Subject: [EXTERNAL MESSAGE] RIN 3064-Za32

To the FDIC:

I am writing regarding the FDIC's request for comment on its statement of principles for climate-related financial risk management for large financial institutions. I fully support additional disclosures, rules, etc, to address climate related financial risk management, with appropriate adjustments for bank size.

Community banks should not be exempt from this; they are subject to the same climate as everyone else, and should not be allowed to pretend the issue does not exist.

I am disappointed the ICBA is encouraging bankers to tell the FDIC 'this proposal should never apply to community banks.' Climate change affects everyone.

Thank you.
Tina Wilkinson
