Re: Basel III Capital Proposals

Ladies and Gentlemen:

Thank you for the opportunity to provide comment on the Basel III proposals^[1] that were recently issued for public comment by the Federal Reserve Board, the Office of the Comptroller of the Currency, and the Federal Deposit Insurance Corporation.

Community banks should be allowed to continue using the current Basel I framework for computing their capital requirements. Basel III was designed to apply to the largest, internationally active, banks and not community banks. Community banks did not engage in the highly leveraged activities that severely depleted capital levels of the largest banks and created panic in the financial markets. Community banks operate on a relationship-based business model that is specifically designed to serve customers in their respective communities on a long-term basis. This model contributes to the success of community banks all over the United States through practical, common sense approaches to managing risk.

The proposed risk weight framework under Basel III is too complicated and will be an onerous regulatory burden that will penalize community banks and jeopardize the housing recovery. Increasing the risk weights for second liens will penalize community banks who offer these loan products to their customers and deprive customers of many financing options for residential property. Many community banks will either exit the residential loan market entirely or only originate those loans that can be sold to a GSE. Second liens will either become more expensive for borrowers or disappear altogether as banks will choose not to allocate additional capital to these balance sheet exposures. Community banks should be allowed to stay with the current Basel I risk weight framework for residential loans. Furthermore, community banks will be forced to make significant software upgrades and incur other operational costs to track mortgage loan-to-value ratios in order to determine the proper risk weight categories for mortgages.

Thank you for your consideration.
