Subject: Comment - Industrial Loan Companies and Industrial Banks

Ladies and Gentlemen:

I am pleased to submit this comment in support of industrial banks. As the FDIC knows through its stringent oversight of industrial banks there is no evidence of a safety and soundness concern regarding their operation. These banks regardless of their ownership have proven to be a competitive force improving the lot of consumers on a national scale. They are well capitalized and profitable. Special conditions for their future operation will be a disservice to the public and only serve to entrench the power of financial institution special interests.

Thank you for consideration

Dan Lis
