Re: Docket No. OCC-2012-0010 RIN 1557-AD46, Docket No. R-[XX] RIN [XX], FDIC RIN 3064-D97: Regulatory Capital Rules: Advanced Approaches Risk-based Capital Rule; Market Risk Capital Rule

Dear Sirs and Madam,

We write on behalf of the National Association of Insurance Commissioners (NAIC) regarding the Federal Reserve, Office of the Comptroller of the Currency, and Federal Deposit Insurance Corporation's joint notice and proposed collective rulemakings on capital rules. Founded in 1871, the NAIC is the U.S. standard-setting and regulatory support organization created and governed by the chief insurance regulators from the 50 states, the District of Columbia and the five U.S. territories. Through the NAIC, state insurance regulators establish standards and best practices, conduct peer reviews, and coordinate their regulatory oversight. NAIC members, together with the central resources of the NAIC, form the national system of state-based insurance regulation in the U.S. The NAIC respectfully submits the following comments to the Notices of Proposed Rulemaking (NPR) and Request for Comment published in the June 7, 2012 issue of the Federal Register.

For purposes of this comment letter, we have focused on responding to your specific questions regarding separate accounts, the general treatment of insurance underwriting, surplus notes, and policy loans. In addition, we offer comparison information on the substantive differences between generally accepted accounting principles (GAAP) and statutory accounting principles (SAP) that might be useful in better understanding the relative conservative nature of SAP and risk-based capital (RBC). We hope these comments and the appended information will be helpful as further consideration is given to more suitable standards for insurance enterprises with thrifts and banking entities. Our technical experts stand ready to answer additional questions in person or by telephone.

Separate Accounts

Question 20: The agencies request comment on how the proposed definition of a separate account interacts with state law. What are the significant differences and what is the nature of the implications of these differences?

The definition provided by the NPR is based on the U.S. GAAP guidance contained in Statement of Position (SOP) 03-1. These requirements for separate account allocation were rejected for statutory accounting in Statement of Statutory Accounting Principles (SSAP) No. 56 as they may conflict with existing state laws that address separate accounts. State laws regarding separate accounts are generally broader, and based in part upon the NAIC's Variable Contract Law. Consequently, the NPR's definition may conflict with state law since the NPR's limitations are not required under state law. However, it may be helpful to note that the NAIC Annual Statement, filed by insurers in all U.S. jurisdictions, requires disclosure of the elements of the GAAP separate account requirements – including a disclosure on whether each product would qualify for separate account treatment under GAAP.

Insurance Underwriting

Question 21: The agencies solicit comment on all aspects of the proposed treatment of insurance underwriting activities.

In considering the appropriateness of using RBC for savings and loan holding companies, we encourage the Board to become more familiar with the risks included in the RBC formulas – a separate formula for filers of the life statement, property/casualty statement and health statement. RBC is indeed calculated from statutory accounting numbers at the legal entity level and not consolidated group numbers, and it is a tool used in the solvency oversight performed by state insurance regulators. However, the risks included within the RBC formula include credit, interest rate and market risks as appropriate for the full list of invested assets owned by the insurer. This includes risk charges for investments held in subsidiary, controlled and affiliated entities, and the RBC risk charge for investments in other insurers is based on the subsidiary's own RBC requirement. Thus, any consideration of using amounts from RBC must recognize this to avoid duplication of amounts. RBC formulas also account for significant insurance underwriting risks – inadequate pricing of premiums and insufficient reserving for claims.

To consider a group of insurers, each legal insurance entity's individual RBC requirement would be aggregated. This does not recognize diversification benefits included in other group capital calculations. State insurance regulators find this appropriate since capital is there to absorb unexpected results and times of financial distress; when a group is troubled, such diversification benefits more likely turn into contagion impacts.

_

¹ This is currently reflected in the FASB Codification at 944-80-25-2.

² NAIC Model # 260.

The Company Action Level RBC, which is twice the amount of Authorized Control Level RBC, is neither an economic nor a regulatory target; in fact, it is not a target capital level of any sort. Rather, the Company Action Level RBC is the amount of Total Adjusted Capital (and surplus) at which regulatory action has been triggered per state statute. Thus, holding one dollar above Company Action Level RBC is not an appropriate strategy for a legal entity insurer. Said another way, a state insurance regulator would not approve a legal entity insurer transferring assets to the holding company that would leave it with a minimum level of capital and surplus that just barely covered Company Action Level RBC (regulatory approvals are required for dividends above a certain percentage of surplus). State insurance regulators monitor each legal entity insurer's financial position and results on an ongoing basis, and require the company to address issues identified well before they become a concern from a capital and surplus perspective.

Capital Instruments

Question 22: What are the specific terms and features of capital instruments (including surplus notes) unique to insurance companies that diverge from current eligibility requirements under the proposal? Are there ways in which such terms and features might be modified in order to bring the instruments into compliance with the proposal?

SSAP No. 41 provides the basic terms that are required for Surplus Notes. Specifically, SSAP No. 41 provides that such instruments shall be reported as surplus and not debt only if the surplus note contains the below provisions. Such provisions help to prevent payment on the note of an insurer in a weakly capitalized position.

- a. Subordination to policyholders;
- b. Subordination to claimant and beneficiary claims;
- c. Subordination to all other classes of creditors other than surplus note holders; and
- d. Interest payments and principal repayments require prior approval of the commissioner of the state of domicile.

It is also worth noting that insurers typically have different liquidity needs and rely more on unassigned funds (i.e. retained earnings) than other financial institutions and, therefore, have less of a need to issue capital instruments.

Question 23: The agencies seek data on the amount and issuers of surplus notes currently outstanding. What proportion of insurance company capital is comprised of surplus notes?

The total amount of surplus notes is \$51,536,392,299, and is located within 530 insurers out of a total of 4,584 insurers filing with the NAIC, or 11.5% of insurers.³ The total amount of \$51,536,392,299 is approximately 5.2% of the approximately \$1 trillion in industry capital and surplus after eliminating stacking.

Other Comments

We provide the following additional information with respect to policy loans and statutory accounting versus generally accepted accounting principles.

Policy Loans

SSAP No. 49 defines a policy loan as a loan to a policyholder that is secured by the surrender value or collateral assignment of the related policy or contract. The surrender value of the contract is earned by

³ Appendix A includes detail that shows the entities and amounts.

the insured over a period of time and can be withdrawn subject to certain provisions. One such provision requires that the face amount of the policy to be reduced for any withdrawals, thus reducing the obligations of the insurer. Another provision generally requires the policy to lapse if the unpaid balance of the loan exceeds the cash surrender value. We submit this information to provide additional explanation that we trust is helpful in evaluating the appropriateness of a 20% risk weight on this type of asset.

SAP vs. GAAP

The objectives of GAAP reporting differ from the objectives of SAP. GAAP is designed to meet the varying needs of the different users of financial statements. SAP is designed to address the concerns of regulators, who are the primary users of statutory financial statements. As a result, GAAP stresses measurement of emerging earnings of a business from period to period, (i.e., matching revenue to expense), while SAP stresses measurement of ability to pay claims in the future. This difference is illustrated by the fact that statutory policy reserves are intentionally established on a conservative basis emphasizing the long-term nature of the liabilities. Under GAAP, the experience expected by each company, with provision for the risk of adverse deviations, is used to determine the reserves it will establish for its policies. GAAP reserves may be more or less than the statutory reserves.

Some other differences between SAP and GAAP have included:

- GAAP has recognized certain assets which, for statutory purposes, have been either non-admitted or immediately expensed. Policy acquisition costs are expensed as incurred under SAP since the funds so expended are no longer available to pay future liabilities. Insurance company financial statements prepared in accordance with GAAP defer costs incurred in the acquisition of new business and amortize them over the premium recognition period.
- Deferred income taxes are limited for recognition under SAP.
- The methods of accounting for certain aspects of reinsurance under GAAP may have varied from SAP, e.g., credit for reinsurance in unauthorized companies.

For additional information on SAP vs. GAAP accounting, please see Appendix B.

Conclusion

We are confident once a better understanding of the existing financial standards required of such insurers is reached, more progress can be made toward developing a regulatory approach that captures the complete risk profile of an insurance enterprise. Should you wish to discuss this comment or any other matter relating to the NAIC's views on this proposed rule, please do not hesitate to contact Ethan Sonnichsen, Director of Government Relations, at (202) 471-3980 or Mark Sagat, Counsel and Manager of Government Relations, at (202) 471-3987.

Sincerely,

Kevin M. McCarty

Florida Commissioner of Insurance and

NAIC President

Therese M. Vaughan, Ph.D. NAIC Chief Executive Officer

APPENDIX - B

Statutory Accounting Principles 101

SAP, GAAP and IFRS

Objectives

- Identify specific items of difference between a GAAP and SAP balance sheet
- Distinguish between how GAAP and SAP handle specific accounting elements on the balance sheet
- Recognize admitted and nonadmitted assets
- Recognize liabilities
- Describe IFRS and how it may impact the future of GAAP and statutory accounting.

GAAP

- Designed to meet the varying needs of different users
- Stresses measurement of profitability/income
- Emphasis on earnings
- Going concern concept

<u>SAP</u>

- Designed to address concerns of regulators
- Stresses ability to satisfy policyholder obligations
- Balance sheet emphasis
- Focuses on liquidity

Foundation Concepts

GAAP

- Relevance
- Reliability
- Neutrality
- Comparability
- Materiality

<u>SAP</u>

Additional Emphasis:

- Conservatism
- Consistency
- Recognition

GAAP vs. SAP

Assets

Burning Down the House

- Illustration of complete GAAP and SAP balance sheets (see Attachment)
- Identifies significant differences in accounting and reporting for GAAP and SAP financial statements.
- For illustrative purposes, differences from both Life and P&C companies are included.

GAAP B	alance Sheet	Statutory Balar	ry Balance Sheet			
Total Assets	\$3,111,000	Assets	Assets Not Admitted	Net Admitted Assets		
	, ,	\$2,794,000	\$ 260,000	\$ 2,534,000		

 GAAP does not recognize the concept of "nonadmitted assets".

- SAP does not allow certain assets to be "admitted" in the balance sheet.
- A nonadmitted asset is one which is accorded limited or no value in statutory reporting.

Investments

GAAP

- Classifies investments as follows in FAS 115:
 - Securities held to maturity are reported at amortized cost;
 - Securities available for sale are reported at fair value;
 - Trading securities are reported at fair value.
- GAAP does not recognize the concept of nonadmitted assets or investment limitations.

SAP

- Bonds are reported at amortized cost except those that are low quality – lower of amortized cost or market (SSAP No. 26).
- Common Stocks are generally reported at SVO fair value (SSAP No. 30).
- Nonadmitted assets due to state investment limitations

M

Investments

GAAP Balance Sheet			Statutory Balance Sheet						
					Assets		sets Not dmitted	Ne	et Admitted Assets
Investments:			Investments:						
Trading securities	\$	56,000	Bonds		\$ 600,000	\$	2,000	\$	598,000
Securities available for sale		1,200,000	Common stocks		1,119,000		15,000		1,104,000
Securities held to maturity		600.000							

In the case of the investments above, the total \$17,000 nonadmitted asset represents investments that exceed the statutory investment limitations imposed by the state of domicile. Most states impose such limitations.

Goodwill

GAAP Balance	Sheet	Statutory Balance Sheet					
				Assets	Net		
				Not	Admitted		
		Investment in	Assets	Admitted	Assets		
Goodwill	20,000	Firemen's Insurance Company	50,000	33,000	17,000		

- GAAP goodwill = purchase price less market value
- GAAP does <u>not</u> limit goodwill.
- SSAP No. 68 goodwill = purchase price less
 book value
- Goodwill in excess of 10% of <u>adj. capital &</u> <u>surplus</u> is nonadmitted.

Mortgage Loans

GAAP Balance Sheet

Statutory Balance Sheet

Mortgage loans on real estate

500,000

Mortgage loans on real estate

Assets Not Net Admitted
Assets Admitted Assets

500,000 500,000

- Mortgage loans are valued at the unpaid principal amount and impairment of the asset can be measured using varying methods.
- Mortgage loans are also valued at the unpaid principal amount pursuant to SSAP No. 37.
- Many states have investment limitations on the ratio of loan value to property value.

Real Estate

GAAP Balance Sheet

Statutory Balance Sheet

				Assets Not	Net Admitted
			Assets	Admitted	Assets
Real estate	50,000	Real estate	25,000		25,000

- GAAP requires real estate investments to be reported at depreciated cost and net of any allowance for impairment in value.
- GAAP requires real estate held for sale to be reported at the lower of depreciated cost or fair value less costs to sell.
- Properties occupied by the company and properties held for the production of income are reported at depreciated cost.
- Property held for sale is reported at the lower of depreciated cost or fair value less costs to sell.
- Additionally, all properties are recorded **NET** of any related debt.

Cash & S/T Investments

GAAP Balance Shee	<u>t</u>	Statutory Balance Sheet					
			Assets	Assets Not Admitted	Net Admitted Assets		
Cash and cash equivalents	50,000	Cash and short-term investments	30,000		30,000		

- GAAP requires
 companies with multiple
 cash accounts to
 reclassify individual
 negative cash account
 balances to liabilities.
- SSAP No. 2 allows negative cash to be reported as a negative asset, consistent with the statutory concept of conservatism.

Other Invested Assets

GAAP Balance Sheet

Statutory Balance Sheet

		Assets Not	Net Admitted
	Assets	Admitted	Assets
Other invested assets	30,000		30,000

- GAAP does not use the classification of "Other Invested Assets."
- SAP requires certain assets to be recorded as "Other Invested Assets" separately from "Other Assets."

Accrued Interest

GAAP Balance Sheet	Statutory Balance Sheet					
			Assets	Assets Not Admitted	Net Admitted Assets	
Accrued interest and dividends	25,000	Accrued interest and dividends	25,000		25,000	

- GAAP allows investment income to be reported as the income is <u>earned</u> by the reporting entity.
- SSAP No. 34 also requires that investment income be reported only as the income is <u>earned</u> by the reporting entity.

Agents Balances

GAAP Balance Sheet

Statutory Balance Sheet

			Assets	Assets Not Admitted	Net Admitted Assets
Premiums receivable and		Agents' balances and uncollected			
agents' balances	55,000	premium	55,000	5,000	50,000

 GAAP requires receivables for premiums and agents' balances to be reported net of a valuation allowance for doubtful accounts. Companies are simply required to nonadmit any premium receivable balances greater than 90 days past due. (Exception for government insured plans is within SSAP No. 84.)

Uncollectible amounts are written off.

Reinsurance Recoverable

GAAP Balance SheetStatutory Balance SheetAssets Not AdmittedAssets Not AdmittedAssets AdmittedReinsurance recoverables30,00030,000

 GAAP requires all amounts due from reinsurers to be recorded as assets. SSAP No. 61 and SSAP No. 62 requires reinsurance recoverables on unpaid claims and IBNR to be recorded as a contra-liability and netted against gross losses and loss adjustment expenses or in cases where the right of offset exists, reinsurance payables.

Deferred Acquisition Costs

- DAC calculation includes:
 - Commissions;
 - State premium taxes;
 - Underwriting; and
 - Issuance costs.
- DAC is usually the largest difference between GAAP and SAP

GAAP Balance Sheet

Statutory Balance Sheet

Assets Not Net Admitted
Assets Admitted Assets

Deferred policy acquisition costs

170,000

FAS 60 allows acquisition costs and commissions to be capitalized and amortized to expense over the life of the policy.

- SSAP No. 71 requires acquisition costs and commissions to be expensed as incurred.
- Premiums are recognized as income on a <u>pro rata</u> basis.

DAC Example Assumptions

- Annual premium is \$1,200;
- Policy term is one year;
- Policy is effective December 1; and
- Acquisition expenses for commissions, taxes, policy issuance, etc., are \$360.

SAP Income Statement

	<u>Year 1</u>	<u> Year 2</u>
Premiums Written	\$1,200	\$ -0-
Change in UPR	<u>1,100</u>	(1,100)

Premiums Earned \$1,100 100 360 Acq. Expenses Net Income (Loss): \$ (260) \$1,100

100

GAAP Income Statement

	Year 1	Year 2
Premiums Written	\$1,200	\$ -0-
Change in UPR	<u> 1,100</u>	(1,100)
Premiums Earned	\$ 100	\$1,100
Acquisition Expenses	<u>30</u>	330
Net Income	\$ 70	\$ 770

At the end of year 1, the company would show the unamortized acquisition costs of \$330 as an asset on the GAAP balance sheet.

Furniture, Fixtures & Equip.

GAAP Balance Sheet

Statutory Balance Sheet

Assets Not Net Admitted

Assets Admitted Assets

Furniture, fixtures and equipment 15,000 Furniture, fixtues and equipment 10,000 10,000 -

- FF&E is capitalized and depreciated over its useful life.
- FAS 13 requires reporting entities to classify leases as capital or operating leases.

- SSAP No. 19 nonadmits all such equipment.
- SSAP No. 22 requires <u>all</u> leases to be considered <u>operating</u> leases.

GAAP Balance Sheet

Statutory Balance Sheet

			Assets	Assets Not Admitted	Net Admitted Assets
EDP equipment and operating		EDP equipment and operating			
software	25,000	software	25,000	20,000	5,000

- EDP equipment is capitalized and depreciated over its useful life.
- SSAP No. 16 requires EDP equipment and operating system software that exceeds 3% of <u>adjusted capital and surplus</u> to be nonadmitted.
- Depreciation period is specified by SSAP No. 79 and SSAP No. 16.

Healthcare Delivery Assets

 GAAP Balance Sheet
 Statutory Balance Sheet

 Assets Not Net Admitted

 Assets Admitted
 Assets

 Fixed assets
 250,000
 Fixed assets
 250,000
 175,000
 75,000

- GAAP does not distinguish between health care delivery assets and other assets.
- GAAP requires that health care delivery assets be depreciated over est. useful lives.
- SAP requires that assets not used in the direct delivery of care be nonadmitted.
- SAP requires that all health care delivery assets be depreciated over their useful lives but no more than three years.

Other Assets

GAAP Balance Sheet

Statutory Balance Sheet

Assets Not Net Admitted
Assets Admitted Assets
Other assets 45,000 Other assets 15,000 15,000

GAAP does not require assets to be classified between "Other Invested Assets" and "Other Assets". SAP requires certain assets (e.g., transportation equipment, mineral rights, certain fixed or variable interest rate investments, etc.) to be recorded as "Other Invested Assets" separately from "Other Assets".

A & H Premiums Due and Unpaid

GAAP Balance Sheet		Statutory Balance Sheet			
			Assets	Assets Not Admitted	Net Admitted Assets
Premiums receivable and agents' balances	55,000	Accident and health premiums due and unpaid	55,000	5,000	50,000

- GAAP requires receivables for premiums and agents' balances to be reported net of any allowance for doubtful accounts.
- The allowance method is not used for SAP purposes. Rather, under SSAP No. 6 companies are required to nonadmit any receivable balances greater than 90 days past due. (Again, exception exists in SSAP No. 84 for government insured plans.)

GAAP Balance Sheet		Statutory Balance Sheet				
				Assets Not	Net Admitted	
			Assets	Admitted	Assets	
Health care receivables	250,000	Health care receivables	250,000	150,000	100.000	

- GAAP does not distinguish between different types of health care receivables.
- GAAP only requires receivables to be reported net of any allowance for doubtful accounts.
- SSAP No. 84 provides a listing of those health care receivables that might be considered an admitted asset.
- The allowance method is not used for SAP purposes. Rather, the admissibility rules in SSAP No. 84 must be followed.

GAAP vs. SAP

Liabilities

P & C Reserves

GAAP Balance Sheet

Statutory Balance Sheet

Reserve for property-liability claims

800,000

Reserve for property-liability claims

,

900.000

- Management's best estimate of the liability
- Generally allows discounting of this liability
- Requires recording of the minimum point in a range as its liability when all points are equally probable

- Management's best estimate of the liability
- Generally does <u>not</u> allow discounting of this liability
- Requires recording of the <u>mid-point</u> in a range as its liability when all points are equally probable

A & H Reserves

GAAP Balance Sheet

Statutory Balance Sheet

Reserve for A&H claims

900,000

Reserve for A&H claims

900,000

- Management's best estimate of the liability
- Generally allows discounting of this liability
- Requires recording of the <u>minimum</u> point in a range as its liability when all points are equally probable

- Management's best estimate of the liability
- Generally does <u>not</u> allow discounting of this liability
- Requires recording of the midpoint in a range as its liability when all points are equally probable

GAAP Balance Sheet

Unearned premiums

250,000

Unearned premiums

Advance premiums

240,000

- FAS 60 only allows premiums to be recognized on a prorata basis (daily pro-rata or monthly pro-rata). This results in the recording of an unearned premium liability for the portion of premium received but <u>not yet earned</u>.
- SSAP No. 53 also only allows premiums to be recognized on a pro-rata basis (daily pro-rata or monthly pro-rata).
- SSAP No. 54 requires premiums to be recognized when due.

SSAP No. 10 - Income Taxes

- Temporary difference a difference between the tax basis of an asset or liability and its book amount that will result in taxable or deductible amounts in future years
- Deferred tax asset an item was taken as a deduction for financial reporting before the deduction was allowed on the tax return; or an item of income was included in the tax return before it was income for financial reporting
- Deferred tax liability an item was taken as a deduction on the tax return before the deduction was allowed for financial reporting purposes; or item of income was included for financial reporting before it was included as income on the tax return
- Deferred tax provision the deferred tax provision is determined by comparing the beginning deferred tax accrual amount to the computation of the year-end deferred tax accrual amount

Changes in Deferred Income Taxes

Surplus:

- Change in accounting principle;
- Change in deferred taxes;
- Unrealized Net Gain/Loss; and/or
- Change in non-admitted assets.

Deferred Income Taxes

GAAP Balance Sheet

Statutory Balance Sheet

Deferred income taxes

15,000

Deferred income taxes

5,000

- GAAP requires
 DTAs/DTLs to be
 recorded for temporary
 differences between
 GAAP book income and
 taxable income.
- GAAP does not limit DTAs (or DTLs).

- SSAP No. 10 requires DTAs/ DTLs to be recorded for temporary differences between SAP book income and taxable income.
- Net DTAs limited by an admissibility test; no limit on net DTLs

Other Liabilities

GAAP Balance Sheet

Statutory Balance Sheet

Other liabilities 30,000 Other liabilities 10,000

Note:

In the case of Burning Down the House, the GAAP liability is \$20,000 higher because Burning Down the House has one negative cash account with a balance of \$20,000.

- GAAP records "other liabilities" when the liability:
 (1) is probable; and
 (2) can be reasonably estimated.
- When both criteria are met, the liability is required to be recorded.
- SAP requires other liabilities to be recorded and presented consistent with GAAP.

GAAP Balance Sheet

Statutory Balance Sheet

Long-term debt 100,000 Borrowed money 25,000

- GAAP requires L/T debt to be recorded as a separate liability on the balance sheet. GAAP generally does not allow debt to be used as an offset against the related asset acquired with the debt.
- SAP allows certain debt to be used as an offset to the related asset for which the debt was obtained.
- SAP No. 41 allows reporting entities to issue instruments with characteristics of both debt and equity, referred to as surplus notes. These are reported in surplus.

Burning Down the House

Under SAP, \$25,000 of long-term debt (i.e., Borrowed Money) is used to offset the related real estate investment. Rather than presenting the \$25,000 as a separate liability, the real estate investment is reduced by \$25,000 which explains the difference between the GAAP and SAP balances for real estate of \$50,000 and \$25,000, respectively.

Long-term Debt, continued

- The remaining difference between the GAAP and SAP long-term debt balances is the \$50,000 that is recorded as surplus notes in the "Surplus" section of the SAP financial statements.
- Note: SAP balances of \$25,000 (included as offset to real estate asset), \$50,000 (included as surplus notes) and the \$25,000 of borrowed money equals the GAAP long-term debt balance of \$100,000.

Surplus

GAAP Balance Sheet		Statutory Balance Sheet		
Common stock	12,000	Common stock	12,000	
Additional paid in capital	100,000	Additional paid in capital	100,000	
Retained earnings	675,000	Unassigned funds (surplus)	216,000	
Accumulated other		Surplus notes	50,000	

208,000

GAAP recognizes stockholders' equity adjusted for net income within R/E.

comprehensive income

- GAAP requires recognition of "Other Comprehensive Income" (OCI).
- GAAP requires surplus notes issued by the company (which is similar to debt) to be reported as long-term debt.
- Unassigned funds include the cumulative effect of net income, unrealized gains and losses, exchange rate fluctuations, nonadmitted assets, provision for reinsurance, asset valuation reserve, and changes in DTAs and DTLs.
- No OCI
- SSAP No. 41 allows surplus notes to be reflected in surplus.

Final Thoughts

- GAAP and SAP have fundamentally different approaches.
- Although SAP reviews and uses some of the GAAP pronouncements, the objectives are different.
