Re: Basel III Capital Proposals

Ladies and Gentlemen:

Thank you for the opportunity to provide comment on the Basel III proposals that were recently issued for public comment by the Federal Reserve Board, the Office of the Comptroller of the Currency, and the Federal Deposit Insurance Corporation.

I would ask the community banks be allowed to continue using the current Basel I system to compute our capital requirements. Basel III was designed to apply to the largest banks, not community banks. The community banks did not engage in the highly leveraged activities that depleted capital and caused the problems in the financial markets.

Inclusion of accumulated other comprehensive income (AOCI) in capital for community banks will result in increased volatility in regulatory capital balances and could rapidly deplete capital levels under certain economic conditions. AOCI for most community banks represents unrealized gains and losses on investment securities held available-for-sale. Because these securities are held at fair value, any gains or losses due to changes in interest rates are captured in the valuation. Recently, both short-term and long-term interest rates have fallen to historic lows generating unprecedented unrealized gains for most investment securities. Additionally, demand for many implicitly and explicitly government guaranteed securities has risen due to a flight to safety and government intervention in the capital markets. Interest rates have fallen to levels that are unsustainable long-term once an economic recovery accelerates. As interest rates rise, fair values will fall causing the balance of AOCI to decline and become negative. This decline will have a direct, immediate impact on common equity, tier 1, and total capital as the unrealized losses will reduce capital balances.

Implementation of the capital conservation buffers for community banks will be difficult to achieve under the proposal and therefore should not be implemented. Many community banks will need to build additional capital balances to meet the minimum capital requirements with the buffers in place. Community banks do not have ready access to capital that the larger banks have through the capital markets. The only way for community banks to increase capital is through the accumulation of retained earnings over time. Due to the current ultra low interest rate environment, community bank profitability has diminished further hampering their ability to grow capital. If the regulators are unwilling to exempt community banks from the capital conservation buffers, additional time should be allotted (at least five years beyond 2019) in order for those banks that need the additional capital to retain and accumulate earnings accordingly.

We object to the proposed ten year phase-out of the tier one treatment of instruments like trust preferred securities (TRUPS) because it is reliable source of capital for community banks that would be very difficult to replace. We believe it was the intent of the Collins amendment of the Dodd-Frank Act to permanently grandfather tier one treatment of TRUPS issued by bank holding companies between $500 million and $15 billion. Phasing out this important source of capital would be a particular burden for many privately-held banks and bank holding companies that are facing greatly reduced alternatives in raising capital. While we applaud the fact that TRUPS issued by bank holding companies under $500 million would not be impacted by the proposal, consistent with the Collins Amendment, we urge the banking regulators to continue the current tier one treatment of TRUPS issued by those bank holding companies with consolidated assets between $500 million and $15 billion in assets.

Penalizing the existing mortgage servicing assets under the proposal is unreasonable for those banks that have large portfolios of mortgage servicing rights. Any mortgage servicing rights existing on community bank balance sheets should be allowed to continue to follow the current risk weight and deduction methodologies.

Sincerely,

Jane C. Showers
Executive Vice President
Chief Financial Officer
