent risk weight category as described in the instructions for Risk-Weighted Assets and for Schedule RC-R, items 34 through 42, above.
- *In column E--50% risk weight*, include the credit equivalent amount of liabilities to counterparties who meet, or that have guarantees or collateral that meets, the criteria for the 50 percent risk weight category as described in the instructions for Risk-Weighted Assets and for Schedule RC-R, items 34 through 42, above.
- *In column F--100% risk weight*, include the portion of the credit equivalent amount reported in column B that is not include in columns C through E.

53 **Unused commitments with an original maturity exceeding one year.** Report in column A the unused portion of commitments to make or purchase extensions of credit in the form of loans or participations in loans, lease financing receivables, or similar transactions as reflected in Schedule RC-L, item 1, that have an original maturity exceeding one year and are subject to the risk-based capital guidelines. Under the risk-based capital guidelines, the unused portion of commitments (facilities) with an original maturity of one year or less or which are unconditionally cancelable (without cause) at any time by the bank, provided a separate credit decision is made before each drawing, have a zero percent conversion factor. The unused portion of such commitments should be excluded from this item. "Original maturity" is defined as the length of time between the date a commitment is issued and the date of maturity, or the earliest date on which the bank (1) is scheduled to (and as a normal practice actually does) review the facility to determine whether or not it should be extended and (2) can unconditionally cancel the commitment. Also include in column A all revolving underwriting facilities (RUFs) and note issuance facilities (NIFs), regardless of maturity.

In the case of consumer home equity or mortgage lines of credit secured by liens on 1-4 family residential properties, a bank is deemed able to unconditionally cancel the commitment if, at its option, it can prohibit additional extensions of credit, reduce the credit line, and terminate the commitment to the full extent permitted by relevant federal law. Retail credit cards and related plans, including overdraft checking plans and overdraft protection programs, are defined to be short-term commitments that should be converted at zero percent and excluded from this item 53 if the bank has the unconditional right to cancel the line of credit at any time in accordance with applicable law.

For commitments providing for increases in the dollar amount of the commitment, the amount to be converted to an on-balance sheet credit equivalent amount and risk weighted is the maximum dollar amount that the bank is obligated to advance at any time during the life of the commitment. This includes seasonal commitments where the dollar amount of the commitment increases during the customer's peak business period. In addition, this risk-

Memoranda**Item No. Caption and Instructions**

- 2.b** **1–4 family residential mortgages serviced with no recourse or other servicer-provided credit enhancements.** Report the outstanding principal balance of 1-to-4 family residential mortgage loans that the reporting bank services for others under servicing arrangements in which the reporting bank does not provide recourse or other servicer-provided credit enhancements.
- 2.c** **Other financial assets.** *NOTE: Memorandum item 2.c is to be completed if the principal balance of loans and other financial assets serviced for others is more than \$10 million.*
- Report the outstanding principal balance of loans and other financial assets, other than 1-to-4 family residential mortgage loans, that the reporting bank services for others. These serviced financial assets may include, but are not limited to, credit cards, automobile loans, and loans guaranteed by the Small Business Administration.
- 3** **Asset-backed commercial paper conduits.** Report the requested information on credit enhancements and liquidity facilities provided to asset-backed commercial paper conduits in Memorandum items 3.a and 3.b, respectively, regardless of whether the reporting bank must consolidate the conduit for reporting purposes in accordance with FASB Interpretation No. 46 (Revised).
- 3.a** **Maximum amount of credit exposure arising from credit enhancements provided to conduit structures in the form of standby letters of credit, subordinated securities, and other enhancements.** Report in the appropriate subitem the maximum contractual credit exposure remaining as of the report date under standby letters of credit, subordinated securities, and other credit enhancements provided by the reporting bank to asset-backed commercial paper conduit structures. Do not report in these subitems a reasonable estimate of the probable loss under the credit enhancement provisions or the fair value of any liability incurred under such provisions.
- 3.a.(1)** **Conduits sponsored by the bank, a bank affiliate, or the bank’s holding company.** Report the unused portion of standby letters of credit, the carrying value of subordinated securities, and the maximum contractual amount of credit exposure arising from other credit enhancements that the reporting bank has provided to asset-backed commercial paper conduit structures sponsored by the reporting bank, an affiliate of the reporting bank, or the reporting bank’s holding company.
- 3.a.(2)** **Conduits sponsored by other unrelated institutions.** Report the unused portion of standby letters of credit, the carrying value of subordinated securities, and the maximum contractual amount of credit exposure arising from other credit enhancements that the reporting bank has provided to asset-backed commercial paper conduit structures *other than those* sponsored by the reporting bank, an affiliate of the reporting bank, or the reporting bank’s holding company.
- 3.b** **Unused commitments to provide liquidity to conduit structures.** Report in the appropriate subitem the unused portions of commitments provided by the reporting bank that function as liquidity facilities to asset-backed commercial paper conduit structures. Typically, these facilities take the form of a *Backstop Line (Loan Agreement)* or an *Asset Purchase Agreement*. Under a backstop line, the reporting bank advances funds to the conduit when a draw is required under the liquidity facility. The advance is secured by the cash flow of the underlying asset pools. Under an asset purchase agreement, the reporting bank purchases a

Memoranda**Item No. Caption and Instructions**

- 3.b** specific pool of assets from the conduit when a draw is required under the liquidity facility.
(cont.) Typically, the reporting bank is repaid from the cash flow on the purchased assets or from the sale of the purchased pool of assets.
- 3.b.(1)** **Conduits sponsored by the bank, a bank affiliate, or the bank's holding company.** Report the unused portions of commitments provided by the reporting bank that function as liquidity facilities to asset-backed commercial paper conduit structures sponsored by the reporting bank, an affiliate of the reporting bank, or the reporting bank's holding company.
- 3.b.(2)** **Conduits sponsored by other unrelated institutions.** Report the unused portions of commitments provided by the reporting bank that function as liquidity facilities to asset-backed commercial paper conduit structures *other than those* sponsored by the reporting bank, an affiliate of the reporting bank, or the reporting bank's holding company.

NOTE: Memorandum item 4 is to be completed only by those banks that:

- (1) either individually or on a combined basis with their affiliated depository institutions, report outstanding credit card receivables that exceed, in the aggregate, \$500 million as of the report date. Outstanding credit card receivables are the sum of:
- (a) Schedule RC-C, part I, item 6.a (column B on the FFIEC 041, column A on the FFIEC 031);
 - (b) Schedule RC-S, item 1, column C; and
 - (c) Schedule RC-S, item 6.a, column C.
- (Include comparable data on managed credit card receivables for any affiliated savings association.)
- OR
- (2) are credit card specialty banks as defined for purposes of the Uniform Bank Performance Report (UBPR). According to the UBPR Users Guide, credit card specialty banks are currently defined as those banks that exceed 50% for the following two criteria:
- (a) Credit Cards plus Securitized and Sold Credit Cards divided by Total Loans plus Securitized and Sold Credit Cards.
 - (b) Total Loans plus Securitized and Sold Credit Cards divided by Total Assets plus Securitized and Sold Credit Cards.

- 4** **Outstanding credit card fees and finance charges.** Report the amount outstanding of credit card fees and finance charges that the bank has securitized and sold in connection with its securitization and sale of the credit card receivables reported in Schedule RC-S, item 1, column C.

Bankers Acceptances (cont.):

- (3) Acceptances owned by the reporting bank -- The treatment of acceptances owned or held by the reporting bank (whether acquired by initial discount or subsequent purchase) depends upon whether the acceptances are held for trading, for sale, or in portfolio and upon whether the acceptances held have been accepted by the reporting bank or by other banks.

All acceptances held for trading by the reporting bank (whether acceptances of the reporting bank or of other banks) are to be reported in Schedule RC, item 5, "Trading assets." Banks that must complete Schedule RC-D, Trading Assets and Liabilities, will identify these holdings (in domestic offices) in item 9, "Other trading assets (in domestic offices)." Banks with foreign offices that must complete Schedule RC-D will identify these holdings in foreign offices in item 10, "Trading assets in foreign offices."

The reporting bank's holdings of acceptances other than those held for trading (whether acceptances of the reporting bank or of other banks) are to be reported in Schedule RC, item 4.a, "Loans and leases held for sale," or in item 4.b, "Loans and leases, net of unearned income," as appropriate, and in Schedule RC-C, part I, "Loans and Lease financing receivables."

In Schedule RC-C, part I, the reporting bank's holdings of other banks' acceptances, other than those held for trading, are to be reported in "Loans to depository institutions and acceptances of other banks" (item 2). On the other hand, the bank's holdings of its own acceptances, other than those held for trading, are to be reported in Schedule RC-C, part I, according to the account party of the draft. Thus, holdings of own acceptances for which the account parties are commercial or industrial enterprises are to be reported in Schedule RC-C, part I, in "Commercial and industrial loans" (item 4); holdings of own acceptances for which the account parties are other banks (e.g., in connection with the refinancing of another acceptance or for the financing of dollar exchange) are to be reported in Schedule RC-C, part I, in "Loans to depository institutions and acceptances of other banks" (item 2); and holdings of own acceptances for which the account parties are foreign governments or official institutions (e.g., for the financing of dollar exchange) are to be reported in Schedule RC-C, part I, "Loans to foreign governments and official institutions" (item 7).

The difference in treatment between holdings of own acceptances and holdings of other banks' acceptances reflects the fact that, for other banks' acceptances, the holding bank's immediate claim is on the accepting bank, regardless of the account party or of the purpose of the loan. On the other hand, for its holdings of its own acceptances, the bank's immediate claim is on the account party named in the accepted draft.

If the account party prepays its acceptance liability on an acceptance of the reporting bank that is held by the reporting bank (in the held-for-sale account, in the loan portfolio, or as trading assets) so as to immediately reduce its indebtedness to the reporting bank, the recording of the holding -- in "Commercial and industrial loans," "Loans to depository institutions and acceptances of other banks," or "Trading assets," as appropriate -- is reduced by the prepayment.

Bank-Owned Life Insurance: FASB Technical Bulletin No. 85-4, "Accounting for Purchases of Life Insurance," addresses the accounting for bank-owned life insurance. According to this technical bulletin, only the amount that could be realized under the insurance contract as of the balance sheet date should be reported as an asset. This amount is the cash surrender value reported to the institution by the insurance carrier less any applicable surrender charges not reflected by the insurance carrier in the reported cash surrender value, i.e., the net cash surrender value. Because there is no right of offset, an investment in bank-owned life insurance should be reported as an asset separately from any related deferred compensation liability.

Bank-Owned Life Insurance (cont.):

The net cash surrender value of bank-owned life insurance policies as of the report date should be reported on the balance sheet in Schedule RC, item 11, "Other assets," and in Schedule RC-F, item 5, "All other assets." If this amount is greater than \$25,000 and exceeds 25 percent of the amount reported in Schedule RC-F, item 5, it should be reported in Schedule RC-F, item 5.b. The net earnings (losses) on or the net increases (decreases) in the net cash surrender value of bank-owned life insurance should be reported in the income statement in Schedule RI, item 5.I, "Other noninterest income." Alternatively, the gross earnings (losses) on or increases (decreases) in net cash surrender value may be reported in Schedule RI, item 5.I, and the life insurance policy expenses may be reported in Schedule RI, Item 7.d, "Other noninterest expense." If the earnings (losses) on or the increases (decreases) in the net cash surrender value that are reported in Schedule RI, item 5.I, are greater than 1 percent of the sum of total interest income and total noninterest income, this amount should be reported in Schedule RI-E, item 1.b.

Banks, U.S. and Foreign: In the classification of banks as customers of the reporting bank, distinctions are drawn for purposes of the Reports of Condition and Income between "U.S. banks" and "commercial banks in the U.S." and between "foreign banks" and "banks in foreign countries." Some report items call for one set of these categories and other items call for the other set. The distinctions center around the inclusion or exclusion of foreign branches of U.S. banks and U.S. branches and agencies of foreign banks. For purposes of describing the office location of banks as customers of the reporting bank, the term "United States" covers the 50 states of the United States, the District of Columbia, Puerto Rico, and U.S. territories and possessions. (This is in contrast to the usage with respect to the offices of the reporting bank, where U.S.-domiciled Edge and Agreement subsidiaries and IBFs are included in "foreign" offices. Furthermore, for banks chartered and headquartered in the 50 states of the United States and the District of Columbia, offices of the reporting bank in Puerto Rico and U.S. territories and possessions are also included in "foreign" offices, but, for banks chartered and headquartered in Puerto Rico and U.S. territories and possessions, offices of the reporting bank in Puerto Rico and U.S. territories and possessions are included in "domestic" offices.)

U.S. banks - The term "U.S. banks" covers both the U.S. and foreign branches of banks chartered and headquartered in the U.S. (including U.S.-chartered banks owned by foreigners), but excluding U.S. branches and agencies of foreign banks. On the other hand, the term "banks in the U.S." or "commercial banks in the U.S." (the institutional coverage of which is described in detail later in this entry) covers the U.S. offices of U.S. banks (including their IBFs) and the U.S. branches and agencies of foreign banks, but excludes the foreign branches of U.S. banks.

Foreign banks - Similarly, the term "foreign banks" covers all branches of banks chartered and headquartered in foreign countries (including foreign banks owned by U.S. nationals and institutions), including their U.S.-domiciled branches and agencies, but excluding the foreign branches of U.S. banks. In contrast, the term "banks in foreign countries" covers foreign-domiciled branches of banks, including the foreign branches of U.S. banks, but excluding the U.S. branches and agencies of foreign banks.

Business Combinations (cont.):

plans, and any other current assets.¹ If any excess remains after reducing to zero the amounts that otherwise would have been assigned to those assets, that remaining excess shall be recognized as an extraordinary gain, generally in the period in which the business combination is completed, and reported in Schedule RI, item 11, "Extraordinary items and other adjustments, net of income taxes."

Under the purchase method, the historical equity capital balances of the acquired business are *not* to be carried forward to the balance sheet of the combined bank. The operating results of the acquired bank or business are to be included in the income and expenses of the reporting bank only from the date of acquisition.

Push down accounting -- Push down accounting is the establishment of a new accounting basis for a bank in its separate financial statements as a result of it becoming substantially wholly owned via a purchase transaction or a series of purchase transactions. Under push down accounting, when a bank becomes substantially wholly owned, yet retains its separate corporate existence, the bank's assets and liabilities are restated based on the amount or amounts paid to purchase the bank's voting stock. The purchase cost should be allocated to the bank's assets and liabilities based on their fair values as of the date(s) of the purchase transaction(s). When the bank becomes substantially wholly owned, but less than 100 percent owned, values should be assigned to the bank's assets and liabilities based on the proportional change in ownership. If the ownership interests in the bank were acquired in a series of purchase transactions, the assigned values would reflect the proportional change from each transaction in the series. These values, including any goodwill, are reflected in the separate financial statements of the acquired bank as well as in any consolidated financial statements of the bank's parent.

Push down accounting is required for purposes of the Reports of Condition and Income if a bank's voting stock becomes at least 95 percent owned, directly or indirectly, by an investor (which may be a holding company) or a group of investors working collaboratively, and the bank does not have outstanding publicly traded debt or preferred stock that may impact the investor's or group of investors' ability to control the form of ownership. Push down accounting also is required if the bank's separate financial statements are presented on a push down basis in reports filed with the Securities and Exchange Commission. Push down accounting may also be used when a bank's voting stock becomes at least 80 percent, but less than 95 percent, owned by an investor or a group of investors working collaboratively. When determining whether a bank has become substantially wholly owned, it is appropriate to aggregate the holdings of those investors who both "mutually promote" the acquisition and "collaborate" on the subsequent control of the acquired bank (the collaborative group).

In all cases, the bank's primary federal supervisory authority reserves the right to determine whether or not a bank must use push down accounting for purposes of the Reports of Condition and Income.

When push down accounting is used by a bank in the preparation of its Reports of Condition and Income, both of the following conditions should be met:

- (1) An arm's-length purchase acquisition or series of purchase transactions resulting in the bank becoming substantially wholly owned (at least 80 percent) must have occurred, and
- (2) The push down adjusting entries must eliminate the retained earnings account (therefore, the entire retained earnings of the bank before it became substantially wholly owned will not be available for the payment of dividends after it became substantially wholly owned).

In the Reports of Condition and Income for the remainder of the year in which a bank applies push down accounting after becoming substantially wholly owned, the bank shall report the initial increase or

¹ Prior to the allocation of the excess, the acquiring entity must reassess whether all acquired assets and assumed liabilities have been identified and recognized and perform remeasurements to verify that the consideration paid, assets acquired, and liabilities assumed have been properly valued.

Business Combinations (cont.):

decrease in its equity capital that results from the application of push down accounting in item 7, "Changes incident to business combinations, net," of Schedule RI-A, Changes in Equity Capital. In addition, when push down accounting is used, no income or expense for the period of the calendar year prior to the date it became substantially wholly owned should be included in subsequent Reports of Income.

For further information, see EITF Topic D-97, *Push-Down Accounting*.

Reorganization -- A combination of two or more entities involving related parties is considered a reorganization and not a business combination. For example, two subsidiary banks of a bank holding company may combine into one bank, which is a change in legal organization but not a change in the entity. The assets and liabilities transferred in the combination are accounted for at historical cost in a manner similar to that described above under "pooling-of-interests method."

A bank holding company's investment in a bank or other business that was acquired in a purchase business combination may differ from the book value of the net assets in that bank's or business's financial statements because push down accounting was not applied. This situation will generally exist with respect to acquisitions that occurred prior to the September 30, 1989, effective date of the push down accounting instructions set forth above in this Glossary entry.

A bank holding company may transfer its ownership interest in an acquired bank or other business to another one of its subsidiary banks subsequent to its acquisition of the bank or other business. When this occurs, the financial statements of the surviving bank must be adjusted, as set forth in FASB Emerging Issues Task Force Issue No. 90-5, to reflect the assets and liabilities of the acquired bank or other business at the historical cost included in the holding company's financial statements. The necessity and extent of such adjustments should be determined in consultation with the bank's primary federal supervisory authority.

For further information on the accounting for business combinations, see FASB Statement No. 141 and FASB Statement No. 72, "Accounting for Certain Acquisitions of Banking or Thrift Institutions."

Call Option: See "derivative contracts."

Capitalization of Interest Costs: Interest costs associated with the construction of a building shall, if material, be capitalized as part of the cost of the building. Such interest costs include both the actual interest incurred when the construction funds are borrowed and the interest costs imputed to internal financing of a construction project.

The interest rate utilized to capitalize interest on internally financed projects in a reporting period shall be the rate(s) applicable to the bank's borrowings outstanding during the period. For this purpose, a bank's borrowings include interest-bearing deposits and other interest-bearing liabilities.

The interest capitalized shall not exceed the total amount of interest cost incurred by the bank during the reporting period.

For further information, see FASB Statement No. 34, "Capitalization of Interest Costs," as amended.

Carrybacks and Carryforwards: See "income taxes."

Cash Management Arrangements: A cash management arrangement is a group of related transaction accounts of a single type maintained in the same right and capacity by a customer (a single legal entity), whereby the customer and the financial institution understand that payments from one account will be honored so long as a net credit balance exists in the group of related transaction accounts taken as a whole. Such accounts function as, and will be regarded for reporting and deposit insurance

Cash Management Arrangements (cont.):

assessment purposes as, one account rather than separate accounts, provided adequate documentation of the arrangement is maintained as discussed below. (Note: For reporting and deposit insurance assessment purposes, transaction accounts of affiliates and subsidiaries of a parent company that are separate legal entities may not be offset because accounts of separate legal entities are not permitted within a bona fide cash management arrangement.)

"Transaction accounts of a single type" means demand deposit accounts or NOW accounts, but not a combination thereof. For purposes of cash management arrangements, the terms "right" and "capacity" relate to the form of legal ownership such as being held in an agency or trust capacity, as a joint tenant, or as an individual. "Single legal entity" means a natural person, partnership, corporation, trust, or estate.

The reporting bank must maintain readily available records that will allow for the verification of cash management arrangements. Such documentation must provide account numbers, account titles, ownership of accounts, and the terms and conditions surrounding the management of the accounts, and must also clearly show that both the customer and the reporting bank have agreed to such terms and conditions. These terms and conditions must clearly indicate the understanding that payments from one account will be honored as long as a net credit balance exists within the group of related transaction accounts taken as a whole and maintained in the same right and capacity. A written cash management agreement, signed by both the customer (a single legal entity) and the reporting bank, accurately maintained and incorporating the above information, will be acceptable evidence of a bona fide cash management arrangement. In addition, the reporting bank must maintain readily available records that will allow for the verification of account balances within cash management arrangements.

See "deposits" for the definitions of transaction account, demand deposit, and NOW account. See also "overdraft."

Certificate of Deposit: See "deposits."

Changes in Accounting Estimates: See "accounting changes."

Changes in Accounting Principles: See "accounting changes."

Clearing Accounts: See "suspense accounts."

Commercial Banks in the U.S.: See "banks, U.S. and foreign."

Commercial Letter of Credit: See "letter of credit."

Commercial Paper: Commercial paper consists of short-term negotiable promissory notes issued in the United States by commercial businesses, including finance companies and banks. Commercial paper usually matures in 270 days or less and is not collateralized. Commercial paper may be backed by a standby letter of credit from a bank, as in the case of documented discounted notes. Holdings of commercial paper are to be reported as "securities" in Schedule RC-B, normally in item 6, "Other debt securities," unless held for trading and therefore reportable in Schedule RC, item 5, "Trading assets."

Commodity or Bill-of-Lading Draft: A commodity or bill-of-lading draft is a draft that is issued in connection with the shipment of goods. If the commodity or bill-of-lading draft becomes payable only when the shipment of goods against which it is payable arrives, it is an arrival draft. Arrival drafts are usually forwarded by the shipper to the collecting depository institution with instructions to release the shipping documents (e.g., bill of lading) conveying title to the goods only upon payment of the draft. Payment, however, cannot be demanded until the goods have arrived at the drawee's destination. Arrival drafts provide a means of insuring payment of shipped goods at the time that the goods are released.

Common Stock of Unconsolidated Subsidiaries, Investments in: See "equity method of accounting" and "subsidiaries."

Continuing Contract: See "federal funds transactions."

Corporate Joint Venture: See "subsidiaries."

Corrections of Accounting Errors: See "accounting changes."

Coupon Stripping, Treasury Receipts, and STRIPS: Coupon stripping occurs when a security holder physically detaches unmatured coupons from the principal portion of a security and sells either the detached coupons or the ex-coupon security separately. (Such transactions are generally considered by federal bank supervisory agencies to represent "improper investment practices" for banks.) In accounting for such transactions, the carrying amount of the security must be allocated between the ex-coupon security and the detached coupons based on their relative fair values at the date of the sale in accordance with FASB Statement No. 140. (See the Glossary entry for "transfers of financial assets.")

Detached U.S. Government security coupons and ex-coupon U.S. Government securities that are held for purposes other than trading, whether resulting from the coupon stripping activities of the reporting bank or from its purchase of stripped securities, shall be reported as "Other domestic debt securities" in Schedule RC-B, item 6.a. The amount of any discount or premium relating to the detached coupons or ex-coupon securities must be amortized. (See the Glossary entry for "premiums and discounts.")

A variation of coupon stripping has been developed by several securities firms which have marketed instruments with such names as CATS (Certificates of Accrual on Treasury Securities), TIGR (Treasury Investment Growth Receipts), COUGAR (Certificates on Government Receipts), LION (Lehman Investment Opportunity Notes), and ETR (East Treasury Receipts). A securities dealer purchases U.S. Treasury securities, delivers them to a trustee, and sells receipts representing the rights to future interest and/or principal payments on the U.S. Treasury securities held by the trustee. Such Treasury receipts are not an obligation of the U.S. Government and, when held for purposes other than trading, shall be reported as "Other domestic debt securities" in Schedule RC-B, item 6.a. The discount on these Treasury receipts must be accreted.

Under a program called Separate Trading of Registered Interest and Principal of Securities (STRIPS), the U.S. Treasury has issued certain long-term note and bond issues that are maintained in the book-entry system operated by the Federal Reserve Banks in a manner that permits separate trading and ownership of the interest and principal payments on these issues. Even after the interest or principal portions of U.S. Treasury STRIPS have been separately traded, they remain obligations of the U.S. Government. STRIPS held for purposes other than trading shall be reported as U.S. Treasury securities in Schedule RC-B, item 1. The discount on separately traded portions of STRIPS must be accreted.

Detached coupons, ex-coupon securities, Treasury receipts, and U.S. Treasury STRIPS held for trading purposes shall be reported at fair value in Schedule RC, item 5.

Custody Account: A custody account is one in which securities or other assets are held by a bank on behalf of a customer under a safekeeping arrangement. Assets held in such capacity are not to be reported in the balance sheet of the reporting bank nor are such accounts to be reflected as a liability. Assets of the reporting bank held in custody accounts at other banks are to be reported on the reporting bank's balance sheet in the appropriate asset categories as if held in the physical custody of the reporting bank.

Dealer Reserve Account: A dealer reserve account arises when a bank purchases at full face value a dealer's installment note receivables, but credits less than the full face value directly to the dealer's account. The remaining amount is credited to a separate dealer reserve account. That account is held by the bank as collateral for the installment notes and, for reporting purposes, is treated as a deposit in the appropriate items of Schedule RC-E. The bank will subsequently disburse to the dealer predetermined portions of the reserve as the purchased notes are paid in a timely manner.

Derivative Contracts (cont.):

specifically identified as a single transaction or a group of individual transactions, the occurrence of the forecasted transaction is probable, and certain other criteria specified in Statement No. 133 are met. If the hedged transaction is a group of individual transactions, those individual transactions must share the same risk exposure for which they are designated as being hedged.

An institution should discontinue prospectively its use of fair value or cash flow hedge accounting for an existing hedge if any of the qualifying criteria for hedge accounting is no longer met; the derivative expires or is sold, terminated, or exercised; or the institution removes the designation of the hedge. When this occurs for a cash flow hedge, the net gain or loss on the derivative should remain in "Accumulated other comprehensive income" and be reclassified into earnings in the periods during which the hedged forecasted transaction affects earnings. However, if it is probable that the forecasted transaction will not occur by the end of the originally specified time period (as documented at the inception of the hedging relationship) or within an additional two-month period of time thereafter (except as noted in Statement No. 133), the derivative gain or loss reported in "Accumulated other comprehensive income" should be reclassified into earnings immediately.

For a fair value hedge, in general, if a periodic assessment of hedge effectiveness indicates noncompliance with the highly effective criterion that must be met in order to qualify for hedge accounting, an institution should not recognize adjustment of the carrying amount of the hedged item for the change in the item's fair value attributable to the hedged risk after the last date on which compliance with the effectiveness criterion was established.

With certain limited exceptions, a nonderivative instrument, such as a U.S. Treasury security, may not be designated as a hedging instrument.

Reporting Derivative Contracts

When an institution enters into a derivative contract, it should classify the derivative as either held for trading or held for purposes other than trading (end-user derivatives) based on the reasons for entering into the contract. All derivatives must be reported at fair value on the balance sheet (Schedule RC).

Trading derivatives with positive fair values should be reported as trading assets in Schedule RC, item 5. Trading derivatives with negative fair values should be reported as trading liabilities in Schedule RC, item 15. Changes in the fair value (that is, gains and losses) of trading derivatives should be recognized currently in earnings and included in Schedule RI, item 5.c, "Trading revenue."

Freestanding derivatives held for purposes other than trading (and embedded derivatives that must be accounted for separately under Statement No. 133, which the bank has chosen to present separately from the host contract on the balance sheet) that have positive fair values should be included in Schedule RC-F, item 5, "All other assets." If the total fair value of these derivatives exceeds 25 percent of "All other assets," this amount should be disclosed in Schedule RC-F, item 5.d. Freestanding derivatives held for purposes other than trading (and embedded derivatives that must be accounted for separately under Statement No. 133, which the bank has chosen to present separately from the host contract on the balance sheet) that have negative fair values should be included in Schedule RC-G, item 4, "All other liabilities." If the total fair value of these derivatives exceeds 25 percent of "All other liabilities," this amount should be disclosed in Schedule RC-G, item 4.d. Net gains (losses) on derivatives held for purposes other than trading that are not designated as hedging instruments should be recognized currently in earnings and reported consistently as either "Other noninterest income" or "Other noninterest expense" in Schedule RI, item 5.i or item 7.d, respectively.

Netting of derivative assets and liabilities is prohibited on the balance sheet except as permitted under FASB Interpretation No. 39. See the Glossary entry for "offsetting."

Derivative Contracts (cont.):

Banks must report the notional amounts of their derivative contracts (both freestanding derivatives and embedded derivatives that must be accounted for separately from their host contract under Statement No. 133) by risk exposure in Schedule RC-L, first by type of contract in Schedule RC-L, item 12, and then by purpose of contract (i.e., trading, other than trading) in Schedule RC-L, items 13 and 14. Banks must then report the gross fair values of their derivatives, both positive and negative, by risk exposure and purpose of contract in Schedule RC-L, item 15. However, these items exclude credit derivatives, the notional amounts and gross fair values of which must be reported in Schedule RC-L, item 7.

Discounts: See "premiums and discounts."

Dividends: Cash dividends are payments of cash to stockholders in proportion to the number of shares they own. Cash dividends on preferred and common stock are to be reported on the date they are declared by the bank's board of directors (the declaration date) by debiting "retained earnings" and crediting "dividends declared not yet payable," which is to be reported in other liabilities. Upon payment of the dividend, "dividends declared not yet payable" is debited for the amount of the cash dividend with an offsetting credit, normally in an equal amount, to "dividend checks outstanding" which is reportable in the "demand deposits" category of the bank's deposit liabilities.

A liability for dividends payable may not be accrued in advance of the formal declaration of a dividend by the board of directors. However, the bank may segregate a portion of retained earnings in the form of a net worth reserve in anticipation of the declaration of a dividend.

Stock dividends are distributions of additional shares to stockholders in proportion to the number of shares they own. Stock dividends are to be reported by transferring an amount equal to the fair value of the additional shares issued from retained earnings to a category of permanent capitalization (common stock and surplus). However, the amount transferred from retained earnings must be reduced by the amount of any mandatory and discretionary transfers previously made (such as those from retained earnings to surplus for increasing the bank's legal lending limit) provided such transfers have not already been used to record a stock dividend. In any event, the amount transferred from retained earnings may not be less than the par or stated value of the additional shares being issued.

Property dividends, also known as dividends in kind, are distributions to stockholders of assets other than cash. The transfer of securities of other companies, real property, or any other asset owned by the reporting bank to a stockholder or related party is to be recorded at the fair value of the asset on the declaration date of the dividend. A gain or loss on the transferred asset must be recognized in the same manner as if the property had been disposed of in an outright sale at or near the declaration date.

In those instances where a bank transfers bank premises to a parent holding company in the form of a property dividend and the parent immediately enters into a sale-leaseback transaction with a third party, the gain must be deferred by the bank and amortized over the life of the lease.

Domestic Office: For purposes of these reports, a domestic office of the reporting bank is a branch or consolidated subsidiary (other than an Edge or Agreement subsidiary) located in the 50 states of the United States or the District of Columbia or a branch on a U.S. military facility wherever located. However, if the reporting bank is chartered and headquartered in Puerto Rico or a U.S. territory or possession, a branch or consolidated subsidiary located in the 50 states of the United States, the District of Columbia, Puerto Rico, or a U.S. territory or possession is a domestic office. The domestic offices of the reporting bank exclude all International Banking Facilities (IBFs); all offices of Edge and Agreement subsidiaries, including their U.S. offices; and all branches and other consolidated subsidiaries of the bank located in foreign countries.

Domicile: Domicile is used to determine the foreign (non-U.S. addressee) or domestic (U.S. addressee) status of a customer of the reporting bank for the purposes of these reports. Domicile is determined by the principal residence address of an individual or the principal business address of a corporation, partnership, or sole proprietorship. If other addresses are used for correspondence or other purposes, only the principal address, insofar as it is known to the reporting bank, should be used in determining whether a customer should be regarded as a U.S. or non-U.S. addressee.

Foreign Debt Exchange Transactions: Foreign debt exchange transactions generally fall into three categories: (1) loan swaps, (2) debt/equity swaps, and (3) debt-for-development swaps. These transactions are to be reported in the Reports of Condition and Income in accordance with generally accepted accounting principles as summarized below. The accounting pronouncements mentioned below should be consulted for more detailed reporting guidance in these areas.

Generally accepted accounting principles require that these transactions be reported at their fair value. There is a significant amount of precedent in the accounting for exchange transactions to consider both the fair value of the consideration given up as well as the fair value of the assets received in arriving at the most informed valuation, especially if the value of the consideration given up is not readily determinable or may not be a good indicator of the value received. It is the responsibility of management to make the valuation considering all of the circumstances. Such valuations are subject to examiner review.

Among the factors to consider in determining fair values for foreign debt exchange transactions are:

- (1) Similar transactions for cash;
- (2) Estimated cash flows from the debt or equity instruments or other assets received;
- (3) Market values, if any, of similar instruments; and
- (4) Currency restrictions, if any, affecting payments on or sales of the debt or equity instruments, local currency, or other assets received, including where appropriate those affecting the repatriation of capital.

Losses arise from swap transactions when the fair value determined for the transaction is less than the recorded investment in the sovereign debt and other consideration paid, if any. Such losses should generally be charged to the allowance for loan and lease losses (or allocated transfer risk reserve, if appropriate) and must include any discounts from official exchange rates that are imposed by sovereign obligors as transaction fees. All other fees and transaction costs involved in such transactions must be charged to expense as incurred.

Loss recoveries or even gains might be indicated in a swap transaction as a result of the valuation process. However, due to the subjective nature of the valuation process, such loss recoveries or gains ordinarily should not be recorded until the debt or equity instruments, local currency, or other assets received in the exchange transaction are realized in unrestricted cash or cash equivalents.

Loan swaps -- The reporting guidance for this type of transaction is presented in the AICPA's Notice to Practitioners, "Accounting for Foreign Loan Swaps," issued on May 27, 1985.

Foreign loan swaps, or debt/debt swaps, involve the exchange of one foreign loan for another. This type of transaction represents an exchange of monetary assets that must be reported at current fair value. Normally, when monetary assets are exchanged, with or without additional cash payments, and the parties have no remaining obligations to each other, the earnings process is complete.

Debt/equity swaps -- The reporting treatment for this type of transaction is presented in AICPA Practice Bulletin No. 4, "Accounting for Foreign Debt/Equity Swaps."

A foreign debt/equity swap represents an exchange of monetary for nonmonetary assets that must be measured at fair value. This type of swap is typically accomplished when holders of U.S. dollar-denominated sovereign debt agree to convert that debt into approved local equity investments. The holders are generally credited with local currency at the official exchange rate. A discount from the

Foreign Debt Exchange Transactions (cont.):

official exchange rate is often imposed as a transaction fee. The local currency is generally not available to the holders for any purposes other than approved equity investments. Restrictions may be placed on dividends on the equity investments and capital usually cannot be repatriated for several years.

In arriving at the fair value of the transaction, both the secondary market price of the debt given up and the fair value of the equity investment or assets received should be considered.

Debt-for-development swaps -- In this type of exchange, sovereign debt held by a bank is generally purchased by a nonprofit organization or contributed to the nonprofit the nonprofit organization. When the sovereign debt is purchased by or donated to a nonprofit organization, the organization may enter into an agreement with the debtor country to cancel the debt in return for the country's commitment to provide local currency or other assets for use in connection with specific projects or programs in that country. Alternatively, a bank may exchange the sovereign debt with the country and receive local currency. In this alternative, the local currency will be donated or sold to the nonprofit organization for use in connection with specific projects or programs in that country.

These transactions, including amounts charged to expense as donations, must be reported at their fair values in accordance with generally accepted accounting principles applicable to foreign debt exchange transactions. This includes appropriate consideration of the market value of the instruments involved in the transaction and the fair value of any assets received, taking into account any restrictions that would limit the use of the assets. In debt-for-development swaps where a bank receives local currency in exchange for the sovereign loan it held and the local currency has no restrictions on its use and is freely convertible, it is generally appropriate for fair value to be determined by valuing the local currency received at its fair market exchange value.

Foreign Governments and Official Institutions: Foreign governments and official institutions are central, state, provincial, and local governments in foreign countries and their ministries, departments, and agencies. These include treasuries, ministries of finance, central banks, development banks, exchange control offices, stabilization funds, diplomatic establishments, fiscal agents, and nationalized banks and other banking institutions that are owned by central governments and that have as an important part of their function activities similar to those of a treasury, central bank, exchange control office, or stabilization fund. For purposes of these reports, other government-owned enterprises are not included.

Also included as foreign official institutions are international, regional, and treaty organizations, such as the International Monetary Fund, the International Bank for Reconstruction and Development (World Bank), the Bank for International Settlements, the Inter-American Development Bank, and the United Nations.

Foreign Office: For purposes of these reports, a foreign office of the reporting bank is a branch or consolidated subsidiary located in a foreign country; an Edge or Agreement subsidiary, including both its U.S. and its foreign offices; or an IBF. In addition, if the reporting bank is chartered and headquartered in the 50 states of the United States and the District of Columbia, a branch or consolidated subsidiary located in Puerto Rico or a U.S. territory or possession is a foreign office. Branches on U.S. military facilities wherever located are treated as domestic offices, not foreign offices.

Forward Contracts: See "derivative contracts."

Functional Currency: See "foreign currency transactions and translation."

Futures Contracts: See "derivative contracts."

Goodwill: See "purchase acquisition" in the entry for "business combinations."

Securities Activities (cont.):

- (4) **Extended Settlements** -- In the U.S., regular-way settlement for federal government and federal agency securities (except mortgage-backed securities and derivative contracts) is one business day after the trade date. Regular-way settlement for corporate and municipal securities is three business days after the trade date. For mortgage-backed securities, it can be up to 60 days or more after the trade date. The use of extended settlements may be offered by securities dealers in order to facilitate speculation on the part of the purchaser, often in connection with pair-off transactions. Securities acquired through the use of a settlement period in excess of the regular-way settlement periods in order to facilitate speculation should be reported as trading assets.
- (5) **Repositioning Repurchase Agreements** -- A repositioning repurchase agreement is a funding technique offered by a dealer in an attempt to enable an institution to avoid recognition of a loss. Specifically, an institution that enters into a "when-issued" trade or a "pair-off" (which may include an extended settlement) that cannot be closed out at a profit on the payment or settlement date will be provided dealer financing in an effort to fund its speculative position until the security can be sold at a gain. The institution purchasing the security typically pays the dealer a small margin that approximates the actual loss in the security. The dealer then agrees to fund the purchase of the security, typically buying it back from the purchaser under a resale agreement. Any securities acquired through a dealer financing technique such as a repositioning repurchase agreement that is used to fund the speculative purchase of securities should be reported as trading assets.
- (6) **Short Sales** -- A short sale is the sale of a security that is not owned. The purpose of a short sale generally is to speculate on a fall in the price of the security. (For further information, see the Glossary entry for "short position.")

One other practice, referred to as "adjusted trading," is not acceptable under any circumstances. Adjusted trading involves the sale of a security to a broker or dealer at a price above the prevailing market value and the contemporaneous purchase and booking of a different security, frequently a lower-rated or lower quality issue or one with a longer maturity, at a price above its market value. Thus, the dealer is reimbursed for losses on the purchase from the institution and ensured a profit. Such transactions inappropriately defer the recognition of losses on the security sold and establish an excessive cost basis for the newly acquired security. Consequently, such transactions are prohibited and may be in violation of 18 U.S.C. Sections 1001--False Statements or Entries and 1005--False Entries.

See also "trading account."

Securities Borrowing/Lending Transactions: Securities borrowing/lending transactions are typically initiated by broker-dealers and other financial institutions that need specific securities to cover a short sale or a customer's failure to deliver securities sold. A transferee ("borrower") of securities generally is required to provide "collateral" to the transferor ("lender") of securities, commonly cash but sometimes other securities or standby letters of credit, with a value slightly higher than that of the securities "borrowed."

Most securities borrowing/lending transactions do not qualify as sales under FASB Statement No. 140 because the agreement entitles and obligates the securities lender to repurchase or redeem the transferred assets before their maturity. (See the Glossary entry for "transfers of financial assets" for further discussion of sale criteria.) When such transactions do not qualify as sales, securities lenders and borrowers should account for the transactions as secured borrowings in which cash (or securities that the holder is permitted by contract or custom to sell or repledge) received as "collateral" by the securities lender is considered the amount borrowed and the securities "loaned" are considered pledged as collateral against the amount borrowed. The "loaned" securities should continue to be reported on the securities lender's balance sheet as available-for-sale securities, held-to-maturity securities, or trading assets, as appropriate. "Loaned" securities that are reported as available-for-sale or held-to-maturity securities in Schedule RC-B, Securities, should also be reported as "Pledged securities" in Memorandum item 1 of that schedule.

Securities Borrowing/Lending Transactions (cont.):

If the securities borrowing/lending transaction meets the criteria for a sale under FASB Statement No. 140, the lender of the securities should remove the securities from its balance sheet, record the proceeds from the sale of the securities (including the forward repurchase commitment), and recognize any gain or loss on the transaction. The borrower of the securities should record the securities on its balance sheet at fair value and record the payment for the purchased assets (including the forward resale commitment).

Securities, Participations in Pools of: See "repurchase/resale agreements."

Servicing Assets and Liabilities: The accounting and reporting standards for servicing assets and liabilities are set forth in FASB Statement No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities" and FASB Statement No. 65, "Accounting for Certain Mortgage Banking Activities," as amended by Statement No. 140. A summary of the relevant sections of these accounting standard follows. For further information, see FASB Statements No. 140 and No. 65 and the Glossary entry for "transfers of financial assets."

Servicing of mortgage loans, credit card receivables, or other financial assets includes, but is not limited to, collecting principal, interest, and escrow payments from borrowers; paying taxes and insurance from escrowed funds; monitoring delinquencies; executing foreclosure if necessary; temporarily investing funds pending distribution; remitting fees to guarantors, trustees, and others providing services; and accounting for and remitting principal and interest payments to the holders of beneficial interests in the financial assets. Servicers typically receive certain benefits from the servicing contract and incur the costs of servicing the assets.

Servicing is inherent in all financial assets; it becomes a distinct asset or liability only when contractually separated from the underlying financial assets by sale or securitization of the assets with servicing retained or by a separate purchase or assumption of the servicing. When a bank undertakes an obligation to service financial assets, it must recognize a servicing asset or liability for that servicing contract unless it securitizes the assets, retains all of the resulting securities, and classifies the securities as held-to-maturity debt securities. Servicing assets result from contracts to service financial assets for which the benefits of servicing (revenues from contractually specified servicing fees, late charges, and other ancillary sources) are expected to more than adequately compensate the servicer for performing the servicing. Servicing liabilities result from contracts to service financial assets for which the benefits of servicing are not expected to adequately compensate the servicer for performing the servicing. Contractually specified servicing fees are all amounts that, per contract, are due to the servicer in exchange for servicing the financial asset and would no longer be received by a servicer if the beneficial owners of the serviced assets or their trustees or agents were to exercise their actual or potential authority under the contract to shift the servicing to another servicer. Adequate compensation is the amount of benefits of servicing that would fairly compensate a substitute servicer should one be required including the profit that would be demanded by a substitute servicer in the marketplace.

When a bank sells or securitizes financial assets and retains the servicing asset, the bank shall allocate the cost of the financial assets to the servicing assets and the financial assets (without the servicing) based on their relative fair values. If it is not practicable to estimate the fair values of the servicing assets and the financial assets (without the servicing), the entire cost shall be allocated to the financial assets (without the servicing) and no cost shall be allocated to the servicing assets. If a bank incurs a servicing liability in a sale or securitization, the servicing liability should initially be measured at fair value. If a bank securitizes assets, retains all of the resulting securities, and classifies the securities as held-to-maturity debt securities, no separate servicing asset or liability shall be recorded. If a bank purchases servicing assets or assumes servicing liabilities in a transaction other than a sale or securitization of the financial assets being serviced, the asset or liability shall be recorded at fair value. For purchased servicing assets, the fair value is presumptively the price paid to acquire the servicing.
